Exam Questions HPE2-W11

Selling HPE Aruba Networking Solutions

NEW QUESTION 1

You are meeting with a customer's Chief Information Security Officer (CISO) and want to open a discovery conversation about HPE Aruba Networking Edge-to-Cloud Security solutions. What is one topic you should discuss?

- A. How dependent the organization is on video conferencing and other collaboration applications and whether the CISO understands how to patch those applications' vulnerabilities.
- B. How dependent the organization is on manually defined security policies and what risk the organization runs if admins make errors in those policies.
- C. Whether the CISO understands the encryption technologies that are improving security for modern wireless networks.
- D. Whether the CISO understands the value of a single-vendor, end-to-end security solution and is ready to commit to a single vendor.

Answer: B

Explanation:

HPE Aruba Networking Edge-to-Cloud Security solutions enable customers to automate and simplify network security operations and enhance Zero Trust protection across all network domains. By using HPE Aruba Networking Central NetConductor, customers can orchestrate and enforce granular, role-based policies that are consistent and aligned with business intent, regardless of where users and devices connect. This reduces the risk of human errors, misconfigurations, and security breaches that can result from manually defined and managed policies.

References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 17: "Aruba Central NetConductor is a cloud-native network security service that automates and accelerates networking and policy orchestration across all network domains. It enables customers to define and enforce granular, role-based policies that are consistent and aligned with business intent, regardless of where users and devices connect."
- Edge-to-cloud, Zero Trust, and SASE security | HPE Aruba Networking: "Aruba Central NetConductor automatically configures infrastructure to deliver optimal network performance while enforcing granular access control security policies that are the foundation of Zero Trust and SASE architectures."
- HPE Aruba Networking Central NetConductor: Automate and Accelerate Networking and Policy Orchestration: "Aruba Central NetConductor eliminates the need for manual configuration and management of network policies, which can be error-prone, time-consuming, and inconsistent across network domains. It also reduces the risk of security breaches and compliance violations that can result from misconfigurations and gaps in policy enforcement."

NEW QUESTION 2

What is one way that HPE Aruba Networking ESP (Edge Services Platform) helps customers reduce operational costs?

- A. Customers can use HPE Aruba Networking NetEdit to manage multiple wired and wireless devices from a single console.
- B. HPE Aruba Networking ESP offloads all network management to common third-party solutions that customers likely already use.
- C. AI embedded in HPE Aruba Networking Central helps IT to troubleshoot more quickly and solve issues before they cause larger problems.
- D. HPE Aruba Networking ESP solutions are plug-and-play and do not require any ongoing management.

Answer: C

Explanation:

HPE Aruba Networking ESP is a cloud-native platform that unifies infrastructure, security, policies, and AI-powered management across all your edges¹. One of the ways that it helps customers reduce operational costs is by embedding AI in HPE Aruba Networking Central, which is a cloud-based network management solution. HPE Aruba Networking Central with AIOps uses data-driven analytics, root cause analysis, and proactive remediation to help IT troubleshoot issues faster, optimize network performance, and improve user experience^{2,3}.

NEW QUESTION 3

What is one distinguishing benefit of HPE Aruba Networking Fabric Composer?

- A. It simplifies the deployment of HPE Aruba Networking APs at branch sites.
- B. It establishes an easily automated, software-defined network.
- C. It automatically establishes secure connections between branch offices and the main office.
- D. It unifies the management of HPE Aruba Networking APs and switches.

Answer: B

Explanation:

HPE Aruba Networking Fabric Composer is an intelligent, API-based, software-defined networking (SDN) orchestration solution that simplifies and accelerates leaf-spine network provisioning and day-to-day operations across rack-scale compute and storage¹. It enables IT staff to manage a discrete set of switches as a single networking fabric, and to automate workflows and integrate with third-party frameworks².

NEW QUESTION 4

You suspect that the HPE Aruba Networking network management solution might resonate with a customer. What is one good way to open the conversation?

- A. Access an Aruba AP Web UI and demonstrate configuring a wireless LAN (WLAN).
- B. Assess how well the customer understands the wireless technologies currently in use.
- C. Point out the differences between HPE Aruba's, Cisco's, and Juniper's management approach one by one.
- D. Ask about how much visibility the customer currently has into the network.

Answer: D

Explanation:

HPE Aruba Networking network management solution is a cloud-based platform that provides AI-powered insights, automation, and security for wired, wireless, and SD-WAN networks¹. A good way to open the conversation is to ask the customer about their current network visibility, such as how they monitor network performance, troubleshoot issues, and optimize user experience. This can help to identify their pain points and show how HPE Aruba Networking network management solution can address them.

NEW QUESTION 5

Which customer challenge indicates a good opportunity for selling HPE Aruba Networking EdgeConnect solutions?

- A. The customer needs more WAN bandwidth but finds it cost-prohibitive to expand bandwidth on the company's current leased lines.
- B. The customer needs to simplify troubleshooting for the HPE Aruba Networking infrastructure devices already deployed at the main office.
- C. The customer needs to simplify by deploying a consistent switching platform across the campus and data center.
- D. The customer has no IT staff and needs a simple mobility solution for the company's single small site.

Answer: A

Explanation:

HPE Aruba Networking EdgeConnect solutions enable customers to leverage multiple WAN transport options, such as broadband internet, 4G/5G/LTE, and MPLS, to optimize bandwidth, performance, and cost. EdgeConnect solutions also provide dynamic path control, which automatically steers traffic to the best available path based on business intent policies and real-time network conditions. This way, customers can increase WAN bandwidth without increasing costs or complexity.

References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 16: "EdgeConnect SD-WAN platform enables customers to use any combination of WAN transport technologies without compromising network or application performance. It supports MPLS, 4G/5G/LTE, and internet-based hybrid WAN data paths and a control plane that is automated and secured by Aruba Orchestrator management software to provide policy-based virtual network segmentation and acceleration of on-premise and SaaS cloud applications."
- Aruba EdgeConnect SD-WAN | HPE Aruba Networking: "Aruba EdgeConnect SD-WAN | HPE Aruba Networking Home / Products / SD-WAN / EdgeConnect EdgeConnect SD- WAN The EdgeConnect SD

NEW QUESTION 6

What is one impact of Internet of Things (IoT) on customer environments?

- A. IoT consistently shifts network traffic away from the wireless network and towards the wired network.
- B. IoT helps customers minimize their vulnerability to attacks at the edge.
- C. IoT increases the number of devices that edge networks must accommodate.
- D. IoT decreases network utilization at the edge and increases utilization in the cloud.

Answer: C

Explanation:

Internet of Things (IoT) is the term used to describe the network of physical objects that are embedded with sensors, actuators, and connectivity to exchange data with other devices and systems over the internet. IoT devices can range from smart home appliances, wearable devices, industrial machines, vehicles, and more. IoT has a significant impact on customer environments, as it increases the number of devices that edge networks must accommodate, manage, and secure. Edge networks are the networks that connect users and devices to the core network and the cloud. As IoT devices proliferate, edge networks face challenges such as scalability, performance, reliability, security, and visibility.

References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 11: "Internet of Things (IoT) is the term used to describe the network of physical objects that are embedded with sensors, actuators, and connectivity to exchange data with other devices and systems over the internet."
- Selling HPE Aruba Networking Solutions, Rev.23.11, page 11: "Edge networks are the networks that connect users and devices to the core network and the cloud. They include campus, branch, remote, data center, and IoT networks."
- Selling HPE Aruba Networking Solutions, Rev.23.11, page 11: "As IoT devices proliferate, edge networks face challenges such as scalability, performance, reliability, security, and visibility."
- What is IoT: The Internet of Things explained | McKinsey: "IoT uses a variety of technologies to connect the digital and physical worlds. Physical objects are embedded with sensors—which can monitor things like temperature or motion, or really any change in environment—and actuators—which receive signals from sensors and then do something in response to those changes."
- How Is the Internet of Things Changing Our Lives?: "The Internet of Things (IoT) is changing our lives in many ways. It is transforming how we work, play, learn, and communicate. It is also creating new opportunities and challenges for businesses, governments, and society."

NEW QUESTION 7

You are discussing a network upgrade with a mid-sized customer. The customer is worried about future-proofing the network. What should you explain about HPE Aruba Networking ESP?

- A. The customer will need to replace APs to migrate from a mid-sized to an enterprise architecture; however, HPE Aruba Networking offers buy-back incentives.
- B. HPE Aruba Networking makes it easy for customers to obtain enterprise-level features on existing switches; the customers must simply purchase Enterprise licenses.
- C. The customer can easily expand from a mid-sized to an enterprise deployment using the same HPE Aruba Networking Central management platform.
- D. HPE Aruba Networking can guarantee the customer access to future Wi-Fi standards through software upgrades rather than hardware upgrades.

Answer: C

Explanation:

HPE Aruba Networking ESP (Edge Services Platform) is a cloud-native platform that unifies infrastructure, security, policies, and AI-powered management across all network domains. It is designed to scale from small to large deployments, and to support customers' evolving business needs and technologies. HPE Aruba Networking Central is the single pane of glass for managing Aruba ESP, and it provides a simple, secure, and cost-effective way to manage and monitor Aruba wired, wireless, and SD-WAN infrastructure, as well as Aruba security and location services. Customers can use the same HPE Aruba Networking Central platform to manage their network regardless of the size, complexity, or location of their network.

NEW QUESTION 8

You are discussing HPE Aruba Networking ESP (Edge Services Platform) solutions with a customer. This customer has mentioned supporting remote and hybrid workers as a key business initiative. What benefit of HPE Aruba Networking solutions should you emphasize?

- A. Remote employees can log into HPE Aruba Networking Central to access the centralized services and applications they need.
- B. These solutions offer a completely separate, dedicated mobility architecture for remote offices versus campuses.
- C. Remote employees can use HPE Aruba Networking Central to easily troubleshoot any issues on their own without IT support.
- D. These solutions make it simpler for customers to apply consistent, role-based policies no matter where users connect.

Answer: D

Explanation:

HPE Aruba Networking ESP (Edge Services Platform) solutions enable customers to deliver a consistent and secure network experience to remote and hybrid workers, regardless of their location or device. By using HPE Aruba Networking Central, customers can define and enforce granular, role-based policies that are automatically applied across the network, from the edge to the cloud. This simplifies network management and enhances security and compliance.

References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 12: “Aruba ESP enables IT to deliver a consistent and secure network experience to remote and hybrid workers, regardless of their location or device.”
- Selling HPE Aruba Networking Solutions, Rev.23.11, page 13: “Aruba Central is the cloud- native, single pane of glass for managing Aruba ESP. It provides a simple, secure, and cost-effective way to manage and monitor Aruba wired, wireless, and SD-WAN infrastructure, as well as Aruba security and location services.”
- Selling HPE Aruba Networking Solutions, Rev.23.11, page 14: “Aruba Policy Enforcement Firewall (PEF) is a key component of Aruba ESP that provides granular, role-based access control and security for wired and wireless networks. PEF enables IT to define and enforce policies based on user identity, device type, location, time, and application, across the network from the edge to the cloud.”

NEW QUESTION 9

Which customer requirement would HPE Aruba Networking Central with AIOps address?

- A. The customer needs to implement role-based security across the wired and wireless networks.
- B. The customer wants to develop sophisticated maps for location-based services.
- C. The customer's IT team is understaffed or underqualified to troubleshoot and optimize the network.
- D. The customer wants to allow users to access applications remotely.

Answer: C

Explanation:

HPE Aruba Networking Central with AIOps is a cloud-based networking solution that empowers IT with AI-powered insights, intuitive visualizations, workflow automation, and edge-to-cloud security to manage campus, branch, remote, data center, and IoT networks from one dashboard¹. It can address the customer requirement of having an efficient and effective IT team by simplifying network operations, reducing manual tasks, providing proactive remediation, and optimizing network performance².
