## **Exam Questions PMI-RMP**

PMI Risk Management Professional

#### NEW QUESTION 1

Ned is the project manager of the HNN project for your company. Ned has asked you to help him complete some probability distributions for his project. What portion of the project will you most likely use for probability distributions?

- A. Bias towards risk in new resources
- B. Risk probability and impact matrixes
- C. Risk identification
- D. Uncertainty in values such as duration of schedule activities

**Answer: D**

#### NEW QUESTION 2

Don is the project manager of the PFO project for his organization. Don is working with the project team members and two subject matter experts to assess the identified risk events in the project. Which of the following approaches is the best to assess the risk events in the project?

- A. Determination of the true cost of the risk event
- B. Probability and Impact Matrix
- C. Root cause analysis
- D. Interviews or meetings

**Answer: D**

#### NEW QUESTION 3

Nancy is the project manager of a project with 78 stakeholders. This is a high-profile project and she needs to express to her project team and to the management the importance of communication in this project. She would like to show the number of stakeholder communication channels in the project. Based on this information how many communication channels exist within this project?

- A. 156
- B. 3,003
- C. 78
- D. 6,084

**Answer: B**

#### NEW QUESTION 4

You are the project manager of the GHY Project for your company. You need to complete a project management process that will be on the lookout for new risks, changing risks, and risks that are now outdated. Which project management process is responsible for these actions?

- A. Risk planning
- B. Risk identification
- C. Risk monitoring and controlling
- D. Risk analysis

**Answer: C**

#### NEW QUESTION 5

Jeff works as a project manager for BlueWell Inc. He is determining which risks can affect the project. Which of the following are the inputs to the identify risks process that Jeff will use to accomplish the task? Each correct answer represents a complete solution. Choose all that apply.

- A. Scope baseline
- B. Activity cost estimates
- C. Risk register
- D. Risk management plan

**Answer: ABD**

#### NEW QUESTION 6

Where can a project manager find risk-rating rules?

- A. Risk management plan
- B. Organizational process assets
- C. Enterprise environmental factors
- D. Risk probability and impact matrix

**Answer: B**

#### NEW QUESTION 7

Tracy is the project manager of the NLT Project for her company. The NLT Project is scheduled to last 14 months and has a budget at completion of \$4,555,000. Tracy's organization will receive a bonus of \$80,000 per day that the project is completed early up to \$800,000. Tracy realizes that there are several opportunities within the project to save on time by crashing the project work. Crashing the project is what type of risk response?

- A. Transference
- B. Mitigation
- C. Exploit
- D. Enhance

**Answer:** D

#### NEW QUESTION 8

Jeff, a key stakeholder in your project, wants to know how the risk exposure for the risk events is calculated during quantitative risk analysis. He is worried about the risk exposure which is too low for the events surrounding his project requirements. How is the risk exposure calculated?

- A. The risk exposure of a risk event is determined by historical information.
- B. The probability of a risk event times the impact of a risk event determines the true risk exposure.
- C. The probability of a risk event plus the impact of a risk event determines the true risk exposure.
- D. The probability and impact of a risk event are gauged based on research and in-depth analysis.

**Answer:** B

#### NEW QUESTION 9

You are working with Anna on your project to determine and map the probability distributions of risk within the project. You have indicated that you will use the uniform distribution method for a portion of the project. Which part of your project is most likely to have a uniform risk distribution?

- A. Late completion stages of a project
- B. Project phases that deal with "cutover" technologies
- C. Early concept stage of design
- D. Project initiating

**Answer:** C

#### NEW QUESTION 10

The only output of the perform qualitative risk analysis are risk register updates. When the project manager updates the risk register he will need to include several pieces of information including all of the following except for which one?

- A. Trends in qualitative risk analysis
- B. Risk probability-impact matrix
- C. Watchlist of low-priority risks
- D. Risks grouped by categories

**Answer:** B

#### NEW QUESTION 10

Virginia is the project manager for her organization. She has hired a subject matter expert to interview the project stakeholders on certain identified risks within the project. The subject matter expert will assess the risk event with what specific goal in mind?

- A. To determine the level of probability and impact for each risk event
- B. To determine the bias of the risk event based on each person interviewed
- C. To determine the probability and cost of the risk event
- D. To determine the validity of each risk event

**Answer:** A

#### NEW QUESTION 14

Courtney is the project manager for her organization. She is working with the project team to complete the qualitative risk analysis for her project. During the analysis Courtney encourages the project team to begin the grouping of identified risks by common causes. What is the primary advantage to group risks by common causes during qualitative risk analysis?

- A. It helps the project team realize the areas of the project most laden with risks.
- B. It saves time by collecting the related resources, such as project team members, to analyze the risk events.
- C. It can lead to developing effective risk responses.
- D. It can lead to the creation of risk categories unique to each project.

**Answer:** C

#### NEW QUESTION 15

You work as a project manager for SoftTech Inc. You are working with the project stakeholders to begin the qualitative risk analysis process. Which of the following inputs will be needed for the qualitative risk analysis process in your project? Each correct answer represents a complete solution. Choose all that apply.

- A. Organizational process assets
- B. Cost management plan
- C. Project scope statement
- D. Risk register

**Answer:** ACD

#### NEW QUESTION 19

You are a risk auditor for your company. You are reviewing the contract types a project manager has used in her project. Of the following, which contract type has the most risk for the project manager as a buyer?

- A. Cost plus percentage of costs

- B. Time and material
- C. Cost plus incentive fee
- D. Fixed-price, incentive fee

**Answer:** A

#### NEW QUESTION 20

You are the project manager for your organization and you are working with Thomas, a project team member. You and Thomas have been working on a specific risk response for a probable risk event in the project. Thomas is empowered with a risk response and will control all aspects of the identified risk response in which a particular risk event will happen within the project. What title, in regard to risk, is bestowed on Thomas?

- A. Risk expeditor
- B. Risk owner
- C. Risk team leader
- D. Risk coordinator

**Answer:** B

#### NEW QUESTION 22

Gary is the project manager of his organization. He is managing a project that is similar to a project his organization completed recently. Gary has decided that he will use the information from the past project to help him and the project team to identify the risks that may be present in the project. Management agrees that this checklist approach is ideal and will save time in the project. Which of the following statement is most accurate about the limitations of the checklist analysis approach for Gary?

- A. The checklist analysis approach is fast but it is impossible to build an exhaustive checklist.
- B. The checklist analysis approach saves time, but can cost more.
- C. The checklist analysis approach only uses qualitative analysis.
- D. The checklist is also known as top down risk assessment.

**Answer:** A

#### NEW QUESTION 24

Mike is the project manager of the NNP Project for his organization. He is working with his project team to plan the risk responses for the NNP Project. Mike would like the project team to work together on establishing risk thresholds in the project. What is the purpose of a risk threshold?

- A. It helps to identify those risks for which specific responses are needed.
- B. It is a limit of the funds that can be assigned to risk events.
- C. It is a warning sign that a risk event is going to happen.
- D. It is a study of the organization's risk tolerance.

**Answer:** A

#### NEW QUESTION 25

Management has asked you to perform a risk audit and report back on the results. Bonny, a project team member asks you what a risk audit is. What do you tell Bonny?

- A. A risk audit is a review of all the risks that have yet to occur and what their probability of happening are.
- B. A risk audit is a review of the effectiveness of the risk responses in dealing with identified risks and their root causes, as well as the effectiveness of the risk management process.
- C. A risk audit is a review of all the risk probability and impact for the risks, which are still present in the project but which have not yet occurred.
- D. A risk audit is an audit of all the risks that have occurred in the project and what their true impact on cost and time has been.

**Answer:** B

#### NEW QUESTION 28

Consider a project with a budget at completion of \$1,345,000 and it is supposed to be completed by today, but it is only 80 percent complete. This project has spent \$1,250,000 to reach this point of completion. What is the schedule variance for this project?

- A. -\$217,500
- B. 20 percent
- C. -\$174,000
- D. -\$269,000

**Answer:** D

#### NEW QUESTION 32

Mark works as a project manager of the NNH project. In this project, he has created a contingency response that the cost performance index should be less than 0.91. The NNH project has a budget at completion of \$950,000 and is 43 percent complete - though the project should be 50 percent complete. The project has spent \$470,897 to reach the 43 percent complete milestone. What is the project's cost performance index?

- A. 0.95
- B. 0.80
- C. 0.87
- D. 0.91

**Answer:** C

#### NEW QUESTION 35

You are the project manager of the GHY project. In your organization you must follow certain enterprise environmental factors that establish the rules for risk management. One of the policies your project must adhere to requires periodic rapid analysis of risks within the project. These rapid, cost-effective sessions must be documented and performed monthly. What type of analysis are you required to perform according to your enterprise environmental factors?

- A. Brainstorming
- B. Qualitative analysis
- C. Delphi Technique
- D. Quantitative analysis

**Answer: B**

#### NEW QUESTION 38

The risk transference is referred to the transfer of risks to a third party, usually for a fee, it creates a contractual-relationship for the third party to manage the risk on behalf of the performing organization. Which one of the following is NOT an example of the transference risk response?

- A. Use of insurance
- B. Warranties
- C. Life cycle costing
- D. Performance bonds

**Answer: C**

#### NEW QUESTION 43

Holly is the project manager of the NHQ project for her company. Her project sponsor, Tracy, has requested that Thomas, the department manager, from the Risk Management Department, will work with Holly to determine the effectiveness of the risk responses. Tracy and Thomas are concerned that some of the risks within Holly's project may not be addressed to depth they would like. In this scenario, who is responsible for ensuring that risk audits are performed at an appropriate frequency throughout the project?

- A. Thomas
- B. Tracy
- C. The project team
- D. Holly

**Answer: D**

#### NEW QUESTION 44

Your project has several risks that may cause serious financial impact should they happen. You have studied the risk events and made some potential risk responses for the risk events but management wants you to do more. They'd like for you to create some type of a chart that identified the risk probability and impact with a financial amount for each risk event. What is the likely outcome of creating this type of chart?

- A. Risk response
- B. Quantitative analysis
- C. Contingency reserve
- D. Risk response plan

**Answer: C**

#### NEW QUESTION 45

Which of the following statements describe the purpose of an Issue Log? Each correct answer represents a complete solution. Choose all that apply.

- A. It analyzes the impact that the issue is having on the project.
- B. It tracks the actions taken to resolve the issue.
- C. It tracks the outcome of the actions taken.
- D. It addresses the risks that could affect the project.

**Answer: ABC**

#### NEW QUESTION 49

Melody is the project manager for her organization. She has created a risk response to conduct more tests on the software her project is creating. The identified risk that prompted this response was that the software is mission-critical and must be flawless before it can be put into product. What type of a risk response has Melody used in this scenario?

- A. Mitigation
- B. Enhance
- C. Transference
- D. Avoidance

**Answer: A**

#### NEW QUESTION 51

Joan is a project management consultant and she has been hired by a firm to help them identify risk events within the project. Joan would first like to examine the project documents including the plans, assumptions lists, project files, and contracts. What key thing will help Joan to discover risks within the review of the project documents?

- A. The project documents will help the project manager, or Joan, to identify what risk identification approach is best to pursue.
- B. Lack of consistency between the plans and the project requirements and assumptions can be the indicators of risk in the project.

- C. Poorly written requirements will reveal inconsistencies in the project plans and documents.
- D. Plans that have loose definitions of terms and disconnected approaches will reveal risks.

**Answer: B**

#### NEW QUESTION 54

Lamont is the project manager of a project that has recently finished the final project deliverables. The project customer has signed off on the project deliverable and Lamont has a few administrative closure activities to complete. In the project, there were several large risks that could have wrecked the project but Lamont and his project team found some creative methods to resolve the risks without affecting the project costs or project end date. What should Lamont do with the risk responses he identified during the project's monitoring and controlling process?

- A. Include the risk response in the project risk management plan.
- B. Include the responses in the project management plan.
- C. Nothin
- D. The risk responses are included in the project's risk register already.
- E. Include the risk responses in the organization's lessons learned database.

**Answer: D**

#### NEW QUESTION 57

Rex is the project manager of the BDF Project. This project will last for two years and has a budget of \$2,345,000. Management has instructed Rex that the project must not go over budget as funds are very tight in the organization. During the project planning Rex and the project team discover a positive risk event to save \$75,000. Rex wants to make certain that this risk event happens so which risk response method is most appropriate?

- A. Share
- B. Mitigation
- C. Exploit
- D. Enhance

**Answer: C**

#### NEW QUESTION 58

Which types of project tends to have more well-understood risks?

- A. Operational work projects
- B. First-of-its kind technology projects
- C. Recurrent projects
- D. State-of-art technology projects

**Answer: C**

#### NEW QUESTION 61

Della works as a project manager for Tech Perfect Inc. She is studying the documentation of planning of a project. The documentation states that there are twenty-eight stakeholders with the project. What will be the number of communication channels for the project?

- A. 378
- B. 300
- C. 28
- D. 250

**Answer: A**

#### NEW QUESTION 63

You are the project manager of the GGG project. You have completed the risk identification process for the initial phases of your project. As you begin to document the risk events in the risk register what additional information can you associate with the identified risk events?

- A. Risk potential responses
- B. Risk schedule
- C. Risk owner
- D. Risk cost

**Answer: A**

#### NEW QUESTION 65

You are preparing to complete the quantitative risk analysis process with your project team and several subject matter experts. You gather the necessary inputs including the project's cost management plan. Why is it necessary to include the project's cost management plan in the preparation for the quantitative risk analysis process?

- A. The project's cost management plan can help you to determine what the total cost of the project is allowed to be.
- B. The project's cost management plan provides direction on how costs may be changed due to identified risks.
- C. The project's cost management plan provides control that may help determine the structure for quantitative analysis of the budget.
- D. The project's cost management plan is not an input to the quantitative risk analysis process.

**Answer: C**

#### NEW QUESTION 68

Lisa is the project manager of the SQL project for her company. She has completed the risk response planning with her project team and is now ready to update the risk register to reflect the risk response. Which of the following statements best describes the level of detail Lisa should include with the risk responses she has created?

- A. The level of detail is set by historical information.
- B. The level of detail should correspond with the priority ranking.
- C. The level of detail must define exactly the risk response for each identified risk.
- D. The level of detail is set of project risk governance.

**Answer: B**

#### NEW QUESTION 72

You work as a project manager for SoftTech Inc. You are working with the project stakeholders to begin the qualitative risk analysis process. You will need all of the following as inputs to the qualitative risk analysis process except for which one?

- A. Stakeholder register
- B. Project scope statement
- C. Risk management plan
- D. Risk register

**Answer: A**

#### NEW QUESTION 74

Thomas is a key stakeholder in your project. Thomas has requested several changes to the project scope for the project you are managing. Upon review of the proposed changes, you have discovered that these new requirements are laden with risks and you recommend to the change control board that the changes be excluded from the project scope. The change control board agrees with you. What component of the change control system communicates the approval or denial of a proposed change request?

- A. Configuration management system
- B. Scope change control system
- C. Integrated change control
- D. Change log

**Answer: C**

#### NEW QUESTION 79

You work as a project manager for BlueWell Inc. You are preparing for the risk identification process. You will need to involve several of the project's key stakeholders to help you identify and communicate the identified risk events. You will also need several documents to help you and the stakeholders identify the risk events. Which one of the following is NOT a document that will help you identify and communicate risks within the project?

- A. Risk register
- B. Activity cost estimates
- C. Stakeholder register
- D. Activity duration estimates

**Answer: A**

#### NEW QUESTION 83

Which of the following documents is described in the statement below? "It is developed along with all processes of the risk management. It contains the results of the qualitative risk analysis, quantitative risk analysis, and risk response planning."

- A. Risk management plan
- B. Project charter
- C. Risk register
- D. Quality management plan

**Answer: C**

#### NEW QUESTION 88

Sammy is the project manager for her organization. She would like to rate each risk based on its probability and affect on time, cost, and scope. Harry, a project team member, has never done this before and thinks Sammy is wrong to attempt this approach. Harry says that an accumulative risk score should be created, not three separate risk scores. Who is correct in this scenario?

- A. Harry is correct, because the risk probability and impact considers all objectives of the project.
- B. Harry is correct, the risk probability and impact matrix is the only approach to risk assessment.
- C. Sammy is correct, because organizations can create risk scores for each objective of the project.
- D. Sammy is correct, because she is the project manager.

**Answer: C**

#### NEW QUESTION 90

There are five outputs of the risk monitoring and controlling process. Which one of the following is NOT an output of the process?

- A. Organizational process assets updates
- B. Risk register updates
- C. Vendor contracts

D. Change requests

**Answer: C**

**NEW QUESTION 93**

You work as a project manager for BlueWell Inc. You have to communicate the causes of risk events to the stakeholders. Which risk diagramming technique you will use to communicate the causes of risk events to project stakeholders?

- A. Project network diagrams
- B. Process flow charts
- C. Ishikawa diagrams
- D. Influence diagrams

**Answer: C**

**NEW QUESTION 94**

You are the project manager of the HQQ Project for your company. You are working with your project stakeholders to discuss the risks in the project that can adversely affect the project objectives. You are discussing the possibilities of causes for an identified risk event in your project. Your stakeholder is confused on the difference between causes and risk events. Which of the following is NOT an example of a cause for a project risk?

- A. Limited team members to complete the project work
- B. Quality assurance programs within the company
- C. Work permit requirements
- D. Schedule constraints on the project

**Answer: B**

**NEW QUESTION 97**

Jenny is the project manager of the NHJ Project for her company. She has identified several positive risk events within the project and she thinks these events can save the project time and money. You, a new team member wants to know that how many risk responses are available for a positive risk event. What will Jenny reply to you?

- A. Four
- B. Three
- C. Seven
- D. Acceptance is the only risk response for positive risk events.

**Answer: A**

**NEW QUESTION 101**

Your organization has named you the project manager of the JKN Project. This project has a BAC of \$1,500,000 and it is expected to last 18 months. Management has agreed that if the schedule baseline has a variance of more than five percent then you will need to crash the project. What happens when the project manager crashes a project?

- A. Project risks will increase.
- B. The project will take longer to complete, but risks will diminish.
- C. Project costs will increase.
- D. The amount of hours a resource can be used will diminish.

**Answer: C**

**NEW QUESTION 104**

You are the project manager of the HJH project for your company. In your project, you have created the probability-impact risk matrix as shown in the following figure:

If Risk D happens in this project, how much will be left in the contingency reserve?

- A. \$440,000
- B. \$233,500
- C. \$258,500
- D. \$243,500

**Answer: B**

**NEW QUESTION 109**

You are the project manager for TTP project. You are in the Identify Risks process. You have to create the risk register. Which of the following are included in the risk register? Each correct answer represents a complete solution. Choose two.

- A. List of mitigation techniques
- B. List of key stakeholders
- C. List of identified risks
- D. List of potential responses

**Answer: CD**

**NEW QUESTION 110**

You work as a project manager for TechSoft Inc. You, the project team, and the key project stakeholders have completed a round of quantitative risk analysis. You now need to update the risk register with your findings so that you can communicate the risk results to the project stakeholders - including management. You will need to update all of the following information except for which one?

- A. Probabilistic analysis of the project
- B. Probability of achieving cost and time objectives
- C. Risk distributions within the project schedule
- D. Trends in quantitative risk analysis

**Answer: C**

#### NEW QUESTION 111

A high-profile, high-priority project within your organization is being created. Management wants you to pay special attention to the project risks and do all that you can to ensure that all of the risks are identified early in the project. Management has to ensure that this project succeeds. Management's risk aversion in this project is associated with what term?

- A. Quantitative risk analysis
- B. Risk conscience
- C. Risk mitigation
- D. Utility function

**Answer: D**

#### NEW QUESTION 112

You work as a project manager for BlueWell Inc. You with your team are using a method or a (technical) process that conceives the risks even if all theoretically possible safety measures would be applied. One of your team member wants to know that what is a residual risk. What will you reply to your team member?

- A. It is a risk that can not be addressed by a risk response.
- B. It is a risk that will remain no matter what type of risk response is offered.
- C. It is a risk that remains because no risk response is taken.
- D. It is a risk that remains after planned risk responses are taken.

**Answer: D**

#### NEW QUESTION 116

Frank is the project manager of the NHH Project. He is working with the project team to create a plan to document the procedures to manage risks throughout the project. This document will define how risks will be identified and quantified. It will also define how contingency plans will be implemented by the project team. What document is Frank and the NHH Project team creating in this scenario?

- A. Resource management plan
- B. Project plan
- C. Project management plan
- D. Risk management plan

**Answer: D**

#### NEW QUESTION 118

You are the project manager of the YHG project for your company. Within the project, you and the project team have identified a risk event that could have a financial impact on the project of \$450,000. This risk event has a 70 percent chance of occurring in the project. The project identifies a solution that will reduce the probability of the risk event to ten percent, but it will cost \$260,000 to implement. Management agrees with the solution and asks that you include the risk response in the project plan. What risk response is this?

- A. This is mitigation because the response reduces the probability.
- B. This is not a risk response, but a change request.
- C. This is transference because of the \$260,000 cost of the solution.
- D. This is avoidance because the risk response caused the project plan to be changed.

**Answer: A**

#### NEW QUESTION 122

You are the project manager of the NKQ project for your organization. You have completed the quantitative risk analysis process for this portion of the project. What is the only output of the quantitative risk analysis process?

- A. Probability of reaching project objectives
- B. Risk register updates
- C. Risk response
- D. Risk contingency reserve

**Answer: B**

#### NEW QUESTION 127

Ben works as a project manager for the MJH Project. In this project, Ben is preparing to identify stakeholders so he can communicate project requirements, status, and risks. Ben has elected to use a salience model as part of his stakeholder identification process. Which of the following activities best describes a salience model?

- A. Influence/impact grid, grouping the stakeholders based on their active involvement ("influence") in the project and their ability to affect changes to the project's planning or execution ("impact").

- B. Grouping the stakeholders based on their level of authority ("power") and their active involvement ("influence") in the project.
- C. Grouping the stakeholders based on their level of authority ("power") and their level or concern ("interest") regarding the project outcomes.
- D. Describing classes of stakeholders based on their power (ability to impose their will), urgency (need for immediate attention), and legitimacy (their involvement is appropriate).

**Answer: D**

#### NEW QUESTION 131

You are the project manager of the NHK Project. Management wants to know how often your risk identification process will occur during the project. Considering that your project is scheduled to last one year and involves five distinct phases, how often should risk identification take place?

- A. Monthly
- B. Once per project life cycle phase
- C. Quarterly
- D. Vary depending on the situations within the project

**Answer: D**

#### NEW QUESTION 135

Which of the following processes looks at the complex web of actors, rules, conventions, processes, and mechanisms concerned with how relevant risk information is collected, analyzed and communicated, and how management decisions are taken?

- A. Risk Communication
- B. IRGC
- C. Risk Response Planning
- D. Risk Governance

**Answer: D**

#### NEW QUESTION 138

You are the project manager of the NNH project. In this project you have created a contingency response that the cost performance index should be less than 0.93. The NNH project has a budget at completion of \$945,000 and is 45 percent complete - though the project should be 49 percent complete. The project has spent \$455,897 to reach the 45 percent complete milestone. What is the project's cost performance index?

- A. 1.06
- B. 0.92
- C. -\$30,647
- D. 0.93

**Answer: D**

#### NEW QUESTION 140

Which of the following processes must be repeated after Plan Risk Responses, as well as part of the Monitor and Control Risks, to determine if the overall project risk has been satisfactorily decreased?

- A. Risk Limitation
- B. Perform Qualitative Risk Analysis
- C. Identify Risk
- D. Perform Quantitative Risk Analysis

**Answer: D**

#### NEW QUESTION 141

You are the project manager of a large, high-profile project in your organization. You have realized that politics within your company may affect the true identification of risk events within the project. You decide that you'd like to use a method to identify risk events through an anonymous process. Which one of the following risk events will allow you to collect and distribute risk information without the stakeholders knowing what other stakeholders are communicating about the project risk events?

- A. Surveys
- B. Monte Carlo Technique
- C. Checklist analysis
- D. Delphi Technique

**Answer: D**

#### NEW QUESTION 143

You are the project manager for the ABC organization. Your current project has 75 internal stakeholders and 245 external stakeholders. Many of the risks within your project will only affect the internal stakeholders, but several of the identified risk events will affect the external stakeholders. Management would like to know the total number of communication channels in the project. How many communication channels exist in this project?

- A. 245
- B. 51,040
- C. 102,080
- D. 320

**Answer: B**

#### NEW QUESTION 145

You are the project manager of the AMD project for your organization. In this project, you are currently performing quantitative risk analysis. The tool and technique you are using is simulation where the project model is computed many times with the input values chosen at random for each iteration. The goal is to create a probability distribution from the iterations for the project schedule. What technique will you use with this simulation?

- A. Pareto modeling
- B. Expected Monetary Value
- C. Analogous modeling
- D. Monte Carlo Technique

**Answer: D**

#### NEW QUESTION 147

Mary is the project manager of the HGH Project for her company. She and her project team have agreed that if the vendor is late by more than ten days they will cancel the order and hire the NGB Company to fulfill the order. The NGB Company can guarantee orders within three days, but the costs of their products are significantly more expensive than the current vendor. What type of a response strategy is this?

- A. Internal risk management strategy
- B. Contingent response strategy
- C. External risk response
- D. Expert judgment

**Answer: B**

#### NEW QUESTION 150

You are the project manager of the NNH Project. In this project you have created a contingency response that the schedule performance index should be less than 0.93. The NNH Project has a budget at completion of \$945,000 and is 45 percent complete though the project should be 49 percent complete. The project has spent \$455,897 to reach the 45 percent complete milestone. What is the project's schedule performance index?

- A. -\$37,800
- B. 0.93
- C. 0.92
- D. 1.06

**Answer: C**

#### NEW QUESTION 151

John is the project manager of the NHQ Project for his company. His project has 75 stakeholders, some of which are external to the organization. John needs to make certain that he communicates about risk in the most appropriate method for the external stakeholders. Which project management plan will be the best guide for John to communicate to the external stakeholders?

- A. Risk Response Plan
- B. Risk Management Plan
- C. Communications Management Plan
- D. Project Management Plan

**Answer: C**

#### NEW QUESTION 152

You are the project manager of the KJH Project and are working with your project team to plan the risk responses. Consider that your project has a budget of \$500,000 and is expected to last six months. Within the KJH Project you have identified a risk event that has a probability of .70 and has a cost impact of \$350,000. When it comes to creating a risk response for this event what is the risk exposure of the event that must be considered for the cost of the risk response?

- A. The risk exposure of the event is \$245,000.
- B. The risk exposure of the event is \$500,000.
- C. The risk exposure of the event is \$350,000.
- D. The risk exposure of the event is \$850,000.

**Answer: A**

#### NEW QUESTION 153

Pete works as a project manager for BlueWell Inc. The Management has told him that he must implement an agreed-upon contingency response if the cost performance index in his project is less than 0.90. Consider that Pete's project has a budget at completion of \$275,000. His project is 65 percent complete and he has spent \$175,000 to date. However, Pete is scheduled to be 78 percent complete. What is the cost performance index for this project to determine if the contingency response should happen?

- A. 1.02
- B. 0.96
- C. 0.90
- D. 0.89

**Answer: A**

#### NEW QUESTION 158

You are the project manager of a large construction project. You are evaluating the strengths, weaknesses, opportunities, and threats involved in a project. In which of the following processes are you on?

- A. Define Scope
- B. Plan Risk Responses
- C. Plan Risk Management
- D. Identify Risks

**Answer:** D

**NEW QUESTION 160**

Marsha is the project manager of the NHQ Project. There's a risk that her project team has identified, which could cause the project to be late by more than a month. Marsha does not want this risk event to happen so she devises extra project activities to ensure that the risk event will not happen. The extra steps, however, will cost the project an additional \$10,000. What type of risk response is this approach?

- A. Enhancing
- B. Exploiting
- C. Mitigation
- D. Transference

**Answer:** C

**NEW QUESTION 164**

Sensitivity analysis is a technique for systematically changing parameters in a model to determine the effects of such changes and is useful for computer modelers for a range of purposes. Which of the following purposes does the sensitivity analysis include? Each correct answer represents a complete solution. Choose all that apply.

- A. Estimating the average outcome
- B. Model development
- C. Decision making or the development of recommendations for decision makers
- D. Increased understanding or quantification of the system

**Answer:** BCD

**NEW QUESTION 165**

You are the project manager for your organization. You are working with your key stakeholders in the qualitative risk analysis process. You understand that there is certain bias towards the risk events in the project that you need to address, manage, and ideally reduce. What solution does the PMBOK recommend to reduce the influence of bias during qualitative risk analysis?

- A. Establish the definitions of the levels of probability and impact
- B. Provide iterations of risk analysis for true reflection of a risk probability and impact
- C. Isolate the stakeholders by project phases to determine their risk bias
- D. Involve all stakeholders to vote on the probability and impact of the risk events

**Answer:** A

**NEW QUESTION 166**

Rob is the project manager of the IDLK Project for his company. This project has a budget of \$5,600,000 and is expected to last 18 months. Rob has learned that a new law may affect how the project is allowed to proceed - even though the organization has already invested over \$750,000 in the project. What risk response is the most appropriate for this instance?

- A. Acceptance
- B. Transference
- C. Mitigation
- D. Enhance

**Answer:** A

**NEW QUESTION 167**

Amy is the project manager for her company. In her current project the organization has a very low tolerance for risk events that will affect the project schedule. Management has asked Amy to consider the affect of all the risks on the project schedule. What approach can Amy take to create a bias against risks that will affect the schedule of the project?

- A. She can create an overall project rating scheme to reflect the bias towards risks that affect the project schedule.
- B. She can filter all risks based on their affect on schedule versus other project objectives.
- C. She can have the project team pad their time estimates to alleviate delays in the project schedule.
- D. She can shift risk-laden activities that affect the project schedule from the critical path as much as possible.

**Answer:** A

**NEW QUESTION 168**

There are five inputs to the quantitative risk analysis process. Which one of the following is NOT an input to the perform quantitative risk analysis process?

- A. Risk register
- B. Risk management plan
- C. Cost management plan
- D. Enterprise environmental factors

**Answer:** D

#### NEW QUESTION 170

Holly is the project manager of the GHH Project. During risk identification and the subsequent risk analysis process she has identified a risk with a high probability and high impact for her project. She and the stakeholder agree that the project management plan should be changed to eliminate the risk threat entirely. What risk response has Holly used in this instance?

- A. This is the risk mitigation response.
- B. This is the avoidance risk response.
- C. This is the transference risk response.
- D. This is a scope change and not a risk response.

**Answer: B**

#### NEW QUESTION 171

Tom works as a project manager for BlueWell Inc. He is determining which risks can affect the project. Which of the following inputs of the identify risks process is useful in identifying risks, and provides a quantitative assessment of the likely cost to complete the scheduled activities?

- A. Activity cost estimates
- B. Cost management plan
- C. Activity duration estimates
- D. Risk management plan

**Answer: A**

#### NEW QUESTION 172

There are seven risk responses for any project. Which one of the following is a valid risk response for a negative risk event?

- A. Enhance
- B. Exploit
- C. Acceptance
- D. Share

**Answer: C**

#### NEW QUESTION 175

Your project uses a piece of equipment that if the temperature of the machine goes above 450 degree Fahrenheit the machine will overheat and have to be shut down for 48 hours. Should this machine overheat even once it will delay the project's end date. You work with your project to create a response that should the temperature of the machine reach 430, the machine will be paused for at least an hour to cool it down. The temperature of 430 is called what?

- A. Risk response
- B. Risk event
- C. Risk trigger
- D. Risk identification

**Answer: C**

#### NEW QUESTION 180

You work as a project manager for TechSoft Inc. You are working with the project stakeholders on the qualitative risk analysis process in your project. You have used all the tools to the qualitative risk analysis process in your project. Which of the following techniques is NOT used as a tool in qualitative risk analysis process?

- A. Risk Urgency Assessment
- B. Risk Categorization
- C. Risk Reassessment
- D. Risk Data Quality Assessment

**Answer: C**

#### NEW QUESTION 183

Donna is the project manager of the QSD Project and she believes Risk Event D in the following figure is likely to happen. If this event does happen, how much will Donna have left in the risk contingency reserve if none of the other risk events have happened?

- A. \$35,000
- B. \$41,700
- C. \$14,000
- D. \$6,700

**Answer: D**

#### NEW QUESTION 186

Wendy is the project manager of the FBL project for your company. She has identified several risks within her project and has created a risk contingency reserve of \$45,000 total. Her project is nearly complete and many of the risks have not happened in the project. What should Wendy do with the funds in the contingency reserve?

- A. The funds remain in the contingency reserve until all of the risks have passed.
- B. The funds for the risks that have passed and have not happened are transferred to the project budget.
- C. The funds for the risks that have passed and have not happened are released.
- D. The funds remain in the contingency reserve until the project is closed.

**Answer: C**

**NEW QUESTION 188**

You are the project manager of the GHQ project for your company. You are working with your project team to prepare for the qualitative risk analysis process. Mary, a project team member, does not understand why you need to complete qualitative risks analysis. You explain to Mary that qualitative risks analysis helps you determine which risks needs additional analysis. There are also some other benefits that qualitative risks analysis can do for the project. Which one of the following is NOT an accomplishment of the qualitative risk analysis process?

- A. Corresponding impact on project objectives
- B. Time frame for a risk response
- C. Prioritization of identified risk events based on probability and impact
- D. Cost of the risk impact if the risk event occurs

**Answer: D**

**NEW QUESTION 193**

Jane is the project manager of the GBB project for her company. In the current project a vendor has offered the project a ten percent discount based if they will order 100 units for the project. It is possible that the GBB Project may need the 100 units, but the cost of the units is not a top priority for the project. Jane documents the offer and tells the vendor that they will keep the offer in mind and continue with the project as planned. What risk response has been given in this project?

- A. Acceptance
- B. Enhance
- C. Exploiting
- D. Sharing

**Answer: A**

**NEW QUESTION 198**

You are the project manager of the AFD project for your company. You are working with the project team to reassess existing risk events and to identify risk events that have not happened and whose relevancy to the project has passed. What should you do with these events that have not happened and would not happen now in the project?

- A. Add the risks to the risk register
- B. Add the risks to a low-priority watchlist
- C. Close the outdated risks
- D. Add the risk to the issues log

**Answer: C**

**NEW QUESTION 201**

You are the project manager of the NHH project for your company. You and the project team have completed the quantitative risk analysis for your project. During this process you create a contingency reserve based on the risk probability-impact matrix as seen in the figure below. Based on the information in the figure above, what amount would you need to include in your risk contingency fund?

- A. -\$465,000
- B. \$171,500
- C. -\$258,500
- D. \$258,500

**Answer: D**

**NEW QUESTION 203**

You are the project manager of the NGH project for your organization. You want to create a causeand- effect diagram to help discover the root causes of the risks within the project. Harold, the CIO, recommends that you create an Ishikawa diagram instead. What is an Ishikawa diagram?

- A. It is a graphical representation of situations showing causal influences.
- B. It is the same thing as a root cause diagram.
- C. It shows how various elements of a system interrelate.
- D. It diagrams the risks according to the work breakdown structure including resources.

**Answer: B**

**NEW QUESTION 208**

A project team member has just identified a new project risk. The risk event is determined to have significant impact but a low probability in the project. Should the risk event happen it'll cause the project to be delayed by three weeks, which will cause new risk in the project. What should the project manager do with the risk event?

- A. Add the identified risk to a quality control management control chart.
- B. Add the identified risk to the issues log.
- C. Add the identified risk to the risk register.
- D. Add the identified risk to the low-level risk watchlist.

**Answer: C**

**NEW QUESTION 212**

Tom is the project manager for his organization. In his project he has recently finished the risk response planning. He tells his manager that he will now need to update the cost and schedule baselines. Why would the risk response planning cause Tom the need to update the cost and schedule baselines?

- A. New or omitted work as part of a risk response can cause changes to the cost and/or schedule baseline.
- B. Risk responses protect the time and investment of the project.
- C. Risk responses may take time and money to implement.
- D. Baselines should not be updated, but refined through versions.

**Answer:** A

#### NEW QUESTION 214

Kelly is the project manager of the BHH project for her organization. She is completing the risk identification process for this portion of her project. Which one of the following is the only thing that the risk identification process will create for Kelly?

- A. Risk register
- B. Risk register updates
- C. Change requests
- D. Project document updates

**Answer:** A

#### NEW QUESTION 216

Henry is the project manager of the QBG Project for his company. This project has a budget of \$4,576,900 and is expected to last 18 months to complete. The CIO, a stakeholder in the project, has introduced a scope change request for additional deliverables as part of the project work. What component of the change control system would review the proposed changes' impact on the features and functions of the project's product?

- A. Scope change control system
- B. Cost change control system
- C. Configuration management system
- D. Integrated change control

**Answer:** C

#### NEW QUESTION 220

Harold is the project manager of a large project in his organization. He has been actively communicating and working with the project stakeholders. One of the outputs of the manage stakeholder expectations process can actually create new risk events for Harold's project. Which output of the manage stakeholder expectations process can create risks?

- A. Project document updates
- B. Change requests
- C. Organizational process assets updates
- D. Project management plan updates

**Answer:** B

#### NEW QUESTION 222

You work as a project manager for BlueWell Inc. You are working on a project and the management wants a rapid and cost-effective means for establishing priorities for planning risk responses in your project. Which risk management process can satisfy management's objective for your project?

- A. Historical information
- B. Qualitative risk analysis
- C. Quantitative analysis
- D. Rolling wave planning

**Answer:** B

#### NEW QUESTION 223

Fill in the blank with an appropriate phrase.

\_\_\_\_\_ is the study of how the variation (uncertainty) in the output of a mathematical model can be apportioned, qualitatively or quantitatively, to different sources of variation in the input of a model.

- A. Sensitivity analysis

**Answer:** A

#### NEW QUESTION 228

Sam is the project manager of a construction project in south Florida. This area of the United States is prone to hurricanes during certain parts of the year. As part of the project plan Sam and the project team acknowledge the possibility of hurricanes and the damage the hurricane could have on the project's deliverables, the schedule of the project, and the overall cost of the project. Once Sam and the project stakeholders acknowledge the risk of the hurricane they go on planning the project as if the risk is not likely to happen. What type of risk response is Sam using?

- A. Active acceptance
- B. Passive acceptance
- C. Avoidance
- D. Mitigation

**Answer:** B

**NEW QUESTION 229**

You are preparing to start the qualitative risk analysis process for your project. You will be relying on some organizational process assets to influence the process. Which one of the following is NOT a probable reason for relying on organizational process assets as an input for qualitative risk analysis?

- A. Studies of similar projects by risk specialists
- B. Risk databases that may be available from industry sources
- C. Review of vendor contracts to examine risks in past projects
- D. Information on prior, similar projects

**Answer: C**

**NEW QUESTION 234**

A project manager must have certain interpersonal skills to communicate with stakeholders and manage their expectations of the project work. Which of the following interpersonal skills has been identified as one of the biggest reasons for project success or failure?

- A. Motivation
- B. Communication
- C. Influencing
- D. Political and cultural awareness

**Answer: B**

**NEW QUESTION 239**

You are the project manager of the GGK project for your company. The GGK project has a budget of \$1,265,100 and is currently 40 percent complete. In this project, you elected to add labor to the project to increase the likelihood of completing the project early as the project was only scheduled to be 35 percent complete at this time. This positive risk response, while keeping the project ahead of schedule, has added significant costs to the project. You have already spent \$575,000 to reach this point in the project. Management would like to know what your cost performance index and the schedule performance index is for this project. What are these values?

- A. The CPI is -\$68,960 and the SPI is \$63,255.
- B. The CPI is .88 and the SPI is zero.
- C. The CPI is .88 and the SPI is 1.14.
- D. The CPI is 1.14 and the SPI is .88.

**Answer: C**
