

Exam Questions MD-102

Endpoint Administrator

<https://www.2passeasy.com/dumps/MD-102/>

NEW QUESTION 1

- (Exam Topic 4)

You use Microsoft Intune and Intune Data Warehouse.

You need to create a device inventory report that includes the data stored in the data warehouse. What should you use to create the report?

- A. the Azure portal app
- B. Endpoint analytics
- C. the Company Portal app
- D. Microsoft Power BI

Answer: D

Explanation:

You can use the Power BI Compliance app to load interactive, dynamically generated reports for your Intune tenant. Additionally, you can load your tenant data in Power BI using the OData link. Intune provides connection settings to your tenant so that you can view the following sample reports and charts related to:

Devices Enrollment

App protection policy Compliance policy

Device configuration profiles Software updates

Device inventory logs

Note: Load the data in Power BI using the OData link

With a client authenticated to Azure AD, the OData URL connects to the RESTful endpoint in the Data Warehouse API that exposes the data model to your reporting client. Follow these instructions to use Power BI Desktop to connect and create your own reports.

- > Sign in to the Microsoft Endpoint Manager admin center.
- > Select Reports > Intune Data warehouse > Data warehouse.
- > Retrieve the custom feed URL from the reporting blade, for example:
- > Open Power BI Desktop.
- > Choose File > Get Data. Select OData feed.
- > Choose Basic.
- > Type or paste the OData URL into the URL box.
- > Select OK.
- > If you have not authenticated to Azure AD for your tenant from the Power BI desktop client, type your credentials. To gain access to your data, you must authorize with Azure Active Directory (Azure AD) using OAuth 2.0.
- > Select Organizational account.
- > Type your username and password.
- > Select Sign In.
- > Select Connect.
- > Select Load.

Reference: <https://docs.microsoft.com/en-us/mem/intune/developer/reports-proc-get-a-link-powerbi>

NEW QUESTION 2

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10. On Computer1, you need to run the

Invoke-Command cmdlet to execute several PowerShell commands on Computer2. What should you do first?

- A. On Computer2, run the Enable-PSRemoting cmdlet.
- B. On Computer2, add Computer1 to the Remote Management Users group.
- C. From Active Directory, configure the Trusted for Delegation setting for the computer account of Computer2.
- D. On Computer1, run the HcK-PSSession cmdlet.

Answer: C

NEW QUESTION 3

- (Exam Topic 4)

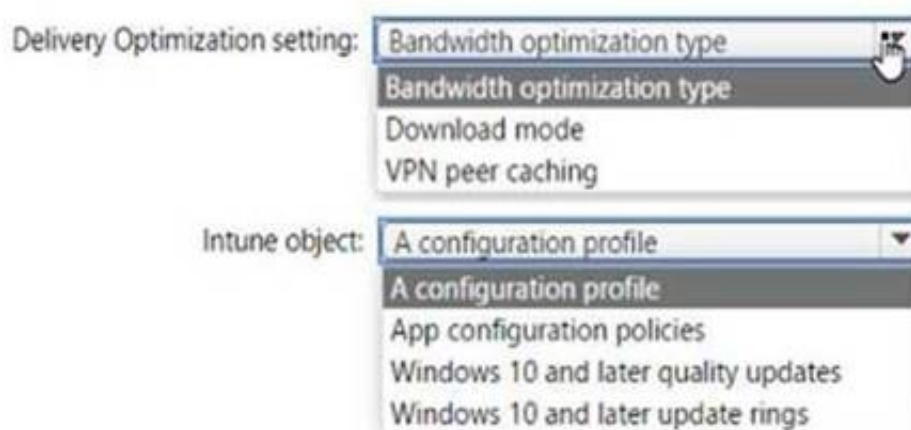

You have 100 Windows 10 devices enrolled in Microsoft Intune.

You need to configure the devices to retrieve Windows updates from the internet and from other computers on a local network.

Which Delivery Optimization setting should you configure, and which type of Intune object should you create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Delivery Optimization setting: B. Download mode Intune object: A configuration profile
To configure the devices to retrieve Windows updates from the internet and from other computers on a local network, you need to configure the Download mode setting in a Delivery Optimization device configuration profile. This setting specifies how the devices use Delivery Optimization to download updates. You can choose from several options, such as HTTP only, LAN only, or Group. For example, you can set the Download mode to Group and specify a group ID for the devices to share updates among themselves and with other devices that have the same group ID. You can also set the Download mode to Internet to allow the devices to download updates from Microsoft or other devices on the internet that use Delivery Optimization. References: <https://docs.microsoft.com/en-us/mem/intune/configuration/delivery-optimization-windows>

NEW QUESTION 4

- (Exam Topic 4)
You have an on-premises Active Directory domain that syncs to Azure AD tenant.
The tenant contains computers that run Windows 10. The computers are hybrid Azure AD joined and enrolled in Microsoft Intune. The Microsoft Office settings on the computers are configured by using an Group Policy Object (GPO).
You need to migrate the GPO to Intune.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Assign the policy.

Create a compliance policy.

Set a scope tag to the policy.

Import an ADMX file.

Create a configuration profile.

Configure the Administrative Templates settings.

Assign the profile.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

Assign the policy.

Create a compliance policy.

Set a scope tag to the policy.

Import an ADMX file.

Create a configuration profile.

Configure the Administrative Templates settings.

Assign the profile.

Answer Area

Create a configuration profile.

Configure the Administrative Templates settings.

Assign the profile.

NEW QUESTION 5

- (Exam Topic 4)
You have a Windows 10 device named Device1 that is joined to Active Directory and enrolled in Microsoft Intune.
Device1 is managed by using Group Policy and Intune.
You need to ensure that the Intune settings override the Group Policy settings. What should you configure?

- A. a device configuration profile
- B. a device compliance policy
- C. an MDM Security Baseline profile
- D. a Group Policy Object (GPO)

Answer: A

Explanation:

A device configuration profile is a collection of settings that can be applied to devices enrolled in Microsoft Intune. You can use device configuration profiles to manage Windows 10 devices that are joined to Active Directory and enrolled in Intune. To ensure that the Intune settings override the Group Policy settings, you need to enable the policy CSP setting called MDMWinsOverGP in the device configuration profile. This setting will give precedence to the MDM policy over any conflicting Group Policy settings. References: [\[Us policy CSP settings to create custom device](#)

configuration profiles]

NEW QUESTION 6

- (Exam Topic 4)

You have an Azure AD group named Group1. Group1 contains two Windows 10 Enterprise devices named Device1 and Device2. You create a device configuration profile named Profile1. You assign Profile1 to Group1. You need to ensure that Profile1 applies to Device1 only. What should you modify in Profile1?

- A. Assignments
- B. Settings
- C. Scope (Tags)
- D. Applicability Rules

Answer: D

Explanation:

To ensure that Profile1 applies to Device1 only, you need to modify the Applicability Rules in Profile1. You can use applicability rules to filter which devices receive a profile based on criteria such as device model, manufacturer, or operating system version. You can create an applicability rule that matches Device1's properties and excludes Device2's properties. References: <https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-assign#applicability-rules>

NEW QUESTION 7

- (Exam Topic 4)

You have a computer that runs Windows 10 and contains two local users named User1 and User2. You need to ensure that the users can perform the following actions:

- User1 must be able to adjust the date and time.
- User2 must be able to clear Windows logs.

The solution must use the principle of least privilege.

To which group should you add each user? To answer, drag the appropriate groups to the correct users. Each group may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Groups

Administrators

Event Log Readers

Performance Log Users

Power Users

System Managed Accounts Group

Answer Area

User1:

User2:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Groups

Administrators

Event Log Readers

Performance Log Users

Power Users

System Managed Accounts Group

Answer Area

User1:

Administrators

User2:

Event Log Readers

NEW QUESTION 8

- (Exam Topic 4)

You have a Microsoft 365 ES subscription that uses Microsoft Intune. Devices are enrolled in Intune as shown in the following table.

Name	Platform	Enrolled by using
Device1	iOS	Apple Automated Device Enrollment (ADE)
Device2	iPadOS	Apple Automated Device Enrollment (ADE)
Device3	iPadOS	The Company Portal app

The devices are the members of groups as shown in the following table.

Name	Members
Group1	Device1, Device2, Device3
Group2	Device2

You create an iOS/iPadOS update profile as shown in the following exhibit.

Create profile

iOS/iPadOS

✓ Basics

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If an iOS update becomes available on Tuesday at 5 AM, the update is installed on Device1 automatically on Wednesday.	<input type="radio"/>	<input type="radio"/>
If an iPadOS update becomes available on Thursday at 2 AM, the update is installed on Device2 automatically on Thursday.	<input type="radio"/>	<input type="radio"/>
If an iPadOS update becomes available on Friday at 10 PM, the update is installed on Device3 automatically on Sunday.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
If an iOS update becomes available on Tuesday at 5 AM, the update is installed on Device1 automatically on Wednesday.	<input type="radio"/>	<input checked="" type="radio"/>
If an iPadOS update becomes available on Thursday at 2 AM, the update is installed on Device2 automatically on Thursday.	<input type="radio"/>	<input checked="" type="radio"/>
If an iPadOS update becomes available on Friday at 10 PM, the update is installed on Device3 automatically on Sunday.	<input type="radio"/>	<input checked="" type="radio"/>

You have a Microsoft 365 E5 subscription.

You need to download a report that lists all the devices that are NOT enrolled in Microsoft Intune and are assigned an app protection policy.

What should you select in the Microsoft Endpoint Manager admin center?

- A. App
- B. and then App protection policies
- C. App
- D. and then Monitor
- E. Devices, and then Monitor
- F. Reports, and the Device compliance

Answer: A

Explanation:

App report: You can search by platform and app, and then this report will provide two different app protection statuses that you can select before generating the report. The statuses can be Protected or Unprotected.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/app-protection-policies-monitor>

NEW QUESTION 10

- (Exam Topic 4)

You use Microsoft Intune and Intune Data Warehouse.

You need to create a device inventory report that includes the data stored in the data warehouse. What should you use to create the report?

- A. the Azure portal app
- B. Endpoint analytics
- C. the Company Portal app
- D. Microsoft Power BI

Answer: D

Explanation:

You can use the Power BI Compliance app to load interactive, dynamically generated reports for your Intune tenant. Additionally, you can load your tenant data in Power BI using the OData link. Intune provides

connection settings to your tenant so that you can view the following sample reports and charts related to: Devices

Enrollment

App protection policy Compliance policy

Device configuration profiles Software updates

Device inventory logs

Note: Load the data in Power BI using the OData link

With a client authenticated to Azure AD, the OData URL connects to the RESTful endpoint in the Data Warehouse API that exposes the data model to your reporting client. Follow these instructions to use Power BI Desktop to connect and create your own reports.

- Sign in to the Microsoft Endpoint Manager admin center.
- Select Reports > Intune Data warehouse > Data warehouse.
- Retrieve the custom feed URL from the reporting blade, for example:
- Open Power BI Desktop.
- Choose File > Get Data. Select OData feed.
- Choose Basic.
- Type or paste the OData URL into the URL box.
- Select OK.
- If you have not authenticated to Azure AD for your tenant from the Power BI desktop client, type your credentials. To gain access to your data, you must authorize with Azure Active Directory (Azure AD) using OAuth 2.0.
- Select Organizational account.
- Type your username and password.
- Select Sign In.
- Select Connect.
- Select Load.

Reference: <https://docs.microsoft.com/en-us/mem/intune/developer/reports-proc-get-a-link-powerbi>

NEW QUESTION 10

- (Exam Topic 4)

Your company has a Remote Desktop Gateway (RD Gateway).

You have a server named Server1 that is accessible by using Remote Desktop Services (RDS) through the RD Gateway.

You need to configure a Remote Desktop connection to connect through the gateway. Which setting should you configure?

- A. Connect from anywhere
- B. Server authentication
- C. Connection settings
- D. Local devices and resources

Answer: A

Explanation:

To connect to a remote server through the RD Gateway, you need to configure the Connect from anywhere setting in the Remote Desktop Connection client. This setting allows you to specify the domain name and port of the RD Gateway server, as well as the authentication method. The other settings are not related to the RD Gateway connection. References: Configure Remote Desktop Connection Settings for Remote Desktop Gateway

NEW QUESTION 15

- (Exam Topic 4)

You are creating a device configuration profile in Microsoft Intune. You need to configure specific OMA-URI settings in the profile. Which profile type template should you use?

- A. Device restrictions (Windows 10 Team)
- B. Identity protection
- C. Custom
- D. Device restrictions

Answer: C

NEW QUESTION 17

- (Exam Topic 4)

Your company has devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Android device administrator
Device3	iOS

In Microsoft Endpoint Manager, you define the company's network as a location named Location1. Which devices can use network location-based compliance policies?

- A. Device2 and Device3 only
- B. Device2 only
- C. Device1 and Device2 only
- D. Device1 only
- E. Device1, Device2, and Device3

Answer: E

Explanation:

Intune supported operating systems

Intune supports devices running the following operating systems (OS): iOS

Android Windows macOS

Note: View the device compliance settings for the different device platforms: Android device administrator

Android Enterprise iOS

macOS

Windows Holographic for Business Windows 8.1 and later

Windows 10/11

Reference: <https://docs.microsoft.com/en-us/mem/intune/fundamentals/supported-devices-browsers> <https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>

NEW QUESTION 20

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 500 macOS devices enrolled in Microsoft Intune. You need to ensure that you can apply Microsoft Defender for Endpoint antivirus policies to the macOS devices. The solution must minimize administrative effort. What should you do?

- A. From the Microsoft Endpoint Manager admin center, create a configuration profile.
- B. From the Microsoft Endpoint Manager admin center, create a security baseline.
- C. Onboard the macOS devices to the Microsoft 365 compliance center.
- D. Install Defender for Endpoint on the macOS devices.

Answer: D

Explanation:

Just install, and use Defender for Endpoint on Mac. Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/microsoft-defender-endpoint-mac>

NEW QUESTION 25

- (Exam Topic 4)

Your company has an Azure AD tenant named contoso.com that contains several Windows 10 devices. When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin. You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Microsoft Entra admin center, you modify the User settings and the Device settings. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 28

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	iOS
Device3	Android Enterprise

You need to ensure that only devices running trusted firmware or operating system builds can access network resources.

Which compliance policy setting should you configure for each device? To answer, drag the appropriate settings to the correct devices. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Settings

Require BitLocker.

Prevent jailbroken devices from having corporate access.

Prevent rooted devices from having corporate access.

Require Secure Boot to be enabled on the device.

Answer Area

Device1:

Setting

Device2:

Setting

Device3:

Setting

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1:

Device Compliance settings for Windows 10/11 in Intune

There are the different compliance settings you can configure on Windows devices in Intune. As part of your mobile device management (MDM) solution, use these settings to require BitLocker, set a minimum and maximum operating system, set a risk level using Microsoft Defender for Endpoint, and more.

Note: Windows Health Attestation Service evaluation rules Require BitLocker:

Windows BitLocker Drive Encryption encrypts all data stored on the Windows operating system volume. BitLocker uses the Trusted Platform Module (TPM) to help protect the Windows operating system and user

data. It also helps confirm that a computer isn't tampered with, even if its left unattended, lost, or stolen. If the computer is equipped with a compatible TPM, BitLocker uses the TPM to lock the encryption keys that protect the data. As a result, the keys can't be accessed until the TPM verifies the state of the computer.

Not configured (default) - This setting isn't evaluated for compliance or non-compliance.

Require - The device can protect data that's stored on the drive from unauthorized access when the system is off, or hibernates.

Box 2: Prevent jailbroken devices from having corporate access Device Compliance settings for iOS/iPadOS in Intune

There are different compliance settings you can configure on iOS/iPadOS devices in Intune. As part of your mobile device management (MDM) solution, use these settings to require an email, mark rooted (jailbroken) devices as not compliant, set an allowed threat level, set passwords to expire, and more.

Device Health Jailbroken devices

Supported for iOS 8.0 and later

Not configured (default) - This setting isn't evaluated for compliance or non-compliance. Block - Mark rooted (jailbroken) devices as not compliant.

Box 3: Prevent rooted devices from having corporate access. Device compliance settings for Android Enterprise in Intune

There are different compliance settings you can configure on Android Enterprise devices in Intune. As part of your mobile device management (MDM) solution, use these settings to mark rooted devices as not compliant, set an allowed threat level, enable Google Play Protect, and more.

Device Health - for Personally-Owned Work Profile Rooted devices

Not configured (default) - This setting isn't evaluated for compliance or non-compliance. Block - Mark rooted devices as not compliant.

Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-create-windows> <https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-create-android-for-work> <https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-create-ios>

NEW QUESTION 31

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a user named Admin1. All computers run Windows 10.

You enable Windows PowerShell remoting on the computers.

You need to ensure that Admin1 can establish remote PowerShell connections to the computers. The solution must use the principle of least privilege.

To which group should you add Admin1?

- A. Access Control Assistance Operators
- B. Remote Desktop Users
- C. Power Users
- D. Remote Management Users

Answer: B

NEW QUESTION 33

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You plan to enable Microsoft Intune enrollment for the following types of devices:

- Existing Windows 11 devices managed by using Configuration Manager
- Personal iOS devices

The solution must minimize user disruption.

Which enrollment method should you use for each device type? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Windows 11 devices managed by using Configuration Manager:

Windows Autopilot
Co-management
User enrollment
Windows Autopilot

Personal iOS devices:

Automated Device Enrollment (ADE)
Apple Configurator
Automated Device Enrollment (ADE)
User enrollment

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Windows 11 devices managed by using Configuration Manager:

Windows Autopilot
Co-management
User enrollment
Windows Autopilot

Personal iOS devices:

Automated Device Enrollment (ADE)
Apple Configurator
Automated Device Enrollment (ADE)
User enrollment

NEW QUESTION 38

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	iOS
Device3	Android Enterprise

You need to ensure that only devices running trusted firmware or operating system build can access network resources.

Which compliance policy setting should you configure for each device? To answer, drag the appropriate settings to the correct devices. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Settings

Require BitLocker.

Prevent jailbroken devices from having corporate access.

Prevent rooted devices from having corporate access.

Require Secure Boot to be enabled on the device.

Answer Area

Device1:

Device2:

Device3:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Settings

☐ Require BitLocker.

☐ Prevent jailbroken devices from having corporate access.

☐ Prevent rooted devices from having corporate access.

☐ Require Secure Boot to be enabled on the device.

Answer Area

Device1: ☐ Require BitLocker.

Device2: ☐ Prevent jailbroken devices from having corporate access.

Device3: ☐ Prevent rooted devices from having corporate access.

NEW QUESTION 41

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to manage devices.

You plan to deploy two apps named App1 and App2 to all Windows devices. App1 must be installed before App2.

From the Intune admin center, you create and deploy two Windows app (Win32) apps. You need to ensure that App1 is installed before App2 on every device. What should you configure?

- A. the App1 deployment configurations
- B. a dynamic device group
- C. a detection rule
- D. the App2 deployment configurations

Answer: C

Explanation:

The correct answer is D because you can configure the dependencies for a Win32 app in the deployment configurations1. Dependencies are other Win32 apps that must be installed before your Win32 app can be installed1. You can add Win32 app dependencies only after your Win32 app has been added and uploaded to Intune2. In this case, you need to configure the App2 deployment configurations to add App1 as a dependency 2. References: 1: Microsoft Intune Win32 App Dependencies - MEndpointMgr <https://msendpointmgr.com/2019/06/03/new-intune-feature-win32-app-dependencies/> 2: Add and assign Win32 apps to Microsoft Intune | Microsoft Learn

<https://learn.microsoft.com/en-us/mem/intune/apps/apps-win32-add>

NEW QUESTION 45

- (Exam Topic 4)

You have a server named Server1 and computers that run Windows 8.1. Server1 has the Microsoft Deployment Toolkit (MDT) installed.

You plan to upgrade the Windows 8.1 computers to Windows 10 by using the MDT deployment wizard. You need to create a deployment share on Server1.

What should you do on Server1, and what are the minimum components you should add to the MDT deployment share? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

On Server1:

☐ Import the Deployment Image Servicing and Management (DISM) PowerShell module.

☐ Import the WindowsAutopilotIntune Windows PowerShell module.

☐ Install the Windows Assessment and Deployment Kit (Windows ADK).

☐ Install the Windows Deployment Services server role.

Add to the MDT deployment share:

☐ Windows 10 image and package only

☐ Windows 10 image and task sequence only

☐ Windows 10 image only

☐ Windows 10 image, task sequence, and package

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Install the Windows Deployment Services role. Install and initialize Windows Deployment Services (WDS) On the server:

Open an elevated Windows PowerShell prompt and enter the following command: Install-WindowsFeature -Name WDS -IncludeManagementTools WDSUTIL /Verbose /Progress /Initialize-Server /Server:MDT01 /RemInst:"D:\RemoteInstall" WDSUTIL /Set-Server /AnswerClients:All

Box 2: Windows 10 image and task sequence only Create the reference image task sequence

In order to build and capture your Windows 10 reference image for deployment using MDT, you will create a task sequence.

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/prepare-for-windows-deployment>

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/create-a-windows-10-reference-im>

NEW QUESTION 48

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You plan to use Windows Autopilot to provision 25 Windows 11 devices. You need to configure the Out-of-box experience (OOBE) settings.

What should you create in the Microsoft Intune admin center?

- A. an enrollment status page (ESP)
- B. a deployment profile
- C. a compliance policy
- D. a PowerShell script
- E. a configuration profile

Answer: B

NEW QUESTION 53

- (Exam Topic 4)

You have a Microsoft Intune subscription.

You have devices enrolled in intune as shown in the following table.

Name	Operating system
Device1	Android 8.1.0
Device2	Android 9
Device3	iOS 11.4.1
Device4	iOS 12.3.1
Device5	iOS 12.3.2

An app named App1 is installed on each device.

What is the minimum number of app configuration policies required to manage Appl ?

- A. 1
- B. 2
- C. 3
- D. 4
- E. 5

Answer: B

Explanation:

The correct answer is B because you need to create two app configuration policies for managed devices, one for iOS/iPadOS devices and one for Android devices1. App configuration policies let you customize the settings of apps for iOS/iPadOS or Android devices1. The settings are assigned to user groups and applied when the app runs1. The app developer or supplier provides the configuration settings (keys and values) that are exposed to Intune1. You can't use a single app configuration policy for both iOS/iPadOS and Android devices because they have different configuration settings2. References: 1: App configuration policies for Microsoft Intune | Microsoft Learn

<https://learn.microsoft.com/en-us/mem/intune/apps/app-configuration-policies-overview> 2: Add app configuration policies for managed iOS/iPadOS devices | Microsoft Learn <https://learn.microsoft.com/en-us/mem/intune/apps/app-configuration-policies-use-ios>

NEW QUESTION 57

- (Exam Topic 3)

You need to meet the technical requirements for the LEG department computers.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

Configure the commercial ID on the LEG department computers.

Create an Azure Machine Learning service workspace.

Create an Azure Log Analytics workspace.

Install the Microsoft Monitoring Agent on the LEG department computers.

Add a solution to a workspace.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A screenshot of a white box Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/windows-analytics-azure-portal>

NEW QUESTION 60

- (Exam Topic 3)

You need to prepare for the deployment of the Phoenix office computers. What should you do first?

- A. Extract the hardware ID information of each computer to a CSV file and upload the file from the Devices settings in Microsoft Store for Business.
- B. Generalize the computers and configure the Mobility (MDM and MAM) settings from the Azure Active Directory blade in the Azure portal.
- C. Generalize the computers and configure the Device settings from the Azure Active Directory blade in the Azure portal.
- D. Extract the hardware ID information of each computer to an XLSX file and upload the file from the Devices settings in Microsoft Store for Business.

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/microsoft-store/add-profile-to-devices#manage-autopilot-deployment-profiles>

NEW QUESTION 62

- (Exam Topic 3)

You are evaluating which devices are compliant.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is compliant	<input type="radio"/>	<input type="radio"/>
Device3 is compliant	<input type="radio"/>	<input type="radio"/>
Device4 is compliant	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Device1 is compliant	<input type="radio"/>	<input checked="" type="radio"/>
Device3 is compliant	<input checked="" type="radio"/>	<input type="radio"/>
Device4 is compliant	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 67

- (Exam Topic 3)

You need to meet the technical requirements for the iOS devices. Which object should you create in Intune?

- A. A compliance policy
- B. An app protection policy
- C. A Deployment profile
- D. A device configuration profile

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/intune/device-restrictions-configure> <https://docs.microsoft.com/en-us/intune/device-restrictions-ios>

NEW QUESTION 69

- (Exam Topic 3)

You need to meet the technical requirements for the new HR department computers.

How should you configure the provisioning package? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Specify ComputerName as:

<input type="checkbox"/>
<input checked="" type="checkbox"/> "HR" + RAND(4)
<input checked="" type="checkbox"/> "HumanResources-" + RAND(????)
<input type="checkbox"/> HR-%RAND:4%
<input type="checkbox"/> HR-????
<input type="checkbox"/> HumanResources-%RAND:4%

Specify AccountOU as:

<input type="checkbox"/>
<input checked="" type="checkbox"/> CN=Computers, CN=HR, DC=Contoso, DC=com
<input checked="" type="checkbox"/> Computers/HumanResources/Contoso.com
<input type="checkbox"/> Contoso.com/HR/Computers
<input type="checkbox"/> OU=Computers, OU=HR, DC=Contoso, DC=com

A. Mastered

B. Not Mastered

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/windows/configuration/wcd/wcd-accounts>

NEW QUESTION 72

- (Exam Topic 2)

What should you upgrade before you can configure the environment to support co-management?

A. the domain functional level

B. Configuration Manager

C. the domain controllers

D. Windows Server Update Services (WSUS)

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/sccm/comanage/tutorial-co-manage-clients>

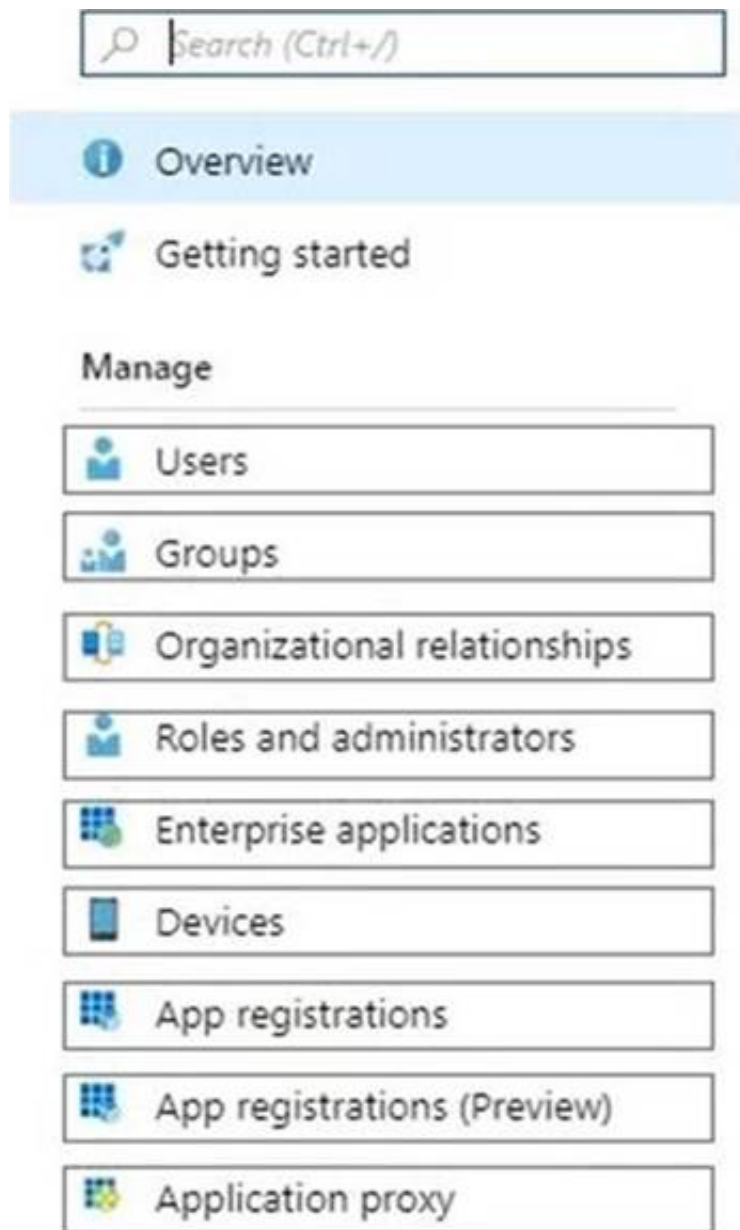

NEW QUESTION 74

- (Exam Topic 2)

You need to meet the technical requirements for Windows AutoPilot.

Which two settings should you configure from the Azure Active Directory blade? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-reset>

NEW QUESTION 75

- (Exam Topic 2)

You need to capture the required information for the sales department computers to meet the technical requirements. Which Windows PowerShell command should you run first?

- A. Install-Module WindowsAutoPilotIntune
- B. Install-Script Get-WindowsAutoPilotInfo
- C. Import-AutoPilotCSV
- D. Get-WindowsAutoPilotInfo

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/existing-devices>

"This topic describes how to convert Windows 7 or Windows 8.1 domain-joined computers to Windows 10 devices joined to either Azure Active Directory or Active Directory (Hybrid Azure AD Join) by using Windows Autopilot"

NEW QUESTION 79

- (Exam Topic 1)

You implement the planned changes for Connection1 and Connection2

How many VPN connections will there be for User1 when the user signs in to Device 1 and Device2? To answer select the appropriate options in the answer area.

NOTE; Each correct selection is worth one point.

Answer Area

Device1:

1
2
3
4
5

Device2:

1
2
3
4
5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Device1:

1
2
3
4
5

Device2:

1
2
3
4
5

NEW QUESTION 83

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 100 iOS devices enrolled in Microsoft Intune. You need to ensure that notifications of iOS updates are deferred for 30 days after the updates are released. What should you create?

- A. a device configuration profile based on the Device features template
- B. a device configuration profile based on the Device restrictions template
- C. an update policy for iOS/iPadOS
- D. an iOS app provisioning profile

Answer: C

Explanation:

Manage iOS/iPadOS software update policies in Intune, delay visibility of software updates.
When you use update policies for iOS, you might have need to delay visibility of an iOS software update. Reasons to delay visibility include:
Prevent users from updating the OS manually
To deploy an older update while preventing users from installing a more recent one
To delay visibility, deploy a device restriction template that configures the following settings: Defer software updates = Yes
This doesn't affect any scheduled updates. It represents days before software updates are visible to end users after release.
Delay default visibility of software updates = 1 to 90 90 days is the maximum delay that Apple supports.
Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/software-updates-ios>

NEW QUESTION 87

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named User1. User1 has a user principal name (UPN) of user1@contoso.com.
You join a Windows 10 device named Client1 to contoso.com.
You need to add User1 to the local Administrators group of Client1.
How should you complete the command? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

net accounts
net localgroup
net user

Administrators /add "

AzureAD
CONTOSO
UPN

\user1@contoso.com"

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

net accounts
net localgroup
net user

Administrators /add "

AzureAD
CONTOSO
UPN

\user1@contoso.com"

NEW QUESTION 91

- (Exam Topic 4)
You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to manage devices. You have a Windows 11 device named Device1 that is enrolled in Intune. Device1 has been offline for 30 days. You need to remove Device1 from Intune immediately. The solution must ensure that if the device checks in again, any apps and data provisioned by Intune are removed. User-installed apps, personal data, and OEM-installed apps must be retained. What should you use?

- A. a Delete action
- B. a Retire action
- C. a Fresh Start action
- D. an Autopilot Reset action

Answer: B

Explanation:

A retire action removes a device from Intune management and removes any apps and data provisioned by Intune. User-installed apps, personal data, and OEM-installed apps are retained. A retire action can be performed on devices that are offline for more than 30 days. References: <https://docs.microsoft.com/en-us/mem/intune/remote-actions/devices-wipe>

NEW QUESTION 92

- (Exam Topic 4)
You have a Microsoft 365 tenant that uses Microsoft Intune. You use the Company Portal app to access and install published apps to enrolled devices. From the Microsoft Intune admin center, you add a Microsoft Store app. Which two App information types are visible in the Company Portal? NOTE: Each correct selection is worth one point.

- A. Privacy URL
- B. Information URL
- C. Developer
- D. Owner

Answer: AC

NEW QUESTION 93

- (Exam Topic 4)
You have two computers that run Windows 10. The computers are enrolled in Microsoft Intune as shown in the following table.

Name	Member of
Computer1	Group1
Computer2	Group1, Group2

Windows 10 update rings are defined in Intune as shown in the following table.

Name	Quality deferral (days)	Assigned
Ring1	3	Yes
Ring2	10	Yes

You assign the update rings as shown in the following table.

Name	Include	Exclude
Ring1	Group1	Group2
Ring2	Group2	Group1

What is the effect of the configurations on Computer1 and Computer2? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Quality deferral on Computer1:

▼

3 days
7 days
10 days
13 days
No effect

Quality deferral on Computer2:

▼

3 days
7 days
10 days
13 days
No effect

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated

Computer1 and Computer2 are members of Group1. Ring1 is applied to Group1.

Note: The term "Exclude" is misleading. It means that the ring is not applied to that group, rather than that group being blocked.

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-wufb-intune> <https://allthingscloud.blog/configure-windows-update-business-using-microsoft-intune/>

NEW QUESTION 96

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains a user named User1. The subscription contains devices enrolled in Microsoft intune as shown in the following table.

Name	Platform	Member of	Description
Device1	Windows 11	Group1	Disk encryption is not configured.
Device2	Windows 10	Group2	Disk encryption is configured.
Device3	Android	Group3	Device local storage is not encrypted.

Microsoft Edge is available on all the devices.

Intune has the device compliance policies shown in the following table.

Name	Platform	Setting	Applied to
Compliance1	Windows 10 and later	Require encryption of data storage on device	Group2
Compliance2	Android Enterprise	Require encryption of data storage on device	Group3

The Compliance policy settings are configured as shown in the exhibit. (Click the Exhibit tab.) You create the following Conditional Access policy:

Compliance policies | Compliance policy settings

Save Discard

These settings configure the way the compliance service treats devices. Each device evaluates these as a "Built-in Device Compliance Policy", which is reflected in device monitoring.

Mark devices with no compliance policy assigned as ☒ Compliant

Enhanced jailbreak detection ☐ Disabled

Compliance status validity period (days)

- Name: Policy1
- Assignments
 - o Users and groups: User1
 - o Cloud apps or actions: Office 365 SharePoint Online
- Access controls
 - o Grant Require device to be marked as compliant
- Enable policy: On

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can access Microsoft SharePoint Online from Device1 by using Microsoft Edge.	<input type="radio"/>	<input type="radio"/>
User1 can access Microsoft SharePoint Online from Device2 by using Microsoft Edge.	<input type="radio"/>	<input type="radio"/>
User1 can access Microsoft SharePoint Online from Device3 by using Microsoft Edge.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User1 can access Microsoft SharePoint Online from Device1 by using Microsoft Edge.	<input type="radio"/>	<input checked="" type="radio"/>
User1 can access Microsoft SharePoint Online from Device2 by using Microsoft Edge.	<input checked="" type="radio"/>	<input type="radio"/>
User1 can access Microsoft SharePoint Online from Device3 by using Microsoft Edge.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 98

- (Exam Topic 4)

You have groups that use the Dynamic Device membership type as shown in the following table.

Name	Syntax
Group1	(device.deviceOwnership -eq "Company")
Group2	(device.deviceOwnership -eq "Personal")

You are deploying Microsoft 365 apps.

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Ownership	Platform
LT1	Company	Windows 10 Enterprise x64
LT2	Personal	Windows 10 Enterprise x64
LT3	Company	MacOS Big Sur

In the Microsoft Endpoint Manager admin center, you create a Microsoft 365 Apps app as shown in the exhibit. (Click the Exhibit tab.)

App Information [Edit](#)

Name	Microsoft 365 Apps for Windows 10
Description	Microsoft 365 Apps for Windows 10
Publisher	Microsoft
Category	Productivity
Show this as a featured app in the Company Portal	No
Information URL	https://products.office.com/en-us/explore-office-for-home
Privacy URL	https://privacy.microsoft.com/en-US/privacystatement
Developer	Microsoft
Owner	Microsoft
Notes	...
Logo	
Architecture	Teams, Word
Update channel	64-bit
Remove other versions	Current Channel
Version to install	Yes
Use shared computer activation	Latest
Accept the Microsoft Software License	No
Teams on behalf of users	No
Install background service for Microsoft Search in Bing	No
Apps to be installed as part of the suite	1 language(s) selected

Assignments [Edit](#)

Group mode	Group
<input type="radio"/> Required	
<input checked="" type="radio"/> Included	Group1
Available for enrolled devices	

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
LT1 will have Microsoft Office 365 installed	<input type="radio"/>	<input type="radio"/>
LT2 will have Microsoft Office 365 installed	<input type="radio"/>	<input type="radio"/>
LT3 will have Microsoft Office 365 installed	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add-office365>

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-deploy> <https://docs.microsoft.com/en-us/mem/intune/apps/apps-add>

NEW QUESTION 100

- (Exam Topic 4)

You have an Azure AD tenant named contoso.com.

You plan to use Windows Autopilot to configure the Windows 10 devices shown in the following table.

Name	Memory	TPM
Device1	16 GB	None
Device2	8 GB	Version 1.2
Device3	4 GB	Version 2.0

Which devices can be configured by using Windows Autopilot self-deploying mode?

- A. Device2 only
- B. Device3 only
- C. Device2 and Device3 only
- D. Device 1, Device2, and Device3

Answer: C

Explanation:

Windows Autopilot self-deploying mode requires devices that have a firmware-embedded activation key for Windows 10 Pro or Windows 11 Pro. This feature allows devices to automatically activate Windows Enterprise edition using the subscription license assigned to the user. Device1 does not have a firmware-embedded activation key, so it cannot use self-deploying mode. Device2 and Device3 have firmware-embedded activation keys for Windows 10 Pro, so they can use self-deploying mode. References: Windows Autopilot self-deploying mode (Public Preview), Deploy Windows Enterprise licenses

NEW QUESTION 104

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to deploy and manage Windows devices.

You have 100 devices from users that left your company.

You need to repurpose the devices for new users by removing all the data and applications installed by the previous users. The solution must minimize administrative effort.

What should you do?

- A. Deploy a new configuration profile to the devices.
- B. Perform a Windows Autopilot reset on the devices.
- C. Perform an in-place upgrade on the devices.
- D. Perform a clean installation of Windows 11 on the devices.

Answer: B

NEW QUESTION 106

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

You need to ensure that the startup performance of managed Windows 11 devices is captured and available for review in the Intune admin center.

What should you configure?

- A. the Azure Monitor agent
- B. a device compliance policy
- C. a Conditional Access policy
- D. an Intune data collection policy

Answer: D

NEW QUESTION 108

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to manage devices.

You need to review the startup times and restart frequencies of the devices. What should you use?

- A. Azure Monitor
- B. Intune Data Warehouse
- C. Microsoft Defender for Endpoint
- D. Endpoint analytics

Answer: D

Explanation:

Endpoint analytics is a feature of Microsoft Intune that provides insights into the performance and health of devices. You can use endpoint analytics to review the startup times and restart frequencies of the devices, as well as other metrics such as sign-in times, battery life, app reliability, and software inventory. References: <https://docs.microsoft.com/en-us/mem/analytics/overview>

NEW QUESTION 110

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains a user named User1 and uses Microsoft Intune Suite. You use Microsoft Intune to manage devices that run Windows 11.

User1 provides remote support for 75 devices in the marketing department.

You need to add User1 to the Remote Desktop Users group on each marketing department device. What should you configure?

- A. an app configuration policy
- B. a device compliance policy

- C. an account protection policy
- D. a device configuration profile

Answer: D

NEW QUESTION 113

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune. You plan to manage Windows updates by using Intune. You create an update ring for Windows 10 and later and configure the User experience settings for the ring as shown in the following exhibit.

User experience settings

Automatic update behavior ⓘ	Auto install and restart at maintenance time
Active hours start * ⓘ	8 AM
Active hours end * ⓘ	5 PM
Restart checks ⓘ	Allow Skip
Option to pause Windows updates ⓘ	Enable Disable
Option to check for Windows updates ⓘ	Enable Disable
Change notification update level ⓘ	Use the default Windows Update notifications
Use deadline settings ⓘ	Allow Not configured
Deadline for feature updates ⓘ	5 ✓
Deadline for quality updates ⓘ	2 ✓
Grace period ⓘ	1 ✓
Auto reboot before deadline ⓘ	Yes No

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Answer Area

Automatic restarts are blocked [answer choice].	between 8 AM and 5 PM before 8 AM between 8 AM and 5 PM after 5 PM
A restart will be forced on a device [answer choice] after the deadline.	5 days 1 day 2 days 5 days

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Automatic restarts are blocked [answer choice].	between 8 AM and 5 PM before 8 AM between 8 AM and 5 PM after 5 PM
A restart will be forced on a device [answer choice] after the deadline.	5 days 1 day 2 days 5 days

NEW QUESTION 117

- (Exam Topic 4)

You have an Azure AD tenant named contoso.com that contains the devices shown in the following table.

Name	Operating system
Device1	Windows 10
Device2	Android 8.0
Device3	Android 9
Device4	iOS 11.0
Device5	iOS 11.4.1

AH devices contain an app named App1 and are enrolled in Microsoft Intune.

You need to prevent users from copying data from App1 and pasting the data into other apps.

Which type of policy and how many policies should you create in Intune? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Policy type:

Minimum number of policies:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

of Corre Answer Only: The correct answer is app protection policy because it allows you to customize the settings of apps for iOS/iPadOS or Android devices1. One of the settings you can configure is Restrict cut, copy, and paste between other apps, which lets you prevent users from copying data from App1 and pasting the data into other apps2. You only need one policy to apply this setting to all devices that have App1 installed. References: 1: App configuration policies for Microsoft Intune | Microsoft Learn <https://learn.microsoft.com/en-us/mem/intune/apps/app-configuration-policies-overview> 2: Troubleshoot restricting cut, copy, and paste between applications - Intune | Microsoft Learn <https://learn.microsoft.com/en-us/troubleshoot/mem/intune/app-protection-policies/troubleshoot-cut-copy-paste>

NEW QUESTION 122

- (Exam Topic 4)

You have 100 computers that run Windows 10 and connect to an Azure Log Analytics workspace.

Which three types of data can you collect from the computers by using Log Analytics? Each correct answer a complete solution.

NOTE: Each correct selection is worth one point.

- A. error events from the System log
- B. failure events from the Security log
- C. third-party application logs stored as text files
- D. the list of processes and their execution times
- E. the average processor utilization

Answer: ACE

Explanation:

You can collect error events from the System log, third-party application logs stored as text files, and the average processor utilization from the computers by using Log Analytics. These are some of the types of data that you can collect by using data sources such as Windows event logs, custom logs, and performance counters. You cannot collect failure events from the Security log or the list of processes and their execution times by using Log Analytics. References: <https://docs.microsoft.com/en-us/azure/azure-monitor/agents/data-sources-overview>

NEW QUESTION 124

- (Exam Topic 4)

You have an on-premises server named Server1 that hosts a Microsoft Deployment Toolkit (MDT) deployment share named MDT1. You need to ensure that MDT1 supports multicast deployments. What should you install on Server1?

- A. Multipath I/O (MPIO)
- B. Multipoint Connector
- C. Windows Deployment Services (WDS)
- D. Windows Server Update Services (WSUS)

Answer: C

NEW QUESTION 129

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that uses Microsoft Intune. The subscription contains the users shown in the following table.

Name	Member of
User1	Group1, Group2
User2	Group2
User3	Group3

Group2 and Group3 are members of Group1. All the users use Microsoft Excel.

From the Microsoft Endpoint Manager admin center, you create the policies shown in the following table.

Name	Type	Priority	Assigned to	Default file format for Excel
Policy1	Policies for Office apps	0	Group1	OpenDocument Spreadsheet (*.ods)
Policy2	Policies for Office apps	1	Group2	Excel Binary Workbook (*.xlsb)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
When User1 saves a new spreadsheet, the .ods format is used.	<input type="radio"/>	<input type="radio"/>
When User2 saves a new spreadsheet, the .xlsb format is used.	<input type="radio"/>	<input type="radio"/>
When User3 saves a new spreadsheet, the .xlsx format is used.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

User1 is member of Group1 and Group2.

Policy1 with priority 0 is assigned to Group1: default file format for Excel is.ods. Policy2 with priority 1 is assigned to Group2: default file format for Excel is.xlsb.

Note: Key points to remember about policy order

Policies are assigned an order of priority. Devices receive the first applied policy only.

You can change the order of priority for policies. Default policies are given the lowest order of priority. Box 2: Yes

User2 is member of Group2.

Group2 and Group3 are members of Group1. Box 3: No

User3 is member of Group3.

Group2 and Group3 are members of Group1.

Reference: <https://learn.microsoft.com/en-us/microsoft-365/security/defender-business/mdb-policy-order>

NEW QUESTION 133

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You have devices enrolled in Microsoft Intune as shown in the following table. To which devices can you deploy apps by using Intune?

- A. Device1 only
- B. Device1 and Device2 only
- C. Device1 and Device3 only
- D. Device1, Device2, and Device3 only
- E. Device1, Device2, Device3, and Device4

Answer: E

NEW QUESTION 138

- (Exam Topic 4)

You have an Azure Active Directory Premium Plan 2 subscription that contains the users shown in the following table.

Name	Member of	Assigned license
User1	Group1	Enterprise Mobility + Security E5
User2	Group2	Enterprise Mobility + Security E5

You purchase the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	Android

You configure automatic mobile device management (MDM) and mobile application management (MAM) enrollment by using the following settings:

- MDM user scope: Group1
- MAM user scope: Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If User1 registers Device1 in contoso.com, Device1 is enrolled automatically in Microsoft Intune.	<input type="radio"/>	<input type="radio"/>
If User1 joins Device1 to contoso.com, Device2 is enrolled automatically in Microsoft Intune.	<input type="radio"/>	<input type="radio"/>
If User2 registers Device3 in contoso.com, Device3 is enrolled automatically in Microsoft Intune.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference: <https://docs.microsoft.com/en-us/mem/intune/enrollment/android-enroll> <https://powerautomate.microsoft.com/fr-fr/blog/mam-flow-mobile/>

NEW QUESTION 140

- (Exam Topic 4)

You have devices that are not rooted enrolled in Microsoft Intune as shown in the following table.

Name	Platform	IP address
Device1	Windows	192.168.10.35
Device2	Android	10.10.10.40
Device3	Android	192.168.10.10

The devices are members of a group named Group1.

In Intune, you create a device compliance location that has the following configurations:

- Name: Network1
- IPv4 range: 192.168.0.0/16

In Intune, you create a device compliance policy for the Android platform. The policy has the following configurations:

- Name: Policy1
- Device health: Rooted devices: Block
- Locations: Location: Network1
- Mark device noncompliant: Immediately
- Assigned: Group1

The Intune device compliance policy has the following configurations:

- Mark devices with no compliance policy assigned as: Compliant
- Enhanced jailbreak detection: Enabled
- Compliance status validity period (days): 20

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device2 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device3 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Device1 is marked as compliant. = No Device2 is marked as compliant. = Yes Device3 is marked as compliant. = No

- Device1 is marked as noncompliant because it is rooted and the device compliance policy Policy1 blocks rooted devices under the Device health setting1.
- Device2 is marked as compliant because it is not rooted and it is within the network location Network1 that is specified in the device compliance policy Policy11.
- Device3 is marked as noncompliant because it is outside the network location Network1 that is specified in the device compliance policy Policy11. The device compliance location setting requires devices to be in a specific network range to be compliant2.

NEW QUESTION 141

- (Exam Topic 4)

You use the Microsoft Deployment Toolkit (MDT) to manage Windows 11 deployments. From Deployment Workbench, you modify the WinPE settings and add PowerShell support. You need to generate a new set of WinPE boot image files that contain the updated settings. What should you do?

- A. From the Deployment Shares node, update the deployment share.
- B. From the Advanced Configuration node, create new media.
- C. From the Packages node, import a new operating system package
- D. From the Operating Systems node, import a new operating system.

Answer: A

NEW QUESTION 145

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains the groups shown in the following table.

Name	Description
Group1	Azure AD group that contains a user named User1
Group2	Azure AD group that contains iOS devices

You create a Conditional Access policy named CAPolicy1 that will block access to Microsoft Exchange Online from iOS devices. You assign CAPolicy1 to Group1. You discover that User1 can still connect to Exchange Online from an iOS device. You need to ensure that CAPolicy1 is enforced. What should you do?

- A. Configure a new terms of use (TOU).
- B. Assign CAPolicy1 to Group2.
- C. Enable CAPolicy1
- D. Add a condition in CAPolicy1 to filter for devices.

Answer: B

Explanation:

Common signals that Conditional Access can take in to account when making a policy decision include the following signals:

* User or group membership

Policies can be targeted to specific users and groups giving administrators fine-grained control over access.

* Device

Users with devices of specific platforms or marked with a specific state can be used when enforcing Conditional Access policies.

Use filters for devices to target policies to specific devices like privileged access workstations.

* Etc.

Reference: <https://learn.microsoft.com/en-us/azure/active-directory/conditional-access/overview>

NEW QUESTION 150

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 11. You need to enable the Windows Remote Management (WinRM) service on Computer1 and perform the following configurations:

- For the WinRM service, set Startup type to Automatic.
- Create a listener that accepts requests from any IP address.
- Enable a firewall exception for WS-Management communications. Which PowerShell cmdlet should you use?

- A. Connect-WSMan
- B. Enable-PSRemoting
- C. Invoke-WSManAction
- D. Enable-PSSessionConfiguration

Answer: B

NEW QUESTION 153

- (Exam Topic 4)

You have computers that run Windows 10 and are managed by using Microsoft Intune. Users store their files in a folder named D:\Folder1.

You need to ensure that only a trusted list of applications is granted write access to D:\Folder1. What should you configure in the device configuration profile?

- A. Microsoft Defender Exploit Guard
- B. Microsoft Defender Application Guard

- C. Microsoft Defender SmartScreen
- D. Microsoft Defender Application Control

Answer: A

NEW QUESTION 156

- (Exam Topic 4)

You use Microsoft Defender for Endpoint to protect computers that run Windows 10.

You need to assess the differences between the configuration of Microsoft Defender for Endpoint and the Microsoft-recommended configuration baseline.

Which tool should you use?

- A. Microsoft Defender for Endpoint Power 81 app
- B. Microsoft Secure Score
- C. Endpoint Analytics
- D. Microsoft 365 Defender portal

Answer: B

NEW QUESTION 161

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to manage devices.

You have the devices shown in the following table.

Name	Operating system	Activation type
Device1	Windows 10 Pro for Workstation	Key
Device2	Windows 11 Pro	Key
Device3	Windows 11 Pro	Subscription

Which devices can be changed to Windows 11 Enterprise by using subscription activation?

- A. Device3 only
- B. Device2 and Device3 only
- C. Device 1 and Device2 only
- D. Device1, Device2, and Device3

Answer: A

NEW QUESTION 162

- (Exam Topic 4)

You have 25 computers that run Windows 10 Pro.

You have a Microsoft 365 E5 subscription that uses Microsoft Intune.

You need to upgrade the computers to Windows 11 Enterprise by using an in-place upgrade. The solution must minimize administrative effort.

What should you use?

- A. Microsoft Deployment Toolkit (MDT) and a default image of Windows 11 Enterprise
- B. Microsoft Configuration Manager and a custom image of Windows 11 Enterprise
- C. Windows Autopilot
- D. Subscription Activation

Answer: C

NEW QUESTION 167

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 500 computers that run Windows 11. The computers are Azure AD joined and are enrolled in Microsoft Intune.

You plan to manage Microsoft Defender Antivirus on the computers. You need to prevent users from disabling Microsoft Defender Antivirus. What should you do?

- A. From the Microsoft Intune admin center, create a security baseline.
- B. From the Microsoft 365 Defender portal, enable tamper protection.
- C. From the Microsoft Intune admin center, create an account protection policy.
- D. From the Microsoft Intune admin center, create an endpoint detection and response (EDR) policy.

Answer: B

Explanation:

Tamper protection is a feature of Microsoft Defender Antivirus that prevents users or malicious software from disabling or modifying the antivirus settings. Tamper protection can be enabled from the Microsoft 365 Defender portal for devices that are Azure AD joined and enrolled in Microsoft Intune. This will prevent users from turning off Microsoft Defender Antivirus or changing its configuration through Windows Security, PowerShell, Registry, or Group Policy. References: [Enable tamper protection]

NEW QUESTION 172

- (Exam Topic 4)

You have a hybrid Azure AD tenant.

You configure a Windows Autopilot deployment profile as shown in the following exhibit.

Create profile

Windows PC

1 Basics 2 Out-of-box experience (OOBE) 3 Scope tags 4 Assignments 5 Review + create

Configure the out-of-box experience for your Autopilot devices

* Deployment mode ? User-Driven

* Join to Azure AD as ? Azure AD joined

? The default value for diagnostic data collection has changed for devices running Windows 10, version 1903 and later. Learn more

Hide change account options ? Show Hide

User account type ? Administrator Standard

Allow White Glove OOBE ? No Yes

Apply device name template ? No Yes

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Answer Area

To apply the profile to a new computer, you must first

▼

join the device to Azure AD

enroll the device in Microsoft Intune

import a CSV file into Windows Autopilot

When the Windows Autopilot profile is applied to a computer, the computer will be

▼

joined to Azure AD only

registered in Azure AD only

joined to Active Directory only

joined to Active Directory and registered in Azure AD

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

To apply the profile to a new computer, you must first

▼

join the device to Azure AD

enroll the device in Microsoft Intune

When the Windows Autopilot profile is applied to a computer, the computer will be

▼

joined to Azure AD only

registered in Azure AD only

joined to Active Directory only

joined to Active Directory and registered in Azure AD

NEW QUESTION 177

- (Exam Topic 4)

Your company standardizes on Windows 10 Enterprise for all users.

Some users purchase their own computer from a retail store. The computers run Windows 10 Pro. You need to recommend a solution to upgrade the computers to Windows 10 Enterprise, join the computers to Azure AD, and install several Microsoft Store apps. The solution must meet the following requirements:

- Ensure that any applications installed by the users are retained.
- Minimize user intervention.

What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Windows Autopilot
- B. Microsoft Deployment Toolkit (MDT)
- C. a Windows Configuration Designer provisioning package
- D. Windows Deployment Services (WDS)

Answer: A

NEW QUESTION 181

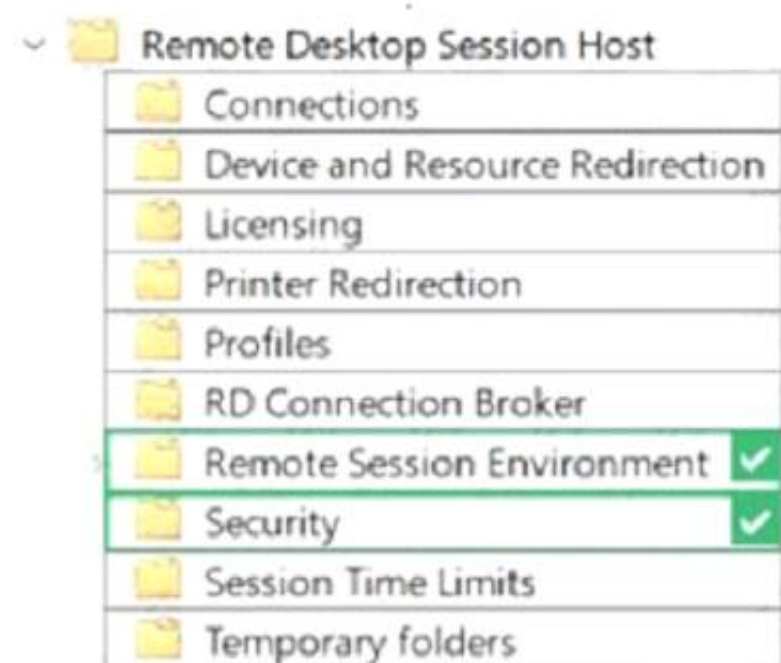

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1.000 computers that run Windows 11.

You need to configure the Remote Desktop settings of all the computers. The solution must meet the following requirements:

- Prevent the sharing of clipboard contents.
- Ensure that users authenticate by using Network Level Authentication (NLA).

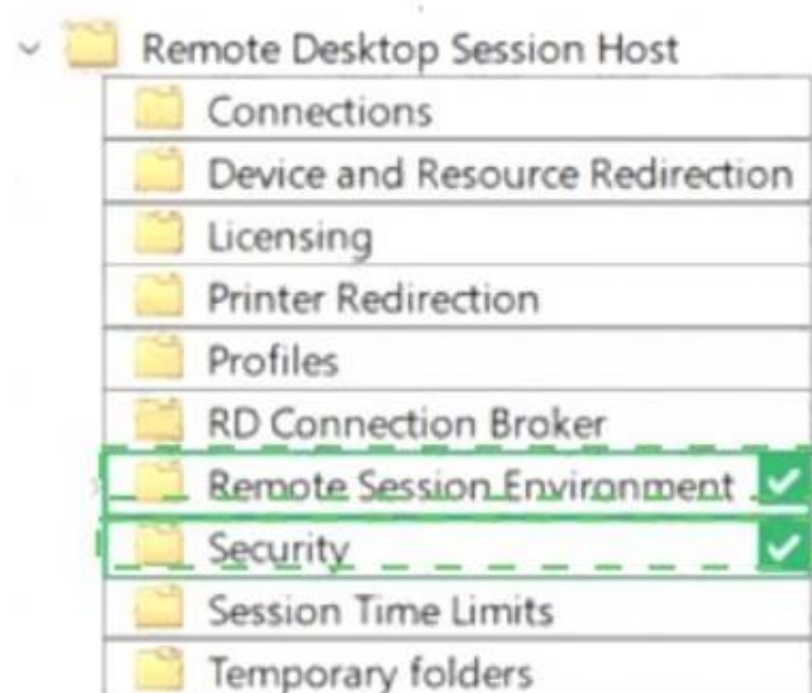

Which two nodes of the Group Policy Management Editor should you use? To answer, select the appropriate nodes in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 183

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You need provide a user the ability to disable Security defaults and principle of least privilege. Which role should you assign to the user?

- A. Global Administrator
- B. Conditional Access Administrator

C. Security Administrator
D. Intune Administrator

Answer: B

Explanation:

To enable or disable security defaults in your directory, sign in to the Azure portal as a security administrator, Conditional Access administrator, or global administrator.

Note: Conditional Access Administrator

Users with this role have the ability to manage Azure Active Directory Conditional Access settings.
