

# Exam Questions MS-100

Microsoft 365 Identity and Services

<https://www.2passeasy.com/dumps/MS-100/>

### NEW QUESTION 1

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@LODSe426243.onmicrosoft.com Microsoft 365 Password: 3&YWyjse-6-d

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 10887751

You hire a new Microsoft 365 administrator named Nestor Wilke. Nestor Wilke will begin working for your organization in several days.

You need to ensure that Nestor Wilke is prevented from using his account until he begins working.

A. Mastered

B. Not Mastered

**Answer: A**

#### Explanation:

You need to sign-in status for the account to 'Blocked'. Blocking doesn't stop the account from receiving email and it doesn't delete any data.

\* 1. On the home page of the Microsoft 365 admin center, type the user's name into the Search box.

\* 2. Select the Nestor Wilke account in the search results.

\* 3. In the 'Sign-in status' section of the account properties, click the Edit link.

\* 4. Select 'Block the user from signing in' and click the Save button.

### NEW QUESTION 2

- (Exam Topic 5)

You have a Microsoft 365 subscription that contains the users shown in the following table.

Name	Group
User1	Group1
User2	Group1, Group2

You have the named locations shown in the following table.

Named location	IP range
Montreal	133.107.0.0/16
Toronto	193.77.10.0/24

You create a conditional access policy that has the following configurations:

Users and groups:

➤ Include: Group1

➤ Exclude: Group2

Cloud apps: Include all cloud apps

Conditions:

➤ Include: Any location

➤ Exclude: Montreal

Access control: Grant access, Require multi-factor authentication User1 is on the multi-factor authentication (MFA) blocked users list.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can access Microsoft Office 365 from a device that has an IP address of 133.107.10.20.	<input type="radio"/>	<input type="radio"/>
User1 can access Microsoft Office 365 from a device that has an IP address of 193.77.10.15.	<input type="radio"/>	<input type="radio"/>
User2 can access Microsoft Office 365 from a device that has an IP address of 193.77.10.20.	<input type="radio"/>	<input type="radio"/>

A. Mastered

B. Not Mastered

Answer: A

#### Explanation:

The Blocked User list is used to block specific users from being able to receive Multi-Factor Authentication requests. Any authentication attempts for blocked users are automatically denied. Users remain blocked for 90 days from the time that they are blocked.

Box 1: Yes

\* 133.107.10.20 is in the Montreal named location. The conditional access policy excludes Montreal so the policy does not apply. Therefore, User1 can access Microsoft Office 365.

Box 2: No

\* 193.77.10.15 is in the Toronto named location. The conditional access policy applies to Group1 which User1 is a member of and all locations except for Montreal. Therefore, the conditional access policy applies in this case. The policy requires MFA but User1 is on the MFA blocked list so he is unable to use MFA. Therefore, User1 cannot access Microsoft 365.

Box 3: Yes

User2 is in Group1 and Group2. The conditional access policy applies to Group1 but excludes Group2.

Therefore, the conditional access policy does not apply in this case so User2 can access Microsoft Office 365. Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-mfa-mfasettings>

#### NEW QUESTION 3

- (Exam Topic 5)

You have the Microsoft Azure Active Directory (Azure AD) users shown in the following table.

Name	Member of
User1	Group1
User2	Group2

Your company uses Microsoft Intune.

Several devices are enrolled in Intune as shown in the following table.

Name	Platform	BitLocker Drive Encryption	Member of
Device1	Windows 10	Disabled	Group3
Device2	Windows 10	Disabled	Group4

The device compliance policies in Intune are configured as shown in the following table.

Name	Require BitLocker	Assigned to
Policy1	Not configured	Group3
Policy2	Require	Group4

You create a conditional access policy that has the following settings:

➤ The Assignments settings are configured as follows:

- Users and groups: Group1
- Cloud apps: Exchange Online
- Conditions: Include All device state, exclude Device marked as compliant

➤ Access controls is set to Block access.

For each of the following statements, select yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can access Microsoft Exchange Online from Device1.	<input type="radio"/>	<input type="radio"/>
User1 can access Microsoft Exchange Online from Device2.	<input type="radio"/>	<input type="radio"/>
User2 can access Microsoft Exchange Online from Device2.	<input type="radio"/>	<input type="radio"/>

A. Mastered

B. Not Mastered

Answer: A

#### Explanation:

Box 1:

Yes. User1 is in Group1. The Conditional Access Policy applies to Group1. The Conditional Access Policy blocks access unless the device is marked as compliant.

BitLocker is disabled for Device1. Device1 is in Group3 which is assigned device Policy1. The BitLocker policy in Policy1 is 'not configured' so BitLocker is not required.

Therefore, Device1 is compliant so User1 can access Exchange online from Device1. Box 2:

No. User1 is in Group1. The Conditional Access Policy applies to Group1. The Conditional Access Policy blocks access unless the device is marked as compliant.

BitLocker is disabled for Device2. Device2 is in Group4 which is assigned device Policy2. The BitLocker policy in Policy2 is 'Required so BitLocker is required.

Therefore, Device2 is not compliant so User1 cannot access Exchange online from Device2. Box3:

Yes. User2 is in Group2. The Conditional Access Policy applies to Group1. The Conditional Access Policy does not apply to Group2. So even though Device2 is non-compliant, User2 can access Exchange Online using Device2 because there is no Conditional Access Policy preventing him/her from doing so.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/conditions>

#### NEW QUESTION 4

- (Exam Topic 5)

Your company has a Microsoft 365 subscription.

You need to identify all the users in the subscription who are licensed for Microsoft Office 365 through a group membership. The solution must include the name of the group used to assign the license.

What should you use?

- A. the Licenses blade in the Azure portal
- B. Reports in the Microsoft 365 admin center
- C. Active users in the Microsoft 365 admin center
- D. Report in Security & Compliance

**Answer:** A

#### Explanation:

In the Azure AD Admin Center, select Azure Active Directory then select Licenses to open the Licenses blade. From there you need to click on the 'Managed your purchased licenses link'. Select a license you want to view, for example Office 365 E3. This will then display a list of all users with that license. In the 'Assignment Paths' column, it will say 'Direct' for a license that has been assigned directly to a user or 'Inherited (Group Name)' for a license that has been assigned through a group.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/licensing-groups-assign>

#### NEW QUESTION 5

- (Exam Topic 5)

You are developing an interactive invoicing application that will be used by end users. The application will have the following features:

- Save invoices generated by a user to the user's OneDrive for Business.
- Email daily automated reminders.

You need to identify which permissions to grant for the application features. The solution must use the principle of least privilege. Which permission type should you grant for each feature? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Save invoices:	
<input type="checkbox"/>	Administrator
<input type="checkbox"/>	Application
<input type="checkbox"/>	Delegated
<input type="checkbox"/>	Super User

Send automated reminders:	
<input type="checkbox"/>	Administrator
<input type="checkbox"/>	Application
<input type="checkbox"/>	Delegated
<input type="checkbox"/>	Super User

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

**Answer Area**

Save invoices:	
<input type="checkbox"/>	Administrator
<input type="checkbox"/>	Application
<input checked="" type="checkbox"/>	Delegated
<input type="checkbox"/>	Super User

Send automated reminders:	
<input checked="" type="checkbox"/>	Administrator
<input checked="" type="checkbox"/>	Application
<input type="checkbox"/>	Delegated
<input type="checkbox"/>	Super User

#### NEW QUESTION 6

- (Exam Topic 5)

Your company has 20 employees. Each employee has a mailbox hosted in Outlook.com. The company purchases a Microsoft 365 subscription.

You plan to migrate all the mailboxes to Microsoft 365.

You need to recommend which type of migration to use for the mailboxes. What should you recommend?

- A. Cutover migration
- B. Staged migration
- C. IMAP migration
- D. Minimal hybrid migration

**Answer:** C

**Explanation:**

To migrate mailboxes from Outlook.com to Office 365, you need to use the IMAP migration method.

After you've added your users to Office 365, you can use Internet Message Access Protocol (IMAP) to migrate email for those users from their IMAP-enabled email servers.

In the Microsoft 365 admin center, go to Setup

>Data migration

to start migrating IMAP enabled emails.

The email migrations page is pre-configured for migrations from Gmail, Outlook, Hotmail and Yahoo. You can also enter your own IMAP server name and connection parameters to migrate from an email service that is not listed.

References:

<https://docs.microsoft.com/en-us/exchange/mailbox-migration/migrating-imap-mailboxes/imap-migration-in-the>

**NEW QUESTION 7**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.

Your company has a main office and three branch offices. All the branch offices connect to the main office by using a WAN link. The main office has a high-speed Internet connection. All the branch offices connect to the Internet by using the main office connection.

Users use Microsoft Outlook 2016 to connect to 4 Microsoft Exchange Server mailbox hosted in the main office.

The users report that when the WAN link in their office becomes unavailable, they cannot access their mailbox.

You create a Microsoft 365 subscription, and then migrate all the user data to Microsoft 365.

You need to ensure that all the users can continue to use Outlook to receive email messages if a WAN link fails.

Solution: You deploy a site-to-site VPN from each branch office to Microsoft Azure. Does this meet the goal?

- A. Yes
- B. NO

**Answer:** B

**NEW QUESTION 8**

- (Exam Topic 5)

You have a Microsoft 365 subscription.

You suspect that several Microsoft Office 365 applications or services were recently updated. You need to identify which applications or services were recently updated.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. From the Microsoft 365 admin center, review the Message center blade.
- B. From the Office 365 Admin mobile app, review the messages.
- C. From the Microsoft 365 admin center, review the Products blade.
- D. From the Microsoft 365 admin center, review the Service health blade.

**Answer:** AB

**Explanation:**

The Message center in the Microsoft 365 admin center is where you would go to view a list of the features that were recently updated in the tenant. This is where Microsoft posts official messages with information including new and changed features, planned maintenance, or other important announcements.

The messages displayed in the Message center can also be viewed by using the Office 365 Admin mobile app. Reference:

<https://docs.microsoft.com/en-us/office365/admin/manage/message-center?view=o365-worldwide>

<https://docs.microsoft.com/en-us/office365/admin/admin-overview/admin-mobile-app?view=o365-worldwide>

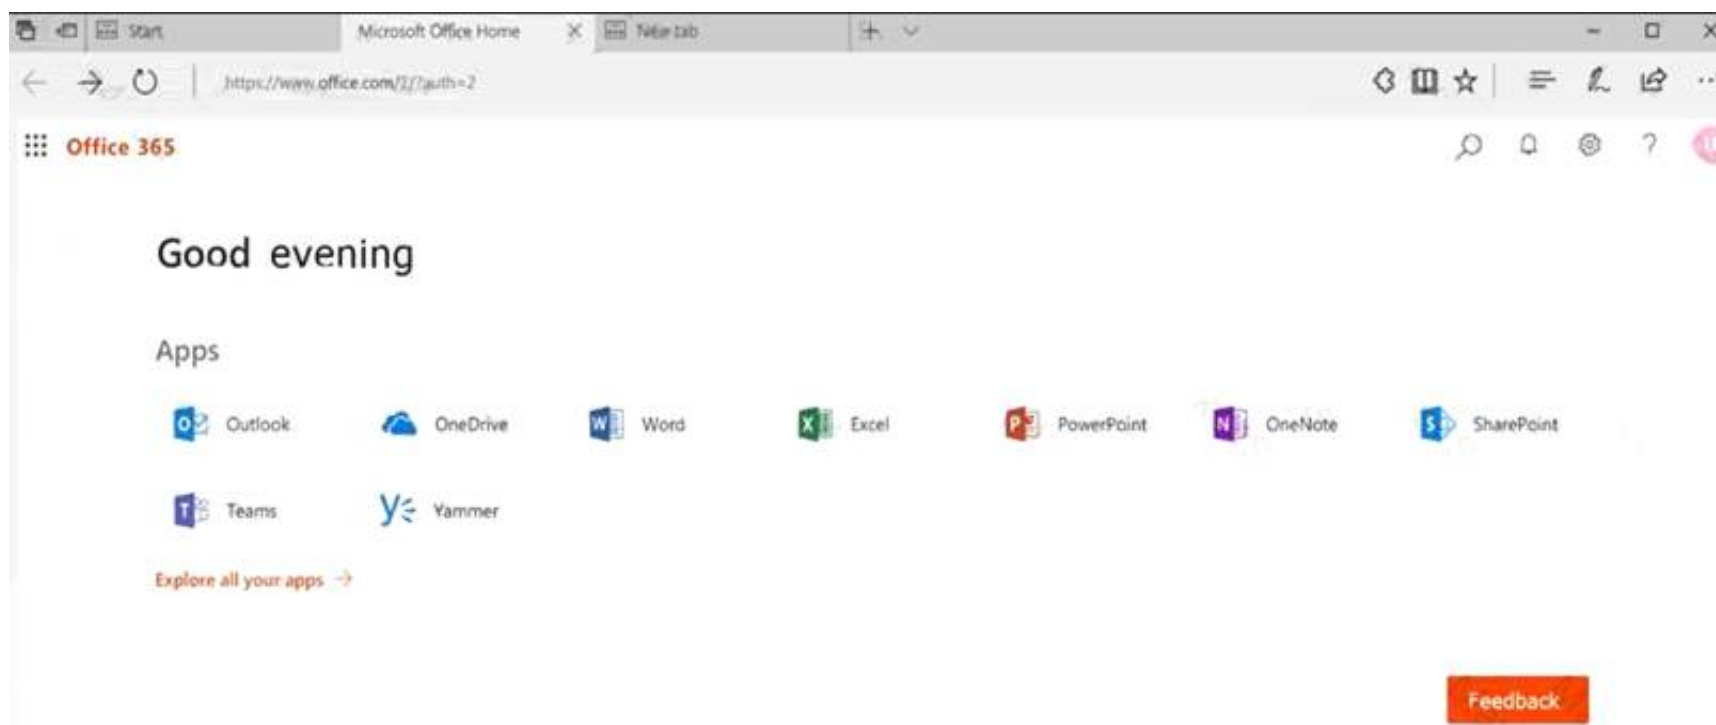

**NEW QUESTION 9**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription.

All users are assigned a license to Microsoft 365 Apps for enterprise.

The users report that they do not have the option to install Microsoft 365 apps on their device as shown in the following exhibit.

You need to ensure that the users can install Microsoft 365 apps from the Office 365 portal. What should you do?

- A. From the Microsoft 365 admin center, modify the user license settings.
- B. From the Microsoft Endpoint Manager admin center, create a Microsoft 365 Apps app and assign the app to the devices.
- C. From the Microsoft Endpoint Manager admin center, create a Microsoft 365 Apps app and assign the app to the users.
- D. From the Microsoft 365 admin center, modify the Services & add-ins settings.

**Answer: D**

#### NEW QUESTION 10

- (Exam Topic 5)

Your company has 10,000 users who access all applications from an on-premises data center. You plan to create a Microsoft 365 subscription and to migrate data to the cloud.

You plan to implement directory synchronization.

User account and group accounts must sync to Microsoft Azure Directory (Azure AD) successfully. You discover that several user accounts fail to sync to Azure AD.

You need to identify which user accounts failed to sync. You must resolve the issue as quickly as possible. What should you do?

- A. From Active Directory Administrative Center, search for all the users, and then modify the properties of the user accounts.
- B. Run idfix.exe, and then click Complete.
- C. From Windows PowerShell, run the Start-AdSyncSyncCycle -PolicyType Delta command.
- D. Run idfix.exe, and then click Edit.

**Answer: D**

#### Explanation:

IdFix is used to perform discovery and remediation of identity objects and their attributes in an on-premises Active Directory environment in preparation for migration to Azure Active Directory. IdFix is intended for the Active Directory administrators responsible for directory synchronization with Azure Active Directory. Reference:

<https://docs.microsoft.com/en-us/office365/enterprise/prepare-directory-attributes-for-synch-with-idfix> <https://www.microsoft.com/en-gb/download/details.aspx?id=36832>

#### NEW QUESTION 10

- (Exam Topic 5)

You have a Microsoft 365 subscription linked to an Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.

In the subscription, an administrator adds two custom domains named sub1.contoso.onmicrosoft.com and sub2.contoso.onmicrosoft.com and the objects shown in the following table.

Name	Type	Attribute
Group1	Distribution group	Group email: group1@sub1.contoso.onmicrosoft.com
Group2	Mail-enabled security group	Group email: group2@sub2.contoso.onmicrosoft.com
Group3	Office 365 group	Group email: group3@contoso.onmicrosoft.com
User1	User	Username: user1@sub1.contoso.onmicrosoft.com
Contact2	Contact	Email: contact2@sub2.contoso.onmicrosoft.com

You plan to delete sub1.contoso.onmicrosoft.com and sub2.contoso.onmicrosoft.com.

Which objects must you delete or modify manually before you can delete the domains? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Sub1.contoso.onmicrosoft.com:

User1 only
Group1 only
User1 and Group1 only
User1, Group1, and Group3
No resources must be deleted or modified

Sub2.contoso.onmicrosoft.com:

Contact2 only
Group2 only
Contact2 and Group2 only
Contact2, Group2, and Group3
No resources must be deleted or modified

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Anything with an email address in the subdomain needs to be removed or moved to another domain. This includes users, mail-enabled security groups, distribution groups and contacts. Office 365 groups will also need to be removed from the subdomains (they cannot be moved to another domain). However, the only Office 365 group in this question is in the parent domain, not the subdomains.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/admin/get-help-with-domains/remove-a-domain?view=o365-wo>

**NEW QUESTION 11**

- (Exam Topic 5)

Your company uses on-premises Windows Server File Classification Infrastructure (FCI). Some documents on the on-premises file servers are classified as Confidential.

You migrate the files from the on-premises file servers to Microsoft SharePoint Online.

You need to ensure that you can implement data loss prevention (DLP) policies for the uploaded files based on the Confidential classification.

What should you do first?

- A. From the SharePoint admin center, create a managed property.
- B. From the SharePoint admin center, configure hybrid search.
- C. From the Security & Compliance Center PowerShell, run the New-DlpComplianceRule cmdlet.
- D. From the Security & Compliance Center PowerShell, run the New-DataClassification cmdlet.

**Answer:** A

**Explanation:**

Your organization might use Windows Server FCI to identify documents with personally identifiable information (PII) such as social security numbers, and then classify the document by setting the Personally Identifiable Information property to High, Moderate, Low, Public, or Not PII based on the type and number of occurrences of PII found in the document. In Office 365, you can create a DLP policy that identifies documents that have that property set to specific values, such as High and Medium, and then takes an action such as blocking access to those files.

Before you can use a Windows Server FCI property or other property in a DLP policy, you need to create a managed property in the SharePoint admin center.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/protect-documents-that-have-fci-or-other-properties>

**NEW QUESTION 12**

- (Exam Topic 5)

You have a SharePoint Framework (SPFx) web part that displays the weather. Users can set the city within the web part. Which component is invoked to provide the users with the ability to configure the settings for the web part?

- A. a custom control
- B. the Application Customizer
- C. a library component
- D. the property pane

**Answer:** D

**NEW QUESTION 14**

- (Exam Topic 5)

You are confirming an enterprise application named Test App in Microsoft Azure as shown in the following exhibit.

**Test Application**  
 Click here to verify application configuration.

**Basic Settings**

Internal Uri **i**  ☒

External Uri **i**

Pre Authentication **i**

Connector Group **i**

**Additional Settings**

Backend Application Timeout **i**

Use HTTP-Only Cookie **i**

Translate URLs In Headers **i**

Application Body **i**

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
 NOTE: Each correct selection is worth one point.

**Answer Area**

To ensure that when users access TestApp, the proxy automatically scans for internal URLs published through the Application Proxy, set [answer choice]

To protect TestApp from Cross-Site Scripting (XSS), set [answer choice]

Use HTTP-Only Cookie to Yes  
 Translate URLs in Headers to No  
 Translate URLs in Application Body to Yes

Use HTTP-Only Cookie to Yes  
 Translate URLs in Headers to No  
 Translate URLs in Application Body to Yes

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

**Answer Area**

To ensure that when users access TestApp, the proxy automatically scans for internal URLs published through the Application Proxy, set [answer choice]

To protect TestApp from Cross-Site Scripting (XSS), set [answer choice]

Use HTTP-Only Cookie to Yes  
 Translate URLs in Headers to No  
 Translate URLs in Application Body to Yes

Use HTTP-Only Cookie to Yes  
 Translate URLs in Headers to No  
 Translate URLs in Application Body to Yes

## NEW QUESTION 16

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains 1,000 Windows 10 devices. You perform a proof of concept (PoC) deployment of Windows Defender Advanced Threat Protection (ATP) for 10 test devices. During the onboarding process, you configure Windows Defender ATP-related data to be stored in the United States. You plan to onboard all the devices to Windows Defender ATP data in Europe. What should you do first?

- A. Create a workspace
- B. Offboard the test devices
- C. Delete the workspace
- D. Onboard a new device

Answer: B

Explanation:

When onboarding Windows Defender ATP for the first time, you can choose to store your data in Microsoft Azure datacenters in the European Union, the United Kingdom, or the United States. Once configured, you cannot change the location where your data is stored.

The only way to change the location is to offboard the test devices then onboard them again with the new location.

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/data-storage-privac>

## NEW QUESTION 19

- (Exam Topic 5)

You have a Microsoft 365 tenant that contains the users shown in the following table.

Name	Email address
User1	User1@contoso.com
User2	User2@contoso.com
User3	User3@contoso.com

Microsoft Exchange Online has the mail flow rules shown in the following table

Name	Priority
Rule1	0
Rule2	1
Rule3	2

Rule1 has the following settings:

Answer Area

Statements	Yes	No
If User1 sends an email to User3, User3 receives the email.	<input type="radio"/>	<input type="radio"/>
If User1 sends an email, a disclaimer is added to the email.	<input type="radio"/>	<input type="radio"/>
If an email is sent to User2, two disclaimers are added to the email.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
If User1 sends an email to User3, User3 receives the email.	<input type="radio"/>	<input checked="" type="radio"/>
If User1 sends an email, a disclaimer is added to the email.	<input checked="" type="radio"/>	<input type="radio"/>
If an email is sent to User2, two disclaimers are added to the email.	<input checked="" type="radio"/>	<input type="radio"/>

## NEW QUESTION 22

- (Exam Topic 5)

You have a Microsoft 365 Enterprise E5 subscription.

You need to enforce multi-factor authentication on all cloud-based applications for the users in the finance department.

What should you do?

- A. Create an activity policy.  
B. Create a new app registration.  
C. Create a conditional access policy.  
D. Create a session policy.

Answer: C

Explanation:

You can configure a conditional access policy that applies to the Finance department users. The policy can be configured to 'Allow access' but with multi-factor authentication as a requirement.

The reference below explains how to create a conditional access policy that requires MFA for all users. To apply the policy to finance users only, you would select Users and Group in the Include section instead of All Users and then specify the finance department group.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/howto-conditional-access-policy-all>

## NEW QUESTION 24

- (Exam Topic 5)

Your network contains an Active Directory domain named adatum.com that is synced to Microsoft Azure Active Directory (Azure AD).

The domain contains 100 user accounts.

The city attribute for all the users is set to the city where the user resides.

You need to modify the value of the city attribute to the three-letter airport code of each city. What should you do?

- A. From Active Directory Administrative Center, select the Active Directory users, and then modify the Properties settings.  
B. From the Microsoft 365 admin center, select the users, and then use the Bulk actions option.

- C. From Azure Cloud Shell, run the Get-MsolUser and Set-MSOLuser cmdlets.  
D. From Windows PowerShell on a domain controller, run the Get-AzureADUser and Set-AzureADUser cmdlets.

**Answer:** A

**Explanation:**

The user accounts are synced from the on-premise Active Directory to the Microsoft Azure Active Directory (Azure AD). Therefore, the city attribute must be changed in the on-premise Active Directory.

You can modify certain attributes of multiple user accounts simultaneously by selecting them in Active Directory Administrative Center or Active Directory Users and Computers, right clicking then selecting Properties.

The other three options all suggest modifying the city attribute of the users in the Azure Active Directory which is incorrect.

Reference:

<https://blogs.technet.microsoft.com/canitpro/2015/11/25/step-by-step-managing-multiple-user-accounts-via-acti>

**NEW QUESTION 25**

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

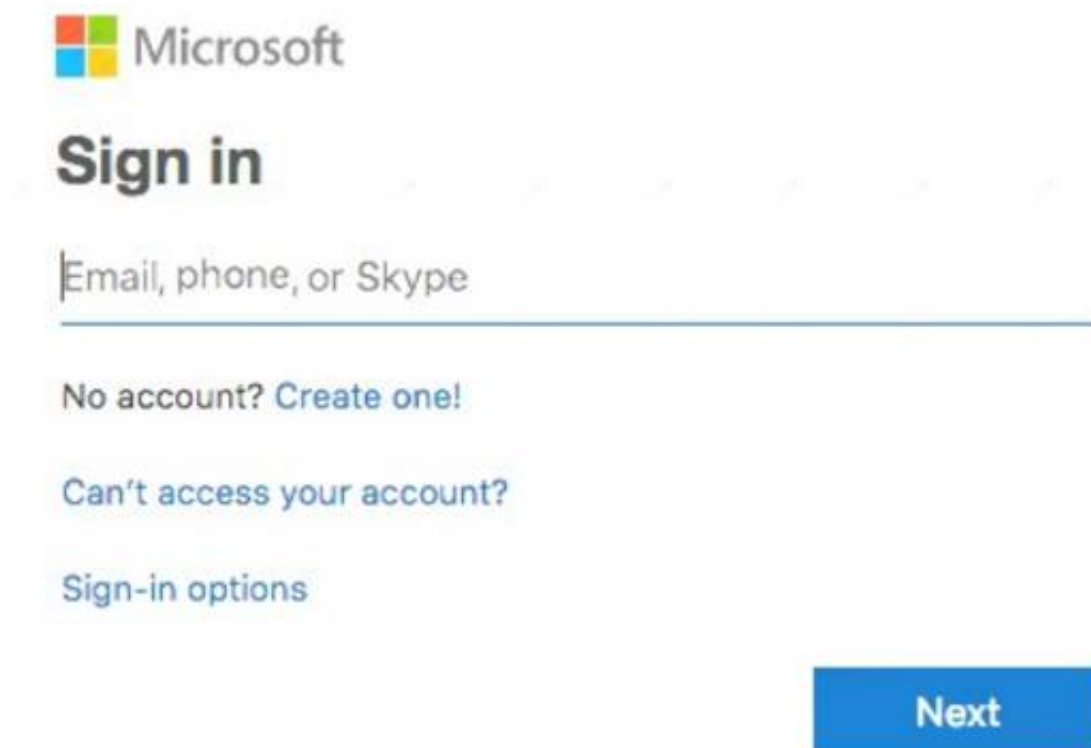

Microsoft 365 Username: admin@LODSe878763.onmicrosoft.com

Microsoft 365 Password: m3t^We\$Z7&xy

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 11440873

You need to ensure that all the users in your organization are prompted to change their password every 60 days. The solution must ensure that the users are reminded that their password must be changed 10 days before the required change.

To answer, sign in to the Microsoft 365 portal.

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

You need to configure the Password Expiration Policy.

- \* 1. Sign in to the Microsoft 365 Admin Center.
- \* 2. In the left navigation pane, expand the Settings section then select the Settings option.
- \* 3. Click on Security and Privacy.
- \* 4. Select the Password Expiration Policy.
- \* 5. Ensure that the checkbox labelled "Set user passwords to expire after a number of days" is ticked.
- \* 6. Enter 60 in the "Days before passwords expire" field.
- \* 7. Enter 10 in the "Days before a user is notified about expiration" field.
- \* 8. Click the 'Save changes' button.

**NEW QUESTION 26**

- (Exam Topic 5)

You plan to migrate to SharePoint Online by using the SharePoint Migration Tool. Which list can be migrated to SharePoint Online?

Name	List template
List1	PictureLibrary
List2	Report Library
List3	Agenda
List4	AdminTasks

- A. List1
- B. List2
- C. List3
- D. List4

**Answer:** D

### NEW QUESTION 30

- (Exam Topic 5)

Your company has a Microsoft 365 subscription.

You plan to move several archived PST files to Microsoft Exchange Online mailboxes. You need to create an import job for the PST files.

Which three actions should you perform before you create the import job? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a Microsoft Azure Storage account.
- B. From Microsoft 365 Security & Compliance, retrieve the SAS key.
- C. Run azcopy.exe to copy the PST files to Microsoft Azure Storage
- D. Use Microsoft Azure Storage Explorer to copy the PST files to Azure Storage.
- E. Create a PST import mapping file.

**Answer:** BCE

#### Explanation:

The first step is to download and install the Azure AzCopy tool, which is the tool that you run in Step 2 to upload PST files to Office 365. You also copy the SAS URL for your organization. This URL is a combination of the network URL for the Azure Storage location in the Microsoft cloud for your organization and a Shared Access Signature (SAS) key. This key provides you with the necessary permissions to upload PST files to your Azure Storage location.

Now you're ready to use the AzCopy.exe tool to upload PST files to Office 365. This tool uploads and stores them in an Azure Storage location in the Microsoft cloud.

After the PST files have been uploaded to the Azure Storage location for your Office 365 organization, the next step is to create a comma-separated value (CSV) file that specifies which user mailboxes the PST files will be imported to. You'll submit this CSV file when you create a PST Import job.

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/use-network-upload-to-import-pst-files>

### NEW QUESTION 35

- (Exam Topic 5)

You have a hybrid deployment of Microsoft 365 that contains the users shown in the following table.

Name	Member of
User1	Group2
User2	Group1, Group2
User3	Group1

You have an on-premises web app named AppA. Group1 has permissions to access AppA. You configure an Azure Active Directory (Azure AD) Application Proxy. You add an Application Proxy entry for AppA as shown the exhibit. (Click the Exhibit tab.)

Add your own on-premises application

+ Add

X Discard

Application proxy provides single sign-on (SSO) and secure remote access for web applications hosted on-premises. [Learn more about Application Proxy](#)

No

Application Body

Yes

No

You assign the AppA enterprise application in Azure to Group2.  
For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can access AppA by using the external URL.	<input type="radio"/>	<input type="radio"/>
User2 can access AppA in the My Apps portal.	<input type="radio"/>	<input type="radio"/>
User3 can access AppA by using the external URL.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Box 1: No  
User1 is in Group2. The enterprise app is assigned to Group2. However, the authentication method is “Passthrough” so the authentication will be passed to the on-premises web app. Only Group1 has access to the web app. Therefore, User1 will not be able to access the web app.  
Box 2: Yes.  
User2 is in Group1 and Group2. The enterprise app is assigned to Group2. The authentication method is “Passthrough” so the authentication will be passed to the on-premises web app. Group1 has access to the web app. Therefore, User2 will be able to access the web app in MyApps.  
Box 3: No  
User3 is in Group1. Group1 has access to the web app so User3 could access the app on-premises. However, the enterprise app is assigned to Group2 which User3 is not a member of. Therefore, User3 will not be able to access the external URL of the web app.

NEW QUESTION 36

- (Exam Topic 5)  
You are developing a new Microsoft Teams app that will contain the following functionality:

- Start a new chat
- Prompt users to install an app.
- Make a Microsoft Graph API call.
- Trigger a search-based command.

Which two functionalities can be implemented by using a deep link? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point

- A. Prompt users to install an app.

- B. Trigger a search-based command.  
C. Start a new chat  
D. Make a Microsoft Graph API call.

Answer: AC

NEW QUESTION 38

- (Exam Topic 5)

You have a Microsoft 365 subscription you use Active Directory (Azure AD) tenant named contoso.com. The tenant contains the Windows 10 devices shown in the following table.

Name	Version	Language
Device1	x86	German
Device2	x64	English
Device3	x64	French

All the devices are managed by using Microsoft Endpoint Manager and are members of a group named Group1. From the Microsoft Endpoint Manager admin center, you create an app suite named App1 for Microsoft Office 365 apps. You configure the App1 settings as shown in the exhibit. (Click the Exhibit tab.)

App Suite Settings

Languages ⓘ

German, OS Languages

You assign App1 to Group1.  
For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
Note: Each correct selection is worth one point.

Statements	Yes	No
On Device1, Office 365 ProPlus will be installed and the display language will be German.	<input type="radio"/>	<input type="radio"/>
On Device2, Office 365 ProPlus will be installed and both the German and English display languages will be installed.	<input type="radio"/>	<input type="radio"/>
On Device3, Office 365 ProPlus will be installed and both the German and French display languages will be installed.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

Answer: A

**Explanation:**

Box 1: No

Device1 is x86 (32-bit) so Office 365 will not be installed. Box 2: Yes

Device2 is x64 (64-bit) so Office 365 will be installed. The German language pack will be installed and the OS language pack (English) will be installed.

Box 3: Yes

Device2 is x64 (64-bit) so Office 365 will be installed. The German language pack will be installed and the OS language pack (French) will be installed.

**NEW QUESTION 39**

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live

environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

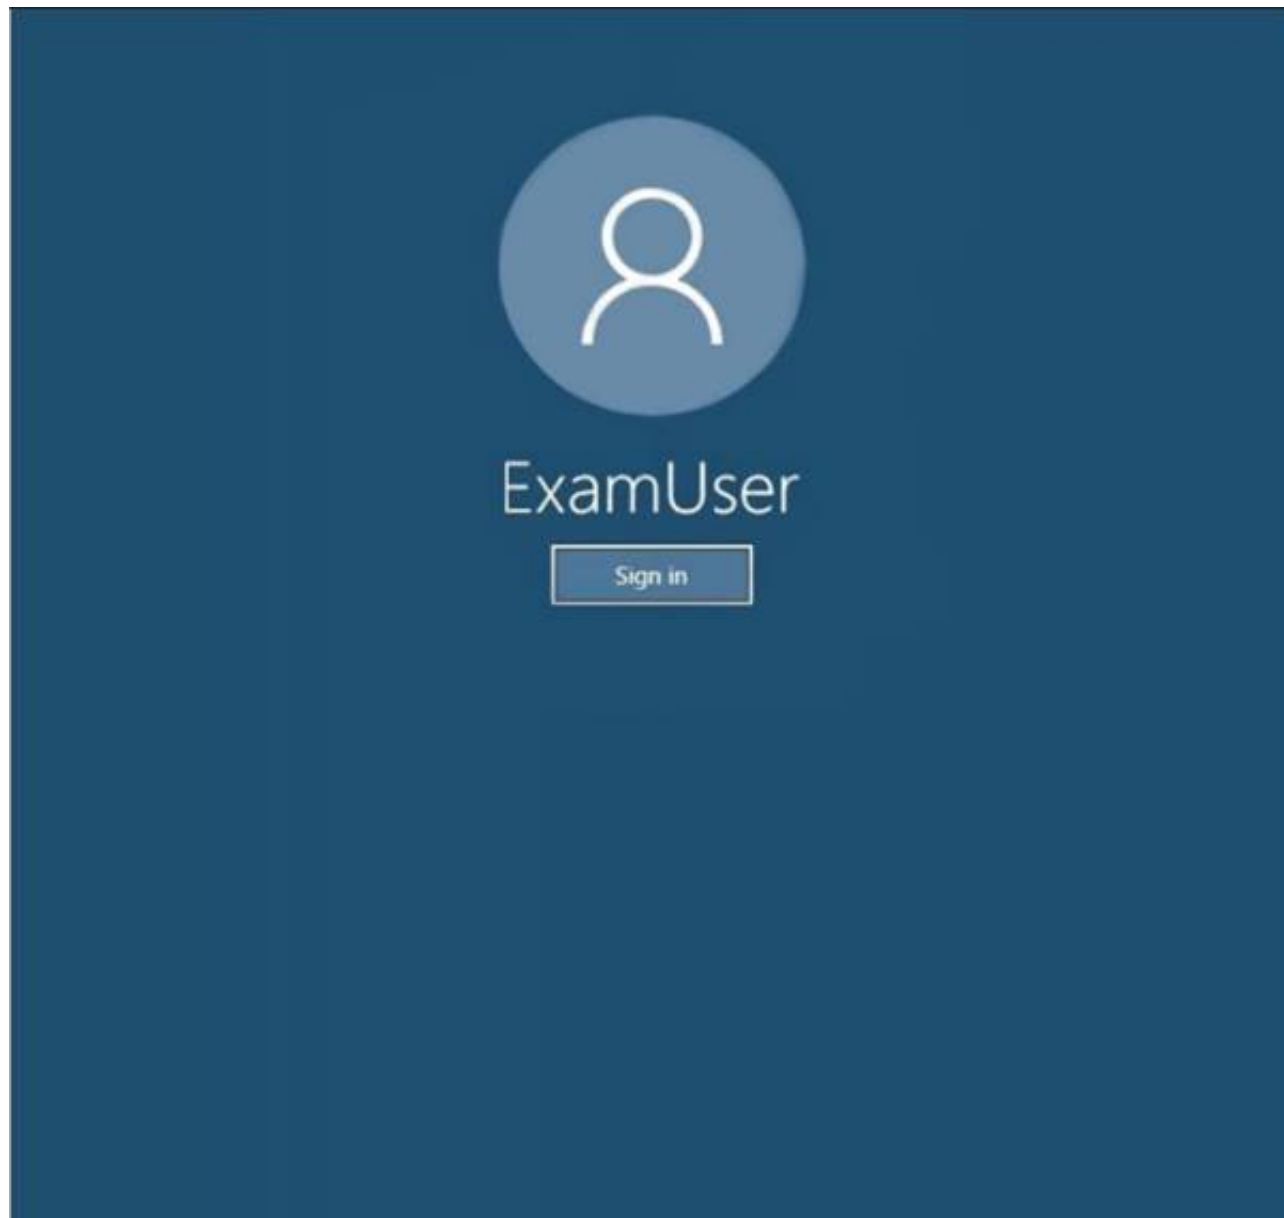

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@LODSe1211885.onmicrosoft.com Microsoft 365 Password: oL9z0=?Nq@ox

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 11098651

You need to ensure that all the users in your organization are prompted to change their password every 180 days. To answer the question, sign in to the Microsoft 365 portal.

A. Mastered

B. Not Mastered

**Answer: A**

**Explanation:**

You need to configure the Password Expiration Policy.

\* 1. Sign in to the Microsoft 365 Admin Center.

\* 2. In the left navigation pane, expand the Settings section then select the Settings option.

\* 3. Click on Security and Privacy.

\* 4. Select the Password Expiration Policy.

\* 5. Ensure that the checkbox labelled "Set user passwords to expire after a number of days" is ticked.

\* 6. Enter 180 in the "Days before passwords expire" field.

\* 7. Click the 'Save changes' button.

#### NEW QUESTION 40

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@LODSe878763.onmicrosoft.com

Microsoft 365 Password: m3t^We\$Z7&xy

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 11440873

You need to ensure that when Lynne Robbins attempts to sign in to the Microsoft Office 365 portal, Lynne Robbins is prompted to authenticate by using multiple methods.

To answer, sign in to the Microsoft 365 portal.

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

You need to enable Multi-Factor Authentication for Lynne Robbins.

- \* 1. Sign in to the Microsoft 365 Admin Center.
- \* 2. In the left navigation pane, expand the Users section and select Active Users.
- \* 3. Click the 'Multi-factor authentication' link.
- \* 4. Select Lynne Robbins.
- \* 5. In the right navigation pane, select the 'Enable' link to enable MFA for the account.
- \* 6. Confirm the setting by clicking the 'Enable multi-factor authentication' button.
- \* 7. Click the Close button to close the confirmation window.

#### NEW QUESTION 45

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain.

You deploy a Microsoft Azure Active Directory (Azure AD) tenant. Another administrator configures the domain to synchronize to Azure AD.

You discover that 10 user accounts in an organizational unit (OU) are NOT synchronized to Azure AD. All the other user accounts synchronized successfully.

You review Azure AD Connect Health and discover that all the user account synchronizations completed successfully.

You need to ensure that the 10 user accounts are synchronized to Azure AD. Solution: You run idfix.exe and report the 10 user accounts.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

#### Explanation:

The question states that "all the user account synchronizations completed successfully". If there were problems with the 10 accounts that needed fixing with

idfix.exe, there would have been synchronization errors in Azure AD Connect Health.  
 It is likely that the 10 user accounts are being excluded from the synchronization cycle by a filtering rule. Reference:  
<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sync-configure-filtering>

#### NEW QUESTION 50

- (Exam Topic 5)

Your company has three main offices and one branch office. The branch office is used for research. The company plans to implement a Microsoft 365 tenant and to deploy multi-factor authentication.

You need to recommend a Microsoft 365 solution to ensure that multi-factor authentication is enforced only for users in the branch office

What should you include in the recommendation?

- A. Azure AD password protection
- B. a Microsoft Endpoint Manager Device compliance policy
- C. Azure AD conditional access
- D. a Microsoft Endpoint Manager Device configuration profile

**Answer:** B

#### NEW QUESTION 53

- (Exam Topic 5)

Your network contains an on premises Active Directory domain named contoso.com. The domain contains five domain controllers.

Your company purchases Microsoft 365 and creates a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.

You plan to establish federation authentication between on premises Active Directory and the Azure AD tenant by using Active Directory Federation Services (AD FS).

You need to establish the federation.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point

Action to perform before establishing the federation:

From the Azure portal, add a custom domain name.
From the Azure portal, configure an authentication method.
From a domain controller, install a Pass-through Authentication Agent.
From a domain controller, install Windows Identity Foundation 3.5.

Tool to use to establish the federation:

Active Directory Domains and Trusts
Azure AD Connect
The AD FS console
The Azure portal

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

The on-premises Active Directory domain is named contoso.com. Before you can configure federation authentication between on-premises Active Directory and the Azure AD tenant, you need to add the domain contoso.com to Microsoft 365. You do this by adding a custom domain name.

The next step is to establish the federation. You can configure AD FS by using Azure AD Connect. Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-install-custom#configuring-feder>

#### NEW QUESTION 56

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain. The domain contains 2,000 computers that run Windows 10.

You purchase a Microsoft 365 subscription.

You implement password hash synchronization and Azure Active Directory (Azure AD) Seamless Single Sign-On (Seamless SSO).

You need to ensure that users can use Seamless SSO from the Windows 10 computers. What should you do?

- A. Create a conditional access policy in Azure AD.
- B. Deploy an Azure AD Connect staging server.
- C. Join the computers to Azure AD.
- D. Modify the Intranet zone settings by using Group Policy

**Answer:** D

#### Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sso-quick-start>

#### NEW QUESTION 60

- (Exam Topic 5)

You plan to create a single-tenant console app that will use the Microsoft identity platform.

You need to ensure that the app can use the device code flow to access Microsoft Graph and read email on behalf of the authenticated user.

Which three actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Set Supported account types to Accounts In this organizational directory only
- B. Generate a client secret for the app
- C. Set Supported account types to Accounts in any organizational directory
- D. Enable the Default client type option.
- E. Add redirect URIs.
- F. From the Expose an API settings, create a custom scope.

**Answer:** BCE

#### NEW QUESTION 65

- (Exam Topic 5)

Your network contains an Active Directory domain. The domain contains a server named Server1 that runs Windows Server 2016. Server1 has a share named Share1. You have a hybrid deployment of Microsoft 365. You need to migrate the content in Share1 to Microsoft OneDrive. What should you use?

- A. Windows Server Migration Tools
- B. Microsoft SharePoint Migration Tool
- C. Storage Migration Service

**Answer:** B

#### Explanation:

Reference:

<https://docs.microsoft.com/en-us/sharepointmigration/migrating-content-to-onedrive-for-business>

#### NEW QUESTION 68

- (Exam Topic 5)

You have a Microsoft Azure Active Directory (Azure AD) tenant that contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2
User3	Group3

Your company uses Windows Defender Advanced Threat Protection (ATP). Windows Defender ATP contains the roles shown in the following table.

Name	Permission	Assigner user group
Windows Defender ATP administrator (default)	View data, Alerts investigation, Active remediation actions, Manage security settings	Group3
Role1	View data, Alerts investigation	Group1
Role2	View data	Group2

Windows Defender ATP contains the device groups shown in the following table.

Rank	Machine group	Machine	User access
1	ATP1	Device1	Group1
Last	Ungrouped machines (default)	Device2	Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

#### Statements

Yes

No

User1 can view Device1 in Windows Defender Security Center.

☐
☐

User2 can sign in to Windows Defender Security Center.

☐
☐

User3 can view Device1 in Windows Defender Security Center.

☐
☐

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

Box 1:

Yes. User1 is in Group1 which is assigned to Role1. Device1 is in the device group named ATP1 which Group1 has access to. Role1 gives Group1 (and User1)

View Data Permission. This is enough to view Device1 in Windows Security Center.

Box 2:

Yes. User2 is in Group2 which is assigned to Role2. Role2 gives Group2 (and User2) View Data Permission. This is enough to sign in to Windows Security Center.

Box 3:

Yes. User3 is in Group3 which is assigned the Windows ATP Administrator role. Someone with a Microsoft Defender ATP Global administrator role has unrestricted access to all machines, regardless of their machine group association and the Azure AD user groups assignments.

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/user-roles> <https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/rbac>

## NEW QUESTION 71

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@LODSe426243.onmicrosoft.com Microsoft 365 Password: 3&YWyjse-6-d

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 10887751

You plan to create 1,000 users in your Microsoft 365 subscription.

You need to ensure that all the users can use the @contoso.com suffix in their username.

Another administrator will perform the required information to your DNS zone to complete the operation.

A. Mastered

B. Not Mastered

**Answer: A**

### Explanation:

You need to add the contoso.com domain to Microsoft 365 then set the domain as the default.

\* 1. In the Admin Center, click Setup then click Domains.

\* 2. Click the 'Add Domain' button.

\* 3. Type in the domain name (contoso.com) and click the 'Use this domain' button.

\* 4. The question states that another administrator will perform the required information to your DNS zone. Therefore, you just need to click the 'Verify' button to verify domain ownership.

\* 5. Click Finish.

\* 6. In the domains list, select the contoso.com domain.

\* 7. Select 'Set as default'. References:

<https://docs.microsoft.com/en-us/office365/admin/setup/add-domain?view=o365-worldwide>

## NEW QUESTION 72

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Your organization plans to start a new collaborative project that will contain email and chat communications, as well as regular meetings. You need to create a team in Microsoft Teams for the planned project. The team must have the following configurations:

- > Be named Project1.
- > Have an owner named Lee Gu.
- > Have a channel named Channel1.

To answer, sign in to the Microsoft 365 portal.

- A. Mastered
- B. Not Mastered

**Answer:** A

### Explanation:

You need to create a team. You can create a team in the Microsoft Teams Admin Center or in the Microsoft Teams app. However, to be able to specify the team owner when creating the team, you need to use the Teams Admin Center.

- \* 1. Go to the Microsoft Teams Admin Center.
- \* 2. In the left navigation pane, expand the Teams section and select 'Manage Teams'.
- \* 3. Click the '+ Add' link to add a new team.
- \* 4. Give the team the name Project1.
- \* 5. In the Team Owner field, remove your name which is there by default and add Lee Gu.
- \* 6. Click the 'Create a team' button to create the team.
- \* 7. In the teams list, select the Project1 team.
- \* 8. Click on 'Channels'.
- \* 9. Click the '+ Add' link to add a new channel.
- \* 10. Give the channel the name Channel1.
- \* 11. Click the Apply button to create the channel.

### NEW QUESTION 77

- (Exam Topic 5)

You are developing an app that will query the tenant for the names of all the Microsoft Teams teams in the organization. What permission will the app require? Your solution must follow the principle of least privilege.

- A. Grou
- B. Rea
- C. All
- D. Directory.Read.All
- E. Channel.ReadBasic.All
- F. TeamSettings.Read.All

**Answer:** D

### NEW QUESTION 82

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@M365x981607.onmicrosoft.com Microsoft 365 Password: \*yfLo7lr2&y  
If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.  
The following information is for technical support purposes only:  
Lab Instance: 10811525  
Your organization recently partnered with another organization named Fabrikam, Inc.  
You plan to provide a Microsoft 365 license to an external user named user1@fabrikam.com, and then to share documents with the user.  
You need to invite user1@fabrikam.com to access your organization.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

You need to create a guest account for user1.  
\* 1. Go to the Azure Active Directory admin center.  
\* 2. Select Users.  
\* 3. Click the 'New guest user' link.  
\* 4. Select the 'Invite user' option.  
\* 5. Give the account a name (User1) and enter user1@fabrikam.com in the email address field.  
\* 6. Click the 'Invite' button. References:  
https://docs.microsoft.com/en-us/azure/active-directory/b2b/b2b-quickstart-add-guest-users-portal

NEW QUESTION 84

- (Exam Topic 5)  
Your network contains an on-premises Active Directory domain. The domain contains the users shown in the following table.

Name	Country	Organizational unit (OU)
User1	United States	OU1
User2	Canada	OU1
User3	United States	OU2

You have a Microsoft 365 subscription that is linked to an Azure Active Directory (Azure AD) tenant named contoso.com. You configure Azure AD Connect to sync the on-premises domain to contoso.com as shown in the following exhibit.

Answer Area

Statements	Yes	No
User1 syncs to Azure AD.	<input type="radio"/>	<input type="radio"/>
User2 syncs to Azure AD.	<input type="radio"/>	<input type="radio"/>
User3 syncs to Azure AD.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User1 syncs to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>
User2 syncs to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>
User3 syncs to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 88

- (Exam Topic 5)  
Your network contains an Active Directory forest named local.  
You have a Microsoft 365 subscription. You plan to implement a directory synchronization solution that will use password hash synchronization.  
From the Microsoft 365 admin center, you verify the contoso.com domain name. You need to prepare the environment for the planned directory synchronization solution.  
What should you do first?

- A. From the public DNS zone of contoso.com, add a new mail exchanger (MX) record.
- B. From Active Directory Domains and Trusts, add contoso.com as a UPN suffix
- C. From the Microsoft 365 admin center, verify the contoso.com domain name.
- D. From Active Directory Users and Computers, modify the UPN suffix for all users.

**Answer:** B

**Explanation:**

The on-premise Active Directory domain is named contoso.local. Therefore, all the domain users accounts will have a UPN suffix of contoso.local by default. To enable directory synchronization that will use password hash synchronization, you need to configure the domain user accounts to have the same UPN suffix as the verified domain (contoso.com in this case). Before you can change the UPN suffix of the domain user accounts to contoso.com, you need to add contoso.com as a UPN suffix in the domain.

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/plan-connect-userprincipalname>

**NEW QUESTION 91**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company plans to deploy several Microsoft Office 365 services.

You need to design an authentication strategy for the planned deployment. The solution must meet the following requirements:

- \* Users must be able to authenticate during business hours only.
- \* Authentication requests must be processed successfully if a single server fails.
- \* When the password for an on-premises user account expires, the new password must be enforced the next time the user signs in.
- \* Users who connect to Office 365 services from domain-joined devices that are connected to the internal network must be signed in automatically.

Solution: You design an authentication strategy that uses password hash synchronization and seamless SSO. The solution contains two servers that have an Authentication Agent installed.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure/security/azure-ad-choose-authn>

**NEW QUESTION 96**

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@LODSe426243.onmicrosoft.com Microsoft 365 Password: 3&YWYjse-6-d

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 10887751

Your company has a web application named App1.

The company plans to publish App1 by using a URL of <https://app1.contoso.com>. You need to register App1 to your Microsoft Office 365 tenant.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

You need to register App1 in Azure Active Directory.

- \* 1. Go to the Azure Active Directory admin center.
- \* 2. Select Azure Active Directory.
- \* 3. Select 'App registrations'.
- \* 4. Click the 'New registration' link.
- \* 5. Enter the name App1.
- \* 6. Click the Register button.
- \* 7. To add the URL to App1, select App1 in the list of registered apps.
- \* 8. In the properties page of App1, select Branding.
- \* 9. Enter the URL <https://app1.contoso.com> in the 'Home page URL' box.
- \* 10. Click Save to save the changes. References:

<https://docs.microsoft.com/en-us/azure/active-directory/develop/quickstart-register-app>

#### NEW QUESTION 101

- (Exam Topic 5)

You are developing a new application named App1 that uses the Microsoft identity platform to authenticate to Azure Active Directory (Azure AD).

Currently, App1 can read user profile information. You need to allow App1 to read the user's calendar.

Solution: From the Azure portal, edit the API permission list for App1. Add the Microsoft Graph API and the Calendars-Read permissions and then grant tenant admin consent.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

#### NEW QUESTION 102

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription and a hybrid deployment of Microsoft Exchange. The deployment contains 100 users who have on-premises mailboxes and 100 users who have mailboxes in Exchange Online.

You enable Microsoft Teams and assign a Microsoft Teams license to each user.

You need to ensure that the users who have on-premises mailboxes can use Microsoft Teams. All Microsoft Teams chat data must be searchable by using Content search in the Security and Compliance admin center.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

License to assign to the users who have on-premises mailboxes:

- ☐ Data Investigations
- ☐ Exchange Online
- ☐ Microsoft Communications Compliance

Task to perform to enable Content search for the on-premises mailboxes:

- ☐ Add an email alias
- ☐ Create a supervision policy
- ☐ Enable a Unified Messaging (UM) IP gateway
- ☐ Submit a request to Microsoft Support

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

License to assign to the users who have on-premises mailboxes:

- ☒ Data Investigations
- ☒ Exchange Online
- ☐ Microsoft Communications Compliance

Task to perform to enable Content search for the on-premises mailboxes:

- ☒ Add an email alias
- ☐ Create a supervision policy
- ☐ Enable a Unified Messaging (UM) IP gateway
- ☐ Submit a request to Microsoft Support

#### NEW QUESTION 106

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab.

Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@LODSe878763.onmicrosoft.com

Microsoft 365 Password: m3t^We\$Z7&xy

Your organization recently purchased a projector that can be moved easily between conference rooms. You need to ensure that any user in the organization can add the projector to a Microsoft Outlook meeting request. The solution must ensure that a user named Lee Gu must approve all meeting requests. To answer, sign in to the Microsoft 365 portal.

- A. Mastered
- B. Not Mastered

**Answer: A**

### Explanation:

You need to create a resource mailbox in Exchange.

- \* 1. Go to the Exchange Admin Center.
- \* 2. In the left navigation pane, select Recipients.
- \* 3. Click the Resources link.
- \* 4. Click the plus (+) icon and select 'Equipment Mailbox'.
- \* 5. Give the mailbox a name such as 'Projector1'.
- \* 6. Enter the name projector1 in the email address field.
- \* 7. Click the Save button to create the equipment mailbox.
- \* 8. In the resource mailbox list, select the new mailbox and click the Edit icon (pencil icon).
- \* 9. Select 'Booking Delegates' in the menu list.
- \* 10. Select the option, "Select delegates who can accept or decline booking requests".
- \* 11. Click the plus (+) icon and add Lee Gu as a delegate.
- \* 12. Click the Save button to save the changes.

### NEW QUESTION 111

- (Exam Topic 5)

You have a Microsoft Teams app that contains a conversational bot. The bot uses task modules to reply to users. When the bot receives a new message, the following code is executed before a response is sent back to the user to decide whether the bot should continue the conversation.

```

80 case "task/submit": {
81     if (invokeValue.data !== undefined) {
82         switch (invokeValue.data.taskResponse) {
83             case "message":
84                 session.send(`task/submit results from the Adaptive card: ${JSON.stringify(invokeValue)} + `);
85                 break;
86             case "continue":
87                 let fetchResponse = fetchTemplates.submitResponse;
88                 fetchResponse.task.value.card = renderAttachment(cardTemplates.acSubmitResponse, { results: JSON.stringify(invokeValue.data) });
89                 cb(null, fetchResponse, 200);
90                 break;

```

Answer Area

If invokeValue.data.taskResponse equals "message", the user will [answer choice]

stop interacting with the bot.  
continue interacting with the bot.  
receive a webpage pop-up window.  
receive a final message from the bot.

These are the selections for the statement If invokeValue.data.taskResponse equals "message", the user will [answer choice]

If invokeValue.data.taskResponse equals "final", the user will [answer choice]

stop interacting with the bot.  
continue interacting with the bot.  
receive a webpage pop-up window.  
receive a final message from the bot.

These are the selections for the statement If invokeValue.data.taskResponse equals "final", the user will [answer choice]

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:  
https://github.com/OfficeDev/microsoft-teams-sample-task-module-nodejs

NEW QUESTION 113

- (Exam Topic 5)  
You have Microsoft 365 tenant that contains a Microsoft Power Platform environment named Environment1 (default). Environment1 contains a Microsoft Dataverse database.  
In the tenant, you create a user named User1. You assign a Microsoft Power Apps license to User1. Which security role for Environment1 is assigned automatically to User1?

- A. Environment maker
- B. System customizer
- C. Delegate
- D. System customizer

Answer: B

Explanation:

Reference:  
https://docs.microsoft.com/en-us/power-platform/admin/database-security#predefined-security-roles

NEW QUESTION 116

- (Exam Topic 5)  
Your network contains an Active Directory domain named fabrikam.com. The domain contains the objects shown in the following table.

Name	Type	In organizational unit (OU)
User1	User	OU1
User2	User	OU1
Group1	Security Group - Global	OU1
User3	User	OU2
Group2	Security Group - Global	OU2

The group have the members shown in the following table.

Group	Members
Group1	User1
Group2	User2, User3, Group1

You are configure synchronization between fabrikam.com and a Microsoft Azure Active Director (Azure AD) tenant.  
You configure the domain/OU Filtering settings in Azure AD Connect as shown in the Domain>OU Filtering exhibit. (Click the Domain/OU Filtering tab.)  
You configure the Filtering in Azure Connect as shown in the Filtering exhibit. (Click the Filtering tab.) NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User2 will synchronize to Azure AD.	<input type="radio"/>	<input type="radio"/>
Group2 will synchronize to Azure AD.	<input type="radio"/>	<input type="radio"/>
User3 will synchronize to Azure AD.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: No

The filtering is configured to synchronize Group2 and OU2 only. The effect of this is that only members of Group2 who are in OU2 will be synchronized.

User2 is in Group2. However, the User2 account object is in OU1 so User2 will not synchronize to Azure AD. Box 2: Yes

Group2 is in OU2 so Group2 will synchronize to Azure AD. However, only members of the group who are in OU2 will synchronize. Members of Group2 who are in OU1 will not synchronize.

Box 3: Yes

User3 is in Group2 and in OU2. Therefore, User3 will synchronize to Azure AD. References:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sync-configure-filtering#group-b>

**NEW QUESTION 119**

- (Exam Topic 5)

You have a Microsoft 365 subscription that uses an Azure Directory (Azure AD) tenant named Contoso.com. The tenant contains the users shown in the following table.

Name	Role
User1	Exchange administrator
User2	User administrator
User3	Global administrator
User4	None

You add another user named user5 to the User administrator role. You need to identify which management tasks User5 can perform.

Which two tasks should you identify? Each correct answer presents a complete solution.

- A. Reset the password of any user in Azure AD.
- B. Delete any user in Azure AD.
- C. Reset the password of User2 and User4 only.
- D. Reset the password of User4 only.
- E. Delete User1, User2, and User4 only.
- F. Delete User2 and User4 only.

**Answer:** CF

**Explanation:**

Users with the User Administrator role can create users and manage all aspects of users with some restrictions (see below).

Only on users who are non-admins or in any of the following limited admin roles:

- > Directory Readers
- > Guest Inviter
- > Helpdesk Administrator
- > Message Center Reader
- > Reports Reader
- > User Administrator Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/directory-assign-admin-roles#availab>

**NEW QUESTION 121**

- (Exam Topic 5)

Your company has a Microsoft 365 subscription that has multi-factor authentication configured for all users. Users on the network report that they are prompted for multi-factor authentication multiple times a day.

You need to reduce the number of times the users are prompted for multi-factor authentication on their company-owned devices.

What should you do?

- A. Enable the multi-factor authentication trusted IPs setting, and then verify each device as a trusted device.
- B. Enable the remember multi-factor authentication setting, and then verify each device as a trusted device.
- C. Enable the multi-factor authentication trusted IPs setting, and then join all client computers to Microsoft Azure Active Directory (Azure AD).
- D. Enable the remember multi-factor authentication setting, and then join all client computers to Microsoft Azure Active Directory (Azure AD).

**Answer:** B

**Explanation:**

The remember Multi-Factor Authentication feature for devices and browsers that are trusted by the user is a free feature for all Multi-Factor Authentication users.

Users can bypass subsequent verifications for a specified number of days, after they've successfully signed-in to a device by using Multi-Factor Authentication.

The feature enhances usability by minimizing the number of times a user has to perform two-step verification on the same device.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-mfa-mfasettings>

**NEW QUESTION 124**

- (Exam Topic 5)

Your company has a Microsoft 365 subscription that contains the following domains: Contoso.onmicrosoft.com

Contoso.com

You plan to add the following domains to Microsoft 365 and to use them with Exchange Online:

- > Sub1.contoso.onmicrosoft.com

- > Sub2.contoso.com
- > Fabrikam.com

You need to identify the minimum number of DNS records that must be added for Exchange Online to receive inbound email messages for the three domains. How many DNS records should you add? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

MX records:

▼
0
1
2
3

CNAME records:

▼
0
1
2
3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: 2

You don't need to verify Sub1.contoso.onmicrosoft.com because the onmicrosoft.com domain and DNS is managed by Microsoft. You also don't need to configure an MX record for Sub1.contoso.onmicrosoft.com because that will be done by Microsoft.

For sub2.contoso.com, you don't need to verify the domain because you have already verified its parent domain contoso.com. However, you do need an MX record to direct email for that domain to Exchange Online.

For Fabrikam.com, you will need to verify the domain. You will need an MX record to direct email for that domain to Exchange Online.

Box 2: 0

You 'should' create CNAME records for autodiscover to point your email clients to Exchange Online to connect to the mailboxes. However, you don't have to. You could configure the email client manually. Therefore, the minimum number of CNAME records required is zero.

NEW QUESTION 129

- (Exam Topic 5)

You have a data loss prevention (DLP) policy.

You need to increase the likelihood that the DLP policy will apply to data that contains medical terms from the International Classification of Diseases (ICD-9-CM). The solution must minimize the number of false positives.

Which two settings should you modify? To answer, select the appropriate settings in the answer area. NOTE: Each correct selection is worth one point.

Content contains \*

Any of these ▼

PII Identifiers 

Sensitive information type

	Instance count		Match accuracy	
	min	max	min	max
U.S. Social Security Number (SSN)	1	any	50	100

Add ▼

and ▼

Any of these ▼

Medical Terms 

Sensitive information type

	Instance count		Match accuracy	
	min	max	min	max
International Classification of Diseases (ICD-9-CM)	1	any	50	100

- A. Mastered  
 B. Not Mastered

**Answer:** A

**Explanation:**

You can tune your rules by adjusting the instance count and match accuracy to make it harder or easier for content to match the rules. Each sensitive information type used in a rule has both an instance count and match accuracy.

To make the rule easier to match, decrease the min count and/or increase the max count. You can also set the match accuracy to any value by deleting the numerical value.

To minimize the number of false positives, we need to increase the minimum match accuracy.

A sensitive information type is defined and detected by using a combination of different types of evidence. Commonly, a sensitive information type is defined by multiple such combinations, called patterns. A pattern that requires less evidence has a lower match accuracy (or confidence level), while a pattern that requires more evidence has a higher match accuracy (or confidence level).

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies>

<https://docs.microsoft.com/en-us/office365/securitycompliance/what-the-sensitive-information-types-look-for#i>

**NEW QUESTION 131**

- (Exam Topic 5)

Your network contains an Active Directory domain and a Microsoft Azure Active Directory (Azure AD) tenant.

The network uses a firewall that contains a list of allowed outbound domains. You began to implement directory synchronization.

You discover that the firewall configuration contains only the following domain names in the list of allowed domains:

- \*.microsoft.com
- \*.office.com

Directory synchronization fails.

You need to ensure that directory synchronization completes successfully.

What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. From the firewall, allow the IP address range of the Azure data center for outbound communication.  
 B. From Azure AD Connect, modify the Customize synchronization options task  
 C. Deploy an Azure AD Connect sync server in staging mode.  
 D. From the firewall, create a list of allowed inbound domains.  
 E. From the firewall, modify the list of allowed outbound domains.

**Answer:** E

**Explanation:**

Azure AD Connect needs to be able to connect to various Microsoft domains such as login.microsoftonline.com. Therefore, you need to modify the list of allowed outbound domains on the firewall.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/reference-connect-ports>

**NEW QUESTION 132**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

Name	Role
Admin1	Exchange Administrator
Admin2	SharePoint Administrator
Admin3	Global Reader
Admin4	Usage Summary Reports Reader

You enable Microsoft 365 usage analytics for Microsoft Power BI.

Which users can use Power BI to connect to Microsoft 365 usage analytics and review usage analytics reports?

- A. Admin3 only  
 B. Admin 1 and Admin2 only  
 C. Admin3 and Admin4 only  
 D. Admin1, Admin2, and Admin3 only  
 E. Admin1, Admin2, Admin3, and Admin4

**Answer:** A

**NEW QUESTION 134**

- (Exam Topic 5)

Your company has a sales system that emails an alert to all the members of the sales department when a new sale is made.

You need to ensure that a notification is posted to a team channel when a new sale is made. The solution must minimize development effort.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Post XML to the webhook URL from the existing sales system.  
 B. Set the configurationUrl property of a connector in the manifest  
 C. Get an incoming webhook for the channel  
 D. Post JSON to the webhook URL from the existing sales system.

Answer: AC

### NEW QUESTION 136

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

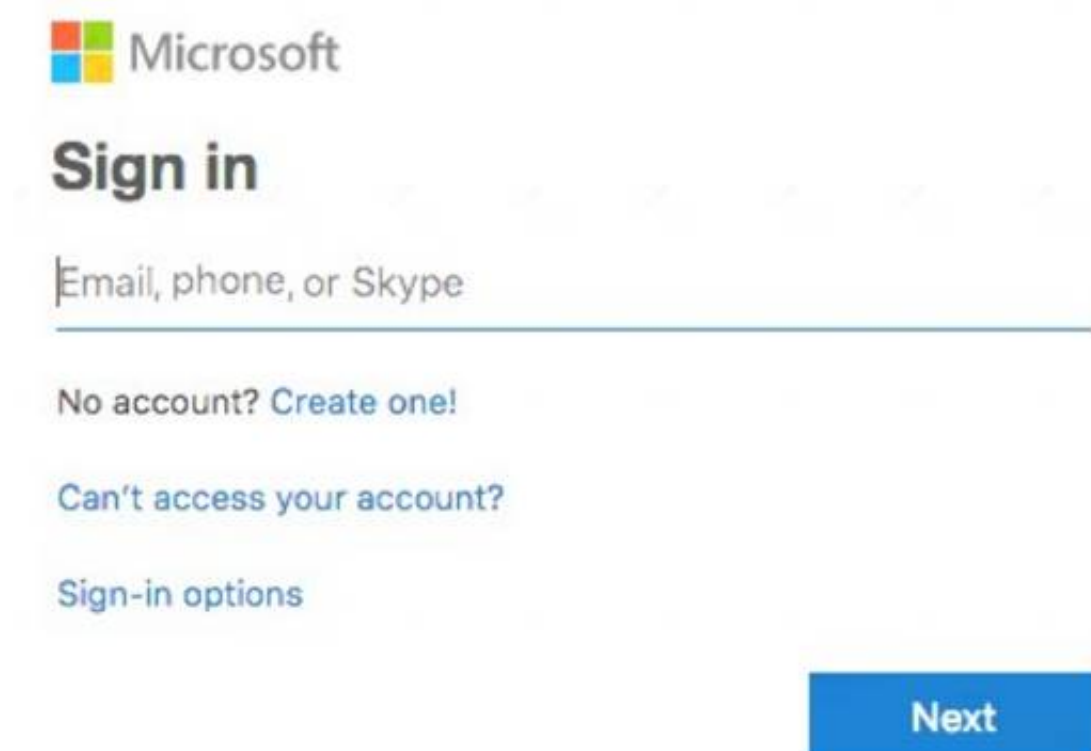

Microsoft 365 Username: admin@LODSe878763.onmicrosoft.com

Microsoft 365 Password: m3t^We\$Z7&xy

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 11440873

You need to prevent all the users in your organization from sending an out of office reply to external users.

To answer, sign in to the Microsoft 365 portal.

- A. Mastered
- B. Not Mastered

Answer: A

### Explanation:

You need to modify the default remote domain. When you add a remote domain, you specify the domain name and the settings apply to that domain. The default remote domain applies to all other domains. Therefore, we need to disable Out of Office replies for external users in the settings of the default remote domain.

- \* 1. Go to the Exchange Admin Center.
- \* 2. Click Mail Flow in the left navigation pane.
- \* 3. Click on Remote Domains.
- \* 4. Select the default remote domain and click the Edit icon (pencil icon).
- \* 5. In the 'Out of Office automatic reply types' section, select 'None'.
- \* 6. Click Save to save to changes to the default remote domain.

### NEW QUESTION 137

- (Exam Topic 5)

Your network contains three Active Directory forests.

You create a Microsoft Azure Active Directory (Azure AD) tenant. You plan to sync the on premises Active Directory (Azure AD).

You need to recommend a synchronization solution. The solution must ensure that the synchronization can complete successfully and as quickly as possible if a single server fails.

What should you include in the recommendation?

- A. Three Azure AD Connect sync servers and three Azure AD Connect sync servers in staging mode
- B. One Azure AD Connect sync servers one Azure AD Connect sync servers in staging mode
- C. Three Azure AD Connect sync servers and one Azure AD Connect sync servers in staging mode
- D. six Azure AD Connect sync servers and three Azure AD Connect sync servers in staging mode

Answer: B

### Explanation:

Azure AD Connect can be active on only one server. You can install Azure AD Connect on another server for redundancy but the additional installation would need

to be in Staging mode. An Azure AD connect installation in Staging mode is configured and ready to go but it needs to be manually switched to Active to perform directory synchronization.  
Reference:  
https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-install-custom

NEW QUESTION 142

- (Exam Topic 5)  
Your network contains two disconnected on-premises Active Directory forests named adatum.com and contoso.com. You have an Azure AD tenant named nwtraders.com  
You need to sync the on-premises forests to nwtraders.com. The solution must meet the following requirements:

- Provide the ability to connect to adatum.com and contoso.com.
- Provide support for Microsoft Exchange hybrid.
- Provide the ability to sync device objects.
- Minimize administrative effort.

Tools

Azure AD Connect

Azure AD Connect Cloud Sync

Active Directory Migration Tool

Answer Area

Provide the ability to sync device objects: Tool

Provide support for Microsoft Exchange hybrid: Tool

Provide the ability to connect to adatum.com and contoso.com: Tool

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Tools

Azure AD Connect

Azure AD Connect Cloud Sync

Active Directory Migration Tool

Answer Area

Provide the ability to sync device objects: Azure AD Connect

Provide support for Microsoft Exchange hybrid: Azure AD Connect Cloud Sync

Provide the ability to connect to adatum.com and contoso.com: Active Directory Migration Tool

NEW QUESTION 145

- (Exam Topic 5)  
You are securing a wet API by using the Microsoft identity Platform. The web API must meet the following requirements:

- Authenticated Azure Active Directory (Azure AD) users must be able to retrieve user information from Azure AD.
- Authenticated Azure AD users must be able to manage Microsoft 365 groups.

You need to grant permissions for the web API. The solution must use the principle of least privilege. What should you grant? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Answer Area

### Configured permissions

Applications are authorized to call APIs when they are granted permissions by users/admins as include all the permissions the application needs. [Learn more about permissions and consent](#)

+ Add a permission

Grant admin consent for nuborocks

API / Permissions name	Type	Description
Microsoft Graph (2)		
Directory.AccessAsUser.All Group.Create Group.Read Group.ReadWrite.All	Delegated	Read and write all groups
User.Read User.Read.All User.ReadBasic.All User.ReadWrite.All	Delegated	Read all users' basic profiles

- A. Mastered

B. Not Mastered

**Answer:** A

**Explanation:**

Answer Area

## Configured permissions

Applications are authorized to call APIs when they are granted permissions by users/admins as include all the permissions the application needs. [Learn more about permissions and consent](#)

+ Add a permission

Grant admin consent for nuborocks

API / Permissions name	Type	Description
Microsoft Graph (2)		
<div> <div>Directory.AccessAsUser.All</div> <div>Group.Create</div> <div>Group.Read</div> <div>Group.ReadWrite.All</div> </div>	Delegated	Read and write all groups
<div> <div>User.Read</div> <div>User.Read.All</div> <div>User.ReadBasic.All</div> <div>User.ReadWrite.All</div> </div>	Delegated	Read all users' basic profiles

### NEW QUESTION 149

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Office 365 tenant.

You suspect that several Office 365 features were recently updated.

You need to view a list of the features that were recently updated in the tenant. Solution: You review the Windows release health in the Microsoft 365 admin center. Does this meet the goal?

A. Yes

B. No

**Answer:** A

**Explanation:**

Reference:

<https://techcommunity.microsoft.com/t5/windows-it-pro-blog/windows-release-health-now-available-in-the-admin-center/ba-p/1648444>

### NEW QUESTION 152

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a hybrid deployment of Microsoft 365 that contains the objects shown in the following table.

Name	Type	Source
User1	User	Azure Active Directory (Azure AD)
User2	User	Windows Server Active Directory
Group1	Group	Cloud
Group2	Group	Windows Server Active Directory

Azure AD Connect has the following settings:

- > Password Hash Sync: Enabled
- > Password writeback: Enabled
- > Group writeback: Enabled

You need to add User2 to Group 2.

Solution: You use the Security & Compliance admin center. Does this meet the goal?

A. Yes

B. No

**Answer:** B

#### NEW QUESTION 154

- (Exam Topic 5)

Your network contains an Active Directory forest named adatum.local. The forest contains 500 users and uses adatum.com as a UPN suffix.

You deploy a Microsoft 365 tenant.

You implement directory synchronization and sync only 50 support users.

You discover that five of the synchronized users have usernames that use a UPN suffix of onmicrosoft.com. You need to ensure that all synchronized identities retain the UPN set in their on-premises user account.

What should you do?

- A. From the Microsoft 365 admin center, add adatum.com as a custom domain name.
- B. From Windows PowerShell, run the Set-ADDomain –AllowedDNSSuffixes adatum.com command.
- C. From Active Directory Users and Computers, modify the UPN suffix of the five user accounts.
- D. From the Microsoft 365 admin center, add adatum.local as a custom domain name.

**Answer:** C

#### Explanation:

The question states that only five of the synchronized users have usernames that use a UPN suffix of onmicrosoft.com. Therefore the other 45 users have the correct UPN suffix. This tells us that the adatum.com domain has already been added to Office 365 as a custom domain.

The forest is named adatum.local and uses adatum.com as a UPN suffix. User accounts in the domain will have adatum.local as their default UPN suffix. To use adatum.com as the UPN suffix, each user account will need to be configured to use adatum.com as the UPN suffix.

Any synchronized user account that has adatum.local as a UPN suffix will be configured to use a UPN suffix of onmicrosoft.com because adatum.local cannot be added to Office 365 as a custom domain.

Therefore, the reason that the five synchronized users have usernames with a UPN suffix of onmicrosoft.com is because their accounts were not configured to use the UPN suffix of contoso.com.

Reference:

<https://docs.microsoft.com/en-us/office365/enterprise/prepare-a-non-routable-domain-for-directory-synchroniza>

#### NEW QUESTION 159

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an on-premises Active Directory forest named contoso.com. The forest contains the following domains:

➤ Contoso.com

➤ East.contoso.com

An Azure AD Connect server is deployed to contoso.com. Azure AD Connect syncs to an Azure Active Directory (Azure AD) tenant.

You deploy a new domain named west.contoso.com to the forest.

You need to ensure that west.contoso.com syncs to the Azure AD tenant.

Solution: You install a new Azure AD Connect server in west.contoso.com and set AD Connect to active mode.

Does this meet the goal?

- A. Yes
- B. No

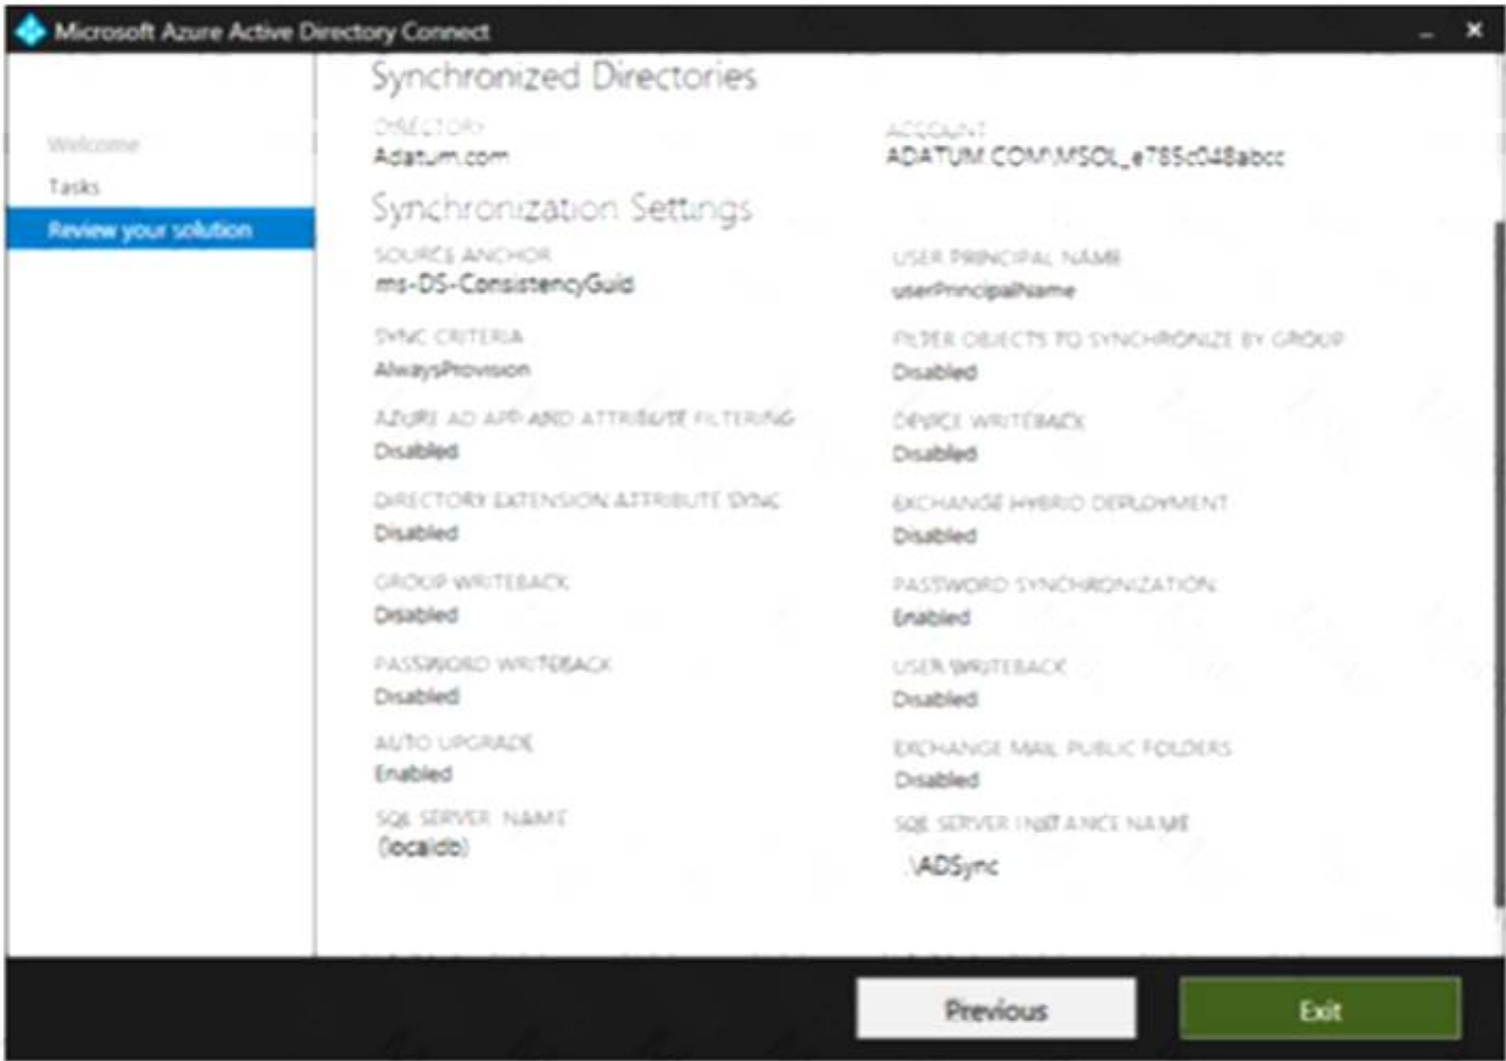

**Answer:** A

#### NEW QUESTION 162

- (Exam Topic 5)

Your company has a hybrid deployment of Microsoft 365.

An on-premises user named User1 is synced to Microsoft Azure Active Directory (Azure AD). Azure AD Connect is configured as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
 NOTE: Each correct selection is worth one point.

User1 [answer choice].

If the password for User1 is changed in Active Directory, [answer choice].

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**  
 User1 cannot change her password from any Microsoft portals because Password Writeback is disabled in the Azure AD Connect configuration.  
 If the password for User1 is changed in Active Directory, the password will be synchronized to Azure AD because Password Synchronization is enabled in the Azure AD Connect configuration.  
 Reference:  
<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-install-custom>

**NEW QUESTION 163**  
 - (Exam Topic 5)

A user receives the following message when attempting to sign in to <https://myapps.microsoft.com>:  
 "Your sign-in was blocked. We've detected something unusual about this sign-in. For example, you might be signing in from a new location, device, or app. Before you can continue, we need to verify your identity. Please contact your admin."  
 Which configuration prevents the users from signing in?

- A. Security & Compliance supervision policies
- B. Security & Compliance data loss prevention (DLP) policies
- C. Microsoft Azure Active Directory (Azure AD) conditional access policies
- D. Microsoft Azure Active Directory (Azure AD) Identity Protection policies

Answer: C

**Explanation:**  
 The user is being blocked due to a 'risky sign-in'. This can be caused by the user logging in from a device that hasn't been used to sign in before or from an unknown location.  
 Integration with Azure AD Identity Protection allows Conditional Access policies to identify risky sign-in behavior. Policies can then force users to perform password changes or multi-factor authentication to reduce their risk level or be blocked from access until an administrator takes manual action.  
 Reference:  
<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/overview>

#### NEW QUESTION 167

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain.

You deploy a Microsoft Azure Active Directory (Azure AD) tenant. Another administrator configures the domain to synchronize to Azure AD.

You discover that 10 user accounts in an organizational unit (OU) are NOT synchronized to Azure AD. All the other user accounts synchronized successfully.

You review Azure AD Connect Health and discover that all the user account synchronizations completed successfully.

You need to ensure that the 10 user accounts are synchronized to Azure AD.

Solution: From Azure AD Connect, you modify the Azure AD credentials. Does this meet the goal?

A. Yes

B. No

**Answer: B**

#### Explanation:

The question states that “all the user account synchronizations completed successfully”. Therefore, the Azure AD credentials are configured correctly in Azure AD Connect. It is likely that the 10 user accounts are being excluded from the synchronization cycle by a filtering rule.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sync-configure-filtering>

#### NEW QUESTION 170

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain named contoso.com that is synced to a Microsoft Azure Active Directory (Azure AD) tenant.

The on-premises network contains a file server named Server1. Server1 has a share named Share1 that contains company documents.

Your company purchases a Microsoft 365 subscription.

You plan to migrate data from Share1 to Microsoft 365. Only data that was created or modified during the last three months will be migrated.

You need to identify all the files in Share1 that were modified or created during the last 90 days. What should you use?

A. Server Manager

B. Microsoft SharePoint Migration Tool

C. Resource Monitor

D. Usage reports from the Microsoft 365 admin center

**Answer: B**

#### Explanation:

You can use the Microsoft SharePoint Migration Tool to migrate files from a file server to SharePoint Online. The Microsoft SharePoint Migration Tool has a number of filters you can use to define which files will be

migrated. One filter setting is “Migrate files modified after”. This setting will only migrate files modified after the selected date.

The first phase of a migration is to perform a scan of the source files to create a manifest of the files that will be migrated. You can use this manifest to identify all the files in Share1 that were modified or created during the last 90 days.

References:

<https://docs.microsoft.com/en-us/sharepointmigration/spmt-settings>

#### NEW QUESTION 174

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain. You have a Microsoft 365 subscription.

You implement a directory synchronization solution that uses pass-through authentication.

You configure Microsoft Azure Active Directory (Azure AD) smart lockout as shown in the following exhibit.

Save Discard

### Custom smart lockout

Lockout threshold ⓘ 5

Lockout duration in seconds ⓘ 60

### Custom banned passwords

Enforce custom list ⓘ Yes No

Custom banned password list ⓘ

password  
Pa\$Sw0rd  
Pa55w0rd  
Contoso

### Password protection for Windows Server Active Directory

Enable password protection on Windows Server Active Directory ⓘ Yes No

Mode ⓘ Enforced Audit

You discover that Active Directory users can use the passwords in the custom banned passwords list. You need to ensure that banned passwords are effective for all users.

Which three actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. From a domain controller, install the Azure AD Password Protection Proxy.
- B. From a domain controller, install the Microsoft AAD Application Proxy connector.
- C. From Custom banned passwords, modify the Enforce custom list setting.
- D. From Password protection for Windows Server Active Directory, modify the Mode setting.
- E. From all the domain controllers, install the Azure AD Password Protection DC Agent.
- F. From Active Directory, modify the Default Domain Policy.

**Answer:** ACE

#### Explanation:

References:

Azure AD password protection is a feature that enhances password policies in an organization. On-premises deployment of password protection uses both the global and custom banned-password lists that are stored in Azure AD. It does the same checks on-premises as Azure AD does for cloud-based changes. These checks are performed during password changes and password reset scenarios.

You need to install the Azure AD Password Protection Proxy on a domain controller and install the Azure AD Password Protection DC Agent on all domain controllers. When the proxy and agent are installed and configured, Azure AD password protection will work.

In the exhibit, the password protection is configured in Audit mode. This is used for testing. To enforce the configured policy, you need to set the password protection setting to Enforced.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-password-ban-bad-on-premises-de> <https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-password-ban-bad-on-premises>

#### NEW QUESTION 179

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription that uses Microsoft Intune.

You need to access service health alerts from a mobile phone. What should you use?

- A. the Microsoft Authenticator app
- B. the Intune app
- C. the Microsoft 365 Admin mobile app
- D. Intune Company Portal

**Answer:** A

#### NEW QUESTION 181

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

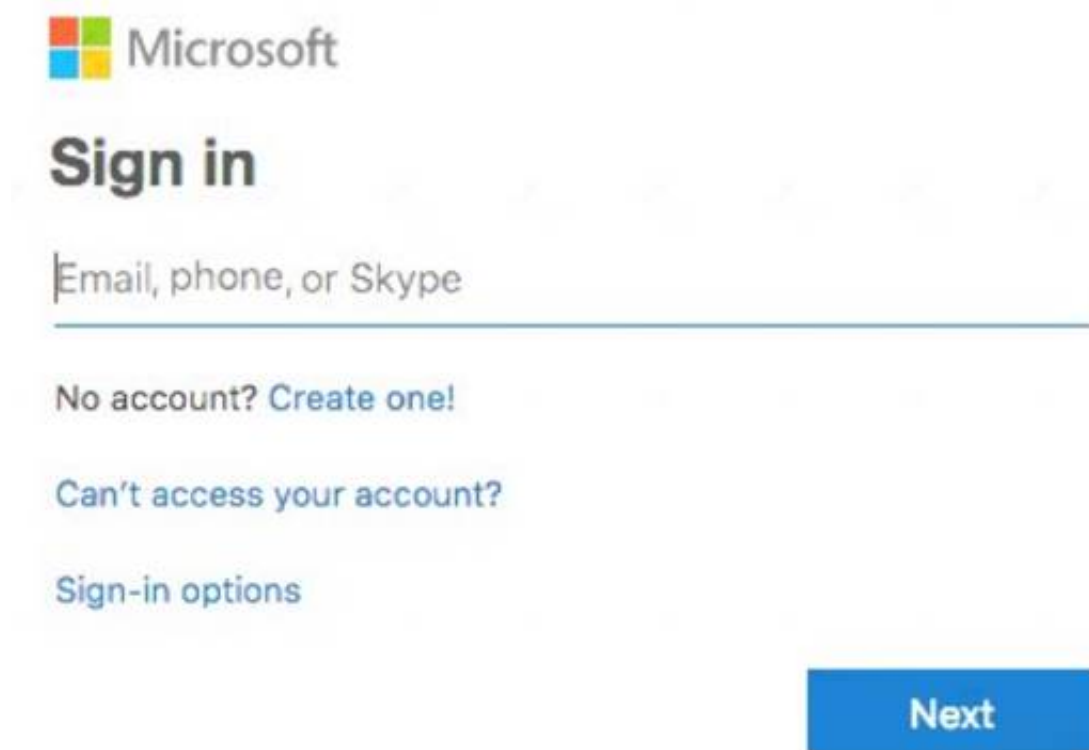

Microsoft 365 Username: admin@LODSe878763.onmicrosoft.com

Microsoft 365 Password: m3t^We\$Z7&xy

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 11440873

You need to create a policy that allows a user named Lee Gu to use Outlook Web App to review 50 percent of the outbound email messages sent by a user named Joni Sherman.

To answer, sign in to the Microsoft 365 portal.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

You need to configure a Supervision Policy.

- \* 1. Go to <https://protection.office.com> or navigate to the Security & Compliance admin center.
- \* 2. In the left navigation pane, select Supervision.
- \* 3. Click the '+Create' button to create a new supervision policy.
- \* 4. Give the policy a name such as 'Joni Sherman' and click Next.
- \* 5. In the 'Supervised users' section, click '+Add users or groups'.
- \* 6. Select Joni Sherman from the users list and click the Add button.
- \* 7. Deselect the 'Teams chats' and 'Skype for Business Conversations' checkboxes leaving only the 'Exchange Email' checkbox ticked and click Next.
- \* 8. Under 'Direction is', deselect Inbound leaving only Outbound selected and click Next.
- \* 9. In the 'Percentage to review' section, enter 50 and click Next.
- \* 10. In the 'Reviewers' section, start typing Lee Gu then select his account when it appears.
- \* 11. Click Next.
- \* 12. On the 'Review your settings' page, check the settings are correct then click the Finish button to create the policy.

**NEW QUESTION 186**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Office 365 tenant.

You suspect that several Office 365 features were recently updated.

You need to view a list of the features that were recently updated in the tenant. Solution: You use the View service requests option in the Microsoft 365 admin center. Does this meet the goal?

- A. Yes
- B. NO

**Answer:** B

**Explanation:**

A service request is a support ticket. Therefore, the View service requests option in the Microsoft 365 admin center displays a list of support tickets. It does not display a list of the features that were recently updated in the tenant so this solution does not meet the goal.

To meet the goal, you need to use Message center in the Microsoft 365 admin center.

Reference:

<https://docs.microsoft.com/en-us/office365/admin/manage/message-center?view=o365-worldwide>

**NEW QUESTION 189**

- (Exam Topic 5)

You have a Microsoft 365 subscription that uses a default domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User1	Compliant
User2	Group1, Group2

The domain contains the devices shown in the following table.

Name	Compliance status
Device1	Compliant
Device2	Noncompliant

The domain contains conditional access policies that control access to a cloud app named App1. The policies are configured as shown in the following table.

Name	Includes	Excludes	Device state includes	Device state excludes	Grant
Policy1	Group1	None	All device states	Devices marked as compliant	Block access
Policy2	Group1	Group2	None	None	Block Access
Policy3	Group1	None	All device states	None	Grant access

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can access App1 from Device1.	<input type="radio"/>	<input type="radio"/>
User2 can access App1 from Device1.	<input type="radio"/>	<input type="radio"/>
User2 can access App1 from Device2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Yes.

User1 is in a group named Compliant. All the conditional access policies apply to Group1 so they don't apply to User1.

As there is no conditional access policy blocking access for the group named Compliant, User1 is able to access App1 using any device.

Box 2: Yes.

User2 is in Group1 so Policy1 applies first. Policy1 excludes compliant devices and Device1 is compliant. Therefore, Policy1 does not apply so we move on to Policy2.

User2 is also in Group2. Policy2 excludes Group2. Therefore, Policy2 does not apply so we move on to Policy3.

Policy3 applies to Group1 so Policy3 applies to User2. Policy3 applies to 'All device states' so Policy3 applies to Device1. Policy3 grants access. Therefore, User2 can access App1 using Device1.

Box 3: No.

User2 is in Group1 so Policy1 applies. Policy1 excludes compliant devices but Devices is non-compliant. Therefore, User2 cannot access App1 from Device2.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/plan-conditional-access>

**NEW QUESTION 192**

- (Exam Topic 5)

You plan to deploy Microsoft Teams to 2,500 users.

You need to estimate the internet bandwidth required for the deployment. What should you use?

- A. Advisor for Teams
- B. Network planner
- C. Skype for Business Server Remote Connectivity Test
- D. Microsoft Remote Connectivity Analyzer

**Answer:** B

**Explanation:**

From: <https://docs.microsoft.com/en-us/microsoftteams/network-planner>

Network Planner is a new tool that is available in the Teams admin center. It can be found by going to Planning > Network planner. In just a few steps, the Network Planner can help you determine and organize network requirements for connecting Microsoft Teams users across your organization. When you provide your network details and Teams usage, the Network Planner calculates your network requirements for deploying Teams and cloud voice across your organization's physical locations.

#### NEW QUESTION 195

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain that syncs to Azure Active Directory (Azure AD).

The on-premises network contains a Microsoft SharePoint Server 2019 farm. The company purchases a Microsoft 365 subscription.

You have the users shown in the following table

Name	Source
User1	Windows Active Directory
User2	Azure Active Directory

You plan to assign User1 and User2 the required roles to run the SharePoint Hybrid Configuration Wizard. User1 will be used for on-premises credentials and User2 will be used for cloud credentials.

You need to assign the correct role to User2. The solution must use the principle of least privilege. Which role should you assign to User2?

- A. Application administrator
- B. SharePoint farm administrator
- C. Global administrator
- D. SharePoint administrator

**Answer: C**

#### Explanation:

To run the SharePoint Hybrid Configuration Wizard, you need to provide credentials of a user (in this case User2) of a Global Administrator account in Azure Active Directory.

Reference:

<https://www.c-sharpcorner.com/article/sharepoint-2019-enable-hybrid-experience/> <https://docs.microsoft.com/en-us/sharepoint/hybrid/accounts-needed-for-hybrid-configuration-and-testing>

#### NEW QUESTION 196

- (Exam Topic 5)

You have a Microsoft 365 subscription.

You view the service advisories shown in the following exhibit.

Home > Service health

Some services have posted advisories 2018-10-05 08:43(UTC) View history

Service	Status
Office 365 Portal	1 advisory
SharePoint Online	1 advisory
Office Subscription	Service is healthy
Microsoft Intune	Service is healthy
Microsoft StaffHub	Service is healthy
Microsoft Teams	Service is healthy
Mobile Device Management for Office 365	Service is healthy
Azure Information Protection	Service is healthy
Exchange Online	Service is healthy

You need to ensure that users who administer Microsoft SharePoint Online can view the advisories to investigate health issues.

Which role should you assign to the users?

- A. SharePoint administrator
- B. Message Center reader
- C. Reports reader
- D. Service administrator

**Answer: D**

#### Explanation:

People who are assigned the global admin or service administrator role can view service health. To allow Exchange, SharePoint, and Skype for Business admins to view service health, they must also be assigned the Service admin role. For more information about roles that can view service health.

Reference:

<https://docs.microsoft.com/en-us/office365/enterprise/view-service-health>

#### NEW QUESTION 199

- (Exam Topic 5)

You have a Microsoft 365 tenant that contains 300 users.

The users have Domestic and International Calling Plan licenses.

What is the maximum user phone numbers and toll-free service phone numbers can you acquire? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Number of user phone numbers:

▼

150

300

340

600

Number of toll-free service phone numbers:

▼

20

30

45

65

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**  
Graphical user interface, text, application, email Description automatically generated  
Reference:  
<https://docs.microsoft.com/en-us/microsoftteams/how-many-phone-numbers-can-you-get>

NEW QUESTION 202

- (Exam Topic 5)  
You have a Microsoft 365 E5 subscription that contains an Azure Active Directory (Azure AD) tenant named contoso.com. The tenant contains a Microsoft SharePoint Online site named Site1 and the accounts shown in the following table.

Name	Account type
UserA	User
UserB	User
GroupA	Security group

You have an on-premises server named Server1 that contains a folder named Folder1. Folder1 contains the files shown in the following table.

Name	Permission
File1	User1: Full control
File2	User2: Modify
File3	Group1: Full control

The User1, User2, and Group1 accounts have the security identifiers (SIDs) shown in the following table.

Name	SID
User1	S-1-5-21-4534338-1127018997-2609994386-1304
User2	S-1-5-21-4534338-1127018997-2609994386-1228
Group1	S-1-5-21-4534338-1127018997-2609994386-1106

You use the SharePoint Migration Tool to migrate Folder1 to Site1. You preserve the file share permissions and use the following user mapping file.  
S-1-5-21-4534338-1127018997-2609994386-1304, UserA@Contoso.com, FALSE S-1-5-21-4534338-1127018997-2609994386-1228, UserB@Contoso.com, FALSE S-1-5-21-4534338-1127018997-2609994386-1106, GroupA, TRUE  
For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point

Statements	Yes	No
UserA is the owner of File1 on Site1.	<input type="radio"/>	<input type="radio"/>
UserB is the owner of File2 on Site1.	<input type="radio"/>	<input type="radio"/>
GroupA is the owner of File3 on Site1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
UserA is the owner of File1 on Site1.	<input type="radio"/>	<input checked="" type="radio"/>
UserB is the owner of File2 on Site1.	<input type="radio"/>	<input checked="" type="radio"/>
GroupA is the owner of File3 on Site1.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 206

- (Exam Topic 5)

Your company has offices in several cities and 100.000 users. The network contains an Active Directory domain contoso.com.

You purchase Microsoft 365 and plan to deploy several Microsoft 365 services.

You are evaluating the implementation of pass-through authentication and seamless SSO. Azure AD Connect will NOT be in staging mode.

You need to identify the redundancy limits for the planned implementation.

What should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Maximum number of servers on which you can run Azure AD Connect:

1

2

4

6

11

Maximum number of servers on which you can run standalone Authentication Agents:

1

2

4

6

11

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Azure AD Connect can be active on only one server. You can install Azure AD Connect on another server for redundancy but the additional installation would need to be in Staging mode. An Azure AD connect installation in Staging mode is configured and ready to go but it needs to be manually switched to Active to perform directory synchronization.

Azure authentication agents can be installed on as many servers as you like. Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-pta-quick-start>

NEW QUESTION 211

- (Exam Topic 5)

When creating an sppkg package for deploying a web part you use the gulp command.

Instructions: Review the underlined text. If it makes the statement correct select "No change is needed/ If the statement is incorrect select the answer choice that makes the statement correct.

- A. No change is needed.
- B. the web part must be signed
- C. you use the yeoman (or yo) PowerShell cmdtet
- D. the solution must be signed

Answer: C

NEW QUESTION 214

- (Exam Topic 5)

Your network contains an Active Directory forest. The forest contains two domains named contoso.com and adatum.com.

Your company recently purchased a Microsoft 365 subscription. You deploy a federated identity solution to the environment.

You use the following command to configure contoso.com for federation. Convert-MsolDomaintoFederated –DomainName contoso.com  
 In the Microsoft 365 tenant, an administrator adds and verifies the adatum.com domain name. You need to configure the adatum.com Active Directory domain for federated authentication.  
 Which two actions should you perform before you run the Azure AD Connect wizard? Each correct answer presents part of the solution.  
 NOTE: Each correct selection is worth one point.

- A. From Windows PowerShell, run the Convert-MsolDomaintoFederated–DomainName contoso.com –SupportMultipleDomain command.
- B. From Windows PowerShell, run the New-MsolFederatedDomain–SupportMultipleDomain -DomainName contoso.com command.
- C. From Windows PowerShell, run the New-MsolFederatedDomain-DomainName adatum.com command.
- D. From Windows PowerShell, run the Update-MSOLFederatedDomain–DomainName contoso.com –SupportMultipleDomain command.
- E. From the federation server, remove the Microsoft Office 365 relying party trust.

**Answer:** AE

**Explanation:**

When the Convert-MsolDomaintoFederated –DomainName contoso.com command was run, a relying party trust was created. Adding a second domain (adatum.com in this case) will only work if the SupportMultipleDomain switch was used when the initial federation was configured by running the Convert-MsolDomaintoFederated –DomainName contoso.com command. Therefore, we need to start again by removing the relying party trust then running the Convert-MsolDomaintoFederated command again with the SupportMultipleDomain switch.

**NEW QUESTION 219**

- (Exam Topic 5)

You work at a company named Contoso, Ltd.

Contoso has a Microsoft 365 subscription that is configured to use the DNS domains shown in the following table.

Name	Can enroll devices
Contoso.com	Yes
Contoso.onmicrosoft.com	Yes

Contoso purchases a company named Fabrikam, Inc.

Contoso plans to add the following domains to the Microsoft 365 subscription:

- > fabrikam.com
- > east.fabrikam.com
- > west.contoso.com

You need to ensure that the devices in the new domains can register by using Autodiscover.

How many domains should you verify, and what is the minimum number of enterpriseregistration DNS records you should add? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Domains:**

1
2
3

**Enterpriseregistration DNS records:**

1
2
3

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/mem/intune/enrollment/windows-enroll>

**NEW QUESTION 223**

- (Exam Topic 5)

You have a Microsoft 365 subscription.

From the Security & Compliance admin center, you create a content search of all the mailboxes that contain the word ProjectX.

You need to export the results of the content search. What do you need to download the report?

- A. an export key
- B. a password
- C. a user certificate

D. a certification authority (CA) certificate

**Answer:** A

**Explanation:**

When you export a report, the data is temporarily stored in a unique Azure Storage area in the Microsoft cloud before it's downloaded to your local computer. To download the report from the Azure Storage Area, you need an export key. Reference:  
<https://docs.microsoft.com/en-us/microsoft-365/compliance/export-a-content-search-report>

**NEW QUESTION 227**

- (Exam Topic 5)

You have a Microsoft 365 subscription.

You need to prevent phishing email messages from being delivered to your organization. What should you do?

- A. From the Exchange admin center, create an anti-malware policy.
- B. From Security & Compliance, create a DLP policy.
- C. From Security & Compliance, create a new threat management policy.
- D. From the Exchange admin center, create a spam filter policy.

**Answer:** C

**Explanation:**

Anti-phishing protection is part of Office 365 Advanced Threat Protection (ATP). To prevent phishing email messages from being delivered to your organization, you need to configure a threat management policy.

ATP anti-phishing is only available in Advanced Threat Protection (ATP). ATP is included in subscriptions, such as Microsoft 365 Enterprise, Microsoft 365 Business, Office 365 Enterprise E5, Office 365 Education A5, etc.

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/set-up-anti-phishing-policies>

**NEW QUESTION 228**

- (Exam Topic 5)

Your company has a hybrid deployment of Microsoft 365.

Users authenticate by using pass-through authentication. Several Microsoft Azure AD Connect Authentication Agents are deployed.

You need to verify whether all the Authentication Agents are used for authentication. What should you do?

- A. From the Azure portal, use the Troubleshoot option on the Pass-through authentication page.
- B. From Performance Monitor, use the #PTA authentications counter.
- C. From the Azure portal use the Diagnostics settings on the Monitor blade.
- D. From Performance Monitor, use the Kerberos authentications counter.

**Answer:** A

**Explanation:**

On the Troubleshoot page, you can view how many agents are configured. If you click on the agents link, you can view the status of each agent. Each agent will have a status of Active or Inactive.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/tshoot-connect-pass-through-authentication>

**NEW QUESTION 230**

- (Exam Topic 5)

Your company has a Microsoft 365 subscription.

You need to identify which users performed the following privileged administration tasks:

- > Deleted a folder from the second-stage Recycle Bin in Microsoft SharePoint
- > Opened a mailbox of which the user was not the owner
- > Reset a user password

What should you use?

- A. Microsoft Azure Active Directory (Azure AD) audit logs
- B. Microsoft Azure Active Directory (Azure AD) sign-ins
- C. Security & Compliance content search
- D. Security & Compliance audit log search

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/azure/azure-monitor/platform/activity-logs-overview>

**NEW QUESTION 234**

- (Exam Topic 5)

You have a Microsoft 365 subscription

You have an Azure AD tenant that contains the users shown in the following table.

Name	Role
User1	Security administrator
User2	Global administrator
User3	Service support administrator

You configure Tenant properties as shown in the following exhibit

Technical contact 

User1@contoso.com ✓

Global privacy contact

Privacy statement URL

http://contoso.com/privacy ✓

Which users will be contacted by Microsoft if the tenant experiences a data breach?

- A. User1 only
- B. User2 only
- C. User3 only
- D. User1 and User2 only
- E. User2 and User3 only

**Answer:** A

#### NEW QUESTION 237

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@M365x981607.onmicrosoft.com Microsoft 365 Password: \*yfLo7lr2&yIf the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 10811525

You need to prevent non-administrators in your organization from registering applications.

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

You need to configure the App Registrations setting in Azure Active Directory.

- \* 1. Go to the Azure Active Directory admin center.
- \* 2. Select Azure Active Directory.
- \* 3. Select 'User settings'
- \* 4. In the 'App registrations' section, toggle the 'Users can register applications' setting to No.
- \* 5. Click Save to save the changes.

#### NEW QUESTION 239

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	UPN suffix
User1	Contoso.com
User2	Fabrikam.com

The domain syncs to an Azure Active Directory (Azure AD) tenant named contoso.com as shown in the exhibit. (Click the Exhibit tab.)

## PROVISION FROM ACTIVE DIRECTORY

### Azure AD Connect cloud provisioning

This feature allows you to manage provisioning from the cloud.

[Manage provisioning \(Preview\)](#)

### Azure AD Connect sync

Sync Status	Enabled
Last Sync	Less than 1 hour ago
Password Hash Sync	Enabled

## USER SIGN-IN

Federation	Disabled	0 domains
Seamless single sign-on	Enabled	1 domain
Pass-through authentication	Enabled	2 agents

User2 fails to authenticate to Azure AD when signing in as user2@fabrikam.com. You need to ensure that User2 can access the resources in Azure AD.  
 Solution: From the Azure Active Directory admin center, you add fabrikam.com as a custom domain. You instruct User2 to sign in as user2@fabrikam.com.  
 Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

### Explanation:

The on-premises Active Directory domain is named contoso.com. To enable users to sign on using a different UPN (different domain), you need to add the domain to Microsoft 365 as a custom domain.
