Issues that affect outbound direct routing calls
You might experience various issues when you use Direct Routing to make outbound calls from a Microsoft Teams client to a Session Border Controller (SBC). These issues include the following:
An incorrect caller ID is displayed to the call recipient. A connection to the SBC is not established.
Some users in a tenant are unable to make calls. No users in a tenant are able to make calls.
No users are able to make calls
If none of the users are able to make calls, the calls are probably not reaching the SBC. Check for one of the following causes.

You are deploying Teams Rooms to a Windows device.
You need to prevent meeting attendees from using room remote in the Teams mobile app. What should you configure in the Microsoft Teams admin center?

A. Supported meeting mode
B. Coordinated Meetings
C. Front row experience
D. Bluetooth beaconing

Answer: D

Explanation:
Manage a Microsoft Teams Rooms console settings remotely with an XML configuration file
This article discusses remote management of the default settings used by a Microsoft Teams Rooms device. It discusses how to create a master settings file and links to discussions of how to place them as needed on Teams Rooms.
It is possible for you to change default settings of Teams Rooms by updating a master XML file and sending copies to the remote Teams Rooms devices.
Create an XML configuration file
Any text editor can be used to create a settings file. The XML Elements table explains the elements shown in this sample SkypeSettings.xml (required file name) configuration file.
<SkypeSettings>
<AutoScreenShare>1</AutoScreenShare>
<HideMeetingName>1</HideMeetingName>
<AutoExitMeetingEnabled>true</AutoExitMeetingEnabled>
<AudioRenderDefaultDeviceVolume>70</AudioRenderDefaultDeviceVolume>
* Details omitted*
<AllowRoomRemoteEnabled>true</AllowRoomRemoteEnabled> Incorrect:
Not B: If you have one or more Microsoft Teams Rooms on Windows devices or Surface Hubs in a meeting room, you can set up Coordinated Meetings.
Coordinated Meetings lets you set up your Teams Rooms on Windows devices and Surface Hubs so that when you join a meeting on one device, the other devices in the room are also joined to the same meeting. You can configure your cameras, speakers, and microphones so that the ones that give participants the best experience are enabled while others are disabled. This avoids the dreaded echo and feedback noise participants can experience when adding multiple devices to a meeting.
Not C: Front Row layout in Teams Rooms– Additional functionality with the Front Row experience, a layout for hybrid meetings that enables users to see remote attendees at eye level and on dual screens. Users can see Chat in the right panel and participants with raised hands on the left panel. And, Meeting Chat is added in the Gallery, Large Gallery, and Together Mode layouts.

You have a Microsoft Teams Phone deployment.

You need to configure users to include a toll free phone number as part of their meeting invites. Which type of policy should you configure?

A. voice routing
B. audio conferencing
C. customization
D. meeting

Answer: B

Explanation:
Initial assignment of phone numbers that are included in the meeting invites for users

The phone numbers included in the meeting invites of users enabled for Audio Conferencing are defined in the TeamsAudioConferencingPolicy that's assigned to users. When a TeamsAudioConferencingPolicy is assigned to a user, all toll and toll-free phone numbers added in the policy are included in meeting invites for users who have that policy. If a user is assigned a TeamsAudioConferencingPolicy and there aren't any toll or toll-free phone numbers added to the policy, then in that case the phone numbers that appear in the meeting invites of these users are defined by the default conferencing toll phone number and the default conferencing toll-free phone number in each individual user's settings.
