NEW QUESTION 77

- (Topic 5)

A company performs on-site inspections and services for air industrial equipment. Field technicians must perform a series of maintenance checks every time they visit a customer site. Every technician performs maintenance tasks in a different order. Some technicians miss steps. You need to ensure that all technicians perform the same steps in the same order. What should you use?

- A. Business process flow
- B. AI Builder
- C. Business rule
- D. Virtual Agent

Answer: A

Explanation:

You can help ensure that people enter data consistently and follow the same steps every time they work with a customer by creating a business process flow. For example, you might want to create a business process flow to have everyone handle customer service requests the same way, or to require that people get approval for an invoice before submitting an order. Business process flows use the same underlying technology as other processes, but the capabilities that they provide are very different from other features that use processes.

NEW QUESTION 98

- (Topic 5)

Users within a company use Flow for personal productivity.

Users often overwrite their working flows by editing the definitions and are unable to undo changes after saving a flow.

You need to ensure that users can revert a flow to the current state.

Which two options can you use? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Export
- B. Rename
- C. Save As
- D. Share

Answer: AC

Explanation:

A: You can export a flow as a package and import it into a different environment, or use it to restore the in the same environment at a later point in time.

C: The ability to make a copy of your flow is often useful when you want to create a flow similar to something you've already created. Or, if you want to maintain a draft of your working flow as you work on adding more functionality.

Here's how:

Go to your My flows page. Click on the More (...) menu item next to the flow that you want to create a copy of. Click on the Save As command.

NEW QUESTION 101

- (Topic 5)

This question requires that you evaluate the BOLD text to determine if it is correct.

A company requires that service representatives schedule customer visits every six months. Each service representative is required to enter a scheduled task for the next checkup as they are leaving a client site. A service representative wants to automate task entry by creating a business process flow that can be initiated from the service call screen on a phone.

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. a scheduled
- C. an instant
- D. an action

Answer: D

Explanation:

Note: Create a flow (see step 6 below)

* 1. Sign in to PowerApps.

* 2. In the left navigation bar, select Business logic, and then select Flows.

* 3. In the upper-left corner of the My Flows page, select New, and then select Create from blank.

* 4. Option to create a flow without using a template

Near the bottom of the page that appears, select Search hundreds of connections and triggers.

* 5. In the search box, type PowerApps, and then select the PowerApps icon.

* 6. Create a PowerApps trigger

* 7. On the next page, select the PowerApps icon again, and then select New step.

* 8. In the box that says Search connectors and actions, specify an action for your flow, as in this example:
