NEW QUESTION 4
- (Topic 1)
View the following exhibit, which shows theDownload Import Report:

Start to import config from devices(Remote-FortiGate) vdom (root)to adom (MyADOM),

Package(Remote-FortiGate)

“firewall address”, SUCCESS,”(name=REMOTE_SUBNET,oid=580, new object)”

“firewall policy”,SUCCESS,”(name=1, oid=990,new object)”

“firewall policy”,FAIL,”(name=ID:2(#2), oid=991, reason=interface(interface binding

Contradiction.detail:any<-port6)binding fail)”

Why it is failing to import firewall policy ID 2?

A. The address object used in policy ID 2 already exist in ADON database with any as interface association and conflicts with address object interface association locally on the FortiGate
B. Policy ID 2 is configured from interface any to port6 FortiManager rejects to import this policy because any interface does not exist on FortiManager
C. Policy ID 2 does not have ADOM Interface mapping configured on FortiManager
D. Policy ID 2 for this managed FortiGate already exists on FortiManager in policy package named Remote-FortiGate.

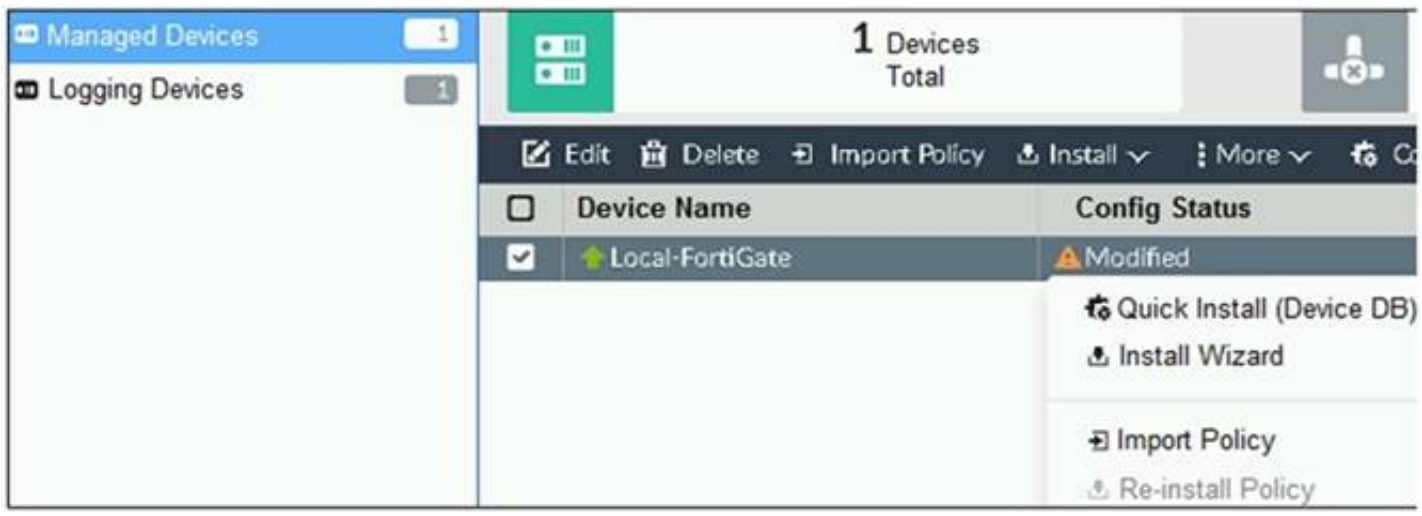
NEW QUESTION 7
- (Topic 1)
Refer to the exhibit.



You are using theQuick Installoption to install configuration changes on the managed FortiGate.
Which two statements correctly describe the result? (Choose two.)

A. It will not create a new revision in the revision history
B. It installs device-level changes to FortiGate without launching theInstall Wizard
C. It cannot be canceled once initiated and changes will be installed on the managed device
D. It provides the option to preview configuration changes prior to installing them

Answer: BC

Explanation:
FortiManager_6.4_Study_Guide-Online – page 164
The Install Config option allows you to perform a quick installation of device-level settings without launching the Install Wizard. When you use this option, you cannot preview the changes prior to committing. Administrator should be certain of the changes before using this install option, because the install can’t be cancelled after the process is initiated.

NEW QUESTION 10
- (Topic 1)
Refer to the exhibit.

```
FortiManager # diagnose dvm device list

                |- vdom:[3]root flags:0 adom:My_ADOM pkg:[imported]Local-FortiGate
```

Which two statements about the output are true? (Choose two.)

A. The latest revision history for the managed FortiGate does match with the FortiGate running configuration
B. Configuration changes have been installed to FortiGate and represents FortiGate configuration has been changed
C. The latest history for the managed FortiGate does not match with the device-level database
D. Configuration changes directly made on the FortiGate have been automatically updated to device-leveldatabase

Answer: AC

Explanation:
STATUS: dev-db: modified; conf: in sync; cond: pending; dm: retrieved; conn: up– dev-db: modified – This is the device setting status which indicates that configuration changes were made on FortiManager.– conf: in sync – This is the sync status which shows that the latest revision history is in sync with Fortigate's configuration.– cond: pending – This is the configuration status which says that configuration changes need to be installed.
Most probably a retrieve was done in the past (dm: retrieved) updating the revision history DB (conf: in sync) and FortiManager device level DB, now there is a new modification on FortiManager device level DB (dev-db: modified) which wasn't installed to FortiGate (cond: pending), hence; revision history DB is not aware of that modification and doesn't match device DB.
Conclusion:– Revision DB does match FortiGate.– No changes were installed to FortiGate yet.– Device DB doesn't match Revision DB.– No changes were done on FortiGate (auto-update) but configuration was retrieved instead
After an Auto-Update or Retrieve:device database = latest revision = FGT
Then after a manual change on FMG end (but no install yet):latest revision = FGT (still) but now device database has been modified (is different).
After reverting to a previous revision in revision history:device database = reverted revision != FGT

NEW QUESTION 10
- (Topic 2)
What does a policy package status ofConflictindicate?

A. The policy package reports inconsistencies and conflicts during aPolicy Consistency Check.
B. The policy package does not have a FortiGate as the installation target.
C. The policy package configuration has been changed on both FortiManager and the managed deviceindependently.
D. The policy configuration has never been imported after a device was registered on FortiManager.

Answer: C

NEW QUESTION 13
