NEW QUESTION 35

- (Topic 5)

You have a Microsoft Office 365 subscription.

You plan to upgrade from Microsoft Skype for Business to Microsoft Teams. You use the following workloads in Skype for Business:

- ? Audio/video conferencing
- ? Dial-in conferencing
- ? Enterprise Voice
- ? Persistent Chat
- ? Chat

You need to ensure that users can evaluate Microsoft Teams while maintaining PSTN calling by using the Skype for Business client.

Which coexistence mode should you use?

NEW QUESTION 38

- (Topic 5)

You have a Microsoft 365 subscription that uses Microsoft Teams. Users report poor call quality.

You need to identify whether Teams calls use TCP or UDP. What should you review in the Microsoft Call Quality Dashboard?

- A. Quality of Experience Reports
- B. Quality Drill Down Reports
- C. Endpoint Reports
- D. Reliability Reports

Answer: C

Explanation:

According to the Microsoft documentation3, you can use Endpoint Reports in the Microsoft Call Quality Dashboard (CQD) to identify whether Teams calls use TCP or UDP. Endpoint Reports show information about the devices and networks used in Teams calls and meetings, such as device name, manufacturer, model, OS version, network type, IP address, and transport protocol (TCP or UDP).

To access Endpoint Reports in CQD, you need to follow these steps3:

- ? Sign in to CQD with your admin account.
- ? In the left navigation pane, select Reports > Endpoint.
- ? In the report list page, select one of the predefined endpoint reports, such as Endpoint by Manufacturer or Endpoint by Network Type.
- ? In the report details page, you can see various metrics and filters for the selected report. You can also customize the report by adding or removing dimensions

and measures.

? To see whether Teams calls use TCP or UDP, you need to add Transport Protocol as a dimension to the report. To do this, select Add dimension, and then select Transport Protocol from the drop-down list.

? The report will show the distribution of TCP and UDP usage for Teams calls based on the selected report type.

Your company has a Microsoft 365 subscription.

You need to prevent a user named User1 from permanently deleting private chats in Microsoft Teams.

Solution: You create an In-Place Hold for the Microsoft SharePoint site used by Microsoft Team.

Does this meet the goal?

A. Yes

B. No

Answer: B

NEW QUESTION 45

- (Topic 5)

You have a Microsoft 365 subscription that uses Microsoft Teams.

You need to identify which teams were inactive during the past 90 days. What should you use?

A. Teams advisor

B. the Office 365 Groups activity report

C. the Teams user activity report

D. the Teams usage report

Answer: D

Explanation:

According to the Microsoft documentation¹, you can use the Teams usage report in the Microsoft Teams admin center to get an overview of the usage activity in Teams. This includes the number of active users, channels, guests, and post messages via chat and conversations to know how many users in each team are actively using Teams to communicate and collaborate. However, this report only shows the last 7 or 28 days of activity of teams, which may not be enough to identify inactive teams over a longer period. Alternatively, you can use PowerShell scripts to generate activity reports that check the audit records of inactive teams

and provide an HTML report file based on SharePoint site activity in the group's document library in the past 90 days and conversations that occurred in the mailbox in the past year². However, this method requires writing complex and time- consuming PowerShell commands, which may not be feasible for administrators who need to produce multiple reports on a daily basis.

Another method to detect inactive teams in your Teams environment is by setting an expiration policy for the associated group in Azure AD. This notifies the owner of the team or group by sending an email to renew or delete the team after specified days if no activity is detected³. However, this method also has some drawbacks, such as:

- ? The owner may fail to notice the email or renew the team within the timeline of the configured policy, resulting in the team being deleted automatically and not being restorable after 30 days.
- ? The expiration policy applies to all Microsoft 365 groups in an Azure AD organization, not just Teams. This may affect other groups that are not related to Teams.
- ? The expiration policy requires Azure AD Premium licenses for the members of all groups to which the policy is applied.

Therefore, based on this information, the correct answer is D. the Teams usage report. This report is the most straightforward and accessible way to find inactive teams in Microsoft Teams, even though it has some limitations. The other options are either not related to finding inactive teams (Teams advisor) or require additional licenses or permissions (the Office 365 Groups activity report and the Teams user activity report).

Team members can upload apps from the Microsoft Teams client.	<input type="radio"/>	<input type="radio"/>
All team members can add the Microsoft Flow app to a team.	<input type="radio"/>	<input type="radio"/>
All team members can add the Microsoft Planner app to a team.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

“Allow interaction with custom apps” in the org-wide policy and “upload custom apps” in the global policy are set to on. This means that users can upload custom apps to teams that allow it and to teams for which they are owners.

Box 2: Yes

The global policy allows Microsoft Flow.

Box 3: No

The global policy allows Microsoft Planner. However, the org-wide settings blocks Microsoft Planner. In this case, the org-wide policy blocking the app will override the global policy meaning the app will be blocked. When an app is blocked, users will not be able to add the app to a team.

Task 9

You need to deploy the Microsoft Viva Connections app to Teams and install the app as the first item on the app bar of the Teams client for all users.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To deploy the Microsoft Viva Connections app to Teams and install the app as the first item on the app bar of the Teams client for all users, you need to use the Teams admin center and PowerShell. Here are the steps to follow:

? Sign in to the Teams admin center with your Microsoft 365 username and password1.

? In the left navigation, go to Teams apps > Manage apps.

? Click Upload and then select the Viva Connections app package that you created using PowerShell2. If you have not created the app package yet, you can follow the instructions in this article to do so.

? After uploading the app package, click on the app name and then click Publish.

? In the left navigation, go to Teams apps > Setup policies.

? Select an existing policy or create a new one by clicking Add.

? In the Setup policy pane, under Installed apps, click Add apps and then select the Viva Connections app from the list.

? Drag and drop the Viva Connections app to reorder it as the first item on the app bar.

? Click Save and then Close.

? To assign the setup policy to all users, you can use PowerShell to run the following cmdlet:

```
Get-CsOnlineUser | Grant-CsTeamsAppSetupPolicy -PolicyName "YourPolicyName"
```

Replace “YourPolicyName” with the name of the policy that you created or modified in step 6.

Note: It may take up to 24 hours for the changes to take effect.

Now, you have deployed and installed the Microsoft Viva Connections app to Teams as the first item on the app bar for all users.

Task 7

You need to acquire a dedicated Microsoft dial-in bridge number from either 431 or 343 area codes in Canada.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To acquire a dedicated Microsoft dial-in bridge number from either 431 or 343 area codes in Canada, you need to use the Teams admin center to request and assign a service number. A service number is a type of phone number that can handle hundreds of simultaneous calls and is used for services such as audio conferencing, auto attendants, and call queues. Here are the steps to follow:

? Sign in to the Teams admin center with your Microsoft 365 username and password1.

? In the left navigation, go to Voice > Phone numbers.

? Click Add (+) and then select New service numbers.

? In the New service numbers pane, select the country or region as Canada, the number type as Toll or Toll-free, and the location as Manitoba (for 431 area code) or Ontario (for 343 area code).

? Enter the quantity of numbers that you need and then click Next.

? Review your order details and then click Submit request.

? Wait for an email confirmation that your request has been processed. This may take up to 24 hours.

? After you receive the confirmation email, go back to the Teams admin center and click Refresh on the Phone numbers page. You should see the new service numbers that you requested.

? To assign a service number to your audio conferencing bridge, go to Meetings > Conference bridges and then click Edit next to Default toll or toll-free number.

? In the Edit default toll or toll-free number pane, select one of the new service numbers that you acquired from the drop-down menu and then click Apply. Now, you have acquired and assigned a dedicated Microsoft dial-in bridge number from either 431 or 343 area codes in Canada.

You need to add the following disclaimer as pan of all Teams meeting invites: “Disc aimer: This meeting may be recorded for quality and training purposes.”

- A. Mastered
- B. Not Mastered

Answer: A**Explanation:**

To add a disclaimer to all Teams meeting invites, you can use the Exchange admin center to create a mail flow rule that applies the disclaimer to meeting requests. Here are the steps to follow:

? Sign in to the Exchange admin center with your Microsoft 365 username and password1.

? In the left navigation, go to Mail flow > Rules.

? Click Add (+) and then select Create a new rule.

? In the New rule pane, enter a name for the rule, such as “Meeting disclaimer”.

? Under Apply this rule if, select A message header includes any of these words.

? In the Specify header name box, enter X-MS-Exchange-Calendar-Meeting- Request. This is a special header that identifies meeting requests2.

? In the Specify words or phrases box, enter True. This means that the rule will apply to any message that has the header set to True.

? Click Add and then OK.

? Under Do the following, select Append the disclaimer.

? In the Specify disclaimer text box, enter the disclaimer text that you want to add to the meeting invites, such as:

Disclaimer: This meeting may be recorded for quality and training purposes.

? Click Enter text and then OK.

? Under Choose a mode for this rule, select Enforce.

? Click Save.

Now, when you or anyone in your organization schedules a Teams meeting, the disclaimer will be added to the meeting invites automatically.

NEW QUESTION 156

- (Topic 5)

You plan to implement a pilot project on Phone System for 100 users. The pilot project will use a Microsoft Calling Plan.

You need to ensure that the users can establish calls to the PSTN. Which cmdlets should you run?

- A. Set-AzureADUserLicense, Set-CSUser, and Set-AzureADUser
- B. Grant-CsOnlineVoiceRoutingPolicy, Set-CsOnlineVoiceUser, and Set-CSUser
- C. Set-AzureADUser, Grant-CsOnlineVoiceRoutingPolicy, and Set-CsOnlineVoiceUser
- D. Set-AzureADUserLicense, Set-CsOnlineVoiceUser, and Set-CSUser

Answer: D

Explanation:

A Microsoft Calling plan requires an additional license. The three cmdlets in this answer assign a phone system license to the user, assigns a phone number to the user and enables the user for Enterprise Voice.

NEW QUESTION 258

- (Topic 5)

You have a Microsoft Office 365 subscription that contains a user named User1.

You need to ensure that User1 can view Usage reports in the Microsoft Teams admin center. The solution must use the principle of least privilege.

Which role should you assign to User1?

- A. Global Administrator
- B. Usage Summary Reports Reader
- C. Helpdesk Administrator
- D. Skype for Business administrator

Answer: B

Explanation:

According to the Microsoft Teams documentation¹, to access the usage reports in the Teams admin center, you must be assigned one of the following roles:

? Global administrator

? Teams or Skype for Business administrator

? Global reader (only tenant-level aggregate and no per-user or team data)

To learn more about Teams admin roles and which reports each admin role can access, see Use Teams administrator roles to manage Teams².

Therefore, based on this information, the correct answer is C. Teams Administrator. This role has the minimum privilege required to view usage reports in the Teams admin center.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft 365 subscription that uses an Azure Active Directory (Azure AD) tenant named contoso.com.

You need to prevent guest users in the tenant from using cameras during Microsoft Teams meetings.

Solution: From Microsoft Teams admin center, you modify the Guest access settings. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Guest access in Teams allows people outside your organization to access teams and channels. When you turn on Guest Access, you can turn on or off features guests users can or can't use.
