NEW QUESTION 8

- (Topic 3)

You create a Power BI dashboard that displays data from Dynamics 365 Customer Engagement. You need to share the Power BI dashboard with coworkers.

What are three possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create a Power BI workspace and grant coworkers permissions.
- B. Publish the dashboard as an app to your coworkers.
- C. Export the data into Common Data Service for others to manipulate in Power BI.
- D. Export the data to Microsoft Excel for coworkers to import and view in Power BI.
- E. Embed reports in your company's internal web portal.

Answer: ABE

Explanation:

A: Basic Sharing for Dashboards and Reports through a workspace is the most common way of sharing the Power BI content. Basic Sharing is very simple and easy to use method. You can simply click on the Share button in the dashboard or report, and then share it with other users.

B: Apps are great sharing method for multiple environment, and best way of sharing for users in production environment.

Power BI App is the solution for multiple environment approach. With Power BI App, your development environment (workspace), and user environment (App) are isolated from each other.

Note: If you are using SharePoint online as a portal for document management and some other reasons already, then consider using Embed in SharePoint Online feature of Power BI reports. This method is secure and you can share the report only with Power BI users you want.

E: Sometimes, you don't need a secure way of sharing, you may search for an easy and free way of sharing, and your content is not confidential or sensitive.

Publish to web is your friend in such situation. This is the only free way of sharing in Power BI, but be aware that this method is not secure.

Publish to web method, gives you an embed code, which you can use in any web pages to embed the Power BI report in it

NEW QUESTION 9

DRAG DROP - (Topic 3)

A company needs to create a series of mobile applications to empower their field engineers to accomplish several tasks with varying degrees of complexity.

Match each option to its answer.

Instructions: To answer, drag the appropriate app type from the column on the left to its definition on the right. Each app type may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

App types	Answer Area	Definition	App type
model-driven		Quickly create apps for very complex business processes with very little or no code.	App type
dashboard		Create simple apps with a highly customizable user interface layouts.	App type
dataset			
canvas			

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: canvas

Both model-driven and canvas apps allow you to easily build business apps. They both share access to the Common Data Service providing standard and custom entities. Canvas apps start with your user experience, crafting a highly tailored interface with the power of a blank canvas and connecting it to 200 data sources. Canvas apps can be built for web, mobile, and tablet applications. Model-driven apps start with your data model – building up from the shape of your core business data and processes in the Common Data Service to model forms, views, and other components. Model-driven apps automatically generate great UI that is responsive across devices.

Box 2: model-driven

NEW QUESTION 34

DRAG DROP - (Topic 3)

A company plans to create an information portal that managers can use to view critical information about their teams.

You need to recommend the type of Power BI components that the company should use. What should you recommend? To answer, drag the appropriate components to the correct

requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE. Each correct selection is worth one point.

Component types	Requirement	Component type
Dashboard	Display data from a Microsoft Excel workbook that has multiple worksheets into one chart.	Component type
Report	Display the top departmental goal metrics and alert users when specific thresholds targets are met.	Component type
	Display Sales charts that can be filtered by region.	Component type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Report

Reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc.

Box 2: Dashboard

Dashboards are a business key performance indicator view where it displays key values that can change business profits and can be glanced at one screen.

Box 3: Report

Power BI dashboards cannot slice and dice, but reports have many ways to filter and slice.

Note: Power BI dashboards are one placeholder to display the most important decision-making facts to run a business. But reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc. Reports are based on one dataset or one business unit data for example reports of a store belonging to California.

NEW QUESTION 76

- (Topic 5)

A company performs on-site inspections and services for air industrial equipment.

Field technicians must perform a series of maintenance checks every time they visit a customer site. Every

technician performs maintenance tasks in a different order. Some technicians miss steps. You need to ensure that all technicians perform the same steps in the same order.

What should you use?

- A. Business process flow
- B. AI Builder
- C. Business rule
- D. Virtual Agent

Answer: A

Explanation:

You can help ensure that people enter data consistently and follow the same steps every time they work with a customer by creating a business process flow. For example, you might want to create a business process flow to have everyone handle customer service requests the same way, or to require that people get approval for an invoice before submitting an order. Business process flows use the same underlying technology as other processes, but the capabilities that they provide are very different from other features that use processes.

NEW QUESTION 84

HOTSPOT - (Topic 5)

A company uses a third party application and an approval process via email. At the end of the month, the IT department enters the data into Microsoft Excel to create pivot charts.

The Excel pivot charts must use the same data source as Dynamics 365 Field Service to generate charts and reports.

You need to recommend a solution.

What should you recommend? To answer, select the appropriate configuration in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
Create an approval workflow.	<div style="border: 1px solid black; padding: 2px;"> <div style="border-bottom: 1px solid black; padding: 2px;">▼</div> <div style="padding: 2px;">Dynamics 365 Workflow Notifications</div> <div style="padding: 2px;">Microsoft Outlook Integration</div> <div style="padding: 2px;">AI Builder</div> <div style="padding: 2px;">Microsoft Flow</div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Dynamics 365 Workflow notifications

You can configure the system to send email messages to users when workflow-related events occur.

Note:

? Go to Navigation pane > Modules > System administration > Users > Users.

? In the list, find and select the desired record.

? On the Action pane, click User options.

? Click the Workflow tab. Make sure that the Notifications section is expanded. In the Notifications section, you can specify how you want the user to be notified about workflow-related events.

Box 2: Dynamics 365 Field Service

Supply Chain Management enables synchronization of business processes between Dynamics 365 Supply Chain Management and Dynamics 365 Field Service.

The integration scenarios are configured by using extensible Data integrator templates and Common Data Service to enable the synchronization of business processes. Standard templates can be used to create custom integration projects, where additional standard and custom fields and entities can be mapped to adjust the integration and meet specific business needs.

NEW QUESTION 87

- (Topic 5)

This question requires that you evaluate the BOLD text to determine if it is correct.

A company requires that service representatives schedule customer visits every six months. Each service representative is required to enter a scheduled task for the next checkup as they are leaving a client site. A service representative wants to automate task entry by creating a business process flow that can be initiated from the service call screen on a phone.

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. a scheduled
- C. an instant
- D. an action

Answer: D

Explanation:

Note: Create a flow (see step 6 below)

* 1. Sign in to PowerApps.

* 2. In the left navigation bar, select Business logic, and then select Flows.

* 3. In the upper-left corner of the My Flows page, select New, and then select Create from blank.

* 4. Option to create a flow without using a template

Near the bottom of the page that appears, select Search hundreds of connections and triggers.

* 5. In the search box, type PowerApps, and then select the PowerApps icon.

* 6. Create a PowerApps trigger

* 7. On the next page, select the PowerApps icon again, and then select New step.

* 8. In the box that says Search connectors and actions, specify an action for your flow, as in this example:

NEW QUESTION 91

DRAG DROP - (Topic 5)

You plan to use Microsoft Flow to monitor what people are saying about your company's products. You store the feedback for research and development purposes.

You need to recommend Flow components to use for the solution.

To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar

between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Components	Requirement	Component
action	Retrieve the top five posts from your company's Facebook page.	Component
expression	Enter the resulting posts into the product database.	Component
service	Combine author and link fields into a single field.	Component
trigger	Run flow every hour.	Component
flow type		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Trigger

A trigger is something that triggers or starts the workflow. It could be a new file uploaded to a document library, a new item created in the list or an email sent to your Inbox –

something that will start (kick-off the workflow).

There are two types of triggers:

? Automatic trigger is pre-programmed into the workflow based on a certain rule (i.e. new document or item created, email sent, etc.)

? Manual Trigger is a trigger initiated by a user. Unlike with automatic trigger above, the workflow will only start when initiated manually by the end user (for example, from the Document Library for a selected file). Manual trigger is only supported for certain types of workflows (i.e. Get feedback from your manager for the selected file)

Box 2: action

An action is something that occurs as a result of the workflow.

Box 3: expression

Sometimes users just need to do basic operations like getting the current time, adding numbers together, or replacing a part of a string of text. That's possible inline in any flow action. Microsoft Flow leverages the same Workflow Definition Language used by Azure Logic apps. For new users who are unfamiliar with the expression language, there is an inline help experience that shows how to use each expression as they build out their flow.

Box 4: flow type

There are four different Flow types that you can choose from when starting out. You can create a scheduled flow, automated flow, instant flow, or a business

process flow.

NEW QUESTION 95

HOTSPOT - (Topic 5)

A company plans to create a workflow that periodically runs a Dynamics 365 action based on data in third-party cloud-based solutions. Which features should you use to create the workflow? To answer, select the appropriate options in the answer area.

NEW QUESTION 106

HOTSPOT - (Topic 5)

A company plans to use Power Apps to connect to a series of custom services. There are no connectors available for the custom services.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
Custom connectors for customer-specific services do not require review and certification by Microsoft.	<input checked="" type="radio"/>	<input type="radio"/>
You can build a custom connector once and reuse the connector for Power Apps and Microsoft Flow.	<input checked="" type="radio"/>	<input type="radio"/>
You can make custom connectors publicly available for all Power Platform users without having Microsoft certify the connector.	<input type="radio"/>	<input checked="" type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

Only if you would like to share your connector with all users of Logic Apps, Microsoft Flow, and PowerApps, you can submit your connector for Microsoft certification. Microsoft will review your connector.

Box 2: Yes

Connectors created in Microsoft Flow are available in PowerApps. Likewise, connectors created in PowerApps are available in Microsoft Flow.

Box 3: No

If you would like to share your connector with all users of Logic Apps, Microsoft Flow, and PowerApps, you can submit your connector for Microsoft certification. Microsoft will review your connector.

NEW QUESTION 117

- (Topic 5)

A company uses Dynamics 365 Supply Chain Management.

When a sales order is created for one of the customers that a specific user manages, a Microsoft Outlook task must be created to remind the user to perform any follow up activities that are required.

You need to implement the functionality to create Outlook tasks.

Which two features should you use? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. AI Builder
- B. Power Apps
- C. Business Events
- D. Microsoft Flow
- E. Common Data Service

Answer: C

Explanation:

Business events in Microsoft Power Automate

Business events can be consumed in Microsoft Power Automate via the application connector. The connector has a trigger that is named when a business event occurs. This trigger can be used to subscribe to any of the business events that are available in the target instance of the application.

NOTE: Each correct selection is worth one point.

Chart types	Requirement	Chart type
Donut	Show the quarterly sales total to date in relation to the sales goal.	<input type="text"/>
KPIs	View the sales trend by month of the sales year to date for all regions.	<input type="text"/>
Line chart	View the year-to-date sales as a percentage by region.	<input type="text"/>
Matrix		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: KPIs

A Key Performance Indicator (KPI) is a visual cue that communicates the amount of progress made toward a measurable goal.

Box 2: Line chart

Line charts emphasize the overall shape of an entire series of values, usually over time.

Box 3: Donut

Doughnut charts are similar to pie charts. They show the relationship of parts to a whole. The only difference is that the center is blank and allows space for a label or icon.

Managed solutions must be used to distribute a Power Platform application on AppSource.	<input type="radio"/>	<input type="radio"/>
Managed solutions always protect Power Platform components from editing when components are exported to another environment.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

Managed solutions are used to deploy to any environment that isn't a development environment for that solution.

Box 2: No

Unmanaged solutions can be exported either as unmanaged or managed.

Box 3: Yes

You can't edit components directly within a managed solution. To edit managed components, first add them to an unmanaged solution.
