

Microsoft

Exam Questions PL-100

Microsoft Power Platform App Maker

NEW QUESTION 1

DRAG DROP - (Topic 4)

You are developing an app that warehouse workers will run on their phones to perform inventory counts.

You need to design the app.

Which type of control should you use? To answer, drag the appropriate control types to the correct requirements. Each control type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection presents a complete solution.

Control types	Answer Area
<div>Text box</div>	
<div>Combo box</div>	
<div>Slider</div>	
<div>Radio</div>	

Requirement	Control type
Capture decimal numbers.	<div></div>
Select multiple products from a list.	<div></div>
Set the status of a product.	<div></div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Control types	Answer Area
<div>Text box</div>	
<div>Combo box</div>	
<div>Slider</div>	
<div>Radio</div>	

Requirement	Control type
Capture decimal numbers.	<div>Text box</div>
Select multiple products from a list.	<div>Combo box</div>
Set the status of a product.	<div>Radio</div>

NEW QUESTION 2

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up.

Proposed solution: Use a Common Data Service workflow with a PowerQuery on the data entity.

Does the solution meet the goal?

- A. Yes
B. No

Answer: A

Explanation:

Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed.

Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft->

NEW QUESTION 3

DRAG DROP - (Topic 4)

A company has 500 products. Each product is referenced by a product ID. Each product belongs to one of eight product categories.

You are creating an app to manage requests for new products.

The product categories will never change. Categories are defined in the column itself, not in a separate table. The data must be structured in a way that does not allow for misspellings.

Only two new tables should be created in Microsoft Dataverse:

? Products: Holds the products that can be requested.

? Requests: Holds the requests for the product ID and quantity. The products are filtered by product category.

You need to identify the data types to use when building the table columns in Dataverse.

Which data type should you use? To answer, drag the appropriate data types to the correct requirements. Each data type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Data types	Answer Area								
<div>Lookup</div> <div>Choice</div> <div>Text</div>	<table border="1"><thead><tr><th>Scenario</th><th>Data types</th></tr></thead><tbody><tr><td>Create a column in the Products table that displays the category of the product</td><td><div>Data type</div></td></tr><tr><td>Create a column in the Products table for the product ID of the product</td><td><div>Data type</div></td></tr><tr><td>Create a column in the Requests table that allows the user to select form a list of available products</td><td><div>Data type</div></td></tr></tbody></table>	Scenario	Data types	Create a column in the Products table that displays the category of the product	<div>Data type</div>	Create a column in the Products table for the product ID of the product	<div>Data type</div>	Create a column in the Requests table that allows the user to select form a list of available products	<div>Data type</div>
Scenario	Data types								
Create a column in the Products table that displays the category of the product	<div>Data type</div>								
Create a column in the Products table for the product ID of the product	<div>Data type</div>								
Create a column in the Requests table that allows the user to select form a list of available products	<div>Data type</div>								

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Text

Text columns can contain text characters. This column type has several format options that will change the presentation of the text.

Box 2: Lookup

When you create a new lookup column you are creating a new Many-to-One (N:1) table relationship between the table you're working with and the Target Row Type defined for the lookup.

Box 3: Choice

You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form, they can select one, multiple, or all the values displayed in a drop-down list.

NEW QUESTION 4

- (Topic 4)

You are an app designer for a hotel.

The hotel wants to create an app to help the housekeeping staff schedule work. You need to create a new environment for the app.

Where should you create the environment?

- A. Power Platform Admin center
- B. Power Apps Maker portal
- C. Dynamics 365 Admin center

Answer: A

Explanation:

Manage environment in the Power Platform admin center. Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/create-environment>

NEW QUESTION 5

- (Topic 4)

A large construction company has 120 departments. Each department has a Microsoft Teams channel.

The company creates training content for each department. All training content for a department is hosted in the channel for that department You must create a chatbot for the company that helps employees find relevant training. Employees must not be able to modify the chatbot.

You need to create the chatbot

Which three actions should you perform"? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a bot for each departmental channel.
- B. Create one training bot for organization-wide deployment.
- C. Create an entity for each department
- D. Create a topic for each department.
- E. Create a topic for each trade.

Answer: BCD

NEW QUESTION 6

- (Topic 4)

You create a canvas app.

You need to make the app available to other people in your company.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Grant access to individual users in your company.
- B. Share the app with a Microsoft Exchange distribution list.
- C. Grant access to a Microsoft Teams team.
- D. Share the app with a Microsoft Azure Active Directory security group.

Answer: AD

Explanation:

After you build a canvas app that addresses a business need, specify which users in your organization can run the app and which can modify and even reshare it. Specify each user by name, or specify a security group in Azure Active Directory.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/share-app>

NEW QUESTION 7

DRAG DROP - (Topic 4)

You are designing an app to track time off for employees. Employee data, including employee ID number, is stored in an existing data source used by other apps. Employees must be able to look up their employee ID number and enter time-off start and end dates in the app.

You need to configure the elements of the data source.

Which data elements should you use? To answer, drag the appropriate data elements to the correct data. Each data element may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 8

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.

Development and testing must be performed using production data. Multiple testers must be used at each testing stage.

You need to provision and configure new environments for development and testing. Solution:

- ? Provision production environments named P1 and P2.
- ? Copy the current production environment to P1 and P2.
- ? Use P1 for development and P2 for testing.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Production: This is intended to be used for permanent work in an organization. Don't use production environment for development and testing.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/environments-overview>

NEW QUESTION 9

- (Topic 4)

You create a canvas app for technicians at a computer store. You assign technicians cases to work on. The technicians update cases at the end of customer site visit.

The manager wants the technicians to sell warranties to the customers. If a customer agrees to purchase a warranty, technicians use the canvas app to immediately alert the sales team, and then the technician records details about the warranty into the app.

You need to create a flow to alert the sales team. Which type of trigger should you use?

- A. Flow button for mobile
- B. Office 365 Outlook
- C. Common Data Service

Answer: A

Explanation:

Create a button flow to run routine tasks by simply tapping a button. Customize your flow by allowing the user to provide specific details that will be used when the flow runs.

Note: There are many repetitive tasks that we all wish we could run with just a tap of a button. For example, you may need to quickly email your team to remind them to join the daily team sync, or you may want to start a new Visual Studio Codespaces build of your code base after you've been notified that there are no more checkins planned for the day. Button flows allow you to accomplish these and many other tasks simply by tapping a button on your mobile device.

Reference:

<https://docs.microsoft.com/en-us/power-automate/button-flow-with-user-input-tokens>

NEW QUESTION 10

DRAG DROP - (Topic 4)

: 186 DRAG DROP

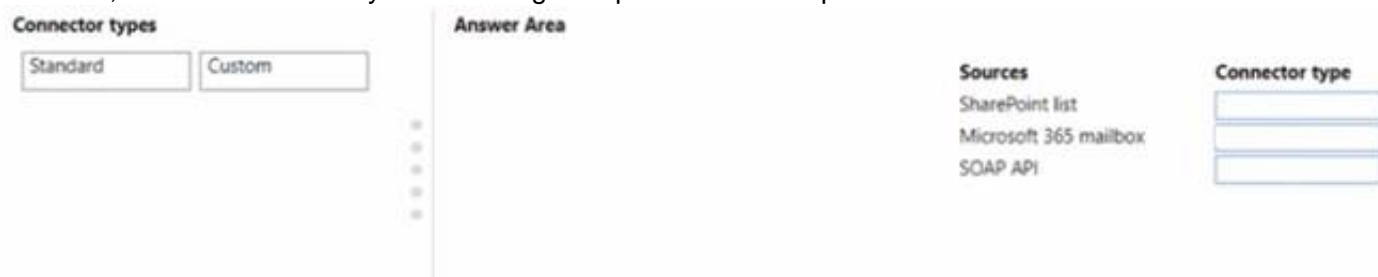

A company uses Power Apps.

The company requires a canvas app that connects to the following sources:

- SharePoint list
- Microsoft 365 mailbox
- SOAP API

You need to select connector types.

Which connector types should you use? To answer, drag the appropriate connector types to the correct sources. Each connector type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 10

- (Topic 4)

You create a canvas app that connects to a Common Data Service database. Users report that they do not see any data in the app.

You need to ensure that users can view data in the app. What should you do?

- A. Share the app with the users
- B. Add a Power Apps license to the users
- C. Assign a security role to the users
- D. Publish the app

Answer: C

Explanation:

Sharing access to the data in the Common Data Service. The users need permission to access the entities the app uses. To grant them access, you will need to:

- * 1. Create a security role
- * 2. Assign users to the security role

Note: Common Data Service for Apps has a powerful enterprise grade security model that allows you to group users in security roles and give those roles varying levels of access to entities that some of our most sophisticated business apps are built on.

Reference:

<https://powerapps.microsoft.com/en-us/blog/sharing-a-canvas-app-built-on-top-of-common-data-service/>
D18912E1457D5D1DDCB40AB3BF70D5D

NEW QUESTION 13

- (Topic 4)

You create a dashboard in Power BI. You share the dashboard with the sales team. Sales team members report that they can see information for the entire company. You need to ensure that the team is able to see only data for their team.

Where must you configure this restriction?

- A. Dashboard
- B. Report
- C. Dataset

D. Settings

Answer: C

Explanation:

Restrict access to the dataset.

Note: Another way of setting access is through manage permission in the dashboard, report, or dataset. If you share a dashboard, by default the report and the dataset will also be shared as read-only for users.

Reference:

<https://radacad.com/dashboard-sharing-and-manage-permissions-in-power-bi-simple-but-useful>

NEW QUESTION 17

- (Topic 4)

A company uses Power Apps in a single Microsoft Dataverse environment.

Users are divided into two groups about not a canvas app should work. The company decides that each group of users will try a version of the app for one week and switch to the other version of the app the following week.

You need to manage the app creation. What should you do?

- A. Create one app with two different version numbers.
- B. Create one app with two different version notes.
- C. Create two apps with the same name.
- D. Create two apps with different app names.

Answer: A

NEW QUESTION 18

- (Topic 4)

Each maker at a company has a separate Common Data Service environment. You are customizing a canvas app. You create two new entities in your environment.

You are leaving for a vacation. Another maker will continue customizing the app in your absence.

You need to transfer the work to the other maker and ensure that you can work on the updated app when you return from your vacation.

What should you export?

- A. unmanaged solution that includes all customizations
- B. the default solution
- C. a managed solution that includes all customizations
- D. the app

Answer: A

Explanation:

Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution.

Reference:

<https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs->

NEW QUESTION 21

- (Topic 4)

A company has an on-premises system that stores product information. The company plans to replace the information with a Power Platform solution that uses the Common Data Service.

The Power Platform solution needs to use data from the product information system. You need to transform and import the data from the product information system. Which two tools should you use? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Dataflow
- B. Business process flow
- C. Power BI Desktop
- D. Data gateway

Answer: AD

Explanation:

The on-premises data gateway acts as a bridge to provide quick and secure data transfer between onpremises data (data that isn't in the cloud) and several Microsoft cloud services. These cloud services include Power BI, PowerApps, Power Automate, Azure Analysis Services, and Azure Logic Apps. By using a gateway, organizations can keep databases and other data sources on their on-premises networks, yet securely use that on-premises data in cloud services. Can use the Power Platform dataflows to load entity in CDS with the option to transform data.

Reference:

<https://docs.microsoft.com/en-us/power-bi/connect-data/service-gateway-onprem> <https://nishantrana.me/2020/07/07/load-data-from-sql-on-premise-to-cds-common-data-service-using-powerplatform-dataflows-in-power-apps/>

NEW QUESTION 23

HOTSPOT - (Topic 4)

You need to create a model-driven app without using code.

Which tools should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Tool
Select the forms and views that the app will use.	<div><div></div><div>Site Map designer</div><div>Solution Explorer</div><div>App designer</div><div>Entity view</div></div>
Design the navigation for the app.	<div><div></div><div>Site Map designer</div><div>Dynamics 365 Admin center</div><div>Microsoft Azure DevOps</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: App designer
As an app maker, you can create and edit public views by using Power Apps.
Box 2: Site Map designer
Site maps define the navigation for your app. Create a site map for your app with ease by using the tile-based site map designer.

NEW QUESTION 25

DRAG DROP - (Topic 4)
A company plans to use Microsoft Power Platform to modernize their business.
Sales commissions are given only to the representatives who sell items from a designated category of products. The company wants to minimize the effort needed to manage data security.
You need to describe how to store real-world objects to the business stakeholders.
What should you use? To answer, drag the appropriate tables to the correct objects. Each table may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Tables

Organization-owned standard table

User-owned standard table

Activity table

Virtual table

Answer Area

Object

Item manufacturer

Item model

Item inventory

Table

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 28

DRAG DROP - (Topic 4)
DRAG DROP
A company uses Microsoft Power Platform. All users in the company have read/write and create access to SharePoint.
You create a canvas app that displays data from a SharePoint list. A group of users must use the app without the ability to change the data source.
You need to shore the app with the users.
What should you do? To answer, drag the appropriate actions to the correct components. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Actions

Send all users an email invitation.

Enable Can use permission.

Set the users as co-owners.

Enable Can edit permission.

Answer Area

Component

Canvas app

SharePoint connection

Action

- A. Mastered
- B. Not Mastered

Answer: A

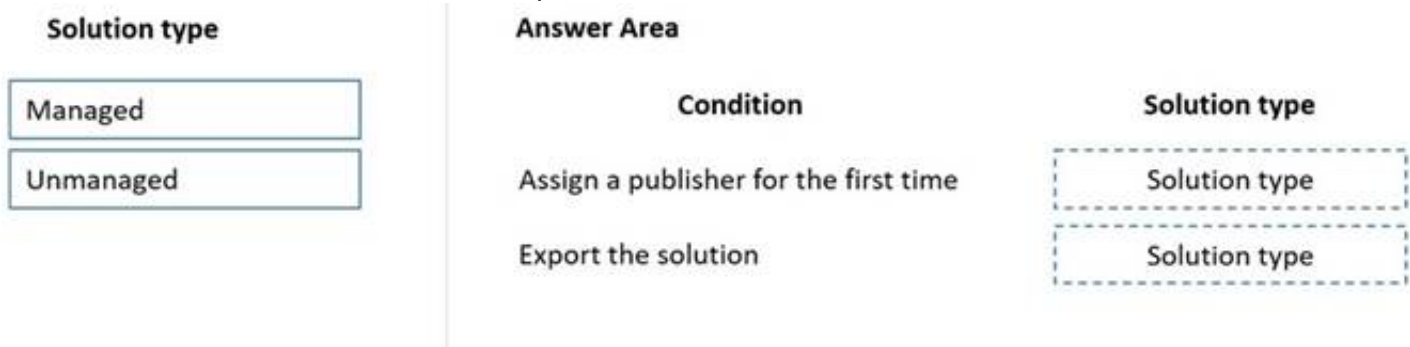

Explanation:

NEW QUESTION 29

DRAG DROP - (Topic 4)
DRAG DROP

A company is creating Power Apps apps for their customer service team. You must create a final released solution to export to their test environment that cannot be changed in the new environment. You need to determine the types of solutions to use. Which type of solution should you use? To answer, drag the appropriate solution types to the correct conditions. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

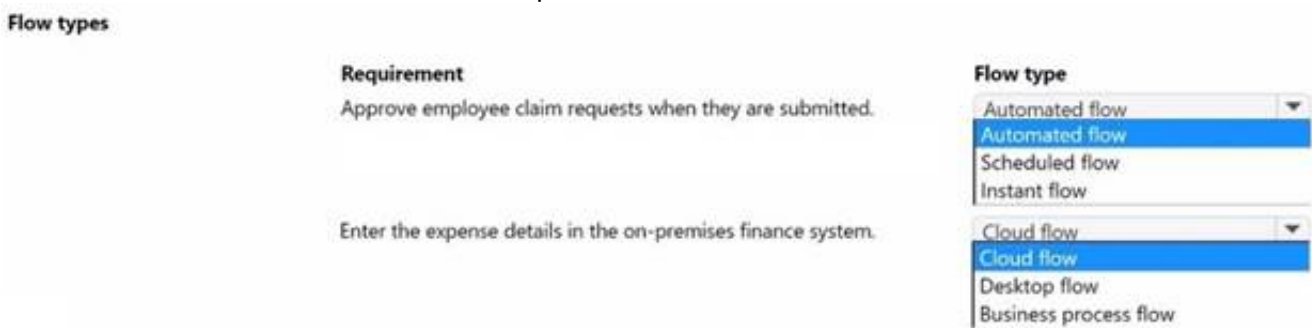

Answer: A

Explanation:

Box 1: Unmanaged
Unmanaged solutions are used in development environments while you make changes to your application.
Box 2: Managed
Managed solutions are used to deploy to any environment that isn't a development environment for that solution.

NEW QUESTION 31

DRAG DROP - (Topic 4)
You create an expense claim app for a manufacturing company. Employees use the app to enter details of their expenses and upload receipts. The company has an on-premises finance system with no APIs. The company requires an automation to enable the manager to approve employee claim requests when they are submitted. After a claim request is approved, the expense details must be entered in the on-premises finance system. You need to create the flow. Which flow type should you use for each requirement? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 34

DRAG DROP - (Topic 4)
DRAG DROP

A company uses Microsoft Power Platform. Users create charts based on specific needs in You create a solution in a development environment. You rebuild personal charts of the users inside the solution. All charts must appear on one page. You need to create a single page that includes all charts without switching to classic. Which three steps should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Create a new dashboard.

Open the solution in the Maker portal.

Add the charts to the dashboard.

Create a new interactive experience dashboard.

NEW QUESTION 36

HOTSPOT - (Topic 4)
HOTSPOT

A company uses Power Apps. The company has a model-driven app that accesses a Microsoft Dataverse table. The app is shared with ail users who all have the Basic User security role. You must prevent the users from running and sharing the app. What should you do? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Prevent users from running the app.

Prevent users from sharing the app.

Action

Turn off the app.

Export the app.

Turn off the app.

Remove access to the table.

Remove access to the table.

Export the app.

Turn off the app.

Remove access to the table.

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement

Prevent users from running the app.

Prevent users from sharing the app.

Action

Turn off the app.

Export the app.

Turn off the app.

Remove access to the table.

Remove access to the table.

Export the app.

Turn off the app.

Remove access to the table.

NEW QUESTION 37

DRAG DROP - (Topic 4)
DRAG DROP

A commercial bakery uses an inventory system to track ingredients consumed in their production line. The workers use iPads to interact with the system and reserve the ingredients for the next batch. Data from the system is extracted as a .csv file. You need to create a Power BI report from the extracted data by using only an iPad. Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Select manual data.

Log into the Power BI service.

Install Power BI Desktop and log in.

Select **Create**.

Select **Use first row as headers**.

Paste the data.

Answer Area

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Actions

Select manual data.

Log into the Power BI service.

Install Power BI Desktop and log in.

Select **Create**.

Select **Use first row as headers**.

Paste the data.

Answer Area

Log into the Power BI service.

Install Power BI Desktop and log in.

Select **Create**.

Select **Use first row as headers**.

Paste the data.

NEW QUESTION 39

- (Topic 4)

You create a canvas app.

A user is not able to determine which field currently has focus. You run App checker to identify errors.

You need to verify that the focused border thickness is set to a value greater than zero. Which section of the App checker results should you check?

- A. Rules
B. Performance
C. Accessibility
D. Runtime

Answer: C

Explanation:

The Accessibility checker classifies each issue as an error, a warning, or a tip based the issue's severity.

Issues include:

? Focus isn't showing

When the FocusBorderThickness of a control is set to 0. It is good practice to ensure a proper color-contrast ratio between the focus border and the control itself so it's clearly visible.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker>

NEW QUESTION 43

DRAG DROP - (Topic 4)

DRAG DROP

A company uses data from a publicly available web service. You plan to create a tabular report by using Power BI Desktop to visualize data from the web service.

The data returned in one column is numeric and must be converted to a corresponding text

You need to create the report and make it available only to co workers.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select

Actions

Create a connection to the web service.

Publish to the Power BI service.

Create a table and input the data from the web service.

Perform data transformation.

Create the visualization.

Publish to AppSource.

Answer area

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 45

- (Topic 4)

A company plans to roll out several Power Apps apps to multiple business units across international operations. The apps must be managed through an application lifecycle management (ALM) solution to provide a consistent and predictable use experience. All changes to the app must be traceable and documented in a single location. You must be able to revert to a previous version of an app. The app release cycles must be as streamlined as possible. You need to create an application for the apps. Which two tools should you use? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Microsoft Azure DevOps
- B. Microsoft Visual Studio
- C. Lifecycle Services
- D. AppSource
- E. Common Data Service

Answer: AD

Explanation:

A: DevOps is the combining of two historically disparate disciplines: software development and IT operations. The primary goal of DevOps is to shorten the software development lifecycle and provide continuous integration and continuous delivery (CI/CD) with high software quality. You can use Power Apps build tools to automate common build and deployment tasks related to Power Apps if your DevOps platform is Azure DevOps.
D: Microsoft AppSource is now embedded in the Dynamics 365 home page and throughout the common navigation. It now includes a private gallery of apps available to you within your company. Select Get more apps from the home page or task pane, and navigate to the My Organization tab to see apps that are available to you.
Reference:
<https://docs.microsoft.com/en-us/power-platform/alm/devops-build-tools> <https://docs.microsoft.com/en-us/powerapps/user/app-source>

NEW QUESTION 46

- (Topic 3)

You need to resolve the instructor's issue and ensure that the same issue does not occur again. What should you use?

- A. Gallery
- B. Combo box
- C. Custom component
- D. Choices

Answer: D

NEW QUESTION 51

- (Topic 3)

You need to design the data model for the cooking classes. What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Data	Component
Dish	<div>Microsoft SharePoint document</div> <div>Custom table</div> <div>Microsoft SharePoint document</div> <div>Global choice</div>
Student type	<div>Connection role</div> <div>Connection role</div> <div>Custom column</div> <div>Lookup column</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Data	Component
Dish	<div> <div>Microsoft SharePoint document</div> <div>Custom table</div> <div>Microsoft SharePoint document</div> <div>Global choice</div> </div>
Student type	<div> <div>Connection role</div> <div>Connection role</div> <div>Custom column</div> <div>Lookup column</div> </div>

NEW QUESTION 56

- (Topic 3)

You need to implement reporting to support the college marketing efforts. Which type of dashboard should you use?

- A. Power BI
- B. Interactive
- C. Model-driven

Answer: A

NEW QUESTION 59

- (Topic 2)

You need to create a flow for moving data from the Sales Log to the Job Setup entity. Which type of flow should you use?

- A. a scheduled flow for the Job Setup entity
- B. an instant (button) flow for the Sales Log
- C. a business process flow for the Job Setup entity
- D. an automated flow for the Sales Log

Answer: A

Explanation:

Scenario: Automatically perform the following actions immediately when a sale is won:

- ? Generate a sequential job number.
- ? Copy key sales information to the Job Setup entity used by manufacturing.

NEW QUESTION 63

- (Topic 2)

You need to connect to the data source for the Job Setup app. What should you do?

- A. Configure a scheduled synchronization with the Common Data Service database
- B. Configure SQL Server database permissions
- C. Create a stored procedure that retrieves time records for a specific employee
- D. Configure an on-premises data gateway

Answer: D

Explanation:

Scenario: The Job Setup entity must store its data in the existing on-premises SQL Server instance.

The on-premises data gateway acts as a bridge to provide quick and secure data transfer between onpremises data (data that isn't in the cloud) and several Microsoft cloud services. These cloud services include Power BI, Power Apps, Power Automate, Azure Analysis Services, and Azure Logic Apps. By using a gateway, organizations can keep databases and other data sources on their on-premises networks, yet securely use that on-premises data in cloud services.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/gateway-reference>

NEW QUESTION 67

HOTSPOT - (Topic 2)

You need to configure the system to meet the sales requirements.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Ensure that work estimates are complete before entering estimated sales values into the Sales Log.	<div>▼</div> <div>Use a Business Process flow</div> <div>Use a UI flow</div>
Prevent modification of timesheet entries by an employee.	<div>▼</div> <div>Add a custom control to the Business Process flow</div> <div>Use a formula to set the DisplayMode property</div> <div>Use a business rule</div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: Use a Business Process flow

Scenario: The Sales Log app must enforce process standards related to the completion of estimates and supporting materials needed during the sales lifecycle.

Box 2: Use a formula to set the DisplayMode property

DisplayMode - The mode to use for data cards and controls within the form control. Derived from the Mode property based and cannot be set independently:

Mode	DisplayMode	Description
FormMode.Edit	DisplayMode.Edit	Data cards and controls are editable, ready to accept changes to a record.
FormMode.New	DisplayMode.Edit	Data cards and controls are editable, ready to accept a new record.
FormMode.View	DisplayMode.View	Data cards and controls are not editable and optimized for viewing.

NEW QUESTION 71

- (Topic 2)

You need to implement logic in the app for lost sales. What should you do?

- A. Create a business process flow.
B. Define a business rule for the Sales Log edit form.
C. Set the required field property of the Won/Lost field to Required.
D. Create a formula for the Description field that uses the Update function.

Answer: B

Explanation:

Scenario: Requests for quotes are currently stored in a Sales Log workbook. The workbook includes the following information:

? Status of the Request for Quote (RFQ) with the values of Won, Lost, No Bid, and Cancelled

Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer purchase order is received.

You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.

Business rules defined for an entity apply to both canvas apps and model-driven apps if the entity is used in the app.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule>

NEW QUESTION 75

- (Topic 2)

You need to modify the entity form to resolve the customer request number issue. What should you do?

- A. Use a calculated field
B. Change the data type of the customer request number field to Lookup
C. Change the data type of the customer request number field to Autonumber

Answer: C

Explanation:

Scenario: Users report that the customer request number is difficult to interpret. They request that you change the number to a system generated sequential number. Autonumber columns are columns that automatically generate alphanumeric strings whenever they are created.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/autonumber-fields>

NEW QUESTION 76

HOTSPOT - (Topic 1)

You need to configure the app to meet the requirements.

Which object properties should you configure? To answer, select the appropriate options in

NOTE: Each correct selection is worth one point.

Requirement	Property
Provide a visual indicator when the app is offline.	<div><div></div><div>Visible</div><div>OnSelect</div><div>DisplayMode</div><div>Fill</div></div>
Store data when the app is offline.	<div><div></div><div>OnSelect</div><div>LoadData</div><div>SubmitForm</div><div>Now</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Fill
Scenario: You must display a visual indicator in the app so that sales representatives know whether the app is offline before submitting reports.
Fill – The background color of a control.

NEW QUESTION 77

- (Topic 1)
You need to resolve the issue for User1.
What should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Option
Submit a status report.	<div><div></div><div>Dynamics 365 mobile app</div><div>Power Apps Studio</div><div>Power Apps mobile app</div><div>Azure mobile app</div></div>
Edit an existing status report.	<div><div></div><div>Azure SQL Database</div><div>Connector</div><div>SQL Lite DB</div><div>Collections</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated
Box 1: Power Apps mobile app Scenario:
User1 often works in a warehouse that does not have internet connectivity. User1 needs to edit an existing status report and submit a new status report.
The app must be able to run both online and offline. If the mobile device on which the app runs is connected to the internet, the app must immediately submit the status report.
You can build offline capabilities in your PowerApps app so your app users can access some data or save some data even when they don't have an internet connection.
Box 2: Connector
Scenario: Azure SQL Database is used to store other data
Use the SQL Server connector to connect to SQL Server, in either Azure or an on- premises database, so that you can manage your data with create, read, update, and delete operations.

NEW QUESTION 79

- (Topic 1)
You need to meet the requirements for sales representative that submit status reports. How should you configure the flow?

- A. Add a parallel branch that uses the value of a dynamic content variable
- B. Add a number functions action that evaluates the risk value by using a static variable to determine if an email is required
- C. Add a condition that evaluates the risk value by using a dynamic content variable
- D. Add a data operation action that evaluates a dynamic content variable

Answer: C

Explanation:

Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer purchase order is received. Include a dashboard that shows all currently active quotes, their status in the sales cycle, the probability of closing, and estimated manufacturing and installation dates, by customer, product division, status, and salesperson.

NEW QUESTION 80

- (Topic 1)

You need to configure functionality for submitting status reports. What should you do?

- A. Determine whether the application is offline when a user selects submit button and call the Sec () function.
- B. Determine whether the application is offline when the app load
- C. Use the SaveDaca () function in the OnSelect property.
- D. Determine whether the application is offline when a user selects the submit button and call the SaveDaca () function.
- E. Determine whether the application is offline when the app load
- F. Use the LoadDaca () function in the Submit button.

Answer: C

Explanation:

Scenario: The app must be able to run both online and offline. If the mobile device on which the app runs is connected to the internet, the app must immediately submit the status report.

When data is submitted offline, the data must be stored in the app until the app is back online.

Mobile users often need to be productive even when they have limited or no connectivity. LoadData and SaveData combine to form a simple mechanism to store small amounts of data on a local device. By using these functions, you can add simple offline capabilities to your app.

The SaveData function stores a collection for later use under a name.

The LoadData function reloads a collection by name that was previously saved with SaveData. You can't use this function to load a collection from another source.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function->

NEW QUESTION 85

- (Topic 4)

You are creating a canvas app for a company.

The app must access data from a private web service that is provided by the company. You need to set up the connector.

Which connector type should you use?

- A. Custom
- B. Standard
- C. First-party
- D. Premium

Answer: A

NEW QUESTION 88

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app that displays a list of accounts.

Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen_Accounts and add a gallery named and add another blank screen named Screen_AccountDetail.

You need to complete the app. Solution:

? Add an edit form to Screen_AccountDetail and set the Default Mode of the form to View.

? Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).

? Set the data source of the form to Accounts.

? Set the Item property of the form to Selected.

? Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

View, edit, or create an item, save the contents, and reset the controls in an Edit form control.

FormMode.View: The form is populated with an existing record but the user cannot modify the values of the fields.

This function is often invoked from the OnSelect formula of a Button or Image control.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form>

NEW QUESTION 89

- (Topic 4)

You need to set the value for a global variable named RunningTotal to 5 and navigate to the previous screen named MainScreen.

Which formula should you use?

- A. UpdateContext({ RunningTotal: 5 }); Navigate(MainScreen, ScreenTransition.Cover, RunningTotal);
- B. If(Value(TextBox1.Text) >= 0, (Set(RunningTotal, 5); Back();), Color.Green)
- C. UpdateContext({ RunningTotal:5 }); Back()
- D. Set(RunningTotal, 5); Back();

Answer: D

Explanation:

You set the value of the global variable with the Set function. Set(MyVar, 1) sets the global variable MyVar to a value of 1.
Use the Back and Navigate function to change which screen is displayed. Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-variables>
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function- navigate>

NEW QUESTION 91

- (Topic 4)

A company uses Power Apps. The company creates a solution that contains the following items:

- environment setting
- flow that accesses Microsoft Dataverse
- plug-in with an unsecure configuration
- environment variable with a default value

The company plans to import solutions manually.

You need to document the solution component type that prompts for user input. Which component type should you document?

- A. Environment variable
- B. Environment setting
- C. Connection reference

Answer: D

NEW QUESTION 95

DRAG DROP - (Topic 4)

You are creating a model-driven app for onboarding new employees. You need to implement business logic for the app.

Which tool should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Requirement	Tools
<div>Business rule</div>	Guide a user through the set of steps needed for onboarding a new employee.	<div></div>
<div>Power Automate</div>	Make date of birth mandatory when creating a new employee record.	<div></div>
<div>Business process flow</div>	Implement an approval flow for expense reports submitted by employees.	<div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Business process flow

A business process flow is a visual guide meant to help users complete a business process by using a set of predefined stages. Users are not limited on how long they run a business process or how long they have a stage open.

Box 2: Business rule Box 3: Power Automate

A Power Automate flow does not have any visual components like a business process flow.

Power Automate flows can be configured to work with many different data sources, and a flow can connect to many different data sources within the same flow. A flow can be configured to time out if it is not completed in a certain time and can be triggered to move between steps based on data or user interaction.

NEW QUESTION 96

HOTSPOT - (Topic 4)

A company creates a Power Apps app that allows service representatives to record information about on-site client visits. Service representatives perform a one-hour site visit with each client each quarter.

Service representatives use the app to perform the following activities:

- ? View their scheduled visits for the day.
- ? Record notes from service visits.
- ? Schedule service technicians for issues uncovered during site visits.
- ? Scan and upload service quote forms to a folder named Service Quote folder on Microsoft OneDrive once the customer has signed a service quote.

Service quotes that are over \$10,000 are automatically sent to the service manager for review and approval.

Visits that are not closed at the end of the day are automatically moved to the following day unless it is the last day of the quarter. All client visits not performed for the quarter are escalated to the service manager for follow-up.

You need to create flows to meet the requirements.

Which type of flows should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Type of flow
Move client visits not completed for the day.	<div><div></div><div>Scheduled flow</div><div>Automated flow</div><div>Adaptive card flow</div><div>Team flow</div></div>
Approve service quote.	<div><div></div><div>Automated flow</div><div>Button flow</div><div>Scheduled flow</div><div>Team flow</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Adaptive card flow
Adaptive Cards are a platform-agnostic method of sharing and displaying blocks of information without the complexity of customizing CSS or HTML to render them.
Directing content to Teams channels:
Post your own adaptive card as the Flow bot to a channel
This action posts an adaptive card as a Flow bot to a specific Teams channel. In this case, you will be prompted for Teams instance, and a channel where the card will be posted. The flow-maker will have to have access to the Teams instance in order to post an adaptive card there. In this case, only URL buttons function by redirecting to the URL configured within the flow.
Box 2: Button flow
Create a button flow to run routine tasks by simply tapping a button. Customize your flow by allowing the user to provide specific details that will be used when the flow runs.

NEW QUESTION 101

DRAG DROP - (Topic 4)
A company stores sales orders in a Microsoft Excel workbook. The company stores customer data in a SQL Server database. You must import the data into a Microsoft Dataverse instance. You need to define the mapping for the migration. Which component should you use? To answer, drag the appropriate components to the correct data type. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Components

Column

Table

Row

Data source

Answer Area

Data

Excel data

Component

Component

Component

Component

Component

- A. Mastered
- B. Not Mastered

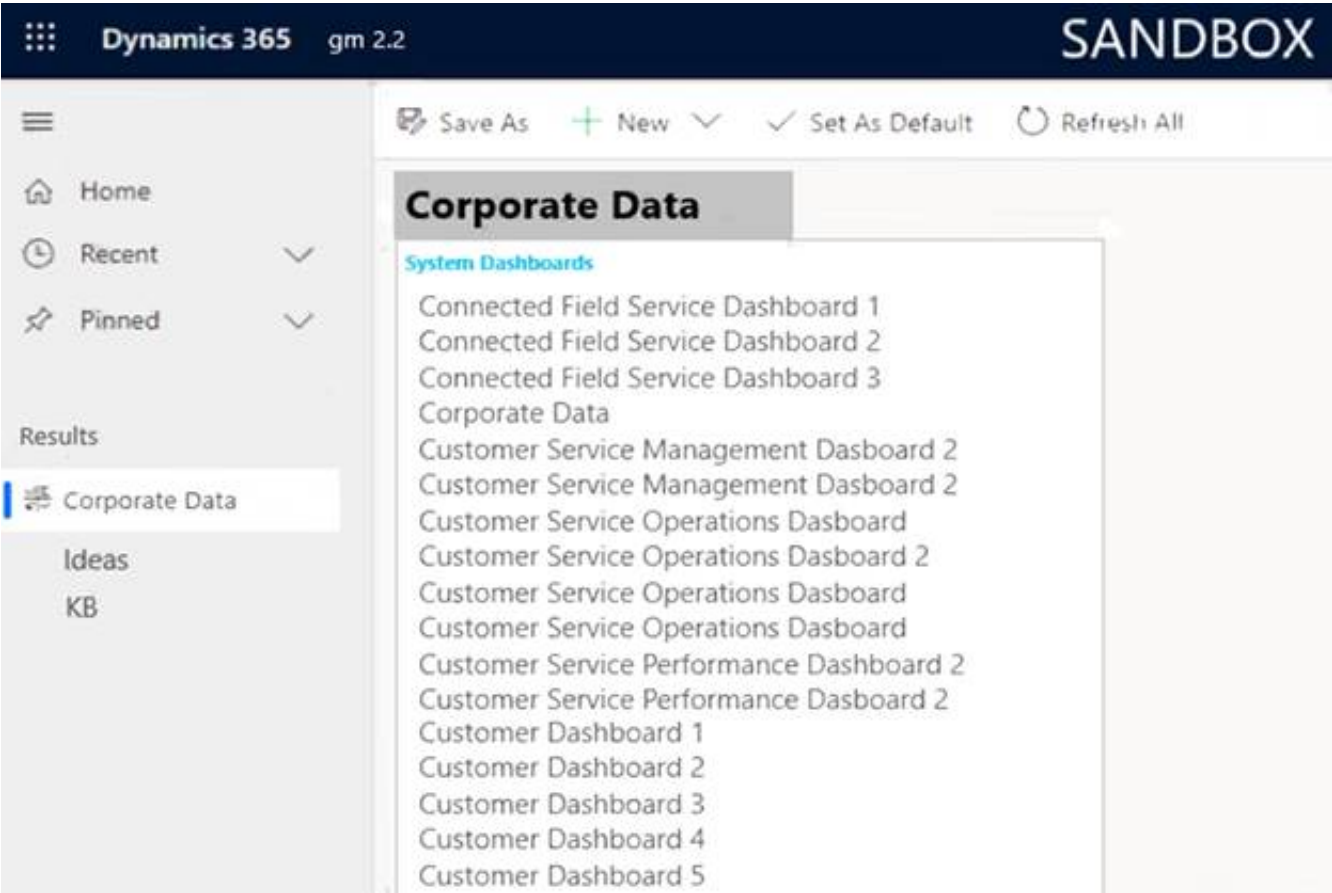

Answer: A

Explanation:

Box 1: Table
Box 2: Data source Box 3: Column
Box 4: Row

NEW QUESTION 102

HOTSPOT - (Topic 4)
The managers in an organization use a model-driven app. The app should display only one dashboard named Corporate Data. The managers observe that several dashboards are displayed.

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

How do you remove all the dashboards from the list of dashboards displayed?

<input type="text"/> <input type="text"/> Open the model-driven app in the app designer and clear all dashboard check boxes except the Corporate Data dashboard. <input type="text"/> Open the site map in the sitemap designer and clear all dashboard check boxes except the Corporate Data subarea except for the Corporate Data dashboard. <input type="text"/> Open the solution and delete all dashboards from the solution except for the Corporate Data dashboard.	▼
---	---

You need to remove the Ideas dashboard from the navigation bar. What should you do?

<input type="text"/> <input type="text"/> Open the model-driven app in the app designer and clear the check box for the ideas dashboard <input type="text"/> Open the site map in the sitemap designer and delete the Ideas dashboard from the Results group <input type="text"/> Open the solutions and delete all the Ideas dashboards from the solution	▼
---	---

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Table
 Description automatically generated
 Box 1: Open the model-driven app in the app designer.
 * 1. On the app designer canvas, select the Dashboards tile.
 On the app designer canvas, the right pane shows dashboards that are available in the default solution.
 * 2. Clearing the corresponding check box.
 Box 2: Open the site map in the sitemap designer and delete the Ideas dashboard from the Results group
 Site maps define the manner by which users move between tables in a model-driven app.

NEW QUESTION 106

- (Topic 4)
 DRAG DROP

A company uses Microsoft Power Platform in a production environment. The company is defining new business processes in a prototyping environment. You create components in both environments.
 You need to package the components you create.
 Which solution types should you use? To answer, drag the appropriate solution types to the connect components. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
 NOTE: Each correct selection is worth one point.

Solution types	Answer Area	Component	Solution type
Managed	<div></div>	Canvas app created in production and used only in production.	<input type="text"/>
Unmanaged		Tables created in prototype to allow only new views added in production.	<input type="text"/>
Segmented			

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Solution types

Managed

Unmanaged

Segmented

Answer Area

Component

Canvas app created in production and used only in production.
Tables created in prototype to allow only new views added in production.

NEW QUESTION 110

DRAG DROP - (Topic 4)

A call center manager monitors incoming phone calls. The manager analyzes the performance of phone reps by using a custom view. The view contains a custom field named Phone call Duration in Minutes.

The call center manager must present an Excel spreadsheet daily to upper management. The spreadsheet must contain the call center performance for further trending analysis and corrective actions.

You need to create the spreadsheet.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Create a pivot table, and then use the Phone call Duration in Minutes field as a category area and the Rep field as a series

Create a pivot table, and then use the Phone Rep field as a category and the Phone call Duration in Minutes field as a series

Set the formula for phone call duration in minutes to Average and add a pie chart linked the pivot table

Export the custom view to an Excel dynamic spreadsheet

Export the custom view to an Excel dynamic pivot table

Save the spreadsheet and upload it back to the system

Export the custom view to an Excel template

Answer Area

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Timeline

Description automatically generated with low confidence

Step 1: Export the custom view to an Excel dynamic pivot table

You can export app data to an Office Excel PivotTable to see patterns and trends in data. An Excel PivotTable is a great way to summarize, analyze, explore, and present your app data.

Step 2: Create a pivot table, and then use the Phone Rep field as a category and the Phone call Duration in Minutes as field as series

Step 3: Set the formula for phone call duration in minutes to Average and add a pie chart linked to the pivot table

Step 4: Save the spreadsheet and upload it back to the system.

NEW QUESTION 112

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.

Development and testing must be performed using production data. Multiple testers must be used at each testing stage.

You need to provision and configure new environments for development and testing. Solution:

? Provision sandbox environments named S1 and S2.

? Copy the production environment to both S1 and S2.

? Use S1 for development and S2 for testing.

Does the solution meet the goal?

- A. Yes
B. No

Answer: A

Explanation:

A sandbox environment is any non-production environment of Microsoft Dataverse. Isolated from production, a sandbox environment is the place to safely develop and test application changes with low risk.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/environments-overview>

NEW QUESTION 117

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.
Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.
You need to ensure that users can scan packing slip information into the form. Proposed solution: Use an Entity Extraction model.
Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

AI Builder entity extraction models recognize specific data in the text that you target based on your business needs. The model identifies key elements in the text and then classifies them into predefined categories. This can help you transform unstructured data into structured data that's machine-readable. You can then apply processing to retrieve information, extract facts, and answer questions.
Note: Create a canvas app and add the text recognizer AI Builder component to your screen. This component takes a photo or loads an image from the local device, and then processes it to detect and extract text based on the text recognition prebuilt model. If it detects text in the image, the component outputs the text and identifies the instances by showing a rectangle for each instance in the image.
Reference:
<https://knowledgefrommanish.com/powerplatform/ai-builder-entity-extraction-ai-model/>
<https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognizer-component-in- powerapps>

NEW QUESTION 121

- (Topic 4)

You create a custom table as part of a solution in the development environment. You deploy major version solutions as managed solutions to production. The organization does not allow new solutions to be created in the production environment.
When a minor update is made to a column length, users cannot enter entire values. You need to allow users to enter entire values in the column.
Solution: Update the column length in the production environment. Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 126

DRAG DROP - (Topic 4)

You create the following apps for a company that provides financial guidance services: a model-driven app for financial advisers that work in the company's offices and a canvas app for remote financial advisers.
You need to create business rules for a custom counselling entity used by all financial advisers.
Who will be affected by the business rules?
To answer, drag the appropriate financial adviser types to the correct business rules. Each financial adviser type may be used once, more than once, or not at all.
You may need to drag the split bat between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Financial adviser types	Answer Area								
	<table><thead><tr><th>Business rule</th><th>Financial adviser type</th></tr></thead><tbody><tr><td>Set a field value with the scope set to Entity</td><td>Financial adviser type</td></tr><tr><td>Clear a field value with the scope set to All Forms</td><td>Financial adviser type</td></tr><tr><td>Set visibility of a field with the scope set to Entity</td><td>Financial adviser type</td></tr></tbody></table>	Business rule	Financial adviser type	Set a field value with the scope set to Entity	Financial adviser type	Clear a field value with the scope set to All Forms	Financial adviser type	Set visibility of a field with the scope set to Entity	Financial adviser type
Business rule	Financial adviser type								
Set a field value with the scope set to Entity	Financial adviser type								
Clear a field value with the scope set to All Forms	Financial adviser type								
Set visibility of a field with the scope set to Entity	Financial adviser type								
Office-based financial advisers only									
Remote financial advisers only									
Office-based and remote financial advisers									

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Office-based and remote financial advisers
Model driven apps can use all actions available on business rules, however not all business rule actions are available for canvas apps at this time.
Box 2: Office-based financial advisers only
If you're building a Canvas app, you must use table as the scope (not All forms, not a specific form)
Box 3: Office-based financial advisers only
The following actions are not available on Canvas apps :
Show or hide columns
Enable or disable columns
Create business recommendations based on business intelligence.

NEW QUESTION 131

HOTSPOT - (Topic 4)

A company uses two SQL Server environments and two Common Data Service environments.
The company policy states that only specific administrators can create environments. SQL Server and Common Data Service groups must be distinct.

You need to assign security access.
What should you assign? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Role	Security access
Admin users for SQL environments	<div><div></div><div>Environment Maker</div><div>Environment Admin</div><div>System Administrator and Environment Security group</div><div>Power Platform Administrator and Environment Security group</div></div>
Admin users for Common Data Service environments	<div><div></div><div>Environment Maker</div><div>Environment Admin</div><div>Global Administrator</div><div>System Administrator</div></div>
Users that create Common Data Service apps	<div><div></div><div>System Customizer</div><div>Environment Maker</div><div>Environment Admin</div><div>System Administrator</div></div>
Users that create SQL apps	<div><div></div><div>System Customizer</div><div>Environment Maker</div><div>Environment Admin</div><div>System Administrator</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: System Administrator and Environment Security group Security model for the databases
When a database is created, the users who have environment roles assigned to them, will continue to maintain those privileges. Users with Environment Admin role are now assigned to System Administrator role. Users with Environment Maker continue to possess the same role.

Box 2: Environment Admin
TheEnvironment Adminrole can perform all administrative actions on an environment, including the following:
? Add or remove a user from either the Environment Admin or Environment Maker role.

Box 3: Environment Maker
Environment Maker: Can create new resources associated with an environment, including apps, connections, custom APIs, gateways, and flows using Microsoft Power Automate. However, this role doesn't have any privileges to access data within an environment. More information:

Box 4: System Customizer
System Customizer: Has full permission to customize the environment. However, users with this role can only view records for environment entities that they create.

NEW QUESTION 136

DRAG DROP - (Topic 4)
You are deploying solutions from development environments into test environments. You need to gather solution information. What should you do? To answer, drag the appropriate actions to the correct scenarios. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Options	Answer Area								
	<table><thead><tr><th>Scenario</th><th>Action</th></tr></thead><tbody><tr><td>Find the deployment outcome</td><td><div>Action</div></td></tr><tr><td>Determine, in which version, a type change occurred</td><td><div>Action</div></td></tr><tr><td>Determine if any components are missing</td><td><div>Action</div></td></tr></tbody></table>	Scenario	Action	Find the deployment outcome	<div>Action</div>	Determine, in which version, a type change occurred	<div>Action</div>	Determine if any components are missing	<div>Action</div>
Scenario	Action								
Find the deployment outcome	<div>Action</div>								
Determine, in which version, a type change occurred	<div>Action</div>								
Determine if any components are missing	<div>Action</div>								

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: View the history
The solution history displays information such as solution version, solution publisher, type of operation, operation start and end time, and operation status.

Box 2: View solution layers
The see solution layers' feature allows you to view all component changes that occur due to solution changes over time. Within a solution layer, you can drill down

to view specific changed and unchanged property details for a component.
The see solution layers' feature:
? Let's you see the order in which a solution changed a component.
? Let's you view all properties of a component within a specific solution, including the changes to the component.
Box 3: Show dependencies
As a result of dependency tracking the following behaviors are enforced:
? Export of a solution warns the user if there are any missing components that could cause failure when importing that solution in another system.

NEW QUESTION 138

- (Topic 4)
A company has ten sales regions. Each salesperson is assigned to one region. You create a set of five standard views that all salespeople will use. Sales users only want to see information for their own region. Sales users must call sales leads within a week of receiving a lead.
You need to recommend a solution for sales users.
Which two actions will you recommend? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Instruct users to create personal views that filter by region.
- B. Instruct users to filter the view by region.
- C. Configure the definition for each view to sort by region.
- D. Configure the definition for each view to filter by region.

Answer: BD

NEW QUESTION 140

DRAG DROP - (Topic 4)
You are creating a Power Automate cloud flow.
The data in the flow must perform the following actions:
• Return the first character of a string of text.
• Convert an array to a single string. You need to manipulate the data.
Which data operations should you use? To answer, drag the appropriate data operations to the correct changes. Each data operation may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

NEW QUESTION 141

DRAG DROP - (Topic 4)
You use Microsoft Dynamics 365 Sales.
Business processes must use data from multiple applications. You need to implement the correct type of automation.
Which flow type should you use? To answer, drag the appropriate flow types to the correct application types. Each flow type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Flow Types

cloud flow

desktop flow

business process flow

Answer Area

Application Type

Update a record after it was created as part of a sales process

Extract a list of prices from a competitor's website

Flow Type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Flow Types	Answer Area	Flow Type
cloud flow	Application Type Update a record after it was created as part of a sales process Extract a list of prices from a competitor's website	business process flow
desktop flow		cloud flow
business process flow		

NEW QUESTION 145

- (Topic 4)

A company uses Microsoft Power Apps.

You need to create a canvas app to display a Microsoft Power BI report. The report must use the context of a selected record in the app. Data in a Power BI control must be filtered to display the context of the selected record.

You need to propose the right solution.

Solution: Add a slicer to a Power BI element on the screen where data is selected. Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 147

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company has locations in multiple countries and regions across four continents. The company stores the total amount of each order in the local currency of the country/region where the customer is located. The company stores the applicable exchange rates in a custom US dollars (USD) exchange rate table.

You need to create a visualization that displays the total amount of orders by country/region in USD.

Proposed solution:

Create a custom rollup field of type currency on the country/region table that aggregates all the total amounts for the orders from that country/region and display this rollup field in a Power BI chart.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead use a calculated field.

Need to calculate the exchange rate in USD.

Calculated columns are calculated in real-time when they are retrieved. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup-attributes>

NEW QUESTION 150

- (Topic 4)

A company delivers products to multiple communities. The company creates a canvas app connected to a Common Data Service database. The app tracks communities to see where

Drivers must enter delivery information on a form that uses an entity named Delivery. Depot staff must enter information on a pick-up form that uses an entity named Pick-up. Each form contains a community field that is based on a shared list across both forms.

You need to create the community field. Which type of field should you create?

- A. local option set
- B. text
- C. global option set
- D. text area

Answer: C

Explanation:

Can use a global option set, no need to use localized option sets.

Note: In PowerApps Option set is one of the field types you can use in your Entity. The information type that Option Set stores is a list of text values. And here comes the Option Set advantage – once you define its text values you can centrally managed it. Reference:

<https://powerapps.microsoft.com/en-us/blog/option-sets-and-many-to-many-relationships-for-canvas-apps/>

NEW QUESTION 152

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a

A company has locations in multiple countries and regions across four continents. The company stores the total amount of each order in the local currency of the country/region where the customer is located. The company stores the applicable exchange rates in a custom US dollars (USD) exchange rate table.

You need to create a visualization that displays the total amount of orders by country/region in USD.

Proposed solution: Create a model-driven chart on the country/region table that aggregates the total amount of the orders by country/region.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead use a calculated field.

Need to calculate the exchange rate in USD.

Calculated columns are calculated in real-time when they are retrieved.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup-attributes>

NEW QUESTION 156

DRAG DROP - (Topic 4)

You have the following Common Data Service entities: BusinessContracts and

You need to configure an N:N relationship between the two entities.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Select Add relationship and then select the many-to-many relationship option.	
Select the BusinessAccounts entity as the related entity.	
Open the relationship tab of the BusinessContracts entity.	
Choose the Relationship Name and Relationship Entity Prefix.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Open the relationship tab of the BusinessContracts entity. View entity relationships

From the Power Apps portal, select either Model-driven or Canvas design mode. Select Data > Entities and select the entity that has the relationships you want to view. With the Relationships tab selected, you can select the following views:

Step 2: Select Add relationship.. Create relationships

While viewing entity relationships, in the command bar, select Add relationship and choose Many-to-many.

Step 3: Select the BusinessAccounts entity as the related entity.

NEW QUESTION 157

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company has locations in multiple countries and regions across four continents. The company stores the total amount of each order in the local currency of the country/region where the customer is located. The company stores the applicable exchange rates in a custom US dollars (USD) exchange rate table.

You need to create a visualization that displays the total amount of orders by country/region in USD.

Proposed solution:

Create a custom column that converts the order total to USD by using the relationship between order local currency and the USD exchange rate table in Power BI Desktop and display this column in a Power BI chart by country/region.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead use a calculated field.

Need to calculate the exchange rate in USD.

Calculated columns are calculated in real-time when they are retrieved. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup-attributes>

NEW QUESTION 158

- (Topic 4)

You create a canvas app that uses the following resources:

- Power Automate cloud flow
- Custom connector
- Microsoft Dataverse customization
- Connection

You need to export the app as a package to move the app to a different environment. Which resource type will be exported with the app?

- A. Custom connector
- B. Connection
- C. Microsoft Dataverse customization

D. Power Automate cloud flow

Answer: D

NEW QUESTION 162

- (Topic 4)

You complete work on a new canvas app in a development environment and add the app to a solution. You export the solution from the development environment and import the solution into a production environment.

After several days you notice that the background color for the canvas app in the production environment has changed from white to grey.

You need to determine why the background color changed.

What are two possible causes for the background color change? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. You recently changed the Office 365 theme.
- B. You exported a managed copy of the solution and imported the solution as an unmanaged solution.
- C. You modified the canvas app in the unmanaged solution.
- D. You exported and imported an unmanaged copy of the solution and a co-worker modified the canvas app.
- E. You chose a different theme from the Theme menu inside the canvas app.

Answer: AC

Explanation:

A: You can create a custom look and feel (a theme), for your app by making changes to the default colors and visual elements provided in the uncustomized system.

C: Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution. You also have the ability to create restrictions on the components within the solution.

Note: Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited.

Reference:

<https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685>

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-themes-organization-branding>

NEW QUESTION 167

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera.

Proposed solution:

- ? Create a Category Classification custom model in AI Builder.
 - ? Train the model with pictures of bicycles and then publish the trained model.
 - ? Add the Object Detector control to your canvas app.
- Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead create an Object Detection custom model Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

NEW QUESTION 171

- (Topic 4)

A company has a Common Data Service custom entity that stores customer account data. You need to create a relationship between the custom entity and the Account entity. Which two tools can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Power Platform Admin center
- B. Power Apps Maker portal
- C. SQL Server Management Studio
- D. Visual Studio Code

Answer: BC

Explanation:

There are two designers you can use to create and edit 1:N (one-to-many) or N:1 (many-to-one) relationships:

- ? You can create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships in Power Apps portal
- ? You can create and edit create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships using solution explorer

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/create-edit-1n-relationships>

NEW QUESTION 175

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.
You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:
? Create an Object Detection custom model in AI Builder.
? Train the model with pictures of bicycles and then publish the trained model.
? Add the Object Detector control to your canvas app.
Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

To train an object detection model to recognize your objects, you have to gather images that contain those objects. The first thing you'll do when you create an AI Builder object detection model is to define its domain.
Upload images
Then Train and publish your object detection model
The object detector component takes a photo or loads an image file to do an object detection scan. On a mobile device, the user chooses between taking a photo or selecting one already available in the device user interface. When an image is selected, the component automatically scans it to identify objects.
Reference:
<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

NEW QUESTION 177

HOTSPOT - (Topic 4)
HOTSPOT

Users in your company vote on color choices for marketing materials by using the following canvas app:

Users enter color names into a text control and then select Add color to add the color to the Color options radio control. You must remove all the listed colors when a user selects Clear Selection
You need to implement the functionality.
Which Power Fx formulas should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Action	Power Fx formula
User selects Add color .	<div><div>If(txtColor.Value <>"", Collect(ColorList, txtColor.Value))</div><div>If(txtColor.Value <>"", Collect(ColorList, txtColor.Value))</div><div>If(Value(txtColor.Text) <>"", Collect(ColorList, txtColor.Text))</div><div>If(Value(txtColor.Color) <>"", Collect(ColorList, txtColor.Color))</div></div>
User selects Clear Selection .	<div><div>Revert(radioselector); ClearCollect(ColorList, txtColor.Value)</div><div>Reset(radioselector); Clear(ColorList)</div><div>Reset(radioselector); Refresh(ColorList)</div><div>Revert(radioselector); Remove(ColorList)</div><div>Revert(radioselector); ClearCollect(ColorList, txtColor.Value)</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Action	Power Fx formula
User selects Add color .	<div><div>If(txtColor.Value <>"", Collect(ColorList, txtColor.Value))</div><div>If(txtColor.Value <>"", Collect(ColorList, txtColor.Value))</div><div>If(Value(txtColor.Text) <>"", Collect(ColorList, txtColor.Text))</div><div>If(Value(txtColor.Color) <>"", Collect(ColorList, txtColor.Color))</div></div>
User selects Clear Selection .	<div><div>Revert(radioselector); ClearCollect(ColorList, txtColor.Value)</div><div>Reset(radioselector); Clear(ColorList)</div><div>Reset(radioselector); Refresh(ColorList)</div><div>Revert(radioselector); Remove(ColorList)</div><div>Revert(radioselector); ClearCollect(ColorList, txtColor.Value)</div></div>

NEW QUESTION 179

- (Topic 4)

A company is onboarding new workers to the Microsoft Power Platform.

A user reports an access issue with a Power Apps app. The user provides no additional information about the access issue.

You need to troubleshoot the app and data security configurations for the user. Which tool should you use?

- A. Azure AD Security review
- B. User information page
- C. Accessibility checker
- D. Run diagnostics

Answer: D

Explanation:

User access diagnostic tool in the Power Platform admin center:

Several factors influence user access in a Microsoft Dataverse environment. To help administrators with diagnosing user access to an environment and reasons for access or no access, the new “Run diagnostics” feature in the Power Platform admin center provides basic access diagnostics for individual users in the environment. The feature helps to detect potential causes to user sign-in and other issues and suggests potential mitigations.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/troubleshooting-user-needs-read-write-access-organization>

NEW QUESTION 183

DRAG DROP - (Topic 4)

You perform repeatable tasks using software installed on a home computer. The operating system includes Microsoft Power Automate Desktop.

You need to decide which tasks to automate using Power Automate Desktop.

Which tasks can you automate? To answer, drag the appropriate can automate responses to the correct tasks. Each can automate response may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content

NOTE: Each correct selection is worth one point.

Options

Yes

No

Answer Area

Task

Can automate

Move files from one folder to another, rename them, and put into archive.

When an email arrives, save attachments from Outlook to your OneDrive folder.

Read product prices from an online shop and add them to an Excel file.

Schedule reading currency exchange rates and save them to an Excel file each day at 7:00 a.m.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Options

Yes

No

Answer Area

Task

Move files from one folder to another, rename them, and put into archive.

Yes

When an email arrives, save attachments from Outlook to your OneDrive folder.

Yes

Read product prices from an online shop and add them to an Excel file.

Yes

Schedule reading currency exchange rates and save them to an Excel file each day at 7:00 a.m.

Yes

NEW QUESTION 185

DRAG DROP - (Topic 4)

You have a canvas app that uses multiple inputs for calculations.

You must use Test Studio to create automated tests and confirm that the app works as expected.

You need to organize your test scenarios into a hierarchy.

In which order should you create the objects? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

Test assertions

Test steps

Test suites

Test cases

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Test suites

By default, a test suite and test case are created for you in Test Studio. Test suites are used to organize your test cases. An app can contain one or more test suites.

Step 2: Test cases

Depending on how you want to organize or group your tests, you can create multiple test cases in a test suite. Each case can test a specific feature or a subset of functionalities in your app.

Step 3: Test steps Step 4: Test assertions

A test case consists of test steps that contain actions. Test actions are written using Power

Apps expressions that perform a task. You can use the recorder to automatically generate the test steps as you interact with your app. After you record, you can update the test case, add new steps, delete steps, and write test assertions to validate the result of your test.

NEW QUESTION 187

- (Topic 4)

You are an app maker.

You want to create apps and track customizations as part of the default solution. You need to determine the impact of performing the work in the default solution. What should you conclude?

- A. The default solution does not contain all components and customizations from all solutions in the environment.
- B. The prefix used when creating components as part of the default solution can be set to a specific value.
- C. The default solution cannot be exported and distributed to another environment.

Answer: C

Explanation:

Default Solution. This is a special solution that contains all components in the system. The default solution is useful for discovering all the components and configurations in your system.

Why you shouldn't use the default solutions to manage customizations

There are a few reasons why you shouldn't create apps and make customizations in either of the default solutions:

? The default solution can't be exported; therefore, you can't distribute the default solution to another environment.

The default solution contains all components and customizations from all solutions in the environment.

By default, all enabled users can create apps and customize components in the Common Data Services Default Solution.

It's difficult to locate or identify the customizations you've made in the environment by using either default solution.

When you use either default solution to create components, you'll also use the default publisher assigned to the solution. This often results in the wrong publisher prefix being applied to some components.

Reference:

<https://docs.microsoft.com/en-us/power-platform/alm/use-solutions-for-your-customizations>

NEW QUESTION 192

DRAG DROP - (Topic 4)

DRAG DROP

A company is migrating to a new Microsoft 365 tenant. You create an expense

You need to move the latest version of the canvas app and cloud flow to the new tenant. Which three actions should you perform in sequence? To answer, move the appropriate

actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Import the app.

Publish all changes.

Create a copy of the app in the cloud.

Export the app as a package.

Share the app with a user in the new tenant.

Answer: A

Explanation:

NEW QUESTION 194

- (Topic 4)

A company is using Power Virtual Agents in Microsoft Teams to expose Microsoft Dataverse data to employees.

You create a chatbot that retrieves a list of customers by postal code from a Dataverse table. The chatbot will accept requests from a user and must connect to Dataverse to retrieve the data.

You need to connect the chatbot to the Dataverse table. What should you use?

- A. Table
- B. Power Apps
- C. Microsoft Teams
- D. Power Virtual Agents
- E. Power Automate

Answer: C

Explanation:

Dataverse for Teams is the “lite” version of Dataverse. It is a low-code platform designed to build relatively simple (but still powerful) apps, using a user-friendly interface and remaining within Microsoft Teams. This new update means that users now have the possibility to create Power Apps apps, Power Automate flows and Power Virtual Agents bots without leaving the Teams platform.

Reference:

<https://docs.microsoft.com/en-us/learn/paths/work-power-platform-teams/>

<https://docs.microsoft.com/en-us/learn/modules/create-chatbot-power-virtual-agents-dataverse-teams/5-call-action-pull-data>

NEW QUESTION 195

- (Topic 4)

A company uses a canvas app. The last published version of the app is version 18.

You edit the app. You save your updates and run the app. When you test the app, you discover you deleted a screen.

You need to restore the last published version of the app.

What is the version number of the app after you successfully restore it?

- A. 17
- B. 18
- C. 18.1
- D. 20

Answer: B

NEW QUESTION 197

- (Topic 4)

You create a model-driven app for a company. The app will be used to manage events that the company organizes.

The Events entity ownership type is set to User or team. Members of the marketing team are assigned the MarketingTeam security role. All privileges for the role are set to User access.

All employees must be able to view event records. Only members of the marketing team are permitted to create or edit event records. You create a role named OtherEmployees.

You need to configure the MarketingTeam and OtherEmployees security roles.

Which three actions should you perform? Each correct selection presents a part of the

NOTE: Each correct selection is worth one point.

- A. Set the access level for the OtherEmployees security role to Organization for the Read permission.
- B. Set the access level for the MarketingTeam security role to Organization for the Read permission.
- C. Set the access level for the OtherEmployees security role to None Selected for the Read permission.
- D. Set the access level for the MarketingTeam security role to None Selected for the Read permission.
- E. Set the access level for the MarketingTeam security role to None Selected for the Create and Write permission.
- F. Set the access level for the OtherEmployees security role to None Selected for the Create and Write permission.

Answer: ABE

NEW QUESTION 199

- (Topic 4)

A company receives its marketing campaign performance report as a Microsoft Excel file. The company stores the file in Microsoft SharePoint.

A user updates the Excel file daily with updated data.

The company needs a solution that automatically displays the latest analytics.

You need to create a basic report that contains pie charts that display the most profitable channels.

You need to propose the right solution.

Solution: Microsoft Power BI report querying Excel file using its path. Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 200

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up.

Proposed solution: Create a Power Automate flow with conditions that use entered data as default data.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead use Common Data Service workflow with a PowerQuery on the data entity.

Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed. Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-classic-common-data-service-workflows>

NEW QUESTION 205

- (Topic 4)

Engineers in an organization plan to attend an international product show.

The engineers must be able to capture information about presented products based on personal assessment and interest. The engineers must capture the information by taking pictures of the booth, brochures, and other product-specific materials.

You need to provide a button flow to streamline the process.

Which two AI Builder models should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Language detection
- B. Sentiment analysis
- C. Category classification
- D. Business card reader
- E. Form processing

Answer: AD

Explanation:

International product show: The language detection prebuilt model identifies the predominant language of a text document. The model analyzes the text and returns the detected language and a numeric score from 0 through 1. Scores close to 1 indicate higher confidence in the result. The detected language is returned as the "script" of the language. For instance, for the phrase "I have a dog", it will return "en" instead of "en-US". The response for languages that can't be detected is unknown.

Use the AI Builder business card reader component to detect business cards and extract their information. You can take photos directly in the component or load images that you've taken. Data is extracted and identified by using the properties listed below.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-language-detection> <https://docs.microsoft.com/en-us/ai-builder/business-card-reader-component-in-powerapps>

NEW QUESTION 209

HOTSPOT - (Topic 4)

HOTSPOT

A company uses Power Apps and Microsoft Data verse. You need to perform the following activities:

* Create a model-driven app.

* Design navigation for the app

* Show an approval name field on the form if the amount is greater than \$1,000.

Which features should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Activity	Feature
Create model driven app.	App designer App designer Solution checker App checker
Design app navigation.	Site map Site map Solutions area Table designer
Show approval name field if amount > \$1,000.	Table designer Form designer Table designer Business rule designer

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Design app navigation.	Site map Site map Solutions area Table designer
Show approval name field if amount > \$1,000.	Table designer Form designer Table designer Business rule designer

NEW QUESTION 214

- (Topic 4)

A company uses Power Apps. You embed a canvas app in a model-driven app form. You need to bind the app to a form component. Which form component should you use?

- A. Section
- B. View
- C. Column
- D. Tab

Answer: C

NEW QUESTION 215

- (Topic 4)

You are developing a canvas app to monitor time. The app includes a Text Input control named TIC1 and a Timer control named TIM1.

You need to set TIM1 to a default value. What should you do?

- A. In the OnChange property of TIC1, set the value of the Text property for TIC1 to a context variable that stores the duration value.
- B. Assign the value of the variable to the OnTimerStart property for TIM1.
- C. Assign the Text property of TIC1 to the Duration property of TIM1.
- D. Assign the Text property of TIC1 to the OnSelect property of a TIM1.
- E. Write code in the OnChange property of TIC1 that assigns the value of the Duration property of the Timer control to Text property of the TIC1. In the OnChange property of TIC1, assign the value to the Duration property for TIM1.

Answer: C

Explanation:

The OnTimerStart, OnTimerEnd and OnSelect are the configurations where you can add your code.

Reference:

<https://sharepains.com/2019/08/22/all-about-timers-in-powerapps/>

NEW QUESTION 217

DRAG DROP - (Topic 4)

A company uses Power Apps. You design the interface for a new model-driven app.

Users must interact with data from records related to the primary record form in the following ways:

- Use related business process flows.
- Display primary and related form columns.

You need to configure the forms without using additional customizations.

Which form types should you use? To answer, drag the appropriate form types to the correct requirements. Each form type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct answer is worth one point.

Form types		Requirement	Form type
Quick view form	⋮	Use related business process flows. Display related columns along with other primary form columns.	
Main form dialog			
Quick create form			
Main form component control			

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Form types		Requirement	Form type
Quick view form	⋮	Use related business process flows. Display related columns along with other primary form columns.	Main form component control
Main form dialog			Quick view form
Quick create form			
Main form component control			

NEW QUESTION 220

DRAG DROP - (Topic 4)

An insurance broker uses a Microsoft Dataverse environment with custom tables. You create a Power Apps app to manage vehicle insurance policies. The app has a drop-down field that allows users to categorize a policy holder's driving record. This category field is not mandatory. You need to ensure that insurance agents enter the correct categories when creating a new vehicle policy. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer area
In the vehicle policy table, click on Add subcomponents and navigate to Business rules.	⌂	⌂
Add a Recommendation card, select the driver record drop-down field and enter the recommendation details.		
In the vehicle policy table, navigate to Business rules.		
Add a business rule and enter a meaningful business rule name.		
Click on the Condition card, select the Vehicle Policy and check for new driver.		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions		Answer area
In the vehicle policy table, click on Add subcomponents and navigate to Business rules.	⌂	1 In the vehicle policy table, navigate to Business rules.
Add a Recommendation card, select the driver record drop-down field and enter the recommendation details.		2 Add a business rule and enter a meaningful business rule name.
		3 Click on the Condition card, select the Vehicle Policy and check for new driver.

NEW QUESTION 225

- (Topic 4)

You significantly modify a canvas app. You need to generate a new app version. What should you do?

- A. Publish the app.
- B. Update the major version number.
- C. Update the version notes.
- D. Update the minor version number.
- E. Save the app.

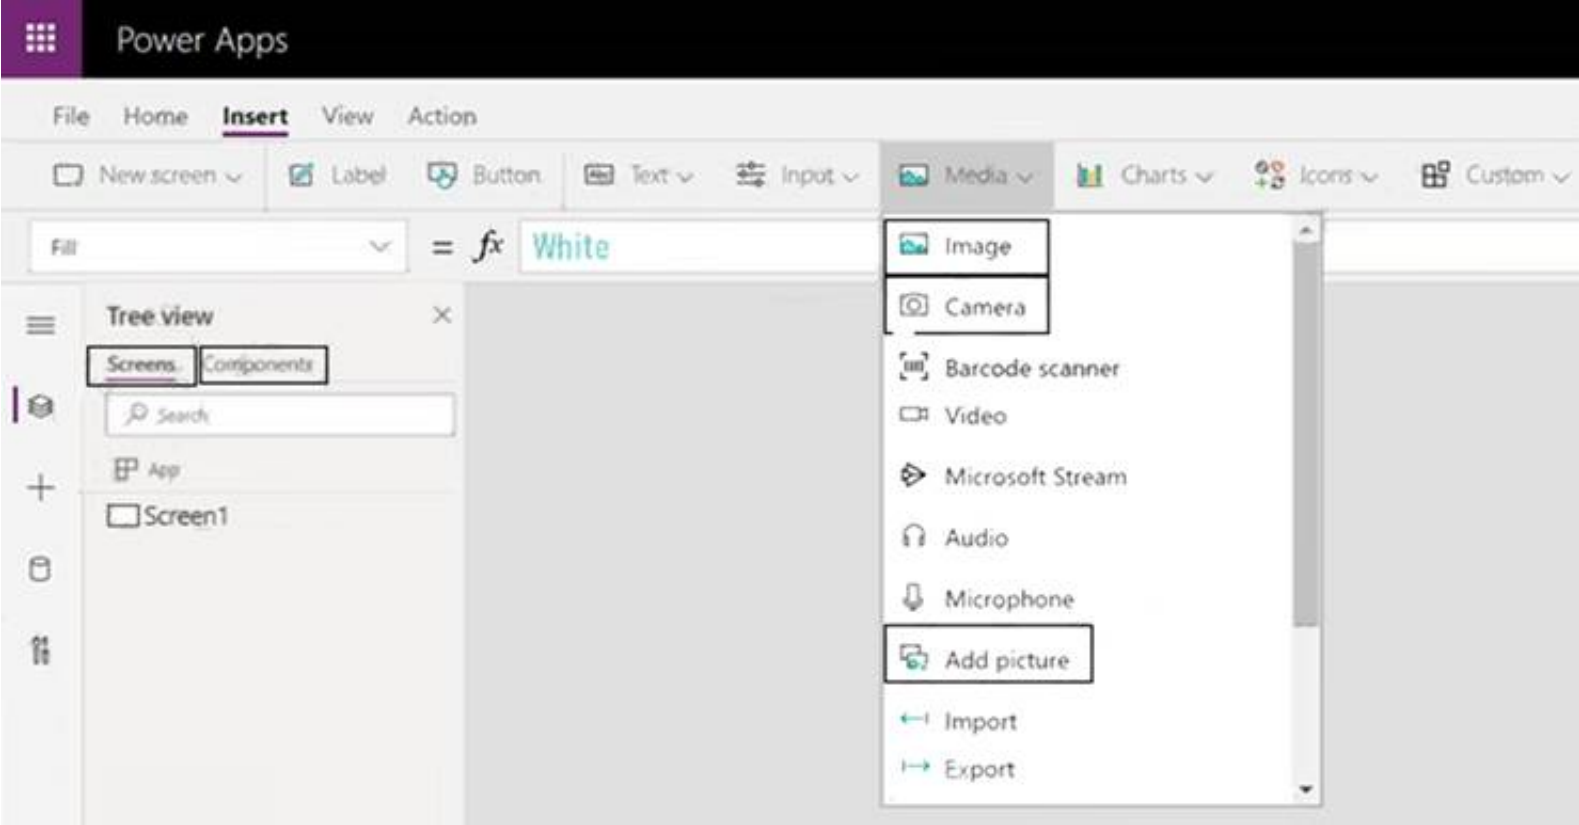

Answer: A

NEW QUESTION 230

HOTSPOT - (Topic 4)

You are developing an app for a package delivery company. Delivery team members will use the app on their phones. Distribution center team members will use a web-based version of the app that runs on tablet devices. When a delivery person arrives at a location and the package recipient is present, the app must capture the recipient's signature. If the recipient is not available,

the app must capture a picture of the drop-off location or the person receiving the package.
You need to design phone-based and web-based versions of the app.
Which app type and media control should you use? To answer, configure the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

App Type: Screens
To insert the Camera control in your PowerApps program you can use the blank screen, and select Insert->Media->Camera.
Media Type: Camera
Use the Camera control to capture pictures with a device's camera. The device must have a camera and the user must authorize the app to use the camera.
Tap or select the camera control to capture a picture from the camera.
The most recently captured picture is available through the Photo property. With this property, the images can be:
? Viewed with the Image control. Use the Image control to view the captured image.
? Temporarily put in a variable or a collection.
? Stored in a database.
? Transmitted as a base64 encoded text string.

NEW QUESTION 231

DRAG DROP - (Topic 4)
DRAG DROP

You are Designing a Power Virtual Agents chatbot in Microsoft Teams. You create an outline to describe how a conversation should be structured.
You need to configure the chatbot.
Which chatbot component should you use? To answer, drag the appropriate components to the correct conversation elements. Each component may be used once, more than once, or not at all. You may need to drag the spirt bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Components

NEW QUESTION 236

- (Topic 4)

You create a canvas app named Hardware Order that suggests computer hardware to customers.

A value must be entered for the EmployeeID field when creating a new order if the value in the OrderType field does not contain the prefix test.

You need to configure the business rule.

Which two actions should you perform? Each correct answer presents part of the complete solution.

NOTE: Each correct selection is worth one point.

- A. Set the scope of the business rule to Entity.
- B. Add a Recommendation action and configure it to enter the order type.
- C. Set the scope of the business rule to All Forms.
- D. Use the following condition expression: (OrderType Does not begin with [test]) AND (Modified By Does not contain data)

Answer: AD

Explanation:

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule>

NEW QUESTION 239

HOTSPOT - (Topic 4)

A user named Bill Jones creates a canvas app and shares it with other users in his company as shown in SharePowerUsers and ShareJimSmith exhibits. (Click the SharePowerUsers tab and the ShareJimSmith tab.)

Share Company App

Enter a name, email address, or Everyone

Shared with

Jim Smith

This User can use this app

☒ Co-owner
Can use, edit, share app but not delete or change owner.

Data permissions

Make sure your users have access to the data used in your app, including gateways, APIs, connectors, and entities.

There are multiple versions of the app. Users must only be able to run the most recently published version of the app as shown in the table below:

Version	Modified	Modified by	Power Apps release	Published	Version note
Version 4	09/05/2020 17:32	Bill Jones	3.20023.8		Changed fonts
Version 3	09/05/2020 17:30	Bill Jones	3.20023.8	Live	Changed business logic
Version 2	09/05/2020 17:22	Bill Jones	3.20023.8		Updated background color
Version 1	09/05/2020 17:20	Bill Jones	3.20023.8		

You need to ensure that sharing is configured correctly.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

	Yes	No
Member of the Power Users group are able to publish version 4 of the canvas app.	<input type="radio"/>	<input type="radio"/>
When using the canvas app, a member of the Power Users group can see version 4.	<input type="radio"/>	<input type="radio"/>
If version 2 of the canvas app is restored, it will be labelled as the Live version.	<input type="radio"/>	<input type="radio"/>
If Jim Smith edits the canvas app he will be editing version 4.	<input type="radio"/>	<input type="radio"/>

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Box 1: No

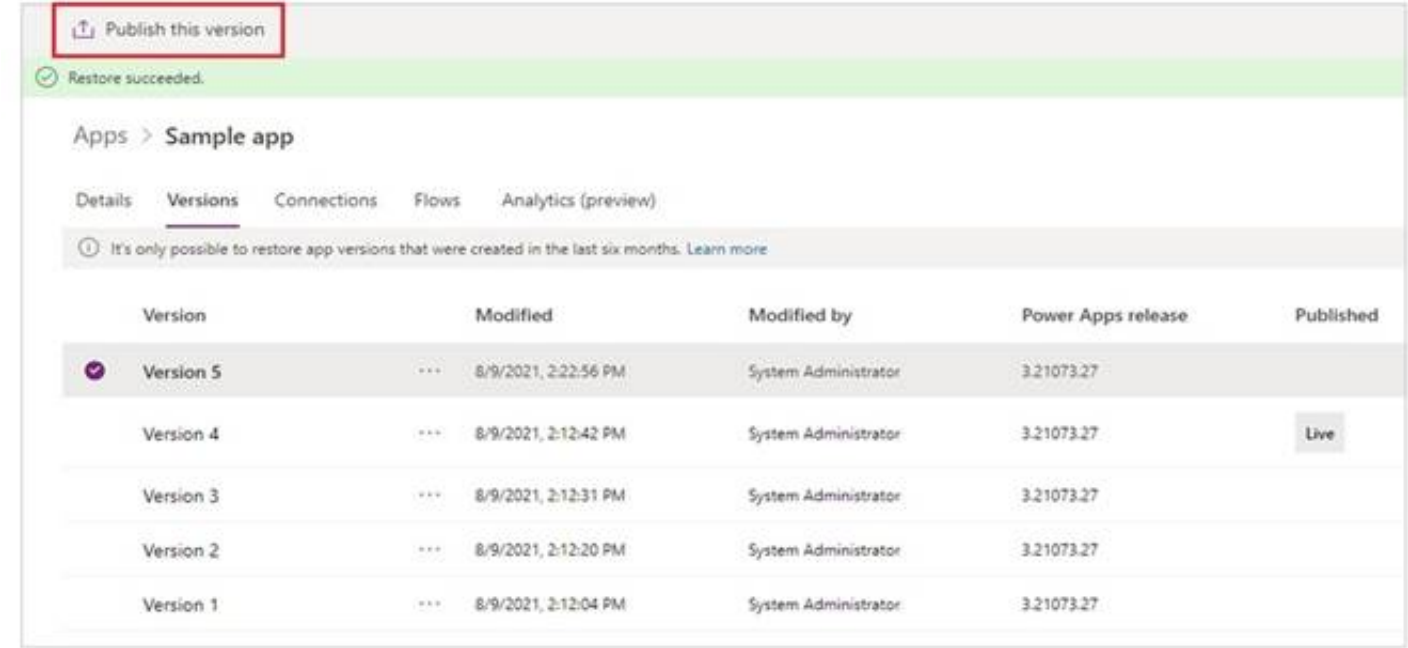

They can only use the app.

Box 2: Yes

Box 3: No

You would need to publish Version 2 to make it live.

Note: If you want to publish the restored version, select Publish this version, and then select Publish this version when prompted to confirm.

Notice the published restore version that shows up as Live.

Version	Modified	Modified by	Power Apps release	Published
Version 5	8/9/2021, 2:22:56 PM	System Administrator	3.21073.27	Live

Box 4: Yes

The most recent version of any app is available only to those who have edit permissions for it.

NEW QUESTION 243

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario.

Each question in the series contains a unique solution that might meet the stated might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Text Recognition model.

Does the solution meet the goal?

A. Yes

B. No

Answer: A

Explanation:

Create a canvas app and add the text recognizer AI Builder component to your screen. This component takes a photo or loads an image from the local device, and then processes it to detect and extract text based on the text recognition prebuilt model. If it detects text in the image, the component outputs the text and identifies the instances by showing a rectangle for each instance in the image.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognizer-component-in- powerapps>

NEW QUESTION 247

HOTSPOT - (Topic 4)

HOTSPOT

The customer service team of a company uses a model-driven app to log customer interactions. The app contains two tables: one to track customer interactions and one to track products.

The team requires an interactive dashboard to display the activities. The dashboard must display the products that have the most complaints. Each chart must display the associated data.

You need to create the dashboard-

Which features should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Activity

Display customer interactions and products.

Feature

Single-stream dashboard

Multi-stream dashboard

Single-stream dashboard

Standard dashboard

Default Chart

Show Chart Only

NEW QUESTION 252

HOTSPOT - (Topic 4)

A company is building a Power Apps app to track key project tasks.

Users assign tasks a risk status on a scale of 0 to 100 by using a slider input control named RiskStatus on the app. The highest risks use the risk status value of 100.

For each task, the user selects a button named RiskLevel to send the name of the task and RiskStatus number to key project stakeholders. The color of the button must change to the color listed in the following table based on the value of the RiskStatus control. The default color for the button is green.

RiskStatus slider value	Risk description	RiskLevel button color
0–50	No/Low risk	Green
51–100	High risk	Red

You need to configure the solution to change the color of the RiskLevel button.

How should you configure the app? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Question

Response

Where do you enter the formula to change the button color?

On the RiskStatus slider.

On the RiskLevel button.

In the variables of the Power Apps app.

On the OnStart property of the Power Apps app.

Which formula should you use?

If (RiskStatus.Value > 75) (return Red;)

If (RiskStatus.Value > 75, Red, Green)

If (RiskStatus.Value > 75 ? Red : Green)

RiskLevel.Fill = RiskStatus.Value > 75 ? Red : Green;

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: On the RiskLevel button.

On the RiskLevel button fill property.

Box 2: Risklevel.Fill = RiskStatus.Value > 75 ? Red : Green;

Most every type of control in a Power App, has a Fill property, for the fill color.

NEW QUESTION 253

- (Topic 4)

A company uses Microsoft platforms for all accessibility, compliance, and security auditing.

The auditing and compliance division of the company flags a newly created Power Apps canvas app due to accessibility issues. The app must be unpublished until it conforms to Microsoft accessibility requirements and recommendations.

You need to identify all accessibility issues for a solution. What should you use?

- A. Microsoft Accessibility Conformance Reports
- B. Microsoft Compliance Center

- C. Power Apps Studio
- D. Microsoft Accessibility Guides
- E. Microsoft Visual Studio

Answer: C

Explanation:

- ? Find accessibility issues
- ? In the upper-right corner of Power Apps Studio, select the icon for the App checker.
- ? App checker icon.
- ? In the menu that appears, select Accessibility.
- ? A list of issues appears, sorted first by severity and then by screen.
- ? Select the arrow next to an item to show details about it.
- ? Accessibility checker details.
- ? Select the back arrow to return to the list of items.
- ? If you decide to address an issue, select it to open the affected property.
- ? After you change one or more properties, select Re-check to update the list of issues.

Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker> <https://support.microsoft.com/en-us/accessibility/enterprise-answer-desk>

NEW QUESTION 258

HOTSPOT - (Topic 4)

A company is building a canvas app.

A user needs to understand which data they can make available for the 500 contacts that are present in the Contact table. All relevant data must be shown in the app. Single fields must show one record and grids must show multiple records. Only the primary fields for each related table should be shown for a contact.

Display name	Relationship name	Related table	Relationship type	Type	Customizable
Company Name	contact_customer_contacts	Contact	Many-to-one	Managed	Yes
Connected From	contact_connections1	Connection	One-to-many	Managed	Yes
Owning Team	Team_contacts	Team	Many-to-one	Standard	Yes

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

How should you design a screen to display the Connection table information for each contact in the Contacts table?

Use a grid for the Contact table and a grid for the Connection table

Use a single field for the Contact table and a grid for the Connection table

Use a grid for the Contact table and a single field for the Connection table

Use a single field for the Contact table and a single field for the Connection table

How should you design a screen to display the Team table information for each contact in the Contact table?

Use a grid for the Contact table and a grid for the Team table

Use a single field for the Contact table and a grid for the Team table

Use a grid for the Contact table and a single field for the Team table

Use a single field for the Contact table and a single field for the Team table

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- Box 1: Use a single field for Contact table and a grid for the Connection table The Contact table is on 1-side of the 1-to-many relation to the Connection table.
- Box 2: Use a single field for Team table and a grid for the Connect table The Team table is on 1-side of the 1-to-many relation to Contact.

NEW QUESTION 262

HOTSPOT - (Topic 4)

HOTSPOT

Inspectors for a city building department use a Microsoft Teams channel, inspectors use SharePoint to view construction bylaws, rules, and regulations.

The city clerk email inspectors links to new bylaw proposal, inspectors vote on the proposals and provide additional feedback.

You need to demonstrate to the city clerk how they can automate the process

Which option should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Flow element

Type of flow.

Option

Cloud flow
Desktop flow
Business process flow

Trigger type.

Manually trigger a flow.
For a selected message in Microsoft Teams.
For a selected file in SharePoint.
When a flow is run from a business process flow.

Flow step to replace emailing the links.

Get changes for an item in SharePoint.
Post an adaptive card to a channel and wait for a response.
Post a choice of options to a user in Teams.
Send an email with options.

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Send an email with options.

NEW QUESTION 265

- (Topic 4)

You are designing an interactive report for a model-driven app. The report will use more than five million records. The query that retrieves data for the report requires more than five minutes to complete.

You need to create the report. Which option should you use?

- A. Interactive dashboard
 B. Power BI
 C. Standard dashboard

Answer: B

NEW QUESTION 268

DRAG DROP - (Topic 4)

You are designing an app for a bank. You plan to use the following entities in the app:

Entity	Comments
Clients	Clients are assigned to a branch office
Bank accounts	A client may have multiple bank accounts. A bank account may have multiple clients as bank account owners
Branch offices	Clients are assigned to a branch office
Employees	Each employee works at only one branch office

You need to configure the relationships between the entities.

Which relationship types should you use? To answer, drag the appropriate relationship types to the correct relationships. Each source may be used once, more

than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Relationship types

One-to-one

One-to-many

Many-to-one

Many-to-many

Answer Area

Relationship		
Source entity	Target entity	Relationship type
Clients	Bank accounts	<div>Relationship type</div>
Clients	Branch offices	<div>Relationship type</div>
Branch offices	Employees	<div>Relationship type</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Many-to-many
Box 2: Many-to-one
A client have a single branch office.
A branch office can have many clients.
Box 3: One-to-many
A branch office can have many employees. An employee only works at one branch office.

NEW QUESTION 272

HOTSPOT - (Topic 4)
: 189 HOTSPOT

A company is building several Power Apps apps to help with sales operations collaboration. You need to identify the right solution for data storage. Which solution should you use? To answer select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Characteristic	Solution
Limits the number of records that can be added.	<div><div>Microsoft Dataverse for Teams</div><div>Microsoft Dataverse</div><div>Microsoft Dataverse for Teams</div></div>
Allows for advanced development tasks for apps specific to Microsoft Teams.	<div><div>Microsoft Dataverse</div><div>Microsoft Dataverse</div><div>Microsoft Dataverse for Teams</div></div>
Has the most granular level of security to account for column-level security in Microsoft Teams.	<div><div>Microsoft Dataverse</div><div>Microsoft Dataverse</div><div>Microsoft Dataverse for Teams</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 274

- (Topic 4)

You create a custom table as part of a solution in the development environment. You deploy major version solutions as managed solutions to production. The organization does not allow new solutions to be created in the production environment.
When a minor update is made to a column length, users cannot enter entire values. You need to allow users to enter entire values in the column.
Solution: Uninstall the most recent version of the solution from the production environment. Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 279

DRAG DROP - (Topic 4)

You are an app maker for a college. You create an app for student enrollment. The app captures the education level of the applicants.

The education level at the time of enrollment is an option set in the student entity. The

? High school

? College

? Bachelor

You must split the College option into two option sets:

? College – 1 Year

? College – 2 years

The split must not impact existing data. You need to create the two option sets.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Open the maker app and navigate to the student table

Publish the student entity

Save the student table

Open settings in the Power Platform admin center

Create new options for College - 1 Year and College - 2 years

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

Open the maker app and navigate to the student table

Publish the student entity

Save the student table

Open settings in the Power Platform admin center

Create new options for College - 1 Year and College - 2 years

Answer Area

Open the maker app and navigate to the student table

Create new options for College - 1 Year and College - 2 years

Publish the student entity

NEW QUESTION 283

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app that displays a list of accounts.

Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.

You need to complete the app.

Solution:

? Add a display form to Screen_AccountDetail.

? Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).

? Set the data source of the form to Accounts.

? Set the Item property of the form to Selected.

? Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

If you add a Display form control, the user can display all fields of a record or only the fields that you specify.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-form-detail>

NEW QUESTION 284

- (Topic 4)

You use a Microsoft SharePoint list to record information about customers.

You must perform a series of actions only when a new item is added to a SharePoint list. You need to configure a Power Automate flow.

Which trigger should you use?

- A. When an item is created
- B. When an item is created or modified
- C. When a file is created (properties only)
- D. For a selected item

Answer: A

Explanation:

Trigger - When an item is created Triggers when an item is created.

MS Flow will trigger when an item is created in the list. It will return all list item properties which can be used in the Flow.

Reference:

<https://www.c-sharpcorner.com/article/sharepoint-based-triggers-in-ms-flow-part-2/>

NEW QUESTION 288

DRAG DROP - (Topic 4)

DRAG DROP

A company uses Power Apps and Microsoft Dataverse.

The company has model driven apps across multiple Microsoft Dataverse environments in the same tenant. You must grant privileges to Power Apps makers to achieve the following:

- Share model-driven apps in multiple Microsoft Dataverse environments.
- Share model-driven apps in only one of the Microsoft Dataverse environments and view only table records that they create themselves.

You need to share the model-driven app with users by using the principle of least privilege. Which security role privilege should you grant for each requirement? To answer, drag the

appropriate security roles to the correct requirements. Each security role may be used once,

more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct answer is worth one point.

Security roles	Requirement	Security role
System Customizer	Share in all Microsoft Dataverse environments.	
Microsoft Power Platform Administrator	Share in one environment and view only table records they create.	
Environment Maker		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Security roles	Requirement	Security role
System Customizer	Share in all Microsoft Dataverse environments.	Environment Maker
Microsoft Power Platform Administrator	Share in one environment and view only table records they create.	System Customizer
Environment Maker		

NEW QUESTION 289

- (Topic 4)

A clothing retailer is creating a Power Virtual Agents chatbot in Microsoft Teams. The chatbot will use Microsoft Dataverse for Teams to provide sales metrics by store.

A user wants to be able to ask the chatbot to see all the sales for pants.

You need to configure the chatbot to provide sales data for pants even when a user enters the terms jeans, slacks, or trousers.

Which chatbot component should you use?

- A. Skills
- B. Tables
- C. Topics
- D. Supported languages
- E. Entities

Answer: E

Explanation:

Reference:

<https://docs.microsoft.com/en-us/power-virtual-agents/advanced-entities-slot-filling>

NEW QUESTION 294

- (Topic 4)

You create a custom table as part of a solution in the development environment. You deploy major version solutions as managed solutions to production. The organization does not allow new solutions to be created in the production environment.

When a minor update is made to a column length, users cannot enter entire values. You need to allow users to enter entire values in the column.

Solution: Update the column length in the development environment. Export the solution as a managed solution, import the solution into production

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 297

- (Topic 4)

You are creating a canvas app. You plan to use variables that are scoped to a screen to store values.

You need to create and update the value of the variables.

Which three functions can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Collect
- B. Patch
- C. Navigate
- D. Set
- E. UpdateContext

Answer: BCE

Explanation:

B: Use the Patch function to modify records in complex situations. Such as, when you do updates that require no user interaction or use forms that span multiple screens.

CE: Context variables are scoped for Screen. They are great for passing values to a screen, much like parameters to a procedure in other languages. Can be referenced from only one screen.

Functions available for context variables: UpdateContext

Navigate Note:

Use the UpdateContext function to create a context variable, which temporarily holds a piece of information, such as the number of times the user has selected a button or the result of a data operation.

Context variables are also preserved when a user navigates between screens. You can use Navigate to set one or more context variables for the screen that the formula will display, which is the only way to set a context variable from outside the screen. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-patch>

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-navigate>
