Exam Questions SC-300

Microsoft Identity and Access Administrator

NEW QUESTION 1

- (Exam Topic 1)

You need to configure the MFA settings for users who connect from the Boston office. The solution must meet the authentication requirements and the access requirements.

What should you configure?

- A. named locations that have a private IP address range
- B. named locations that have a public IP address range
- C. trusted IPs that have a public IP address range
- D. trusted IPs that have a private IP address range

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/location-condition>

Location offer your country set, IP ranges MFA trusted IP and corporate network VPN gateway IP address: This is the public IP address of the VPN device for your on-premises network. The VPN device requires an IPv4 public IP address. Specify a valid public IP address for the VPN device to which you want to connect. It must be reachable by Azure Client Address space: List the IP address ranges that you want routed to the local on-premises network through this gateway. You can add multiple address space ranges. Make sure that the ranges you specify here do not overlap with ranges of other networks your virtual network connects to, or with the address ranges of the virtual network itself.

NEW QUESTION 2

- (Exam Topic 1)

You need to track application access assignments by using Identity Governance. The solution must meet the delegation requirements.

What should you do first?

- A. Modify the User consent settings for the enterprise applications.

NEW QUESTION 54

- (Exam Topic 4)
You have an Azure AD tenant that contains a user named User1. User1 is assigned the User Administrator role.

You need to configure External collaboration settings for the tenant to meet the following requirements: |

*Guest users must be prevented from querying staff email addresses.

*Guest users must be able to access the tenant only if they are invited by User1.

Which three settings should you configure? To answer, select the appropriate settings in the answer area.

Guest user access restrictions:

- Guest users have the same access as members (most inclusive)
- Guest users have limited access to properties and memberships of directory objects
- Guest user access is restricted to properties and memberships of their own directory objects (most restrictive)**

Guest invite restrictions:

- Anyone in the organization can invite guest users including guests and non-admins (most inclusive)
- Member users and users assigned to specific admin roles can invite guest users including guests with member permissions
- Only users assigned to specific admin roles can invite guest users
- No one in the organization can invite guest users including admins (most restrictive)**

Enable guest self-service sign up via user flows:

- No
- Yes**

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box1 = User access is restricted to properties and memberships of their own directory objects (most restrictive). This setting ensures that guest users are prevented from querying staff email addresses and can access the tenant only if they are invited by User1.

Box2 = Only users assigned to specific admin roles can invite guest users. This setting ensures that guest users can access the tenant only if they are invited by User1.

Box3 = This setting enables guest users to sign up for the tenant only if they are invited by User1.
