## Exam Questions PMI-RMP

PMI Risk Management Professional

#### NEW QUESTION 1

Adrian is the project manager of the NHP Project. In her project there are several work packages that deal with electrical wiring. Rather than to manage the risk internally she has decided to hire a vendor to complete all work packages that deal with the electrical wiring. By removing the risk internally to a licensed electrician Adrian feels more comfortable with project team being safe. What type of risk response has Adrian used in this example?

- A. Avoidance
- B. Mitigation
- C. Acceptance
- D. Transference

**Answer: D**

#### NEW QUESTION 2

You and your project team are identifying the risks that may exist within your project. Some of the risks are small risks that won't affect your project much if they happen. What should you do with these identified risk events?

- A. All risks must have a valid, documented risk response.
- B. These risks can be accepted.
- C. These risks can be added to a low priority risk watch list.
- D. These risks can be dismissed.

**Answer: C**

#### NEW QUESTION 3

Lisa is the project manager of the FKN project for her organization. She is working with Sam, the CIO, to discuss a discount the vendor has offered the project based on the amount of materials that is ordered. Lisa and Sam review the offer and agree that while their project may qualify for the discounted materials the savings is nominal and they would not necessarily pursue the savings. Lisa documents this positive risk response in the risk register. What risk response is this?

- A. Enhance
- B. Transference
- C. Share
- D. Acceptance

**Answer: D**

#### NEW QUESTION 4

Your organization has a project that is expected to last 20 months but the customer would really like the project completed in 18 months. You have worked on similar projects in the past and believe that you could fast track the project and reach the 18 month deadline. What increases when you fast track a project?

- A. Resources
- B. Costs
- C. Communication
- D. Risks

**Answer: D**

#### NEW QUESTION 5

Ben is the project manager of the YHT Project for his company. Alice, one of his team members, is confused about when project risks will happen in the project. Which one of the following statements is the most accurate about when project risk happens?

- A. Project risk can happen at any moment.
- B. Project risk happens throughout the project execution.
- C. Project risk is always in the future.
- D. Project risk is uncertain, so no one can predict when the event will happen.

**Answer: C**

#### NEW QUESTION 6

Jeff works as a project manager for BlueWell Inc. He is determining which risks can affect the project. Which of the following are the inputs to the identify risks process that Jeff will use to accomplish the task? Each correct answer represents a complete solution. Choose all that apply.

- A. Scope baseline
- B. Activity cost estimates
- C. Risk register
- D. Risk management plan

**Answer: ABD**

#### NEW QUESTION 7

Tracy is the project manager of the NLT Project for her company. The NLT Project is scheduled to last 14 months and has a budget at completion of \$4,555,000. Tracy's organization will receive a bonus of \$80,000 per day that the project is completed early up to \$800,000. Tracy realizes that there are several opportunities within the project to save on time by crashing the project work. Crashing the project is what type of risk response?

- A. Transference
- B. Mitigation

- C. Exploit
- D. Enhance

**Answer:** D

**NEW QUESTION 8**

You are working with Anna on your project to determine and map the probability distributions of risk within the project. You have indicated that you will use the uniform distribution method for a portion of the project. Which part of your project is most likely to have a uniform risk distribution?

- A. Late completion stages of a project
- B. Project phases that deal with "cutover" technologies
- C. Early concept stage of design
- D. Project initiating

**Answer:** C

**NEW QUESTION 9**

You are interviewing members of a project team to test their understanding of the assigned risk responses as risk owners. You and the project manager are working together to evaluate the risk responses to determine their effectiveness in the project. What project management technique are you performing with the project manager in this scenario?

- A. Risk audits
- B. Stakeholder analysis as the project team is a stakeholder
- C. Risk identification with the project team
- D. Risk analysis

**Answer:** A

**NEW QUESTION 10**

You are a risk auditor for your company. You are reviewing the contract types a project manager has used in her project. Of the following, which contract type has the most risk for the project manager as a buyer?

- A. Cost plus percentage of costs
- B. Time and material
- C. Cost plus incentive fee
- D. Fixed-price, incentive fee

**Answer:** A

**NEW QUESTION 10**

You are the project manager of the GHG project for your company. You have identified the project risks, completed qualitative and quantitative analysis, and created risk responses. You also need to document how and when risk audits will be performed in the project. Where will you define the frequency of risk audits?

- A. Risk response plan
- B. Quality management plan
- C. Risk management plan
- D. Schedule management plan

**Answer:** C

**NEW QUESTION 14**

You work as a project manager for BlueWell Inc. Management has asked you to work with the key project stakeholder to analyze the risk events you have identified in the project. They would like you to analyze the project risks with a goal of improving the project's performance as a whole. What approach can you use to achieve the goal of improving the project's performance through risk analysis with your project stakeholders?

- A. Focus on the high-priority risks through qualitative risk analysis
- B. Involve the stakeholders for risk identification only in the phases where the project directly affects them
- C. Involve subject matter experts in the risk analysis activities
- D. Use qualitative risk analysis to quickly assess the probability and impact of risk events

**Answer:** A

**NEW QUESTION 16**

During qualitative risk analysis you want to define the risk urgency assessment. All of the following are indicators of risk priority except for which one?

- A. Cost of the project
- B. Risk rating
- C. Warning signs
- D. Symptoms

**Answer:** A

**NEW QUESTION 21**

David is the project manager of HGF project for his company. David, the project team, and several key stakeholders have completed risk identification and are

ready to move into qualitative risk analysis. Tracy, a project team member, does not understand why they need to complete qualitative risk analysis. Which one of the following is the best explanation for completing qualitative risk analysis?

- A. It is a cost-effective means of establishing probability and impact for the project risks.
- B. Qualitative risk analysis helps segment the project risks, create a risk breakdown structure, and create fast and accurate risk responses.
- C. All risks must pass through quantitative risk analysis before qualitative risk analysis.
- D. It is a rapid and cost-effective means of establishing priorities for the plan risk responses and lays the foundation for quantitative analysis.

**Answer: D**

#### NEW QUESTION 26

You are the project manager for your organization. You are preparing for the quantitative risk analysis. Mark, a project team member, wants to know why you need to do quantitative risk analysis when you just completed qualitative risk analysis. Which one of the following statements best defines what quantitative risk analysis is?

- A. Quantitative risk analysis is the process of numerically analyzing the effect of identified risks on overall project objectives.
- B. Quantitative risk analysis is the planning and quantification of risk responses based on probability and impact of each risk event.
- C. Quantitative risk analysis is the review of the risk events with the high probability and the highest impact on the project objectives.
- D. Quantitative risk analysis is the process of prioritizing risks for further analysis or action by assessing and combining their probability of occurrence and impact.

**Answer: A**

#### NEW QUESTION 31

Fill in the blank with an appropriate phrase.

\_\_\_\_\_ are activities that are dangerous to complete and manage such as construction, electrical work, or manufacturing.

- A. Pure risks

**Answer: A**

#### NEW QUESTION 36

Which of the following processes is described in the statement below? "This is the process of numerically analyzing the effect of identified risks on overall project objectives."

- A. Identify Risks
- B. Perform Quantitative Risk Analysis
- C. Monitor and Control Risks
- D. Perform Qualitative Risk Analysis

**Answer: B**

#### NEW QUESTION 37

You are the project manager for your organization. You are working with your project team to complete the qualitative risk analysis process. The first tool and technique you are using requires that you assess the probability and what other characteristic of each identified risk in the project?

- A. Impact
- B. Risk owner
- C. Cost
- D. Risk category

**Answer: A**

#### NEW QUESTION 39

Joan is a project management consultant and she has been hired by a firm to help them identify risk events within the project. Joan would first like to examine the project documents including the plans, assumptions lists, project files, and contracts. What key thing will help Joan to discover risks within the review of the project documents?

- A. The project documents will help the project manager, or Joan, to identify what risk identification approach is best to pursue.
- B. Lack of consistency between the plans and the project requirements and assumptions can be the indicators of risk in the project.
- C. Poorly written requirements will reveal inconsistencies in the project plans and documents.
- D. Plans that have loose definitions of terms and disconnected approaches will reveal risks.

**Answer: B**

#### NEW QUESTION 40

Joyce is the project manager for her company. Joyce and her project team are working through the quantitative analysis for certain risk events within her project. According to the enterprise environmental factors the project manager is to perform sensitivity analysis on any risk with an impact greater than \$5,000 in the project. What is the sensitivity analysis?

- A. It determines which risk events have the most potential impact on the project.
- B. It uses round of anonymous surveys to predict which events are most likely to happen.
- C. It uses rounds of anonymous surveys to predict probability and impact.
- D. It determines possible combinations of risk events to predict overall project success, failure, or probability of achieving project objectives.

**Answer: A**

#### NEW QUESTION 44

Fred is the project manager of a large project in his organization. Fred needs to begin planning the risk management plan with the project team and key stakeholders. Which plan risk management process tool and technique should Fred use to plan risk management?

- A. Variance and trend analysis
- B. Information gathering techniques
- C. Planning meetings and analysis
- D. Data gathering and representation techniques

**Answer:** C

#### NEW QUESTION 46

Rex is the project manager of the BDF Project. This project will last for two years and has a budget of \$2,345,000. Management has instructed Rex that the project must not go over budget as funds are very tight in the organization. During the project planning Rex and the project team discover a positive risk event to save \$75,000. Rex wants to make certain that this risk event happens so which risk response method is most appropriate?

- A. Share
- B. Mitigation
- C. Exploit
- D. Enhance

**Answer:** C

#### NEW QUESTION 47

You and your project team have identified the project risks and now are analyzing the probability and impact of the risks. What type of analysis of the risks provides a quick and high-level review of each identified risk event?

- A. A risk probability-impact matrix
- B. Quantitative risk analysis
- C. Seven risk responses
- D. Qualitative risk analysis

**Answer:** D

#### NEW QUESTION 49

You are the project manager of the HJK Project for your organization. You and the project team have created risk responses for many of the risk events in the project. Where should you document the proposed responses and the current status of all identified risks?

- A. Stakeholder management strategy
- B. Risk management plan
- C. Risk register
- D. Lessons learned documentation

**Answer:** C

#### NEW QUESTION 53

Which of the following are parts of SWOT Analysis? Each correct answer represents a complete solution. Choose all that apply.

- A. Opportunities
- B. Tools
- C. Weaknesses
- D. Threats
- E. Strengths
- F. Optimism

**Answer:** ACDE

#### NEW QUESTION 56

What risk identification technique allows participants to identify the project risks and to remain anonymous?

- A. Influence diagrams
- B. Assumptions analysis
- C. Surveys
- D. Delphi technique

**Answer:** D

#### NEW QUESTION 60

You are the project manager of a new project in your organization. You and the project team have identified the project risks, completed risk analysis, and are planning the most appropriate risk responses. Which of the following tools is most effective to choose the most appropriate risk response?

- A. Cause-and-effect diagrams
- B. Project network diagrams
- C. Delphi Technique
- D. Decision tree analysis

**Answer:** D

**NEW QUESTION 64**

There are five outputs of the risk monitoring and controlling process. Which one of the following is NOT an output of the process?

- A. Organizational process assets updates
- B. Risk register updates
- C. Vendor contracts
- D. Change requests

**Answer:** C

**NEW QUESTION 68**

Harry is a project manager of a software development project. In the early stages of planning, he and the stakeholders operated with the belief that the software they were developing would work with their organization's current computer operating system. Now that the project team has started developing the software it has become apparent that the software will not work with nearly half of the organization's computer operating systems. The incorrect belief Harry had in the software compatibility is an example of what in project management?

- A. Issue
- B. Assumption
- C. Risk
- D. Constraint

**Answer:** B

**NEW QUESTION 69**

You work as a project manager for BlueWell Inc. You have to communicate the causes of risk events to the stakeholders. Which risk diagramming technique you will use to communicate the causes of risk events to project stakeholders?

- A. Project network diagrams
- B. Process flow charts
- C. Ishikawa diagrams
- D. Influence diagrams

**Answer:** C

**NEW QUESTION 70**

You are the program manager for your organization. Management is considering a new program but they are worried about the program risks that may affect the program success. You know that there are three positive risks responses and three negative risk responses that each risk can have. Management asks you which risk response would be most appropriate for a large risk event if they wanted to hire a third-party to own the risk event for the program. What risk event is most appropriate?

- A. Avoidance
- B. Sharing
- C. Transference
- D. Mitigation

**Answer:** C

**NEW QUESTION 71**

You are the project manager of the GHG project. You are preparing for the quantitative risk analysis process. You are using organizational process assets to help you complete the quantitative risk analysis process. Which one of the following is NOT a valid reason to utilize organizational process assets as a part of the quantitative risk analysis process?

- A. You will use organizational process assets for risk databases that may be available from industry sources.
- B. You will use organizational process assets for studies of similar projects by risk specialists.
- C. You will use organizational process assets to determine costs of all risks events within the current project.
- D. You will use organizational process assets for information from prior similar projects.

**Answer:** C

**NEW QUESTION 73**

Which one of the following is the only output for the qualitative risk analysis process?

- A. Enterprise environmental factors
- B. Project management plan
- C. Risk register updates
- D. Organizational process assets

**Answer:** C

**NEW QUESTION 77**

Your project team has identified a project risk that must be responded to. The risk has been recorded in the risk register and the project team has been discussing potential risk responses for the risk event. The event is not likely to happen for several months but the probability of the event is high. Which one of the following is a valid response to the identified risk event?

- A. Corrective action
- B. Risk audit
- C. Technical performance measurement
- D. Earned value management

**Answer:** A

**NEW QUESTION 82**

There are four inputs to the Monitoring and Controlling Project Risks process. Which one of the following will NOT help you, the project manager, to prepare for risk monitoring and controlling?

- A. Work Performance Information
- B. Project management plan
- C. Risk register
- D. Change requests

**Answer:** D

**NEW QUESTION 86**

You are the project manager for the NHH project. You are working with your project team to examine the project from four different defined perspectives to increase the breadth of identified risks by including internally generated risks. What risk identification approach are you using in this example?

- A. Root cause analysis
- B. SWOT analysis
- C. Influence diagramming techniques
- D. Assumptions analysis

**Answer:** B

**NEW QUESTION 89**

You are the project manager of the GHY project for your company. This project has a budget of \$543,000 and is expected to last 18 months. In this project, you have identified several risk events and created risk response plans. In what project management process group will you implement risk response plans?

- A. Executing
- B. Planning
- C. Monitoring and Controlling
- D. In any process group where the risk event resides

**Answer:** C

**NEW QUESTION 94**

During which of the following processes, probability and impact matrix is prepared?

- A. Perform Qualitative Risk Analysis
- B. Monitoring and Control Risks
- C. Plan Risk Responses
- D. Perform Quantitative Risk Analysis

**Answer:** A

**NEW QUESTION 99**

Don has hired Jerry, a contractor, to complete a portion of his project work. The contract used was a cost-plus contract. If Don were to perform a risk audit, who would carry the risk in this scenario?

- A. Don would because he is the project manager.
- B. Jerry would because of the contract type.
- C. Don would because of the contract type.
- D. Jerry would because he is the hired contractor.

**Answer:** C

**NEW QUESTION 102**

You work as a project manager for BlueWell Inc. Your project is using a new material to construct a large warehouse in your city. This new material is cheaper than traditional building materials, but it takes some time to learn how to use the material properly. You have communicated to the project stakeholders that you will be able to save costs by using the new material, but you will need a few extra weeks to complete training to use the materials. This risk response of learning how to use the new materials can also be known as what term?

- A. Team development
- B. Benchmarking
- C. Cost of conformance to quality
- D. Cost-benefits analysis

**Answer:** C

**NEW QUESTION 104**

You are the project manager of the NKQ project for your organization. You have completed the quantitative risk analysis process for this portion of the project. What is the only output of the quantitative risk analysis process?

- A. Probability of reaching project objectives
- B. Risk register updates
- C. Risk response
- D. Risk contingency reserve

**Answer: B**

#### NEW QUESTION 107

You are the project manager for your organization. You have determined that an activity is too dangerous to complete internally so you hire licensed contractor to complete the work.

The contractor, however, may not complete the assigned work on time which could cause delays in subsequent work beginning. This is an example of what type of risk event?

- A. Internal
- B. Secondary risk
- C. Pure risk
- D. Transference

**Answer: B**

#### NEW QUESTION 108

There are seven risks responses that a project manager can choose from. Which risk response is appropriate for both positive and negative risk events?

- A. Acceptance
- B. Sharing
- C. Transference
- D. Mitigation

**Answer: A**

#### NEW QUESTION 111

Ben works as a project manager for the MJH Project. In this project, Ben is preparing to identify stakeholders so he can communicate project requirements, status, and risks. Ben has elected to use a salience model as part of his stakeholder identification process. Which of the following activities best describes a salience model?

- A. Influence/impact grid, grouping the stakeholders based on their active involvement ("influence") in the project and their ability to affect changes to the project's planning or execution ("impact").
- B. Grouping the stakeholders based on their level of authority ("power") and their active involvement ("influence") in the project.
- C. Grouping the stakeholders based on their level of authority ("power") and their level or concern ("interest") regarding the project outcomes.
- D. Describing classes of stakeholders based on their power (ability to impose their will), urgency (need for immediate attention), and legitimacy (their involvement is appropriate).

**Answer: D**

#### NEW QUESTION 112

Risks with low ratings of probability and impact are included on a for future monitoring.

- A. Risk alarm
- B. Watchlist
- C. Observation list
- D. Risk register

**Answer: B**

#### NEW QUESTION 113

You are the project manager of the NHK Project. Management wants to know how often your risk identification process will occur during the project. Considering that your project is scheduled to last one year and involves five distinct phases, how often should risk identification take place?

- A. Monthly
- B. Once per project life cycle phase
- C. Quarterly
- D. Vary depending on the situations within the project

**Answer: D**

#### NEW QUESTION 117

Which of the following processes looks at the complex web of actors, rules, conventions, processes, and mechanisms concerned with how relevant risk information is collected, analyzed and communicated, and how management decisions are taken?

- A. Risk Communication
- B. IRGC
- C. Risk Response Planning
- D. Risk Governance

**Answer:** D

**NEW QUESTION 118**

You are the project manager of the NNH project. In this project you have created a contingency response that the cost performance index should be less than 0.93. The NHH project has a budget at completion of \$945,000 and is 45 percent complete - though the project should be 49 percent complete. The project has spent \$455,897 to reach the 45 percent complete milestone. What is the project's cost performance index?

- A. 1.06
- B. 0.92
- C. -\$30,647
- D. 0.93

**Answer:** D

**NEW QUESTION 119**

Which of the following processes must be repeated after Plan Risk Responses, as well as part of the Monitor and Control Risks, to determine if the overall project risk has been satisfactorily decreased?

- A. Risk Limitation
- B. Perform Qualitative Risk Analysis
- C. Identify Risk
- D. Perform Quantitative Risk Analysis

**Answer:** D

**NEW QUESTION 121**

You are the project manager of the NGQQ Project for your company. To help you communicate project status to your stakeholders, you are going to create a stakeholder register. All of the following information should be included in the stakeholder register except for which one?

- A. Assessment information of the stakeholders' major requirements, expectations, and potential influence
- B. Stakeholder classification of their role in the project
- C. Identification information for each stakeholder
- D. Stakeholder management strategy

**Answer:** D

**NEW QUESTION 122**

Sensitivity analysis is a technique for systematically changing parameters in a model to determine the effects of such changes and is useful for computer modelers for a range of purposes. Which of the following purposes does the sensitivity analysis include? Each correct answer represents a complete solution. Choose all that apply.

- A. Increased understanding or quantification of the system
- B. Estimating the average outcome
- C. Model development
- D. Decision making or the development of recommendations for decision makers

**Answer:** ACD

**NEW QUESTION 124**

You are the project manager of the NNH Project. In this project you have created a contingency response that the schedule performance index should be less than 0.93. The NHH Project has a budget at completion of \$945,000 and is 45 percent complete though the project should be 49 percent complete. The project has spent \$455,897 to reach the 45 percent complete milestone. What is the project's schedule performance index?

- A. -\$37,800
- B. 0.93
- C. 0.92
- D. 1.06

**Answer:** C

**NEW QUESTION 127**

You are the project manager of the GYH project for your organization. Management has asked you to begin identifying risks and to use an information gathering technique. Which one of the following risk identification approaches is an information gathering technique?

- A. Root cause analysis
- B. Assumptions analysis
- C. SWOT analysis
- D. Documentation reviews

**Answer:** A

**NEW QUESTION 128**

You are the project manager of the KJH Project and are working with your project team to plan the risk responses. Consider that your project has a budget of \$500,000 and is expected to last six months. Within the KJH Project you have identified a risk event that has a probability of .70 and has a cost impact of \$350,000. When it comes to creating a risk response for this event what is the risk exposure of the event that must be considered for the cost of the risk response?

- A. The risk exposure of the event is \$245,000.
- B. The risk exposure of the event is \$500,000.
- C. The risk exposure of the event is \$350,000.
- D. The risk exposure of the event is \$850,000.

**Answer:** A

**NEW QUESTION 129**

Pete works as a project manager for BlueWell Inc. The Management has told him that he must implement an agreed-upon contingency response if the cost performance index in his project is less than 0.90. Consider that Pete's project has a budget at completion of \$275,000. His project is 65 percent complete and he has spent \$175,000 to date. However, Pete is scheduled to be 78 percent complete. What is the cost performance index for this project to determine if the contingency response should happen?

- A. 1.02
- B. 0.96
- C. 0.90
- D. 0.89

**Answer:** A

**NEW QUESTION 133**

Mark works as a project manager for TechSoft Inc. Mark, the project team, and the key project stakeholders have completed a round of qualitative risk analysis. He needs to update the risk register with his findings so that he can communicate the risk results to the project stakeholders – including management. Mark will need to update all of the following information except for which one?

- A. Prioritized list of quantified risks
- B. Watchlist of low-priority risks
- C. Trends in qualitative risk analysis
- D. Risks grouped by categories

**Answer:** A

**NEW QUESTION 138**

You are the project manager of a large construction project. You are evaluating the strengths, weaknesses, opportunities, and threats involved in a project. In which of the following processes are you on?

- A. Define Scope
- B. Plan Risk Responses
- C. Plan Risk Management
- D. Identify Risks

**Answer:** D

**NEW QUESTION 142**

As a part of monitoring and controlling the project, the project manager should update the risk register. The project manager should update the risk register with information on risk reassessment, risk audits, and periodic risk reviews. What other information should the project manager update the risk register with?

- A. Actual costs and schedule delays of risk events.
- B. Actual outcomes of risk management duties by the project team.
- C. Actual cost of risk events.
- D. Actual outcomes of the project's risks and of the risk responses.

**Answer:** D

**NEW QUESTION 145**

Marsha is the project manager of the NHQ Project. There's a risk that her project team has identified, which could cause the project to be late by more than a month. Marsha does not want this risk event to happen so she devises extra project activities to ensure that the risk event will not happen. The extra steps, however, will cost the project an additional \$10,000. What type of risk response is this approach?

- A. Enhancing
- B. Exploiting
- C. Mitigation
- D. Transference

**Answer:** C

**NEW QUESTION 150**

Your organization, as part of its enterprise environmental factors, has established risk governance to be implemented in each project. Part of this governance is the reassessment of risks within each project. How much detail and repetition in approach for risks to be reassessed for probability and impact?

- A. Each risk reassessment should go into the same depth as the original risk assessment activity.
- B. The probability and impact of risk event should determine the level of reassessment throughout the project lifecycle.
- C. The amount of detail of repetition that is appropriate depends on how the project progresses relative to its objectives.
- D. The level of detail and reassessment should reflect the priority of the project.

**Answer:** C

#### NEW QUESTION 154

Holly is the project manager of the GHH Project. During risk identification and the subsequent risk analysis process she has identified a risk with a high probability and high impact for her project. She and the stakeholder agree that the project management plan should be changed to eliminate the risk threat entirely. What risk response has Holly used in this instance?

- A. This is the risk mitigation response.
- B. This is the avoidance risk response.
- C. This is the transference risk response.
- D. This is a scope change and not a risk response.

**Answer: B**

#### NEW QUESTION 155

Tom works as a project manager for BlueWell Inc. He is determining which risks can affect the project. Which of the following inputs of the identify risks process is useful in identifying risks, and provides a quantitative assessment of the likely cost to complete the scheduled activities?

- A. Activity cost estimates
- B. Cost management plan
- C. Activity duration estimates
- D. Risk management plan

**Answer: A**

#### NEW QUESTION 157

Mary is the project manager of PKT project. In Mary's project there are certain enterprise environmental factors that require Mary to use modeling and simulation techniques to predict the likelihood of achieving cost and schedule objectives in the project. Mary is using a technique for which the cost estimates are chosen at random for each iteration of the analysis, such as pessimistic, most likely, and worst-case scenarios. What type of analysis is Mary using in this project?

- A. Quantitative analysis
- B. Qualitative analysis
- C. Risk distribution
- D. Monte Carlo Analysis

**Answer: D**

#### NEW QUESTION 161

You are the project manager of the NJJ project. Your enterprise environmental factors require that you establish certain risk management rules regarding low risks within your project. What is the best policy for risks with low probability and low impact in the project management?

- A. These risks should be accepted.
- B. These risks should be placed on a watchlist for future monitoring.
- C. These risks should be identified, but dismissed.
- D. These risks should be placed in the risk register.

**Answer: B**

#### NEW QUESTION 164

Kelly is the project manager of the NNQ Project for her company. This project will last for one year and has a budget of \$350,000. Kelly is working with her project team and subject matter experts to begin the risk response planning process. When the project manager begins the plan risk response process, what two inputs will she need?

- A. Risk register and the risk response plan
- B. Risk register and power to assign risk responses
- C. Risk register and the risk management plan
- D. Risk register and the results of risk analysis

**Answer: C**

#### NEW QUESTION 168

Bill is the project manager of the JKH Project. He and the project team have identified a risk event in the project with a high probability of occurrence and the risk event has a high cost impact on the project. Bill discusses the risk event with Virginia, the primary project customer, and she decides that the requirements surrounding the risk event should be removed from the project. The removal of the requirements does affect the project scope, but it can release the project from the high risk exposure. What risk response has been enacted in this project?

- A. Mitigation
- B. Transference
- C. Acceptance
- D. Avoidance

**Answer: D**

#### NEW QUESTION 172

Your project uses a piece of equipment that if the temperature of the machine goes above 450 degree Fahrenheit the machine will overheat and have to be shut down for 48 hours. Should this machine overheat even once it will delay the project's end date. You work with your project to create a response that should the temperature of the machine reach 430, the machine will be paused for at least an hour to cool it down. The temperature of 430 is called what?

- A. Risk response

- B. Risk event
- C. Risk trigger
- D. Risk identification

**Answer:** C

**NEW QUESTION 177**
