

Cisco

Exam Questions 700-750

Cisco Small and Medium Business Engineer (SMBE)

NEW QUESTION 1

Meraki Dashboard is used for ease of management of Meraki devices. Which other devices are integrated with the Meraki dashboard?

- A. Smart Assistants
- B. HVAC Sensors
- C. Catalyst devices
- D. WebEx Boards

Answer: C

Explanation:

The Meraki Dashboard is designed to provide a centralized management platform for various Cisco devices, including Meraki and Catalyst devices. The integration of Catalyst devices with the Meraki Dashboard allows for simplified management and monitoring, offering a unified view of the network. This integration enables IT administrators to oversee their network infrastructure, including switches and wireless access points, through the Meraki Dashboard's intuitive interface¹².

NEW QUESTION 2

What is the primary purpose of Umbrella's Secure Web Gateway?

- A. exposes shadow IT by providing the ability to detect and report on cloud applications across organizations
- B. analyzes sensitive data in-line to provide visibility and control over sensitive data
- C. isolates web traffic from the user device to prevent the possibility of malware infections
- D. logs and inspects web traffic for full visibility, URL and application controls, and protection against malware

Answer: D

Explanation:

The primary purpose of Umbrella's Secure Web Gateway (SWG) is to provide a comprehensive security solution that logs and inspects web traffic. This allows for full visibility into the web activities within an organization, enabling URL and application controls, and offering advanced threat protection against malware. SWG acts as a checkpoint between users and the internet, filtering and monitoring web traffic to ensure safe internet access while blocking potentially harmful content. It is designed to enforce security policies, prevent data leakage, and protect against web-based threats by inspecting URLs, detecting threats, and decrypting select encrypted traffic for inspection.

NEW QUESTION 3

What do SMBs need to be truly smart?

- A. visibility for each process at each location separately
- B. optimized customer and employee experiences by providing an environment that meets modern expectations
- C. individually managed technology stacks
- D. separate dashboards to provide intelligent monitoring with actionable insight and device manageability

Answer: B

Explanation:

To be truly smart, SMBs need to optimize customer and employee experiences by providing an environment that meets modern expectations. This involves leveraging technology to create a seamless, efficient, and responsive experience for both customers and employees. A smart SMB utilizes integrated solutions that enhance collaboration, productivity, and security, enabling the business to adapt quickly to market changes and customer needs. By focusing on the user experience, SMBs can drive innovation and growth, ensuring they remain competitive in a rapidly evolving business landscape¹. References :=

NEW QUESTION 4

Which security challenge do SMBs face?

- A. 98% of breaches are human error
- B. global excess of security experts
- C. too little vendor support
- D. too many security products

Answer: D

Explanation:

Small and medium-sized businesses (SMBs) often face the challenge of navigating through an overwhelming number of security products. This can lead to complexity and confusion, making it difficult for SMBs to choose the right solutions and effectively manage their cybersecurity posture. Unlike larger organizations, SMBs typically have limited resources and may not have dedicated security personnel, which exacerbates the challenge of dealing with too many security products. The key is finding a balance between having enough security to protect against threats and not having so much that it becomes unmanageable or too costly.

NEW QUESTION 5

Which outcome do Cisco products deliver for SMB Customers?

- A. enhance people
- B. enhance workspaces
- C. enable IT
- D. enhance visibility

Answer: C

Explanation:

Cisco's solutions for small and medium-sized businesses (SMBs) are designed to empower the IT infrastructure of these organizations. By enabling IT, Cisco products provide reliable, fast connections to networks and resources, which keeps employees productive and customers satisfied. Their offerings include switches, routers, wireless access points, and networking management tools that form the backbone of a robust IT environment. Additionally, Cisco's security solutions, like firewalls and VPNs, ensure that SMBs can protect their data and assets effectively. This focus on enabling IT aligns with Cisco's broader strategy to provide flexible cloud solutions and secure, intelligent workspaces for SMBs.

NEW QUESTION 6

Which Cisco product secures the perimeterless, work-from-anywhere world with Zero Trust?

- A. Meraki MX
- B. Duo
- C. Meraki Insight
- D. Umbrella

Answer: B

Explanation:

Cisco's Duo is the product that secures the perimeterless, work-from-anywhere world with Zero Trust. Duo provides user-centric zero-trust security by verifying the identity of users and the health of their devices before they connect to the apps they need. It's designed to protect access to sensitive data for all users, devices, and applications, aligning with the zero trust concept of least privilege and continuous trust assessment¹². References :=

NEW QUESTION 7

What must a hybrid SMB technology solution have?

- A. zero trust identity-based access
- B. specific desk for each employee when they visit the office
- C. single vendor collaboration infrastructure
- D. separate security policy for wired and wireless users

Answer: A

Explanation:

A hybrid SMB technology solution must prioritize security, especially in a landscape where remote work is prevalent. Zero trust identity-based access is a security model that requires all users, whether inside or outside the organization's network, to be authenticated, authorized, and continuously validated for security configuration and posture before being granted or keeping access to applications and data. This approach aligns with the modern needs of SMBs to provide secure access to their resources in a hybrid environment, where users are accessing systems both on-premises and remotely. It ensures that only authenticated and authorized users and devices can access applications and data, thereby reducing the attack surface and providing a more secure IT environment.

NEW QUESTION 8

Video surveillance technology is now in the middle of the same type of transformation as which technology?

- A. networks
- B. security
- C. Wi-Fi
- D. business telephone

Answer: D

Explanation:

Video surveillance technology is undergoing a transformation similar to that of business telephone systems. Just as business telephones have evolved from traditional landlines to VoIP and unified communications, video surveillance is shifting from standalone, analog systems to integrated, digital solutions. This transformation is driven by advancements in AI, cloud computing, and IoT, which are enabling more intelligent, connected, and versatile surveillance systems¹²³.

NEW QUESTION 9

How does Cisco help SMBs to be truly smart?

- A. employee automation

- B. utilities cost control
- C. operational inefficiencies
- D. secure connectivity

Answer: D

Explanation:

Explanation

Cisco aids SMBs in becoming truly smart by providing secure connectivity solutions. These solutions are designed to enable employees to work safely and reliably from anywhere, at any time. Cisco's offerings, such as Meraki Wi-Fi for public or private connectivity, ensure speed, scale, and security. Additionally, Cisco's smart office technology solutions leverage intelligent workplace technologies like Meraki cameras for security and smart building automation, and environmental sensors for a smarter, safer, and more sustainable future. This secure connectivity is fundamental to enabling smart operations and empowering SMBs to take advantage of digital opportunities.

NEW QUESTION 10

Which Cisco program offers knowledge about security resilience and how the Cisco Secure portfolio can help customers achieve it?

- A. Fire Jumper
- B. MINT
- C. EBC
- D. U-Learn

Answer: A

NEW QUESTION 10

Which Cisco product allows secure internet access?

- A. Duo
- B. Webex
- C. Meraki
- D. Umbrella

Answer: D

NEW QUESTION 15

.....

Thank You for Trying Our Product

We offer two products:

1st - We have Practice Tests Software with Actual Exam Questions

2nd - Questions and Answers in PDF Format

700-750 Practice Exam Features:

- * 700-750 Questions and Answers Updated Frequently
- * 700-750 Practice Questions Verified by Expert Senior Certified Staff
- * 700-750 Most Realistic Questions that Guarantee you a Pass on Your First Try
- * 700-750 Practice Test Questions in Multiple Choice Formats and Updates for 1 Year

100% Actual & Verified — Instant Download, Please Click
[Order The 700-750 Practice Test Here](#)
