Exam Questions HPE2-W11

Selling HPE Aruba Networking Solutions

NEW QUESTION 1

What common customer desire is addressed by HPE Aruba Networking Central network management?

- A. eliminating the need for network admins and letting server admins maintain the network
- B. deploying the network and then letting it run without the need for further management and monitoring
- C. managing each network silo with tools specialized for that silo's needs
- D. managing the network without having to install and maintain on-prem management tools

Answer: D

Explanation:

HPE Aruba Networking Central is a cloud-based network management solution that simplifies IT operations, improves agility, and reduces costs by unifying management of all network infrastructure. It eliminates the need for customers to invest in, deploy, and maintain on-premises management tools, and provides a single pane of glass for managing campus, branch, remote, data center, and IoT networks from one dashboard.

References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 13: "Aruba Central is the cloud- native, single pane of glass for managing Aruba ESP. It provides a simple, secure, and cost-effective way to manage and monitor Aruba wired, wireless, and SD-WAN infrastructure, as well as Aruba security and location services."
- Aruba Central for Cloud-managed networking | HPE Aruba Networking: "Built on a cloud- native, microservices architecture, Central is an AI-powered solution that simplifies IT operations, improves agility, and reduces costs by unifying management of all network infrastructure."
- HPE Aruba Central | HPE United Kingdom - Hewlett Packard Enterprise: "Simplify how you provision, configure, and maintain networks by orchestrating all operations from a cloud-native dashboard. Aruba Central is your single point of visibility and control to oversee every aspect of wired and wireless LANs, WANs, and VPNs across campus, branch, remote, and data center locations."

NEW QUESTION 2

What is a use case for HPE Aruba Networking Central with AIOps?

- A. Simplifying the architecture of a data center attached to the campus.
- B. Finding network connectivity and performance issues before they impact business- critical apps.
- C. Upgrading the network more frequently by leasing, rather than purchasing, infrastructure devices.
- D. Enhancing the deployment of IoT devices by delivering an analytics platform at the edge.

Answer: B

Explanation:

HPE Aruba Networking Central with AIOps is a cloud-native network management solution that leverages artificial intelligence to provide full-stack insights for enhanced root cause analysis, impact assessment, and recommendations. It helps IT teams simplify network operations and improve productivity by reducing manual tasks and proactively identifying and resolving network issues before they affect users and business applications. References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 13: "Aruba Central is the cloud- native, single pane of glass for managing Aruba ESP. It provides a simple, secure, and cost-effective way to manage and monitor Aruba wired, wireless, and SD-WAN infrastructure, as well as Aruba security and location services."
- Selling HPE Aruba Networking Solutions, Rev.23.11, page 15: "Aruba Central with AIOps provides AI-powered full-stack insights for enhanced root cause analysis (RCA), impact assessment, and recommendations. It helps IT teams simplify network operations and improve productivity by reducing manual tasks and proactively identifying and resolving network issues before they affect users and business applications."
- HPE Aruba Networking simplifies IT operations with AIOps-driven cloud management and new network-as-a-service capabilities available on HPE GreenLake: "To alleviate time spent on network troubleshooting and optimization, the HPE Aruba Networking Central cloud network management platform has been re-designed to simplify operations and improve productivity by leveraging artificial intelligence for IT operations (AIOps) to reduce manual tasks, so stretched networking teams can focus on more strategic and higher-value projects."
- HPE Aruba network platforms gain AIOps, Agile NaaS: "The next generation of HPE Aruba Networking Central will leverage artificial intelligence for IT operations (AIOps), providing AI-powered full-stack insights for enhanced root cause analysis (RCA), impact assessment and recommendations."

NEW QUESTION 3

Which characteristic indicates a good opportunity for an HPE GreenLake for Aruba solution?

- A. Preferring to use network equipment beyond typical refresh cycles
- B. Being focused on budget and price-per-unit
- C. Preferring in-house support and maintenance
- D. Being under pressure to prove regulatory compliance

Answer: D

Explanation:

HPE GreenLake for Aruba is a network-as-a-service (NaaS) solution that enables customers to consume HPE Aruba Networking solutions as a service with HPE GreenLake for Networking. It provides customers with the flexibility, scalability, and security of a cloud- like experience, while reducing capital expenditures and operational costs¹. One of the characteristics that indicates a good opportunity for this solution is being under pressure to prove regulatory compliance, as HPE GreenLake for Aruba helps customers meet compliance requirements such as SOC 2 Type 2, PCI DSS, HIPAA, and GDPR by providing secure and auditable network services²³.

NEW QUESTION 4

What approach does Aruba Edge Service Platform (ESP) take towards IT operations?

- A. It applies machine learning to large data sets to identify issues and recommend fixes or optimizations automatically.
- B. It simplifies management by taking a one-size-fits all approach in which most settings are non-customizable.
- C. It relies on expert IT admins who work in specialized teams to manage their segment of the Aruba network.
- D. It uses a distributed analytics approach in which operators gain visibility into local issues.

Answer: A

Explanation:

Aruba ESP (Edge Services Platform) is a cloud-native platform that leverages artificial intelligence for IT operations (AIOps) to simplify and improve network operations across all edges. It uses machine learning to analyze data from various sources, such as network devices, users, applications, and security events, to provide insights, recommendations, and automation for network optimization and troubleshooting.

References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 15: “Aruba Central with AIOps provides AI-powered full-stack insights for enhanced root cause analysis (RCA), impact assessment, and recommendations. It helps IT teams simplify network operations and improve productivity by reducing manual tasks and proactively identifying and resolving network issues before they affect users and business applications.”
- Introducing Aruba ESP: “Aruba ESP (Edge Services Platform) is the industry’s first cloud- native platform designed to automate, unify, and secure the Edge — using AI to spot and fix problems before they impact your business.”
- What is Aruba Edge Services Platform (ESP)? - Comport: “How Does Aruba ESP Work? Aruba ESP has the capability to analyze unstructured data that users, devices and applications provide across all of a network’s domains. This data is then used to curate contextual information about identity, location, applications in use and security posture to become hyper-aware of a network’s operations.”

NEW QUESTION 5

An organization has adopted a hybrid work model and is concerned about security. Which distinguishing value of HPE Aruba Networking ESP should you emphasize?

- A. HPE Aruba Networking ESP relays all user traffic through the HPE Aruba Networking cloud to filter and secure the traffic.
- B. HPE Aruba Networking ESP makes it easy to enforce consistent role-based policies whether users connect from home, while traveling, or at an office.
- C. HPE Aruba Networking ESP takes an Internet perimeter-focused approach to security, which is ideal for organizations with remote workers
- D. HPE Aruba Networking ESP empowers admins to define manual security policies based on criteria such as switch port and SSID.

Answer: B

Explanation:

HPE Aruba Networking ESP is a cloud-native platform that unifies infrastructure, security, policies, and AI-powered management across all your edges¹. One of its distinguishing values is that it enables Zero Trust security, which applies consistent role-based policies to users and devices regardless of where they connect from². This ensures that only authorized and authenticated users and devices can access the network and its resources. NEW QUESTION 6

A customer’s employees need to connect to the corporate network from their own home offices. IT finds it difficult to support these employees and get them connected securely. What HPE Aruba Networking solution should you recommend?

- A. HPE Aruba Networking EdgeConnect Enterprise
- B. HPE Aruba Networking EdgeConnect MicroBranch
- C. HPE Aruba Networking Fabric Composer
- D. HPE Aruba Networking CX switches

Answer: B

Explanation:

HPE Aruba Networking EdgeConnect MicroBranch is a secure SD-WAN solution that extends the benefits of HPE Aruba Networking EdgeConnect to home offices and small offices. It enables employees to connect to the corporate network from their own devices, and provides consistent security, performance, and quality of experience for cloud and SaaS applications¹. It also simplifies and automates the deployment and management of home office networks, and integrates with HPE Aruba Networking Central for cloud-based visibility and control².

NEW QUESTION 7

Which customer requirement would HPE Aruba Networking Central with AIOps address?

- A. The customer needs to implement role-based security across the wired and wireless networks.
- B. The customer wants to develop sophisticated maps for location-based services.
- C. The customer’s IT team is understaffed or underqualified to troubleshoot and optimize the network.
- D. The customer wants to allow users to access applications remotely.

Answer: C

Explanation:

HPE Aruba Networking Central with AIOps is a cloud-based networking solution that empowers IT with AI-powered insights, intuitive visualizations, workflow automation, and edge-to-cloud security to manage campus, branch, remote, data center, and IoT networks from one dashboard¹. It can address the customer requirement of having an efficient and effective IT team by simplifying network operations, reducing manual tasks, providing proactive remediation, and optimizing network performance².
