- B. Assign a Microsoft Teams Rooms Pro license to the phone
- C. Assign a Shared Device license to the phone
- D. Create and assign an Audio Conferencing policy
- E. Enable the Cloud Video Interop for Teams service

Answer: BD

Explanation:

B: Teams Rooms license service plan comparison

The following table shows the services included in each Teams Rooms license.

| | Microsoft Teams Rooms Basic | Microsoft Teams Rooms Pro |
|--|-----------------------------|---------------------------|
| Maximum number of licenses | 25 | Unlimited |
| Microsoft Teams | ✓ | ✓ |
| Audio Conferencing ¹ | ✓ | ✓ |
| Whiteboard | ✓ | ✓ |
| Teams Phone | | ✓ |
| Microsoft Intune ² | | ✓ |
| Azure Active Directory Premium Plan 1 | | ✓ |
| Skype for Business Plan 2 ³ | | ✓ |

Note: Microsoft Teams Rooms licenses

Microsoft offers two licenses for Teams Rooms systems that participate in Teams meetings and calls: Microsoft Teams Rooms Pro delivers enhanced in-room meeting experiences like intelligent audio and video, front row and large galleries, and dual screen support. The Teams Rooms Pro license also provides advanced management features like remote device management, conditional access policies, and detailed device analytics.

Teams Rooms Pro is a great fit for medium and enterprise organizations, as well as smaller organizations with larger room counts or more advanced needs.

Teams Rooms Pro licenses can be used to license both certified Teams Rooms systems and Teams Panels.

Microsoft Teams Rooms Basic provides core meeting experiences to organizations that purchase a certified Microsoft Teams Rooms system, at no additional cost.

The Teams Rooms Basic license includes scheduling, joining meetings, content sharing, and collaborative white boarding, as well as basic security and management capabilities out-of-the-box.

Incorrect: Not C:

Microsoft Teams Shared Devices licenses aren't supported on and won't work with Teams Rooms devices. Teams Rooms devices should only be assigned Teams Rooms Basic or Teams Rooms Pro licenses.

Not E: Cloud Video Interop (CVI) is a Microsoft Qualified third-party solution that enables third-party meeting rooms (telepresence) and personal video devices

(VTCs) to join Microsoft Teams meetings.

With Microsoft Teams, you get rich online content collaboration in meetings that include audio, video, and content sharing.

NEW QUESTION 69

- (Exam Topic 3)

You have a Microsoft Teams Phone deployment. You have a call queue named Customer Service.

You need to ensure that when the agents of Customer Service make calls, the outbound calling name appears as Contoso, and the caller ID shows the phone number of Customer Service. Other users must NOT be affected.

Which three actions should you perform? Each correct answer presents a part of the solution. NOTE: Each correct selection is worth one point.

- A. From the Microsoft Teams admin center configure a new caller ID policy
- B. Set Calling Party Name to the organization name.
- C. From the Microsoft Teams admin center, modify the global (Org-wide default) caller ID policy.
- D. Set Replace the caller ID with to Resource account
- E. Set Override the caller ID policy to On.

Answer: ADE

Explanation:

You can manage caller ID policies by going to Voice > Caller ID policies in the Microsoft Teams admin center. You can use the global (Org-wide default) policy or create and assign custom policies. Users in your organization automatically get the global policy unless you create and assign a custom policy.

Create a custom caller ID policy

- In the left navigation of the Microsoft Teams admin center, go to Voice > Caller ID policies. (A)
- Select Add.
- Enter a name and description for the policy.
- Turn on or off Block incoming caller ID and Override the caller ID policy. (E)
- Enter a Calling Party Name.
- Under Replace the caller ID with, set which caller ID is displayed for users by selecting one of the following: (D)

User's number: Display the user's number. Anonymous: Display the caller ID as Anonymous.

Resource account: Set a resource account associated with an Auto Attendant or Call Queue.

If you choose Resource account, you're prompted to specify a resource account for the next field, called Replace the caller ID with this resource account. Only resource accounts with an assigned phone number will be displayed. If you just assigned a phone number to the resource account, it may take a few minutes before the resource account is available for selection.

- B. Not Mastered

Answer: A

Explanation:

Box 1: Grant-CsDialoutPolicy

Least bad option perhaps, but it does not seem to be a good answer.

* Grant-CsDialoutPolicy

Use the Grant-CsDialoutPolicy cmdlet to assign the tenant global, a group of users, or a per-user outbound calling restriction policy to one or more users.

Syntax

Grant-CsDialoutPolicy [[-Identity] <string>]

[[[-PolicyName] <string>] [-PassThru]

[-WhatIf] [-Confirm]

[<CommonParameters>]

Note: Set-CsUserCallingSettings would be a good answer, but it is not an option.

This cmdlet will set the call forwarding, simultaneous ringing and call group settings for the specified user.

-UnansweredTargetType

The unanswered target type. Supported values are Voicemail, SingleTarget, MyDelegates and Group.

SingleTarget is used when forwarding the unanswered call to another user or phone number. MyDelegates is used when forwarding the unanswered call to the users's delegates. Group is used when forwarding the unanswered call to the specified user's call group.

Box 2: -UnansweredTargetType Incorrect:

* Grant-CsIPPhonePolicy, Skype for Business Server 2019

Use the Grant-CsIPPhonePolicy cmdlet to assign an Internet Protocol (IP) phone policy to a user or a group of users. IP phone policies determine the features of Microsoft Teams, Skype for Business Online, or Skype for Business Server 2019 that are available to users. For example, you might enable the Better Together Over Ethernet feature for some users while disabling it for others.

Syntax

Grant-CsIPPhonePolicy, Skype for Business Server 2019 [[-Identity] <UserIdParameter>]

[-PolicyName] <String> [-Tenant <Guid>]

[-DomainController <Fqdn>] [-PassThru]

[-WhatIf] [-Confirm]

[<CommonParameters>]

* Grant-CsOnlineVoiceRoutingPolicy

Assigns a per-user online voice routing policy to one user, a group of users, or sets the Global policy instance. Online voice routing policies manage online PSTN usages for Phone System users.

Syntax

Grant-CsOnlineVoiceRoutingPolicy [[-Identity] <string>]

[[[-PolicyName] <string>]

[-PassThru] [-WhatIf]

[-Confirm] [<CommonParameters>]

* Set-CsOnlineAudioConferencingRoutingPolicy Reference:

NEW QUESTION 97

- (Exam Topic 3)

You have a Microsoft Teams Phone deployment that contains two users named User1 and User2. User1 will be on leave for two weeks.

You need to redirect all calls to the phone number of User1 to the phone number of User2. The solution must minimize administrative effort.

What should you modify for User1?

- A. the voicemail transfer target settings
- B. the call delay and order settings
- C. the call delegation settings
- D. the phone number type

Answer: C

Explanation:

Use the Teams admin center

You can use the Teams admin center to configure call forward and unanswered settings, group call pickup, and call delegation for your users.

To configure immediate call forward settings:

- In the Teams admin center, go to Users > Manage users and select a user.
- On the user details page, go to the Voice tab.
- Under Call answering rules, select Be immediately forwarded, and select the appropriate call forward type and destination.

To configure simultaneous ringing, on the same page select Ring the user's devices. In the Also allow drop-down, select the appropriate simultaneous ringing setting.

To configure unanswered settings, on the same page select the appropriate setting in the If unanswered drop-down. In the Ring for this many seconds before redirecting drop-down, specify the number of seconds to wait.

The configuration of call delegation and group call pickup are integrated into the call forward and unanswered settings by selecting the appropriate type. For example, to configure that calls should also ring the user's delegates, on the same page select Call delegation under Also allow. Then add the appropriate delegates by selecting Add people and clicking Save.

Event organizers can invite others to the event and grant them one of two roles: Producer or Presenter. Both roles have different access and responsibilities for the Live Event. You can have multiple producers and presenters (up to 250, though only the last 10 who have spoken will appear in the producer view list).

Producers have access and control over nearly all settings and details for an event. However, especially in larger Live Events, a producer tends to have the more supportive role of managing which video feeds, shared screens, or other content is presented in the event.

Consider limiting the number of producers for your event. Not only is the producer interface more complex than the presenter's, but having more producers than needed can make coordination more difficult.
