NEW QUESTION 105

A company is investigating the service-level agreements (SLAS) provided by Microsoft 365. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
The SLA commits to providing 100% uptime and email delivery.	<input type="radio"/>	<input type="radio"/>
Every Microsoft 365 application has an individual SLA commitment.	<input type="radio"/>	<input type="radio"/>
Microsoft offers a service credit if the SLA is not upheld.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NO: Microsoft 365 provides service-level agreements (SLAs) that describe Microsoft’s commitments for uptime and connectivity for its online services. The SLAs vary depending on the service and plan, but generally they offer a 99.9% monthly uptime guarantee. The SLA for Exchange Online, which is the email service in Microsoft 365, states that Microsoft will provide at least 99.9% availability of email delivery within one minute. However, this is an average over a month and not for any one email message. If there is an average delay of greater than 10 minutes over a month, then Microsoft will consider it a breach of the SLA.

NO: Microsoft 365 provides service-level agreements (SLAs) that describe Microsoft’s commitments for uptime and connectivity for its online services. The SLAs vary depending on the service and plan, but generally they offer a 99.9% monthly uptime guarantee. However, not every Microsoft 365 application has an individual SLA commitment. Some applications are grouped together under a single SLA, such as Office 365 apps (Word, Excel, PowerPoint, etc.), SharePoint Online, OneDrive for Business, etc. Other applications have their own separate SLAs, such as Dynamics 365 apps (Sales, Customer Service, Marketing, etc.), Azure Active Directory Premium P1/P2 plans, etc.

YES: Microsoft offers a service credit if the SLA is not upheld for Microsoft Online Services such as Azure, Dynamics 365, Office 365, and Intune. The service credit is prorated based on the service affected and the duration of the outage.

NEW QUESTION 203

An organization uses Microsoft 365 Business to secure their data.

Many users install the organization's data on their personal tablets and phones. You need to protect the organization's data stored on users' devices. Which three features support device security? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Remotely wiping company data
- B. Enabling Advanced Threat Protection for users
- C. Disabling the device remotely
- D. Automatically deleting files after 90 days of inactivity
- E. Requiring users to have a PIN on their device

Answer: ADE

Explanation:

You can manage many of the Microsoft 365 Business security features in the admin center, which gives you a simplified way to turn these features on or off. In the admin center, you can do the following:

Set application management settings for Android or iOS devices.

These settings include deleting files from an inactive device after a set period, encrypting work files, requiring that users set a PIN, and so on.

Set application protection settings for Windows 10 devices.

These settings can be applied to company data on both company-owned, or personally owned devices. Set device protection settings for Windows 10 devices. You can enable BitLocker encryption to help protect data in case a device is lost or stolen, and enable Windows Exploit Guard to provide advanced protection against ransomware.

Remove company data from devices.

You can remotely wipe company data if a device is lost, stolen, or an employee leaves your company. Reset Windows 10 devices to their factory settings.

You can reset any Windows 10 devices that have device protection settings applied to them. References:

A company is a Microsoft 365 reseller. The company does not provide managed services or direct customer support. You need to provide licenses for customers and earn commissions for each license sold. What should you do?

- A. Buy licenses for customers by using the Microsoft admin portal
- B. Sign up as a Cloud Solution Provider direct reseller.
- C. Sign up as a Cloud Solution Provider indirect reseller.
- D. Buy licenses for customers from a Microsoft authorized distributor.

Answer: D

Explanation:

<https://docs.microsoft.com/en-us/partner-center/indirect-reseller-tasks-in-partner-center>

"As an indirect reseller in CSP, you work with indirect providers (also known as distributors) who have a direct relationship with Microsoft and can provide you with customer support and billing. Working with indirect providers means you don't have to start your own. Instead, you can work with an experienced technology provider to help ensure your success. In the provider-reseller (two-tier) model, the provider buys cloud solutions and services from Microsoft. You then resell them to customers."
