

Microsoft

Exam Questions MD-100

Windows 10

NEW QUESTION 1

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10. Computer1 has a Trusted Platform Module (TPM) version 12.

The domain contains a domain controller named DC1 that has all the Remote Server Administration Tools (RSAT) installed.

BitLocker Drive Encryption (BitLocker) recovery passwords are stored in Active Directory. You enable BitLocker on the operating system drive of Computer1.

A software update on Computer1 disables the TPM, and BitLocker enters recovery mode. You need to recover your BitLocker password for Computer1.

What should you use to retrieve the recovery password?

- A. Active Directory Users and Computers
- B. repair-bde with the /f parameter
- C. manage-bde with the -unlock parameter
- D. Disk Management

Answer: A

NEW QUESTION 2

- (Exam Topic 4)

You have a computer that runs Windows 10. You can start the computer but cannot sign in.

You need to start the computer into the Windows Recovery Environment (WinRE). What should you do?

- A. Turn off the computer
- B. Turn on the computer, and then press F8.
- C. Turn off the computer
- D. Turn on the computer, and then press F10.
- E. From the sign-in screen, hold the Shift key, and then click Restart.
- F. Hold Alt+Ctrl+Delete for 10 seconds.

Answer: C

Explanation:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-recovery-environment--win>

NEW QUESTION 3

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 11.

You receive a notification that Computer1 is running low on disk space. You need to remove the following files from Computer1:

- Unused apps
 - Unused Microsoft OneDrive content
 - Non-critical files for Microsoft Defender Antivirus
- The solution must minimize administrative effort.

Which tool should you use to remove each type of file? To answer, drag the appropriate tools to the correct file types. Each tool may be used once, more not at all.

You may need to drag the split bar between panes or scroll to view content.

NEW QUESTION 4

- (Exam Topic 4)
You have a computer named Computer5 that runs Windows 10 that is used to share documents in a workgroup.
You create three users named User-a, User-b, User-c. The users plan to access Computer5 from the network only.
You have a folder named Data. The Advanced Security Settings for the Data folder are shown in the Security exhibit. (Click the Security Exhibit tab).

Advanced Security Settings for Data

Name: C:\Data

Owner: Administrators (DESKTOP-59Q8HS3\Administrators) [Change](#)

☐ Replace owner on subcontainers and objects

Permissions

Share

Auditing

Effective Access

For additional information, double-click a permission entry. To modify a permission entry, select the entry and click Edit (if available).

Permission entries:

Type	Principal	Access	Inherited from	Applies to
 Allow	User-a (DESKTOP-59Q8HS3\U..	Read & execute	None	This folder, subfolders and files
 Allow	User-b (DESKTOP-59Q8HS3\U..	Modify	None	This folder, subfolders and files
 Allow	Administrators (DESKTOP-59...	Full control	None	This folder, subfolders and files
 Allow	SYSTEM	Full control	None	This folder, subfolders and files
 Allow	Users (DESKTOP-59Q8HS3\Us..	Read & execute	None	This folder, subfolders and files

Add

Remove

View

Enable inheritance

☐ Replace all child object permission entries with inheritable permission entries from this object

OK

Cancel

Apply

You share the Data folder. The permission for User-a are shown in the User-a exhibit (Click the User-a tab.)

Permissions for Data

Share Permissions

Group or user names:

User-a (DESKTOP-59Q8HS3\User-a)

User-b (DESKTOP-59Q8HS3\User-b)

User-c (DESKTOP-59Q8HS3\User-c)

Add...

Remove

Permissions for User-a

	Allow	Deny
Full control	<input type="checkbox"/>	<input type="checkbox"/>
Change	<input type="checkbox"/>	<input type="checkbox"/>
Read	<input checked="" type="checkbox"/>	<input type="checkbox"/>

OK

Cancel

Apply

The permissions for user-b are shown in the User-b exhibit. (Click the User-b tab.)

Permissions for Data

Share Permissions

Group or user names:

User-a (DESKTOP-59Q8HS3\User-a)

User-b (DESKTOP-59Q8HS3\User-b)

User-c (DESKTOP-59Q8HS3\User-c)

Add...

Remove

Permissions for User-a

	Allow	Deny
Full control	<input type="checkbox"/>	<input type="checkbox"/>
Change	<input type="checkbox"/>	<input type="checkbox"/>
Read	<input checked="" type="checkbox"/>	<input type="checkbox"/>

OK

Cancel

Apply

The permissions for user-c are shown in the User-c exhibit. (Click the User-c tab.)

For each of the following statements, select Yes if the statements is true. Otherwise, select No.
NOTE: Reach correct selection is worth one point.

Statements	Yes	No
User-a can modify files in the Data share.	<input type="radio"/>	<input type="radio"/>
User-b can delete files in the Data share.	<input type="radio"/>	<input type="radio"/>
User-c can read files in the Data share.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
No No Yes

NEW QUESTION 5

- (Exam Topic 4)
You have a public computer named Public1 that runs Windows 10. Users use Public1 to browse the internet by using Microsoft Edge. You need to view events associated with website phishing attacks on Public1. Which Event Viewer log should you view?

- A. Applications and Services Logs > Microsoft > Windows > SmartScreen > Debug
- B. Applications and Services Logs > Microsoft > Windows > Security-Mitigations > User Mode
- C. Applications and Services Logs > Microsoft > Windows > Windows Defender > Operational
- D. Applications and Services Logs > Microsoft > Windows > DeviceGuard > Operational

Answer: A

NEW QUESTION 6

- (Exam Topic 4)
You have three computers that run Windows 10 as shown in the following table.

Name	TPM version	Operating system
Computer1	None	Windows 10 Enterprise
Computer2	2.0	Windows 10 Pro
Computer3	1.2	Windows 10 Enterprise

All the computers have C and D volumes. The Require additional authentication at startup Group Policy settings is disabled on all the computers. Which volumes can you encrypt by using BitLocker Drive Encryption (BitLocker)? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

You can encrypt volume C on:

▼
Computer1 only
Computer2 only
Computer3 only
Computer1 and Computer3 only
Computer2 and Computer3 only
Computer1, Computer2 and Computer3

You can encrypt volume D on:

▼
Computer1 only
Computer2 only
Computer3 only
Computer1 and Computer3 only
Computer2 and Computer3 only
Computer1, Computer2 and Computer3

- A. Mastered
- B. Not Mastered

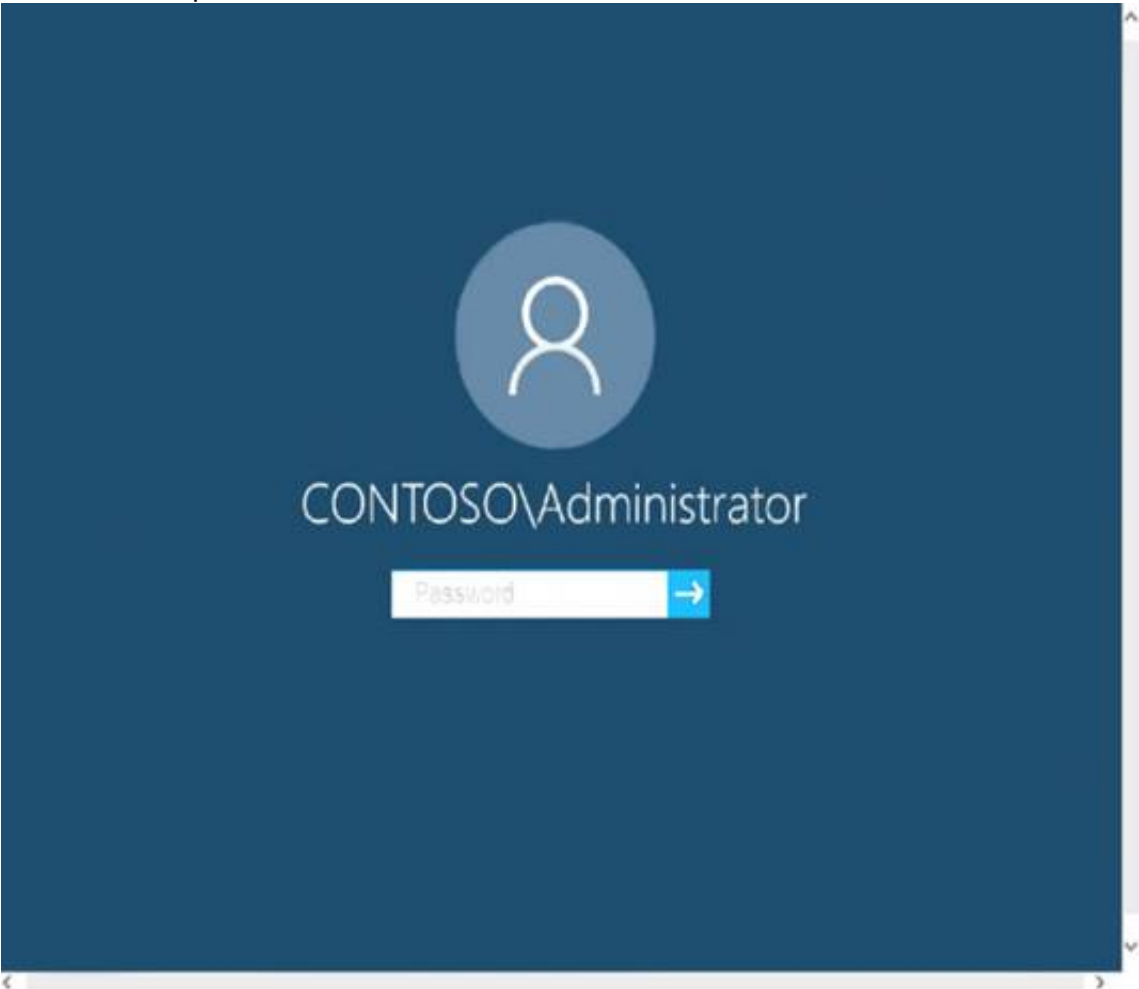

Answer: A

Explanation:

Volume C on = Computer 2 and 3 only Volume D on = C1, C2, C3
The "Require additional authentication at startup" setting is located in the Computer Configuration\ Administrative Templates\ Windows Components\ BitLocker Drive Encryption\ Operating System Drives path. If the policy is disabled and there is no TPM chip installed, operating system drives can not be encrypted using BitLocker. Additional data volumes can be protected using a password as a key protector for example.

<https://www.windowscentral.com/how-use-bitlocker-encryption-windows-10>

NEW QUESTION 7

- (Exam Topic 4)
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.
Username and password

Use the following login credentials as needed:
To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

Tasks **Computers**

Users in the Finance group report that they cannot copy files to Client1\Finance. You need to resolve the issue. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- Open File Explorer.
- Browse and find the file or folder you want to have full access.
- Right-click it, and select Properties.

- Click the Security tab to access the NTFS permissions.
- Click the Advanced button.
- On the "Advanced Security Settings" page, you need to click the Change link, in the Owner's field.
- Click the Advanced button.
- On the "Select User or Group" page, click the Find Now button.
- From the search result, select your user account, and click OK.
- On the "Select User or Group" page, click OK.
- Click Apply.
- Click OK.
- Click OK again.
- Click OK one more time to complete this task.

It's important to note that if you're taking ownership of a folder, you can check the Replace ownership on subcontainers and object option in the Advanced Security Settings page to take control of the subfolders inside of the folder.

Now you'll need to grant full access control to your account, to do this use the following steps:

- Right-click the file or folder and select Properties.
- Click the Security tab to access the NTFS permissions.
- Click the Advanced button.
- Under the Permissions tab, click Add.
- Click Select a principal to add your user account.
- On the "Select User or Group" page, click the Find Now button.
- From the search result, select your user account, and click OK.
- On the "Select User or Group" page, click OK.
- On "Permission Entry", check the Full control option.
- Click OK.
- Click OK.
- Click Apply.
- Click OK.
- Click OK to close the file or folder properties to complete the task.

You can now assign the necessary permissions to the Finance group.

If you right-click on a file or folder, choose Properties and click on the Security tab, we can now try to edit some permissions. Go ahead and click the Edit button to get started.

At this point, there are a couple of things you can do. Firstly, you'll notice that the Allow column is probably greyed out and can't be edited. This is because of the inheritance I was talking about earlier. However, you can check items on the Deny column.

When you click the Add button, you have to type in the user name or group name into the box and then click on Check Names to make sure it's correct. If you don't remember the user or group name, click on the Advanced button and then just click Find Now. It will show you all the users and groups.

Click OK and the user or group will be added to the access control list. Now you can check the Allow column or Deny column.

NEW QUESTION 8

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10.

You need to ensure that Computer1 will respond to ping requests.

How should you configure Windows Defender Firewall on Computer1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Rule to create:

A server-to-server connection security rule
An authentication exemption connection security rule
An inbound rule
An outbound rule

Protocol type to allow:

ICMPv4
IGMP
PGM
TCP
UDP

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Rule to create:

A server-to-server connection security rule

An authentication exemption connection security rule

An inbound rule

An outbound rule

Protocol type to allow:

ICMPv4

IGMP

PGM

UDP

NEW QUESTION 9

- (Exam Topic 4)
You have a Windows 11 Pro device.
You need to perform a scan in Microsoft Defender to check for rootkits. Which type of scan should you use?

- A. full
- B. offline
- C. custom
- D. quick

Answer: B

NEW QUESTION 10

- (Exam Topic 4)
You have the computers shown in the following table.

Name	Windows 10 edition	Servicing channel
Computer1	Windows 10 Education	Semi-annual
Computer2	Windows 10 Pro	Semi-annual
Computer3	Windows 10 Enterprise	Semi-annual

You apply the 20H2 feature update as soon as the update is available.
How many months of servicing does each computer support without installing another feature update? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Computer1:

6 months

12 months

18 months

30 months

Computer2:

6 months

12 months

18 months

30 months

Computer3:

6 months

12 months

18 months

30 months

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 10

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You test Windows updates on Computer1 before you make the updates available to other users at your company.

You install a quality update that conflicts with a customer device driver. You need to remove the update from Computer1.

Solution: From System Restore, you revert the system state to a restore point that was created before the update was installed.

Does this meet the goal?

A. Yes

B. No

Answer: B

Explanation:

References:

<https://support.microsoft.com/en-us/help/934307/description-of-the-windows-update-standalone-installer-in-win>

NEW QUESTION 11

- (Exam Topic 4)

You have a computer that runs Windows 10.

You need to be able to recover the computer by using System Image Recovery.

What should you use to create a system image?

A. Windows System Image Manager (Windows SIM)

B. Backup and Restore (Windows 7)

C. File History

D. System Protection

Answer: B

Explanation:

Reference:

https://answers.microsoft.com/en-us/windows/forum/windows_10/how-to-create-a-system-image-in-windows-1

NEW QUESTION 14

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains computers that run Windows 11.

You have a workgroup computer named Computer1 that runs Windows 11 and contains a user named User1. Each computer contains a folder named C:\Folder1.

Each C:\Folder1 contains three files named Image1.jpg.

Image2.jpg. and Image3.jpg.

Contoso.com has the Default Domain Policy configured as shown in the following table.

Policy	Value
Minimum password length	7
Desktop Wallpaper	Enabled C:\Folder1\Image1.jpg

Contoso.com has the Default Domain Controllers Policy configured as shown in the following table.

Policy	Value
Minimum password length	10
Desktop Wallpaper	Enabled C:\Folder1\Image2.jpg

Computer1 has a local Group Policy configured as shown in the following table.

Policy	Value
Minimum password length	5
Desktop Wallpaper	Enabled C:\Folder1\Image3.jpg

You join Computer1 to contoso.com and User1 signs in to the computer.

What is the minimum password length and the desktop wallpaper for User1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Minimum password length:

5

Image3.jpg

Desktop wallpaper:

Image3.jpg

Image1.jpg

Image2.jpg

Image3.jpg

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Minimum password length:

5

Image3.jpg

Desktop wallpaper:

Image3.jpg

Image1.jpg

Image2.jpg

image3.jpg

NEW QUESTION 17

- (Exam Topic 4)
You plan to install Windows 10 Pro by using an answer file. You open Windows System Image Manager. You need to create an answer file. What should you do first?

- A. Open the Install.wim file from the Windows 10 installation media.
- B. Open the Boot.wim file from the Windows 10 installation media.
- C. Install the WinPE add-on for the Windows Assessment and Deployment Kit (Windows ADK).
- D. Install the Windows Assessment and Deployment Kit (Windows ADK).

Answer: C

NEW QUESTION 21

- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the local users shown in the following table.

Name	Member of
Administrator	Administrators, Users
User1	Users
User2	Users

Computer1 contains the folders shown in the following table.

Name	Path
Folder1	D:\Folder1
Folder2	D:\Folder2
Folder3	E:\Folder3

The Users group has Full control permissions to Folder1, Folder2, and Folder3. User1 encrypts two files named File1.docx and File2.docx in Folder1 by using EFS.
Which users can move each file? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Users who can move File1.docx to Folder2:

▼

User1 only

User1 and Administrator only

User1, User2, and Administrator

Users who can move File2.docx to Folder3:

▼

User1 only

User1 and Administrator only

User1, User2, and Administrator

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

EFS works by encrypting a file with a bulk symmetric key. The symmetric key that is used to encrypt the file is then encrypted with a public key that is associated with the user who encrypted the file. Because the encryption & decryption operations are performed at a layer below NTFS, it is transparent to the user and all their applications.

Box 1: User1, User2, and Administrator Box 2: User1, User2, and Administrator

All three are members of the Users group that has Full control permissions to Folder1, Folder2, and Folder3.

NEW QUESTION 24

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users
User3	Users

You need to configure the desktop background for User1 and User2 only.

Solution: You create a new local group to which you add User1 and User2. You create a local Group Policy Object (GPO) and configure the Desktop Wallpaper setting in the GPO. At a command prompt, you run the gpupdate.exe/Force command.

Does this meet the goal?

- A. Yes
 B. No

Answer: A

Explanation:

References:

<https://www.windowscentral.com/how-apply-local-group-policy-settings-specific-users-windows-10>

NEW QUESTION 29

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

On Computer1, you create a VPN connection as shown in the following exhibit.

```

PS C:\> Get-VpnConnection VPN1

Name                : VPN1
ServerAddress       : vpn.contoso.com
AllUserConnection   : False
Guid                : {101AC5F1 - 6269 - 4745 - A3C4 - 48825E3FD83}
TunnelType          : Automatic
AuthenticationMethod : {MsChapv2}
EncryptionLevel     : Optional
L2tpIPsecAuth       : Certificate
UseWinlogonCredential : False
EapConfigXmlStream  :
ConnectionStatus    : Disconnected
RememberCredential  : True
SplitTunneling      : True
DnsSuffix            :
IdleDisconnectSeconds : 0

PS C:\>
  
```

The corporate network contains a single IP subnet.
 Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

VPN1 can use protocols **[answer choice]** to establish a VPN connection.

▼

PPTP and L2TP only
 L2TP and SSTP only
 L2TP, SSTP, and IKEv2 only
 PPTP, L2TP, SSTP, and IKEv2

[Answer choice] will be routed through the VPN connection.

▼

Only traffic for the internet
 Only traffic for the corporate network
 Traffic the Internet and the corporate network

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

VPN1 can use protocols **[answer choice]** to establish a VPN connection.

▼

PPTP and L2TP only
 L2TP and SSTP only
 L2TP, SSTP, and IKEv2 only
 PPTP, L2TP, SSTP, and IKEv2

[Answer choice] will be routed through the VPN connection.

▼

Only traffic for the internet
 Only traffic for the corporate network
 Traffic the Internet and the corporate network

NEW QUESTION 30

- (Exam Topic 4)
 You are troubleshooting Windows 10 updates that fail to install on a computer that runs Windows 10. You delete the contents of the SoftwareDistribution folder. You need to delete the signatures of the Windows Update packages. Which folder should you delete?

- A. %systemroot%\system32\catroot2
- B. %systemdrive%\recovery
- C. %systemroot%\WinSxS
- D. %systemdrive%\System Volume Information

Answer: A

Explanation:

References:
<https://tipsmake.com/how-to-delete-pending-updates-on-windows-10>

NEW QUESTION 35

- (Exam Topic 4)
Your company has several mobile devices that run Windows 10.
You need configure the mobile devices to meet the following requirements:
> Windows updates may only be download when mobile devices are connect to Wi-Fi.
> Access to email and the Internet must be possible at all times.
What should you do?

- A. Open the Setting app and select Update & Securit
- B. Then select and configure Change active hours.
- C. Open the Setting app and select Network & Interne
- D. Then select Change connection properties, and setthe Metered connection option for cellular network connections to On.
- E. Open the Setting app and select Network & Internet Then select Data Usage and set a data limit.
- F. Open the Setting app and select Update & Securit
- G. Then select and configure Delivery Optimization.

Answer: B

Explanation:

Reference:

NEW QUESTION 37

- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 10.
You restart Computer1 by using Advanced startup and select Boot log.
In which folder is the boot log file stored?

- A. C:\
- B. C:\Windows
- C. C:\Windows\debug
- D. C:\Windows\System32\LogFiles

Answer: B

Explanation:

Reference:
<https://winaero.com/enable-boot-log-windows-10/>

NEW QUESTION 38

- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 7. Computer1 has a local user named User1 who has a customized profile.
On Computer1, you perform a clean installation of Windows 10 without formatting the drives. You need to migrate the settings of User1 from Windows7 to Windows 10.
Which two actions should you perform? To answer, drag the appropriate actions to the correct targets. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Actions	Answer Area
Run scanstate.exe and specify the C:\Users subfolder.	First action: <div>Action</div>
Run loadstate.exe and specify the C:\Users subfolder.	Second action: <div>Action</div>
Run scanstate.exe and specify the C:\Windows.old subfolder.	
Run loadstate.exe and specify the C:\Windows.old subfolder.	
Run usmutils.exe and specify the C:\Users subfolder.	
Run usmutils.exe and specify the C:\Windows.old subfolder.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-how-it-works>

NEW QUESTION 40

- (Exam Topic 4)

You have a computer that runs Windows 10 and contains the folders shown in the following table.

Name	Path
FolderA	C:\FolderA
FolderB	C:\FolderA\FolderB
FolderC	C:\FolderA\FolderB\FolderC

You create the groups shown in the following table.

Name	Members
Group1	User1, User2
Group2	User2, User3
Group3	User1, User3

On FolderA, you remove permission inheritance. To each folder, you assign the NTFS permissions shown in the following table.

Folder	Permission
FolderA	Modify to Group1 Read to Group2
FolderB	Write to Group2
FolderC	Read to Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can read and write all files in FolderC.	<input type="radio"/>	<input type="radio"/>
User2 can delete all files in FolderB.	<input type="radio"/>	<input type="radio"/>
User3 can delete all files in FolderC.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

YES YES NO

NEW QUESTION 44

- (Exam Topic 4)

You plan to deploy Windows 10 Enterprise to company-owned devices. You capture a Windows 10 image file from a reference device.

You need to generate catalog files and answer files for the deployment.

What should you use for each file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Catalog file:	<div><div>Deployment Image Servicing and Management (DISM)</div><div>Windows Configuration Designer</div><div>Windows Deployment Services (WDS)</div><div>Windows System Image Manager (Windows SIM)</div></div>
Answer file:	<div><div>Deployment Image Servicing and Management (DISM)</div><div>Windows Configuration Designer</div><div>Windows Deployment Services (WDS)</div><div>Windows System Image Manager (Windows SIM)</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated
References:
<https://docs.microsoft.com/en-us/windows-hardware/customize/desktop/wsim/open-a-windows-image-or-catalo>

NEW QUESTION 47

- (Exam Topic 4)
You are a network administrator at your company.
A user attempts to start a computer and receives the following error message: “Bootmgr is missing.” You need to resolve the issue.
You start the computer in recovery mode.
Which command should you run next? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Bootrec

Diskpart

Sfc

/FixMbr

/RebuildBcd

/ScanNow

/offbootdir

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
References: https://neosmart.net/wiki/bootrec/#Bootrec_in_Windows10

NEW QUESTION 49

- (Exam Topic 4)
Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of domain group
User1	Authenticated Users
User2	Device Managers Authenticated Users
User3	Help Desk Authenticated Users

The Authenticated Users group has the Add workstations to domain user right in the Default Domain Controllers Policy.
The Device Managers and Help Desk groups are granted the Create Computer objects permission for the Computers container of the domain.
You have 15 workgroup computers that run Windows 10. Each computer contains a local user account named LocalAdmin1 that is a member of the following groups:

- > Administrators
- > Device Owners
- > Authenticated Users

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can join all the computers to the domain.	<input type="radio"/>	<input type="radio"/>
User2 can join a maximum of 10 computers to the domain.	<input type="radio"/>	<input type="radio"/>
User3 can join all the computers to the domain.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Box 1: No
User1 is a member of the Authenticated Users group which has the Add workstations to domain user right. However, with the Add workstations to domain user right, you are restricted to joining a maximum of 10 computers to the domain.
Box 2: No
User2 is a member of the Authenticated Users group which has the Add workstations to domain user right. User2 is also a member of the Device Managers group

which is granted the Create Computer objects permission for the Computers container of the domain. The Create Computer objects permission overrides the 10-computer limit imposed by the Add workstations to domain user right so User2 can join more than 10 computers to the domain.

Box 3. Yes

User3 is a member of the Authenticated Users group which has the Add workstations to domain user right. User3 is also a member of the Help Desk group which is granted the Create Computer objects permission for the Computers container of the domain. The Create Computer objects permission overrides the 10-computer limit imposed by the Add workstations to domain user right so User3 can join all the computers to the domain.

NEW QUESTION 50

- (Exam Topic 4)

You are a network administrator at your company.

The company uses an application that checks for network connectivity to a server by sending a ping request to the IPv6 address of the server replies, the application loads.

A user cannot open the application.

You manually send the ping request from the computer of the user and the server does not reply. You send the ping request from your computer and the server replies.

You need to ensure that the ping request works from the user’s computer. Which Windows Defender firewall rule is a possible cause of the issue?

A. File and Printer Sharing (NB-Datagram-In)

B. File and Printer Sharing (Echo request ICMPv6-Out)

C. File and Printer Sharing (NB-Datagram-Out)

D. File and Printer Sharing (Echo Request ICMPv6-In)

Answer: B

NEW QUESTION 51

- (Exam Topic 4)

You install Windows 10 Enterprise on a new computer. You need to force activation on the computer.

Which command should you run?

A. slmgr /upk

B. Sec-RDLICENSEconfiguration -Force

C. Sec-MsolLicense -AddLicense

D. slmgr /ato

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/volume-activation/activate-using-key-management-servi>

NEW QUESTION 56

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1, Group2
User3	Group2

The domain contains a computer named Computer1 that runs Windows 10. Computer1 contains a folder named Folder1 that has the following permissions:

- > User2: Deny Write
- > Group1: Allow Read
- > Group2: Allow Modify

Folder1 is shared as Share1\$. Share1\$ has the following configurations:

- > Everyone: Allow Full control
- > Access-based enumeration: Enabled

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can list files in \\Computer1\Share1\$.	<input type="radio"/>	<input type="radio"/>
User2 can list files in \\Computer1\Share1\$.	<input type="radio"/>	<input type="radio"/>
If User3 connects to \\Computer1 from File Explorer, Share1\$ will be visible.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

YES, YES, NO

References:

<https://www.varonis.com/blog/ntfs-permissions-vs-share/>

<http://www.ntfs.com/ntfs-permissions-file-advanced.htm>

<https://docs.microsoft.com/en-us/windows-server/storage/dfs-namespaces/enable-access-based-enumeration-on>

NEW QUESTION 58

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you run the winrm quickconfig command.

Does this meet the goal?

A. Yes

B. No

Answer: B

Explanation:

Windows Remote Management is a component of the Windows Hardware Management features that manage server hardware locally and remotely.

References:

<https://docs.microsoft.com/en-us/windows/win32/winrm/about-windows-remote-management>

NEW QUESTION 63

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. You must ensure that Windows BitLocker Drive Encryption is enabled on all client computers, even though a Trusted Platform Module (TPM) chip is installed in only some of them.

You need to accomplish this goal by using one Group Policy object (GPO). What should you do?

A. Enable the Allow enhanced PINs for startup policy setting, and select the Allow BitLocker without a compatible TPM check box

B. Enable the Enable use of BitLocker authentication requiring preboot keyboard input on slates policy setting, and select the Allow BitLocker without a compatible TPM check box

C. Enable the Require additional authentication at startup policy setting, and select the Allow BitLocker without a compatible TPM check box

D. Enable the Control use of BitLocker on removable drives policy setting, and select the Allow BitLocker without a compatible TPM check box

Answer: C

Explanation:

We need to allow Windows BitLocker Drive Encryption on all client computers (including client computers that do not have Trusted Platform Module (TPM) chip).

We can do this by enabling the option to allow BitLocker without a compatible TPM in the group policy. The "Allow BitLocker without a compatible TPM" option is a checkbox in the "Require additional authentication at startup" group policy setting. To access the "Allow BitLocker without a compatible TPM" checkbox, you need to first select Enabled on the "Require additional authentication at startup" policy setting.

Reference:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-group-policy-setti>

NEW QUESTION 66

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10. Computer1 contains a folder named Folder1.

You plan to share Folder1. Everyone will have Read share permissions, and administrators will have Full control share permission.

You need to prevent the share from appearing when users browse the network. What should you do?

A. Enable access-based enumeration.

B. Deny the List NTFS permissions on Folder1.

C. Add Folder1 to a domain-based DFS namespace.

D. Name the share Folder\$.

Answer: D

Explanation:

Appending a dollar sign to share name prevents a share from appearing when users browse the network.

NEW QUESTION 71

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

Computer1 was off for one year. During that time, two feature updates and 12 quality updates were released.

From the Microsoft Update Catalog website, you download the missing updates and save the updates to Computer1.

You need to ensure that Computer1 runs the latest version of Windows 10 and is fully updated. The solution must minimize the amount of time required to update the computer.

What should you do?

A. Install the last feature update, and then install the last quality update.

B. Install the last quality update, and then install both feature updates.

C. Install the last quality update, and then install the last feature update.

- D. Install the last feature update, and then install all the quality updates released after the feature update.
E. Install all the quality and feature updates in the order in which they were released.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/get-started-updates-channels-tools>

NEW QUESTION 72

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows10. Computer1 is in a workgroup. Computer1 contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1
User3	Group1
User4	Users
Admin1	Administrators

You need to apply the same Group Policy settings to only User1, User2 and User3. The solution must use a minimum number of local Group Policy objects (GPOs).

How many local GPOs should you create?

- A. 1
B. 2
C. 3

Answer: A

Explanation:

You can use security filtering to restrict the GPO to the required users. Only users with the Read and Apply Group Policy permissions will have the GPO applied to them.

NEW QUESTION 73

- (Exam Topic 4)

You are troubleshooting the network connectivity of a computer that runs Windows 10. The computer is connected physically to the network but rejects network traffic from an external source. You need to reinstall the TCP/IP stack on the computer. What should you run?

- A. the `necsh int ip resec` command
B. the `Resec-NetAdapcerAdvancedPropercy` cmdlet
C. the `netcf g -d` command
D. the `Debug-NecworkController` cmdlet

Answer: A

Explanation:

Reference: <https://howtofix.guide/reset-tcp-ip/>

NEW QUESTION 77

- (Exam Topic 4)

Your network contains the segments shown in the following table.

Name	Domain controller connectivity	Internet connectivity
Segment1	Yes	Yes
Segment2	No	Yes

You have computers that run Windows 10 and are configured as shown in the following table.

Name	Shared folder	Share permission	Active Directory joined	Connected to
Computer1	Share1	Everyone: Full control	Yes	Segment1
Computer2	Share2	Everyone: Full control	Yes	Segment2
Computer3	Share3	Everyone: Full control	No	Segment1

Windows Defender Firewall has the File and Printer Sharing allowed apps rule shown in the following table.

Computer	Domain	Private	Public
Computer1	Allowed	Not allowed	Not allowed
Computer2	Allowed	Allowed	Not allowed
Computer3	Not applicable	Allowed	Allowed

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
You can access Share1 from Computer3.	<input type="radio"/>	<input type="radio"/>
You can access Share2 from Computer3.	<input type="radio"/>	<input type="radio"/>
You can access Share3 from Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
You can access Share1 from Computer3.	<input type="radio"/>	<input checked="" type="radio"/>
You can access Share2 from Computer3.	<input type="radio"/>	<input checked="" type="radio"/>
You can access Share3 from Computer1.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 79

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.
A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.
You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User2 on Computer1.
Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.
User2 is a domain user, not an administrator. Use User3's credentials instead. References:
<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

NEW QUESTION 80

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a user named User1. User1 creates a Microsoft account.
User1 needs to sign in to cloud resources by using the Microsoft account without being prompted for credentials.
Which settings should User1 configure?

- A. User Accounts in Control Panel
- B. Email & app accounts in the Settings app
- C. Users in Computer Management
- D. Users in Active Directory Users and Computers

Answer: B

Explanation:

References:

<https://support.microsoft.com/en-za/help/4028195/microsoft-account-how-to-sign-in>

NEW QUESTION 83

- (Exam Topic 4)

You have the source files shown in the following table.

Source	Location
Custom Windows 10 image	D:\Folder1\Image1.wim
Windows 10 language pack DVD	E:\

You mount an image from Image1.wim to a folder named C:\Mount. You need to add the French language pack to the mounted image.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

<div><div>▼</div><div>Add-WindowsCapability</div><div>Add-WindowsFeature</div><div>Dism.exe</div><div>Setup.exe</div></div>	/Image:	<div><div>▼</div><div>"C:\Mount"</div><div>"C:\Mount\Windows"</div><div>"C:\Windows"</div><div>"D:\Folder1\Image1.wim"</div></div>	/Add-Package /PackagePath: "E:\x64\langpacks\Microsoft-Windows-Client-Language-Pack_x64_fr-fr.cab"
---	---------	--	--

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Note: The referenced document has the mount directory as C:\Mount\Windows. In this question, the mount directory is C:\Mount.

Reference:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-language-packs-to-windows>

NEW QUESTION 86

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. You deploy an application named Application1 to Computer1. You need to assign credentials to Application1.

You need to meet the following requirements:

- Ensure that the credentials for Application1 cannot be used by any user to log on to Computer1.
- Ensure that the principle of least privilege is maintained.

What should you do?

- A. Configure Application1 to sign in as the Local System account and select the Allow service to interact with desktop check box.
B. Create a user account for Application1 and assign that user account the Deny log on locally user right
C. Create a user account for Application1 and assign that user account the Deny log on as a service user right
D. Configure Application1 to sign in as the Local Service account and select the Allow service to interact with desktop check box.

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/deny-log-on-locall>

NEW QUESTION 88

- (Exam Topic 4)

You have a computer that runs Windows 10 and has File History enabled. File History is configured to save copies of files every 15 minutes.

At 07:55, you create a file named D:\Folder1\File1.docx.

You add D:\Folder1 to File History and manually run File History at 08:00. You modify File1.docx at the following times:

- 08:05
- 08:12
- 08:20
- 08:24
- 08:50

At 08:55, you attempt to restore File1.docx.

How many previous versions of File1.docx will be available to restore?

- A. 2
B. 3
C. 4

D. 5

Answer: C

NEW QUESTION 93

- (Exam Topic 4)

You have 100 computers that run Windows 10. The computers are in a workgroup. The computers have a low-bandwidth metered Internet connection. You need to reduce the amount of Internet bandwidth consumed to download updates. What should you configure?

- A. BranchCache in hosted mode
- B. BranchCache in distributed cache mode
- C. Delivery Optimization
- D. Background intelligent Transfer Service (BITS)

Answer: C

Explanation:

References:

<https://support.microsoft.com/en-us/help/4468254/windows-update-delivery-optimization-faq>

NEW QUESTION 98

- (Exam Topic 4)

A user has a computer that runs Windows 10.

When the user connects the computer to the corporate network, the user cannot access the internal corporate servers. The user can access servers on the Internet.

You run the ipconfig command and receive the following output.

```
Connection-specific DNS Suffix . . : 
Description . . . . . : Ethernet 1
Physical Address. . . . . : 00-50-B6-7B-E4-81
DHCP Enabled. . . . . : Yes
Autoconfiguration Enabled . . . . : Yes
Link-local IPv6 Address . . . . . : fe80::5d56:3419:e83b:3c46%17(Preferred)
IPv4 Address. . . . . : 192.168.0.121(Preferred)
Subnet Mask . . . . . : 255.255.255.0
Lease Obtained. . . . . : Wednesday, October 31, 2018 8:07:14 AM
Lease Expires . . . . . : Wednesday, October 31, 2018 8:07:14 PM
Default Gateway . . . . . : 192.168.0.1
DHCP Server . . . . . : 192.168.0.2
DHCPv6 IAID . . . . . : 536891574
DHCPv6 Client DUID. . . . . : 00-01-00-01-22-AC-5F-64-00-50-B6-7B-E4-81
DNS Servers . . . . . : 131.107.10.60
                        192.168.0.3
NetBIOS over Tcpip. . . . . : Enabled
```

You send a ping request and successfully ping the default gateway, the DNS servers, and the DHCP server. Which configuration on the computer causes the issue?

- A. the DNS servers
- B. the IPv4 address
- C. the subnet mask
- D. the default gateway address

Answer: A

NEW QUESTION 102

- (Exam Topic 4)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented on the graphic.

```

joined to an on-premises Active Directory domain

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Microsoft Edge is configured by using [answer choice].

a Group Policy object (GPO)
Microsoft Intune
the Internet Explorer Administration (IEAK)

The computer is [answer choice].

enrolled in Microsoft Intune
managed by using Microsoft System Center Configuration Manager
joined to an on-premises Active Directory domain

A user purchases a new computer that has Windows 10 Home preinstalled. The computer has a biometric fingerprint reader. You need to ensure that the user can use the fingerprint reader to sign in to the computer by using an Azure Active Directory (Azure AD) account. What should you do first?

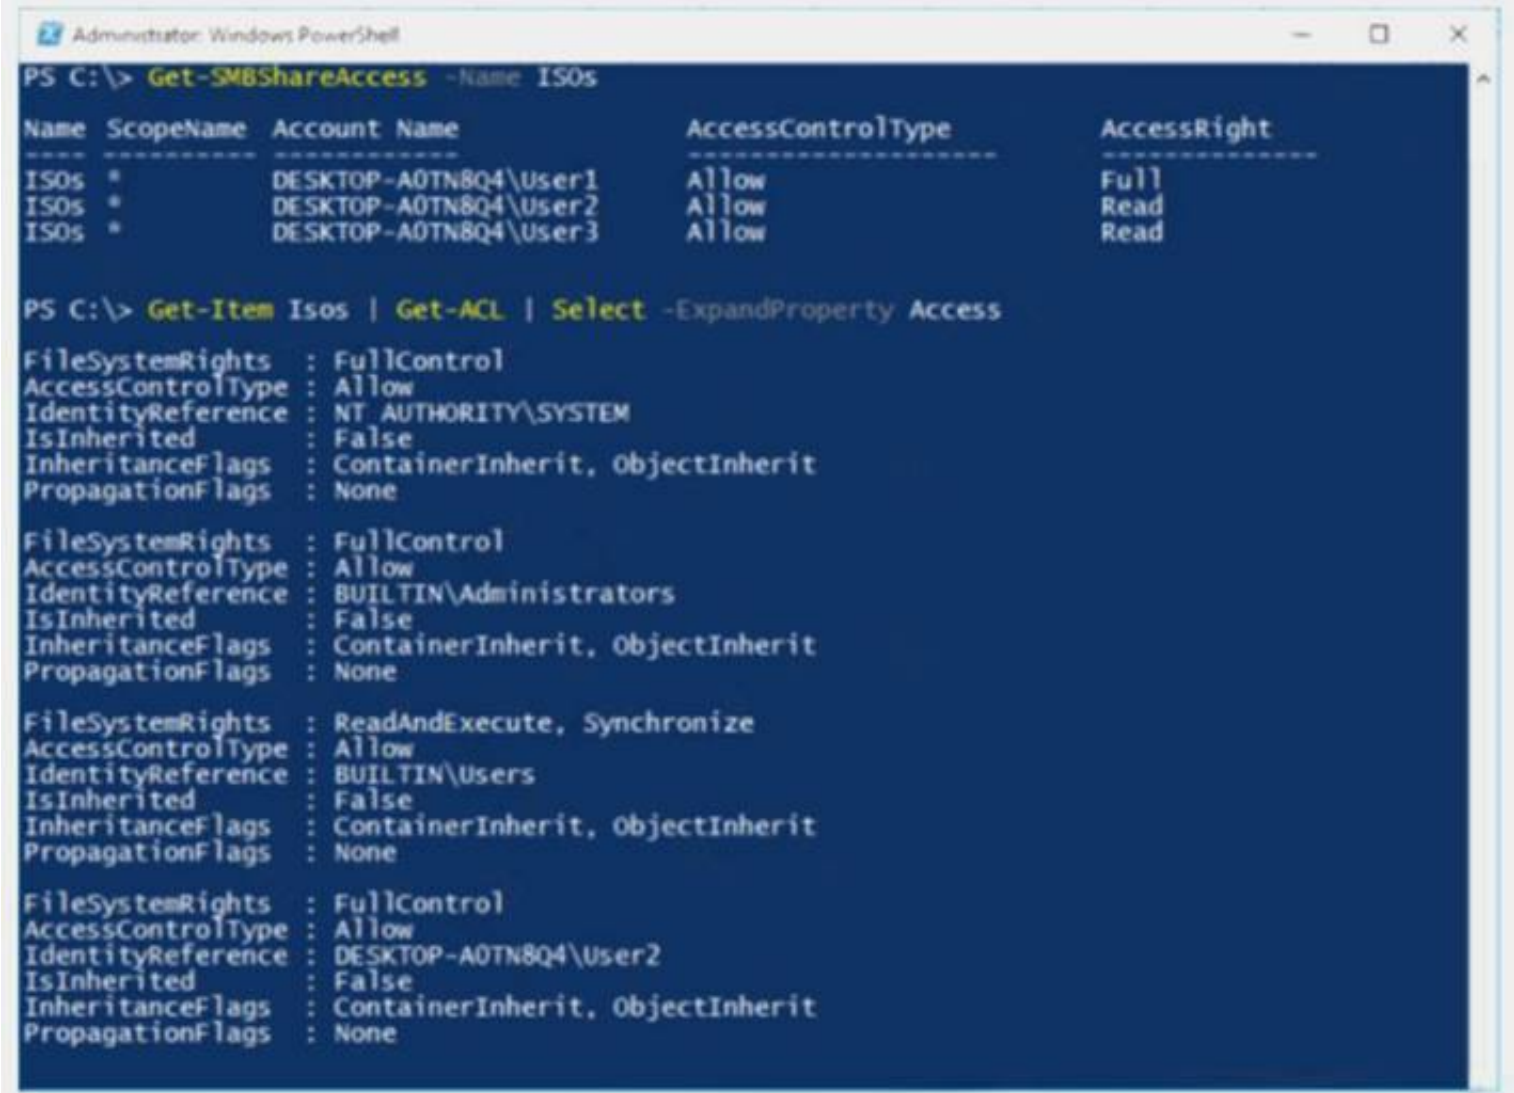

- A. Register the computer to Azure AD.
- B. Install the latest feature updates on the computer.
- C. Upgrade the computer to Windows 10 Enterprise.
- D. Upgrade the computer to Windows 10 Pro.

Answer: D

NEW QUESTION 111

- (Exam Topic 4)

You have a computer that runs Windows 10. The computer contains a folder named C:\ISOs that is shared in ISOs. You run several commands on the computer as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

[answer choice] can delete files in the ISOs share.

None of the users
Only User1
Only User2
Only User3
Only User1 and User2
Only User1 and User3
Only User2 and User3
User1, User2, and User3

[answer choice] can read the files in the ISOs share.

None of the users
Only User1
Only User2
Only User3
Only User1 and User2
Only User1 and User3
Only User2 and User3
User1, User2, and User3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

[answer choice] can delete files in the ISOs share.

▼
None of the users
Only User1
Only User2
Only User3
Only User1 and User2
Only User1 and User3
Only User2 and User3
User1, User2, and User3

[answer choice] can read the files in the ISOs share.

▼
None of the users
Only User1
Only User2
Only User3
Only User1 and User2
Only User1 and User3
Only User2 and User3
User1, User2, and User3

NEW QUESTION 113

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10. The computer contains a folder. The folder contains sensitive data.

You need to log which user reads the contents of the folder and modifies and deletes files in the folder. Solution: From the properties of the folder, you configure the Auditing settings and from the Audit Policy in

the local Group Policy, you configure Audit directory service access.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:

https://www.netwrix.com/how_to_detect_who_changed_file_or_folder_owner.html

NEW QUESTION 117

- (Exam Topic 4)

You have a computer that runs Windows 10. You use the computer to test new Windows features. You need to configure the computer to receive preview builds of Windows 10 as soon as possible. What should you configure from Update & Security in the Settings app?

- A. Windows Insider Program
- B. Windows Update
- C. Delivery Optimization
- D. For developer

Answer: A

Explanation:

Reference:

<https://insider.windows.com/en-us/getting-started/>

NEW QUESTION 119

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. You need to provide a user with the ability to remotely create and modify shares on the computers. The solution must use the principle of least privilege.

To which group should you add the user?

- A. Power Users
- B. Remote Management Users
- C. Administrators
- D. Network Configuration Operators

Answer: C

NEW QUESTION 120

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to a Microsoft Azure Active Directory (Azure AD) tenant.

Your company purchases a Microsoft 365 subscription.

You need to migrate the Documents folder of users to Microsoft OneDrive for Business. What should you configure?

- A. One Drive Group Policy settings
- B. roaming user profiles
- C. Enterprise State Roaming
- D. Folder Redirection Group Policy settings

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/onedrive/redirect-known-folders?redirectSourcePath=%252fen-us%252farticle%252fredirect-windows-known-folders-to-onedrive-e1b3963c-7c6c-4694-9f2f-fb8005d9ef12>

NEW QUESTION 124

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live

environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

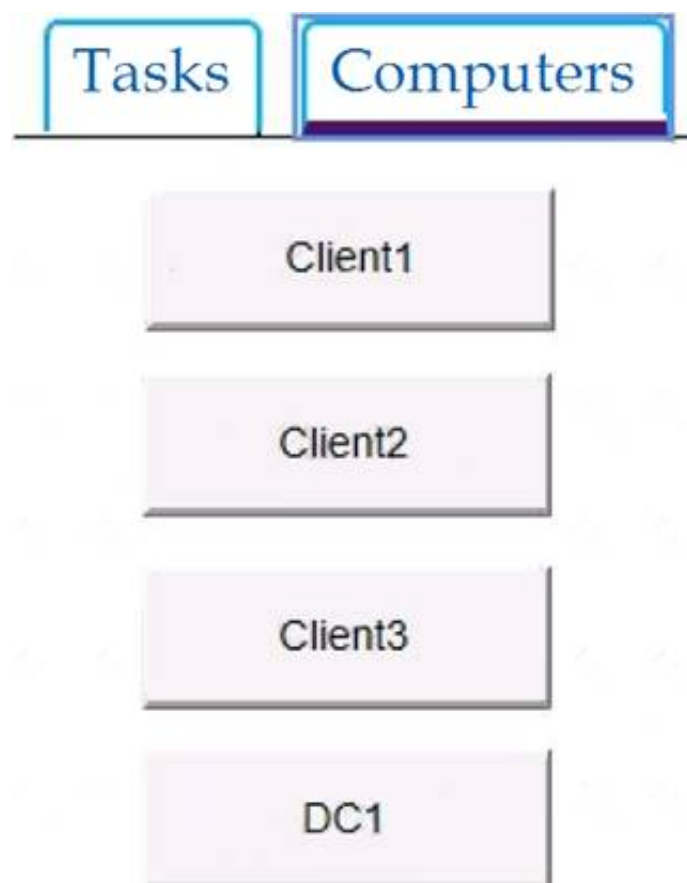

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

The following information is for technical support purposes only:

Lab Instance: 10921597

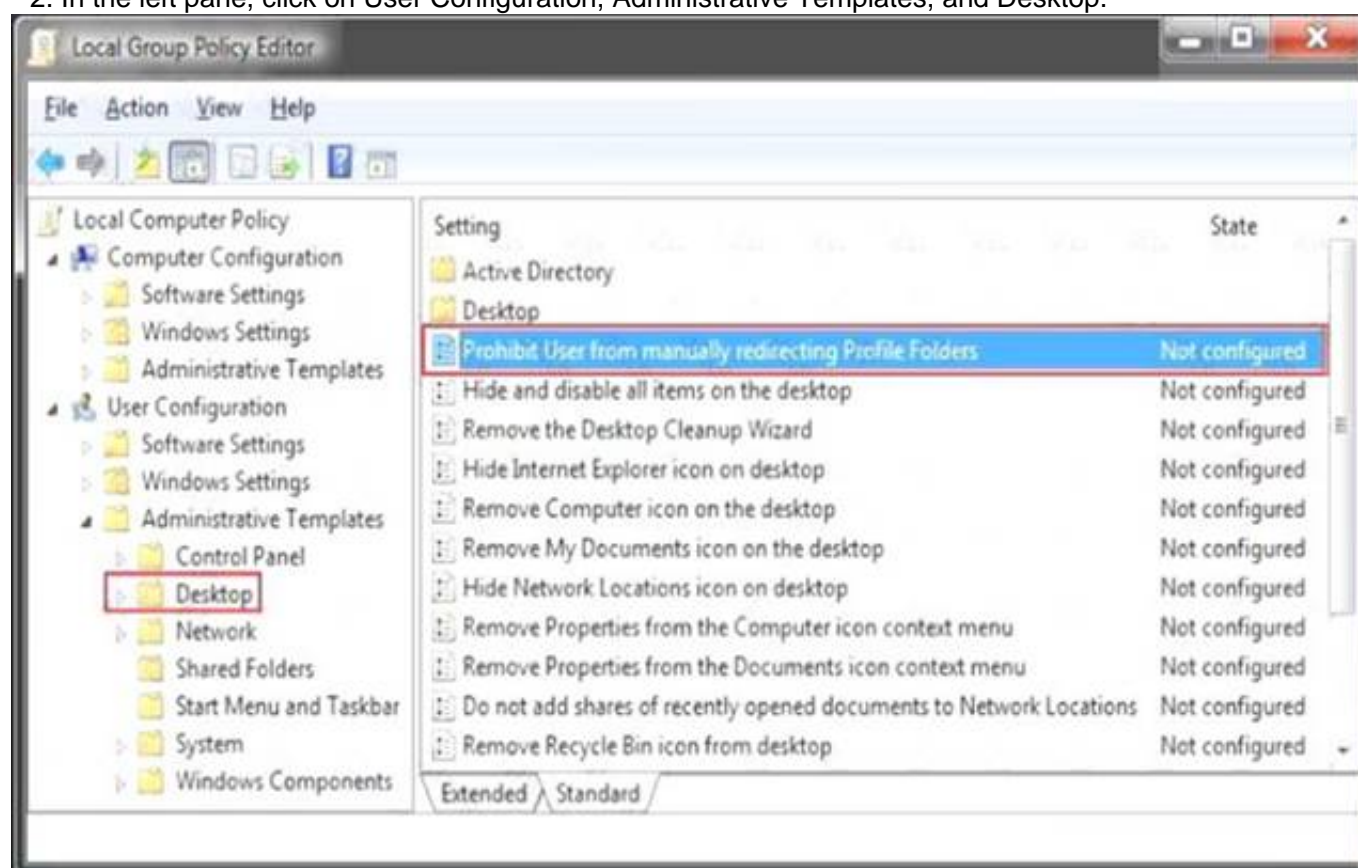

You need to enable the Prohibit User from manually redirecting Profile Folders Group Policy setting only for the administrative users of Client3. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

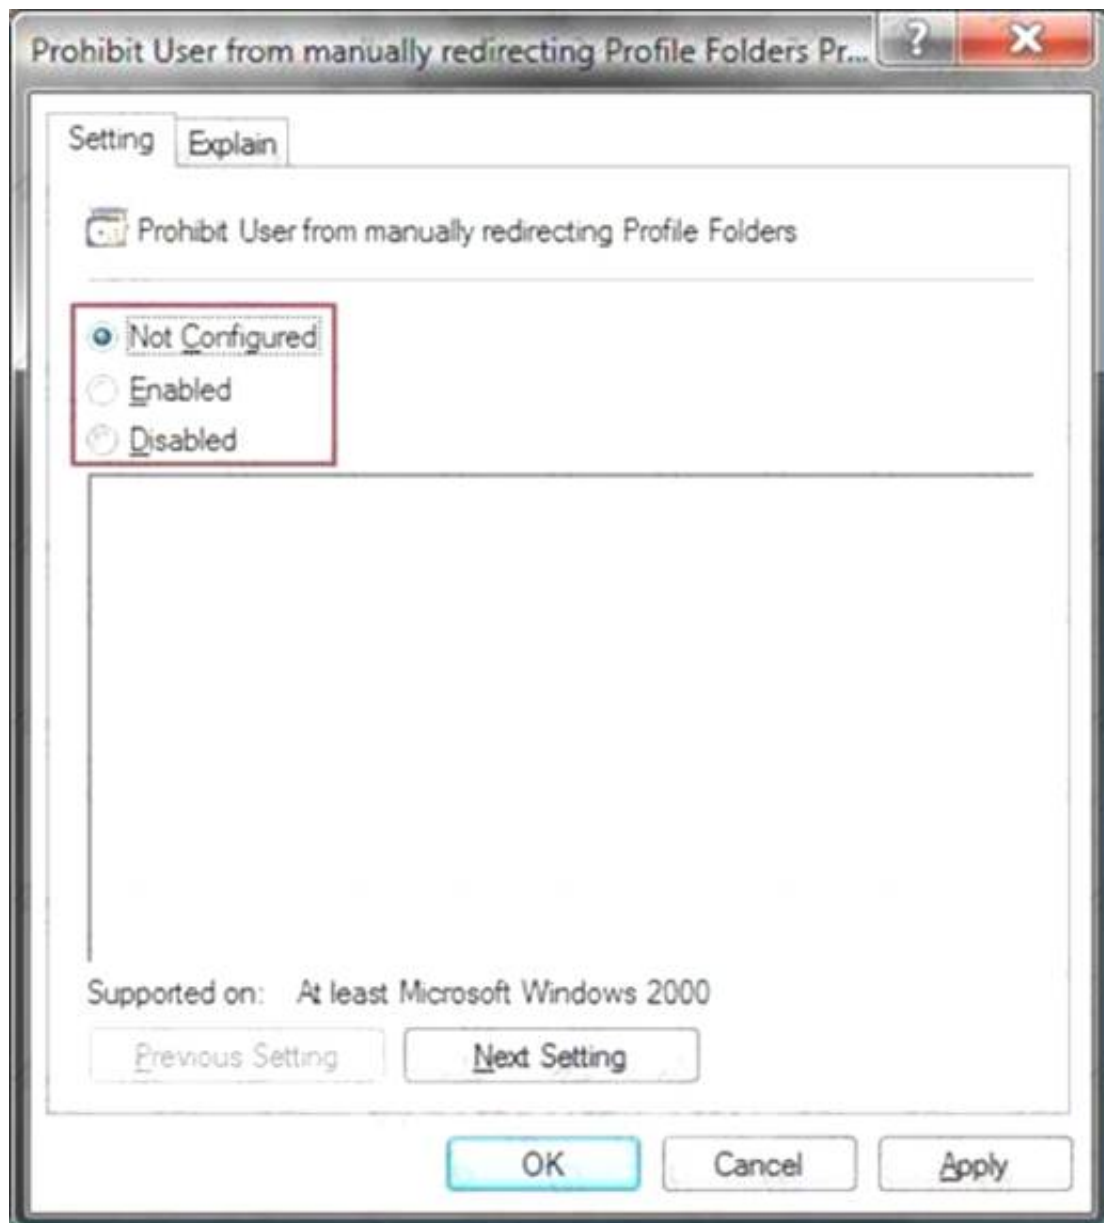

Answer: A

Explanation:

- * 1. Open the Administrator Group Local Group Policy Editor.
- * 2. In the left pane, click on User Configuration, Administrative Templates, and Desktop.

- * 3. In the right pane, right click on Prohibit User from Manually redirecting Profile Folders and click on Properties.
- * 4. To Prevent User Profile Folders Location Change Select (dot) Enabled and click on OK.

* 5. Close the Local Group Policy Editor window. References:
<https://www.vistax64.com/threads/user-profile-folders-prevent-or-allow-location-change.180719/>

NEW QUESTION 127

- (Exam Topic 3)

You need to ensure that you can manage Computer2 by using Windows Admin Center on Server1. What should you do on Computer2?

- A. Install the Remote Server Administration Tool (RSAT) optional features.
- B. Run the winrm quickconfig command.
- C. Set the Windows Management Service Startup type to Automatic and start the service.
- D. Run the Sec-Location cmdlet.

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-server/manage/windows-admin-center/azure/manage-azure-vms>

NEW QUESTION 132

- (Exam Topic 3)

Which users can sign in to Computer3 when the computer starts in Safe Mode?

- A. User31 only
- B. User31 and User32 only
- C. User31 and Admin1 only
- D. User31, User 32, User33, and Admin1
- E. User31, User32, and User33 only

Answer: A

Explanation:

Only users with membership of the local Administrators group can log on to a computer in safe mode. Admin1 cannot log in because Computer3 is not joined to the domain.

References:

<https://support.microsoft.com/en-us/windows/advanced-startup-options-including-safe-mode-b90e7808-80b5-a2>

NEW QUESTION 134

- (Exam Topic 3)

You need to configure Delivery Optimization to meet the technical requirements. Which download mode should you use?

- A. Simple (99)
- B. Group (2)
- C. Internet (3)

- D. HTTP Only (0)
- E. Bypass (100)

Answer: D

Explanation:

Reference:
<https://docs.microsoft.com/en-us/windows/deployment/update/waas-delivery-optimization-reference#download>

NEW QUESTION 136

- (Exam Topic 3)
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE Each correct selection is worth one point.

Answer Area

Statements	Yes	No
When User1 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input type="radio"/>
When User1 attempts to save changes to D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input type="radio"/>
When User2 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
When User1 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input checked="" type="radio"/>	<input type="radio"/>
When User1 attempts to save changes to D:\Folder1\Report.docx, an event is created in the security event log.	<input checked="" type="radio"/>	<input type="radio"/>
When User2 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 141

- (Exam Topic 3)
On Computer1, you need to configure the custom Visual Effects performance settings. Which user accounts can you use?

- A. Admm1,User11, and User13 only
- B. Admin1 only
- C. Admin1, User11, and User12 only
- D. Admin1, User11, User12, and User13
- E. Admin1 and User11 only

Answer: D

NEW QUESTION 142

- (Exam Topic 3)
You implement the planned changes for Computer1.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>
User2 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>
User3 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated with low confidence

Box 1: Yes

User1 already has full control access through membership of Group1. Therefore, User1 can write to the file. Box 2: No

The planned changes will grant User2 full control access to the file. However, User2 is a member of Group2 which has Deny/Write access. The Deny permission will always take precedence. Therefore, User2 will not be able to write to the file.

Box 3: No

The planned changes will grant User3 full control access to the folder. That permission will be inherited by the file. However, User3 is a member of Group2 which has Deny/Write access. The Deny permission will always take precedence. Therefore, User3 will not be able to write to the file.

NEW QUESTION 144

- (Exam Topic 2)

You need to meet the technical requirement for Computer1.

What should you do? To answer, select the appropriate options in the answer area.

Answer Area

User who should configure Kiosk (assigned access):

	▼
User1	
User2	
User3	
User11	
User12	

Configure Kiosk (assigned access) for:

	▼
User4	
User5	
User12	
User13	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

User who should configure Kiosk (assigned access):

	▼
User1	
User2	
User3	
User11	
User12	

Configure Kiosk (assigned access) for:

	▼
User4	
User5	
User12	
User13	

NEW QUESTION 148

- (Exam Topic 2)

You need to meet the technical requirement for the IT department users. What should you do first?

- A. Issue computer certificates
- B. Distribute USB keys to the IT department users.
- C. Enable screen saver and configure a timeout.
- D. Turn on Bluetooth.

Answer: D

Explanation:

References:

<https://support.microsoft.com/en-za/help/4028111/windows-lock-your-windows-10-pc-automatically-when-you>

NEW QUESTION 152

- (Exam Topic 2)

You need to meet the technical requirements for EFS on ComputerA. What should you do?

- A. Run certutil.exe, and then add a certificate to the local computer certificate store.
- B. Run cipher.exe, and then add a certificate to the local computer certificate store.
- C. Run cipher.exe, and then add a certificate to the local Group Policy.
- D. Run certutil.exe, and then add a certificate to the local Group Policy.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/crea>

NEW QUESTION 155

- (Exam Topic 1)

You need to sign in as LocalAdmin on Computer11. What should you do first?

- A. From the LAPS UI tool, view the administrator account password for the computer object of Computer11.
- B. From Local Security Policy, edit the policy password settings on Computer11.
- C. From the LAPS UI tool, reset the administrator account password for the computer object of Computer11.
- D. From Microsoft Intune, edit the policy password settings on Computer11.

Answer: A

Explanation:

References:

<https://technet.microsoft.com/en-us/mt227395.aspx>

NEW QUESTION 157

- (Exam Topic 1)

You need to implement a solution to configure the contractors' computers.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Tool to use:

▼
Microsoft Deployment Toolkit (MDT)
Windows AutoPilot
Windows Configuration Designer
Windows Deployment Services (WDS)

File type to create:

▼
CAB
PPKG
WIM
XML

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-install-icd>

NEW QUESTION 159

- (Exam Topic 1)

You need to take remote control of an employee's computer to troubleshoot an issue. What should you send to the employee to initiate a remote session?

- A. a numeric security code
- B. a connection file
- C. an Easy Connect request
- D. a password

Answer: A

Explanation:

References:

<https://support.microsoft.com/en-us/help/4027243/windows-10-solve-pc-problems-with-quick-assist>

NEW QUESTION 162

- (Exam Topic 1)

You need to recommend a solution to monitor update deployments. What should you include in the recommendation?

- A. Windows Server Update (WSUS)
- B. the Update Management solution in Azure Automation
- C. the Update Compliance solution in Azure Log Analytics
- D. the Azure Security Center

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/update-compliance-monitor>

NEW QUESTION 163

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. Computer1 is experiencing connectivity issues.

You need to view the IP addresses of any remote computer that Computer1 has an active TCP connection to. Should you do?

- A. In Windows Administrative Tools, open Performance Monitor
- B. In the Control Panel, open Network and Internet Then select Network and Sharing Center
- C. In Windows Administrative Tools, open Resource Monitor
- D. In the Setting ap
- E. open Update and Security Then open Windows Security and select Firewall and Network protection

Answer: C

NEW QUESTION 164

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10.

You configure Microsoft Edge settings by using domain and local Group Policy Objects (GPOs).

You need to generate a report that contains all the Microsoft Edge policy settings applied to a computer. What should you do?

- A. From PowerShell
- B. run the Gec-GPO cmdlet.
- C. From PowerShell
- D. run the Gec-GPOReport cmdlet.
- E. From Microsoft Edge, open edge://policy.
- F. From Microsoft Edge, open edge://settings.

Answer: C

Explanation:

The Get-GPOReport cmdlet would generate a report for all domain group policy objects. However, this would not display the settings that are applied by local group policy objects.

To display the settings applied by both domain and local GPOs, you would have to open Microsoft Edge and enter edge://policy in the address bar.

NEW QUESTION 168

- (Exam Topic 4)

A user named User1 has a computer named Computer1 that runs Windows 10.

User1 connects to a Microsoft Azure virtual machine named VM1 by using Remote Desktop. User1 creates a VPN connection to a partner organization.

When the VPN connection is established, User1 cannot connect to VM1. When User1 disconnects from the VPN, the user can connect to VM1.

You need to ensure that User1 can connect to VM1 while connected to the VPN. What should you do?

- A. From the proxy settings, add the IP address of VM1 to the bypass list to bypass the proxy.
- B. From the properties of VPN1, clear the Use default gateway on remote network check box.
- C. From the properties of the Remote Desktop connection to VM1, specify a Remote Desktop Gateway (RDGateway).
- D. From the properties of VPN1, configure a static default gateway address.

Answer: B

Explanation:

References:

<https://www.stevejenkins.com/blog/2010/01/using-the-local-default-gateway-with-a-windows-vpn-connection/>

NEW QUESTION 170

- (Exam Topic 4)

You have a computer that runs Windows 10 and has BitLocker Drive Encryption (BitLocker) enabled on all volumes.

You start the computer from Windows Recovery Environment (WinRE). You need to read the data on the system drive.

What should you do?

- A. Run cipher.exe and specify the /rekey parameter
- B. Run cipher.exe and specify the /adduser parameter
- C. Run manage-bde.exe and specify the -off parameter
- D. Run manage-bde.exe and specify the -unlock parameter

Answer: D

Explanation:

<https://www.repairwin.com/how-to-disable-bitlocker-in-windows-recovery-environment-winre/>

NEW QUESTION 171

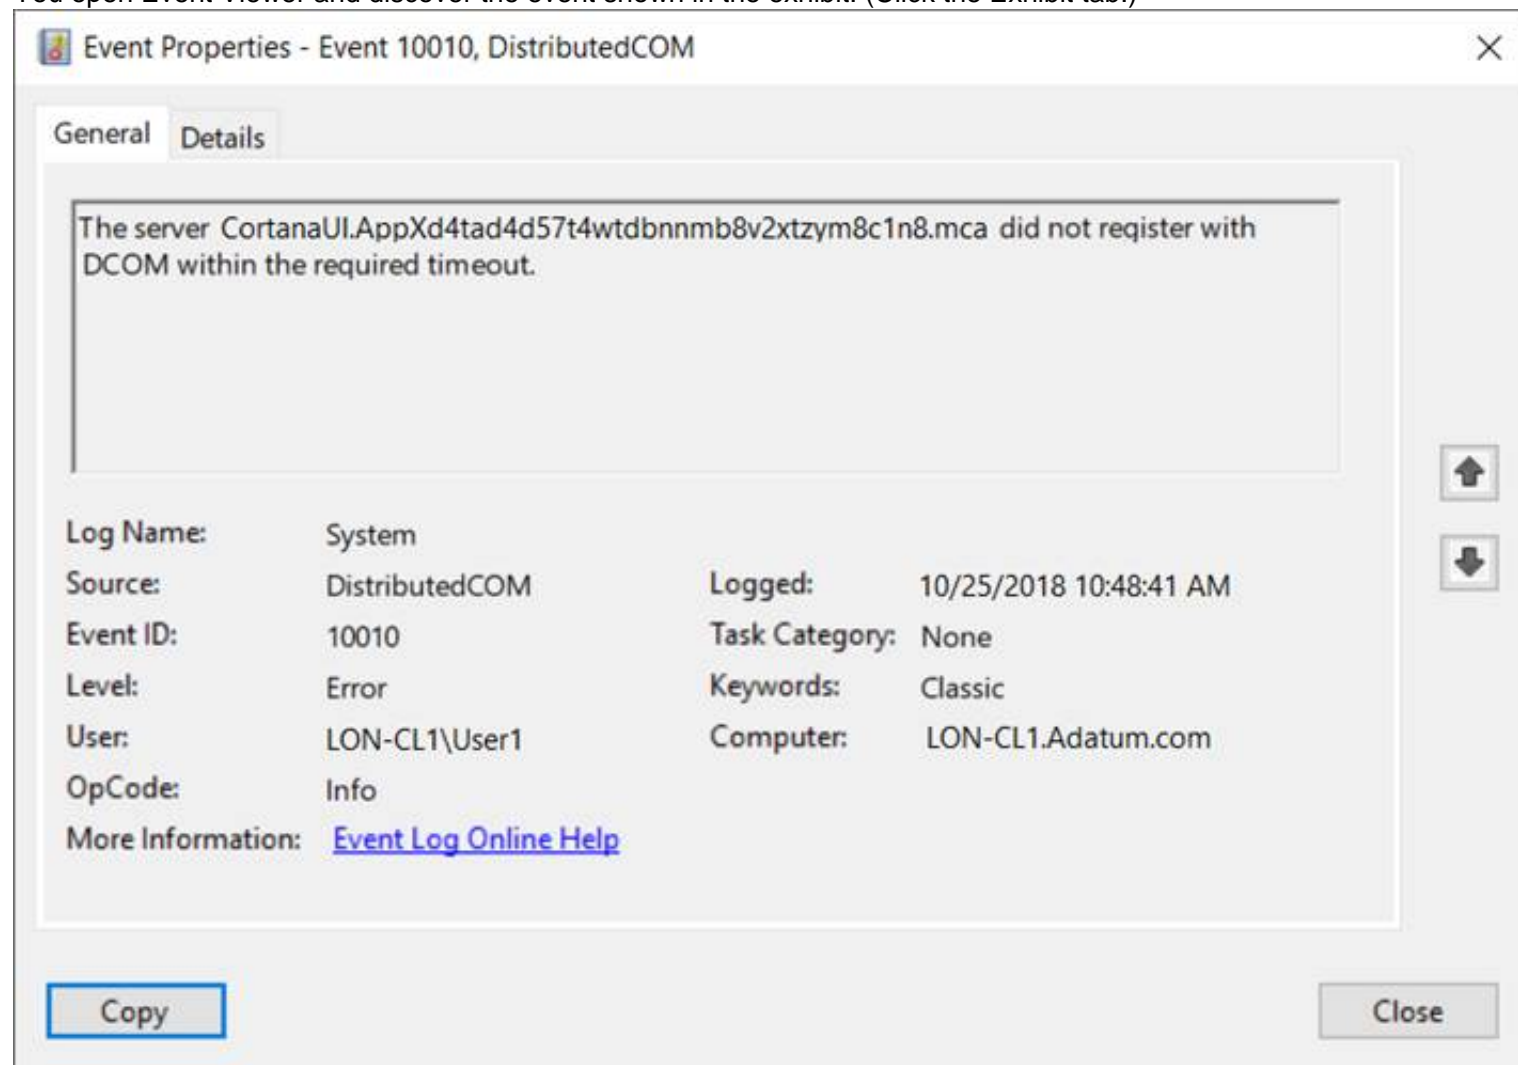

- (Exam Topic 4)

You have a computer named LON-CL1.Adatum.com that runs Windows 10.

From Event Viewer, you create a custom view named View1 that has the following filter:

- > User: User1
- > Logged: Any time
- > Event logs: System
- > Computer: LON-CL1
- > Event IDs: 10000 – 11000
- > Event level: Error, Verbose

You open Event Viewer and discover the event shown in the exhibit. (Click the Exhibit tab.)

The event does not appear in View1.

You need to ensure that the event appears in View1. What should you do?

- A. Add a Task Category setting to the filter.
- B. Add the computer account to the Event Log Readers group.
- C. Create an event subscription.
- D. Modify the Computer setting in the filter.

Answer: A

Explanation:

References:

<https://www.techrepublic.com/article/how-to-use-custom-views-in-windows-10s-event-viewer/>

NEW QUESTION 174

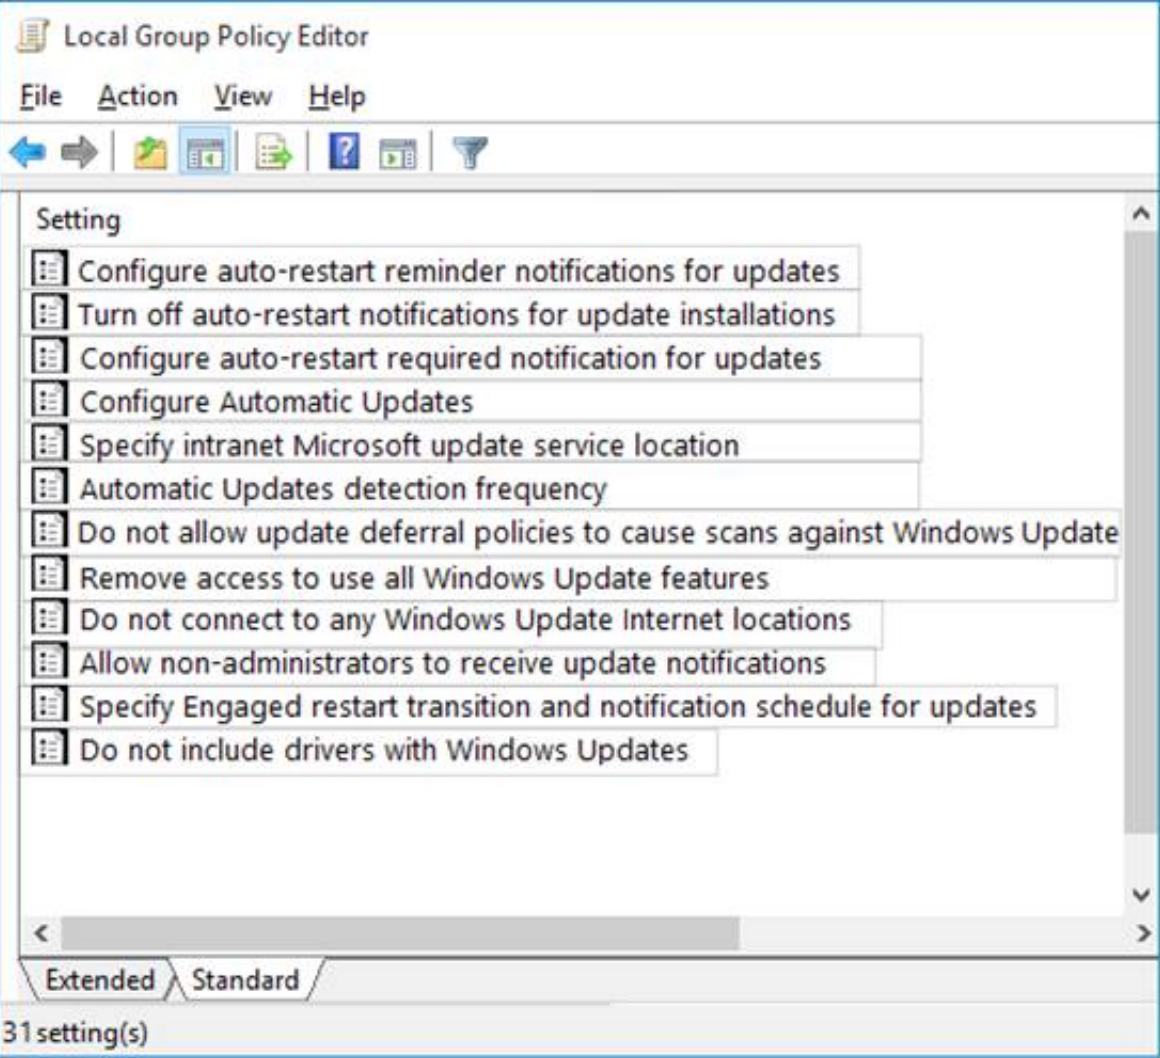

- (Exam Topic 4)

You have 10 computers that run Windows 10.

You have a Windows Server Update Services (WSUS) server.

You need to configure the computers to install updates from WSUS.

Which two settings should you configure? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

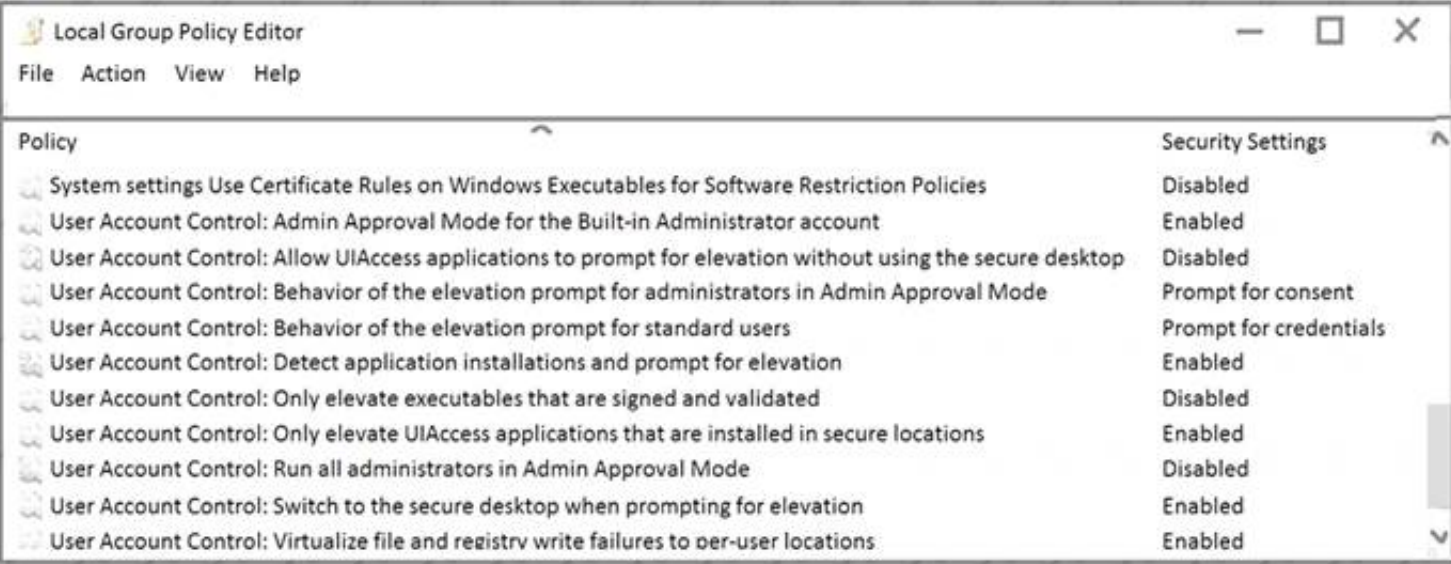

References:
<https://docs.microsoft.com/en-us/windows/deployment/update/waas-manage-updates-wsus#configure-automatic>

NEW QUESTION 177

- (Exam Topic 4)
 You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users

User Account Control (UAC) on Computer1 is configured as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
When Administrator opens a command prompt by using the Run as administrator option, the user will be prompted for consent.	<input type="radio"/>	<input type="radio"/>
When User1 opens a command prompt by using the Run as administrator option, the user will be prompted for consent.	<input type="radio"/>	<input type="radio"/>
When User2 opens a command prompt by using the Run as administrator option, the user will be prompted for credentials.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode is set to Prompt for consent When an operation requires elevation of privilege, the user is prompted to select either Permit or Deny. If the user selects Permit, the operation continues with the user's highest available privilege.

Box 2: Yes

User1 is a member of Administrators group.

User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode is set to Prompt for consent When an operation requires elevation of privilege, the user is prompted to select either Permit or Deny. If the user selects Permit, the operation continues with the user's highest available privilege.

Box 3: Yes

User Account Control: Behavior of the elevation prompt for standard users is set to Prompt for credentials (Default) When an operation requires elevation of privilege, the user is prompted to enter an administrative user name and password. If the user enters valid credentials, the operation continues with the applicable privilege.

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/user-account-control/user-account-control>

NEW QUESTION 180

- (Exam Topic 4)

You install Windows 10 Pro on a computer named CLIENT1.

You need to ensure that all per-user services are disabled on CLIENT1. The solution must minimize administrative effort.

What should you use?

- A. a Group Policy administrative template
 B. Device Manager
 C. Task Manager
 D. Group Policy preferences

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/application-management/per-user-services-in-windows>

NEW QUESTION 183

- (Exam Topic 4)

Your network contains an Active Directory domain named Contoso.com.

A user named User1 has a personal computer named Computer that runs Windows 10 Pro. User1 has a VPN connection to the corporate network.

You need to ensure that when User1 connection to the corporate network.

You need to ensure that when user1 connects to the VPN, network traffic uses a proxy located in the corporate network. The solution must ensure that User1 can access the internet when disconnected from the VPN.

What should you do?

- A. From the Settings app, modify the properties of the VPN connection.
 B. From the Setting app, modify proxy settings for the local computer.
 C. From Control panel, modify the properties of the VPN connection
 D. From Control Panel, modify the Windows Defender Firewall settings

Answer: A

NEW QUESTION 188

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1. Solution: On Computer1, you turn off Windows Defender Firewall-Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 193

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10. The domain contains the users shown in the following table.

Name	Member of
User1	Domain Users
User2	Domain Users, Guests
User3	Domain Users, Administrators

Computer has the local users shown in the following table.

Name	Member of
User4	Users
User5	Administrators

All users have Microsoft accounts.

Which two user can be configured to sign in by using their Microsoft account? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. User 1
- B. User 2
- C. User 3
- D. User 4
- E. User 5

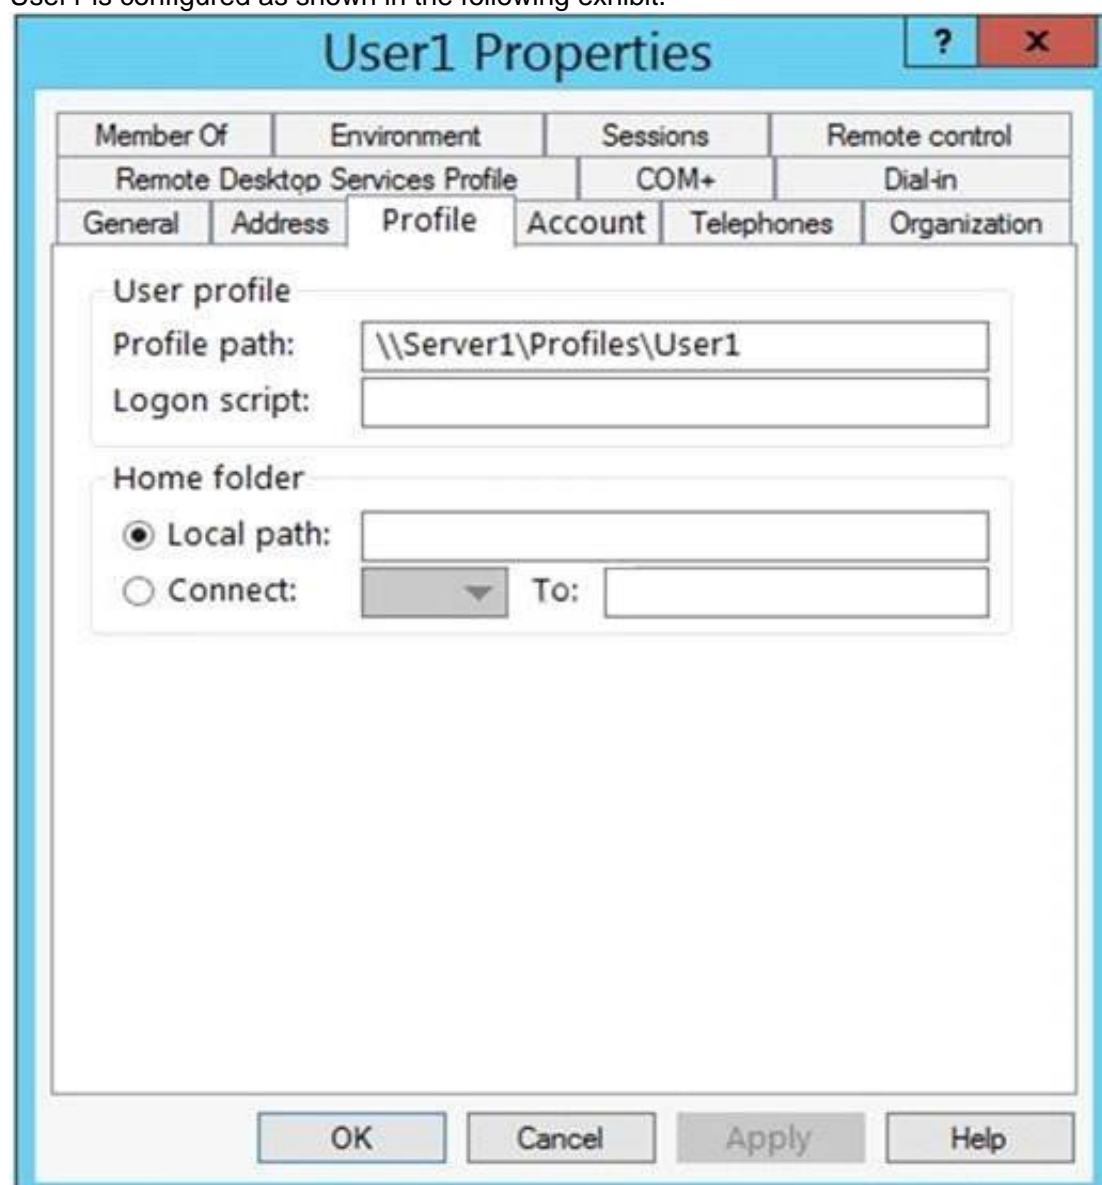

Answer: CE

NEW QUESTION 197

- (Exam Topic 4)

Your network contains an on-premises Active Directory forest named contoso.com. The forest contains a user named User1 and two computers named Computer1 and Computer2 that run Windows 10.

User1 is configured as shown in the following exhibit.

The screenshot shows the 'User1 Properties' dialog box with the 'Profile' tab selected. The 'User profile' section shows 'Profile path' as '\\Server1\Profiles\User1' and 'Logon script' as empty. The 'Home folder' section shows 'Local path' selected with an empty text box, and 'Connect' with a dropdown arrow and 'To:' followed by an empty text box. At the bottom are 'OK', 'Cancel', 'Apply', and 'Help' buttons.

You rename file \\Server1\Profiles\User1.V6\NTUSER.DAT as NTUSER.MAN.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
On Computer1, if User1 adds a shortcut to the desktop, the shortcut will appear when the user signs in to Computer2.	<input type="radio"/>	<input type="radio"/>
On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing back in to Computer1.	<input type="radio"/>	<input type="radio"/>
On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing in to Computer2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
On Computer1, if User1 adds a shortcut to the desktop, the shortcut will appear when the user signs in to Computer2.	<input type="radio"/>	<input checked="" type="radio"/>
On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing back in to Computer1.	<input checked="" type="radio"/>	<input type="radio"/>
On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing in to Computer2.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 202

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a group named Group1.

All the computers in the domain run Windows 10. Each computer contains a folder named C:\Documents that has the default NTFS permissions set.

You add a folder named C:\Documents\Templates to each computer.

_ You need to configure the NTFS permissions to meet the following requirements: All domain users must be able to open the files in the Templates folder.

_ Only the members of Group1 must be allowed to edit the files in the Templates folder.

How should you configure the NTFS settings on the Templates folder? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Inheritance:

▼

Enable inheritance.

Disable inheritance and remove permissions.

Disable inheritance and copy explicit permissions.

Permissions for domain users:

▼

Allow Read&Execute

Deny Read&Execute

Allow Modify

Deny Modify

Permissions for Group1:

▼

Allow Read&Execute

Deny Read&Execute

Allow Modify

Deny Modify

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Inheritance: ▼

Enable inheritance.
Disable inheritance and remove permissions.
Disable inheritance and copy explicit permissions.

Permissions for domain users: ▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify

Permissions for Group1: ▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify

NEW QUESTION 207

- (Exam Topic 4)

You have a computer that runs Windows 10 Home.

You need to upgrade the computer to Windows 10 Enterprise as quickly as possible. The solution must retain the user settings.

What should you do first?

- A. Run the scansca command.
- B. Perform an in-place upgrade to Windows Pro.
- C. Install the latest feature updates.
- D. Run the sysprep command.

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-upgrade-paths>

NEW QUESTION 212

- (Exam Topic 4)

You have a computer that runs Windows 10. You need to configure a picture password.

What should you do? D18912E1457D5D1DDCBD40AB3BF70D5D

- A. From Control Panel, configure the User Accounts settings.
- B. From the Settings app, configure the Sign-in options.
- C. From the Local Group Policy Editor, configure the Account Policies settings.
- D. From Windows PowerShell, run the Set-LocalUser cmdlet and specify the InputObject parameter.

Answer: B

NEW QUESTION 213

- (Exam Topic 4)

You have Windows 10 devices that use custom device drivers.

You need to test new builds of Windows before the builds are made available to the general public. The solution must ensure that the builds are installed as soon as possible.

Which Windows readiness level should you configure?

- A. Preview Build - Slow
- B. Semi-Annual Channel
- C. Release Preview
- D. Preview Build - Fast

Answer: D

NEW QUESTION 216

- (Exam Topic 4)

You have a Windows 10 device named Device1.

You plan purchase a wireless display device that will stream audio and video from Device1. Which wireless feature or protocol should the display device support?

- A. Wi-Fi sense
- B. Miracast
- C. near field communications (NFC)

D. Bluetooth

Answer: B

NEW QUESTION 218

- (Exam Topic 4)

You have two workgroup computers named Computer1 and Computer2 that run Windows 10. The computers contain the local security principals shown in the following table.

Name	Type	Computer
User1	User	Computer1
GroupA	Group	Computer1
GroupB	Group	Computer1
User2	User	Computer2
GroupC	Group	Computer2

Which security principals can be members of GroupA and GroupC? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

GroupA:

User1 only

User1 and User2 only

User1 and GroupB only

User1, User2, GroupB, and GroupC

GroupC:

User2 only

User1 and User2 only

User1, User2, GroupA, and GroupB

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated

NEW QUESTION 222

- (Exam Topic 4)

You need to Windows 10 to 20 new laptops.

The laptops will be recommend a solution to lock the laptop when the users leave their laptop for an extended period.

Which two actions should you include in the recommendation? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From the settings app, configure the Dynamic lock settings.
- B. From the Settings app, configure the lock screen settings.
- C. Enable Bluetooth discovery.
- D. From the Settings app, configure the Screen timeout settings
- E. Pair the Android device the laptop.
- F. From Sign-in option, configure the Windows hello settings.

Answer: BE

Explanation:

<https://support.microsoft.com/en-us/help/4028111/windows-lock-your-windows-10-pc-automatically-when-you->

NEW QUESTION 223

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) deployment share named Share1. You add Windows 10 images to Share1 as shown in the following table.

Name	In WIM file	Description
Image1	Install1.wim	Default Windows 10 Pro image from the Windows 10 installation media
Image2	Install1.wim	Default Windows 10 Enterprise image from the Windows 10 installation media
Image3	Install2.wim	Default Windows 10 Pro for Workstations image from the Windows 10 installation media
Image4	Custom1.wim	Custom Windows 10 Enterprise image without any additional applications
Image5	Custom2.wim	Custom Windows 10 Enterprise image that includes custom applications

Which images can be used in the Standard Client Task Sequence, and which images can be used in the Standard Client Upgrade Task Sequence?
 Answer Area

Standard Client Task Sequence:

Image3 only
 Image3, Image4, and Image5 only
 Image1, Image2, and Image3 only
 Image1, Image2, Image3, and Image4 only
 Image1, Image2, Image3, Image4, and Image5

Standard Client Upgrade Task Sequence:

Image3 only
 Image3, Image4, and Image5 only
 Image1, Image2, and Image3 only
 Image1, Image2, Image3, and Image4 only
 Image1, Image2, Image3, Image4, and Image5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Standard Client Task Sequence:

Image3 only
 Image3, Image4, and Image5 only

Image1, Image2, and Image3 only

 Image1, Image2, Image3, and Image4 only
 Image1, Image2, Image3, Image4, and Image5

Standard Client Upgrade Task Sequence:

Image3 only
 Image3, Image4, and Image5 only
 Image1, Image2, and Image3 only
 Image1, Image2, Image3, and Image4 only

Image1, Image2, Image3, Image4, and Image5

NEW QUESTION 225

- (Exam Topic 4)
 You have a workgroup computer that runs Windows 10.
 You need to set the minimum password length to 12 characters. What should you use?

- A. Local Group Policy Editor
- B. User Accounts in Control Panel
- C. System Protection in System Properties
- D. Sign-in options in the Settings app

Answer: A

NEW QUESTION 230

- (Exam Topic 4)
 You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Administrators
User2	Power Users, Users
User3	Backup Operators, Users
User4	Users

You plan to add a key named Key1 to the following three registry branches:

- HKEY_CURRENT_CONFIG\Software
- HKEY_LOCAL_MACHINES\Software
- HKEY_CURRENT_USER\Software

You need to identify which users can add Key1.

What user or users should you identify for each branch? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

HKEY_CURRENT_CONFIG\Software:

User1 only

User1 and User2 only

User1 and User3 only

User1, User2, User3, and User4

HKEY_LOCAL_MACHINE\Software:

User1 only

User1 and User2 only

User1 and User3 only

User1, User2, User3, and User4

HKEY_CURRENT_USER\Software:

User1 only

User1 and User2 only

User1 and User3 only

User1, User2, User3, and User4

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1 and Box 2.

These are system-wide registry keys so only Administrators can modify them. Box 3.

This key affects only the logged in user. Therefore, any user can modify this key.

NEW QUESTION 233

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named UserA.

You have two computers named Computer1 and Computer2 that run Windows 10 and are joined to contoso.com.

You need to ensure that UserA can connect to Computer2 from Computer1 by using Remote Desktop. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. On Computer1, modify the registry.
- B. On Computer2, modify the registry.
- C. On Computer1, modify the properties of UserA.
- D. On Computer1, enable Remote Desktop.
- E. On Computer2, modify the properties of UserA.
- F. On Computer 2, enable Remote Desktop.
- G. On Computer2, add the Everyone group to the Remote Desktop Users group.
- H. On Computer1, add the Everyone group to the Remote Desktop Users group.

Answer: EFG

Explanation:

NEW QUESTION 236

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 contains five local user accounts.

You need to ensure that all users who sign in to Computer1 see a picture named Image1.jpg as the desktop background.

What should you do?

- A. From the Settings app
- B. modify the Background settings.
- C. From the Local Group Policy Editor, modify the Desktop settings.
- D. Rename Image1.jpg as Desktop.jpg and copy the picture to the C:\Windows\system32\folder.
- E. Rename Image1.jpg as Desktop.jpg and copy the picture to the C:\Users\Default\Desktop\folder.

Answer: B

Explanation:

References:

<https://www.top-password.com/blog/set-a-default-background-wallpaper-for-windows-10-desktop/>

NEW QUESTION 240

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

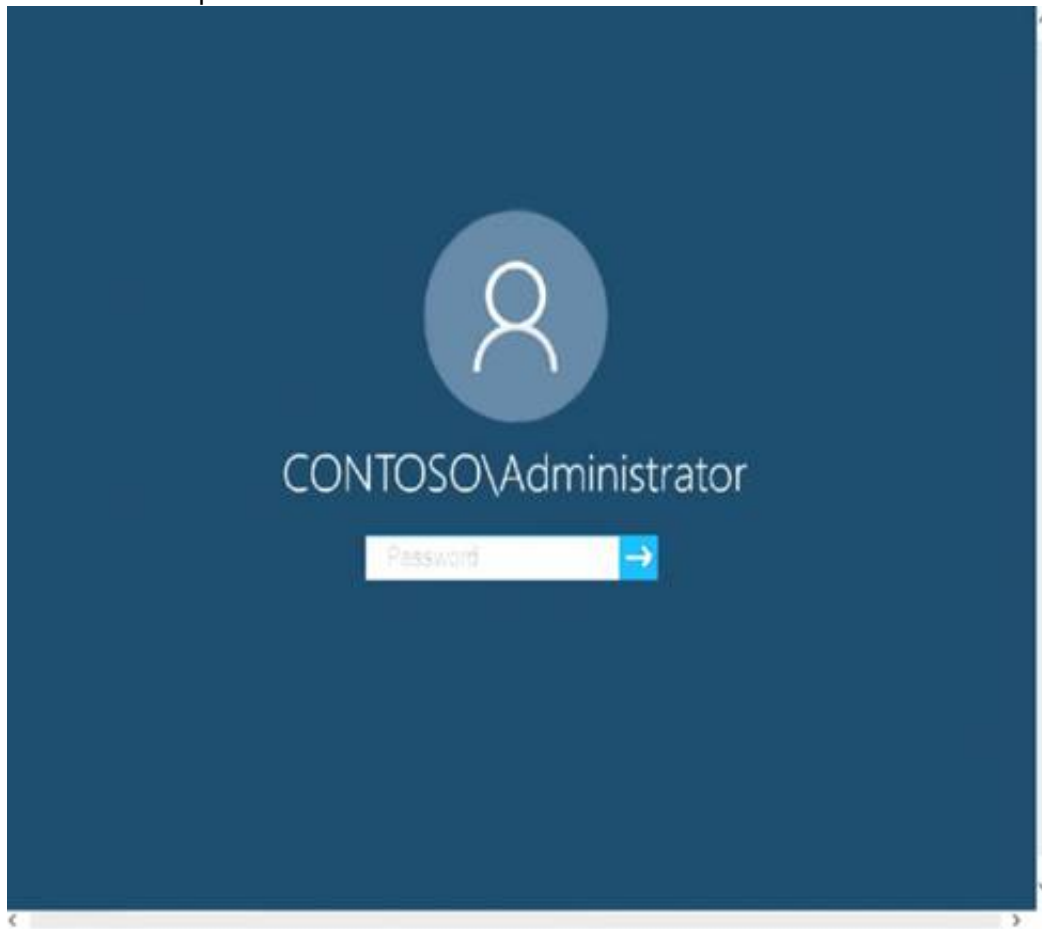

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

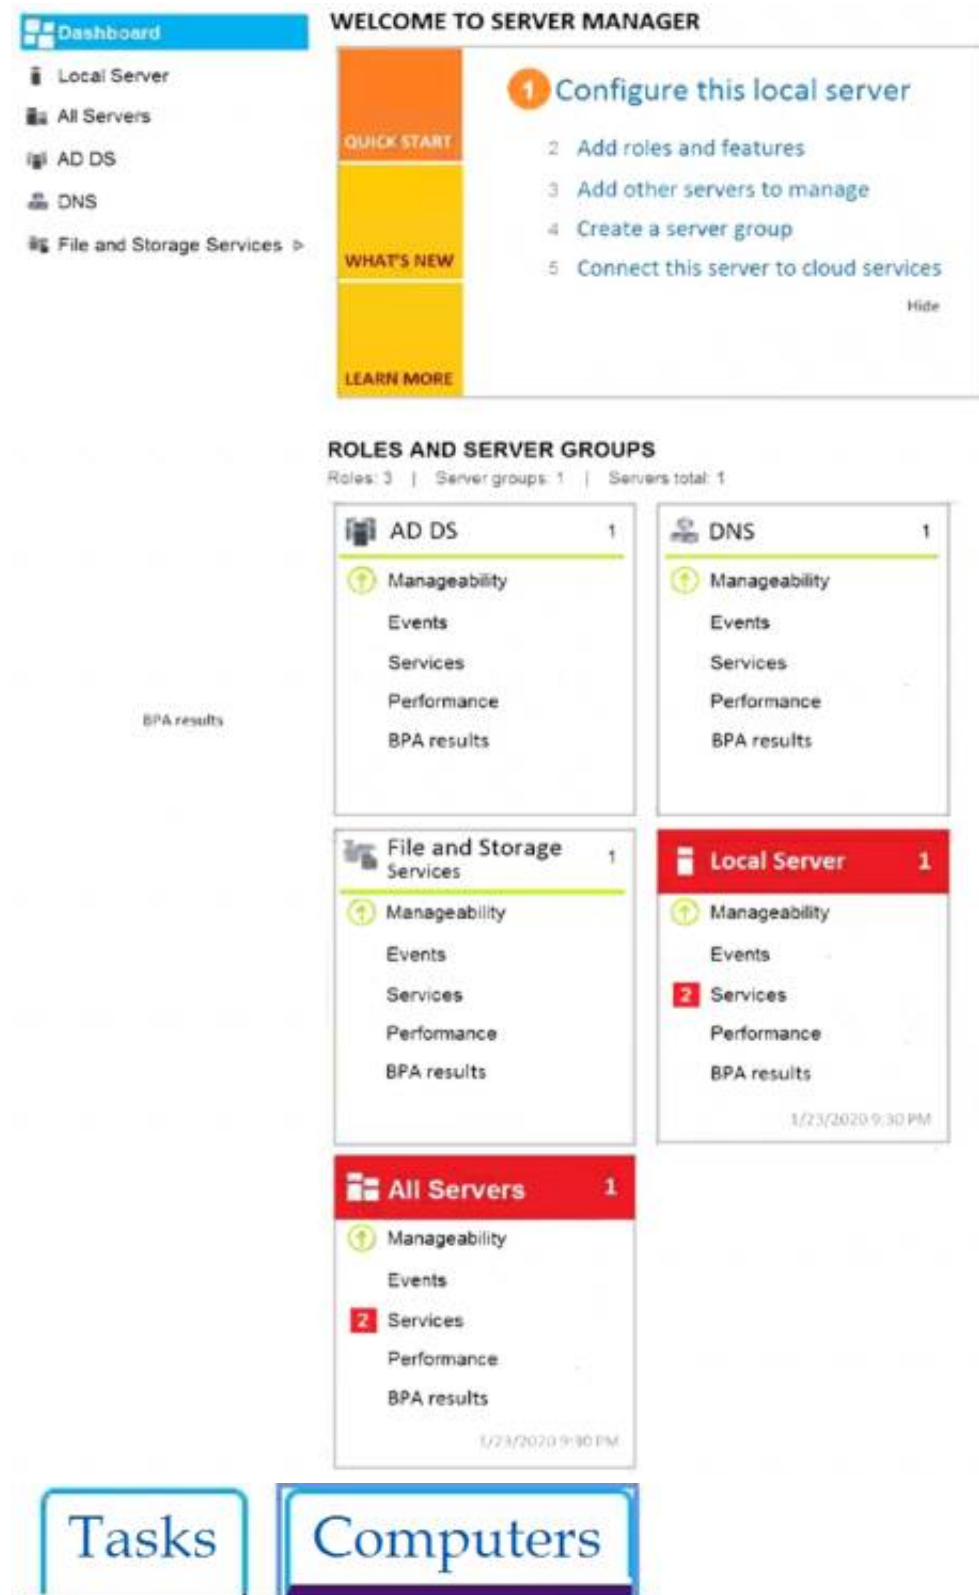

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

You need to ensure that the File History of Contoso\Administrator on Client1 is backed up automatically to \\DC1\Backups.
 To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

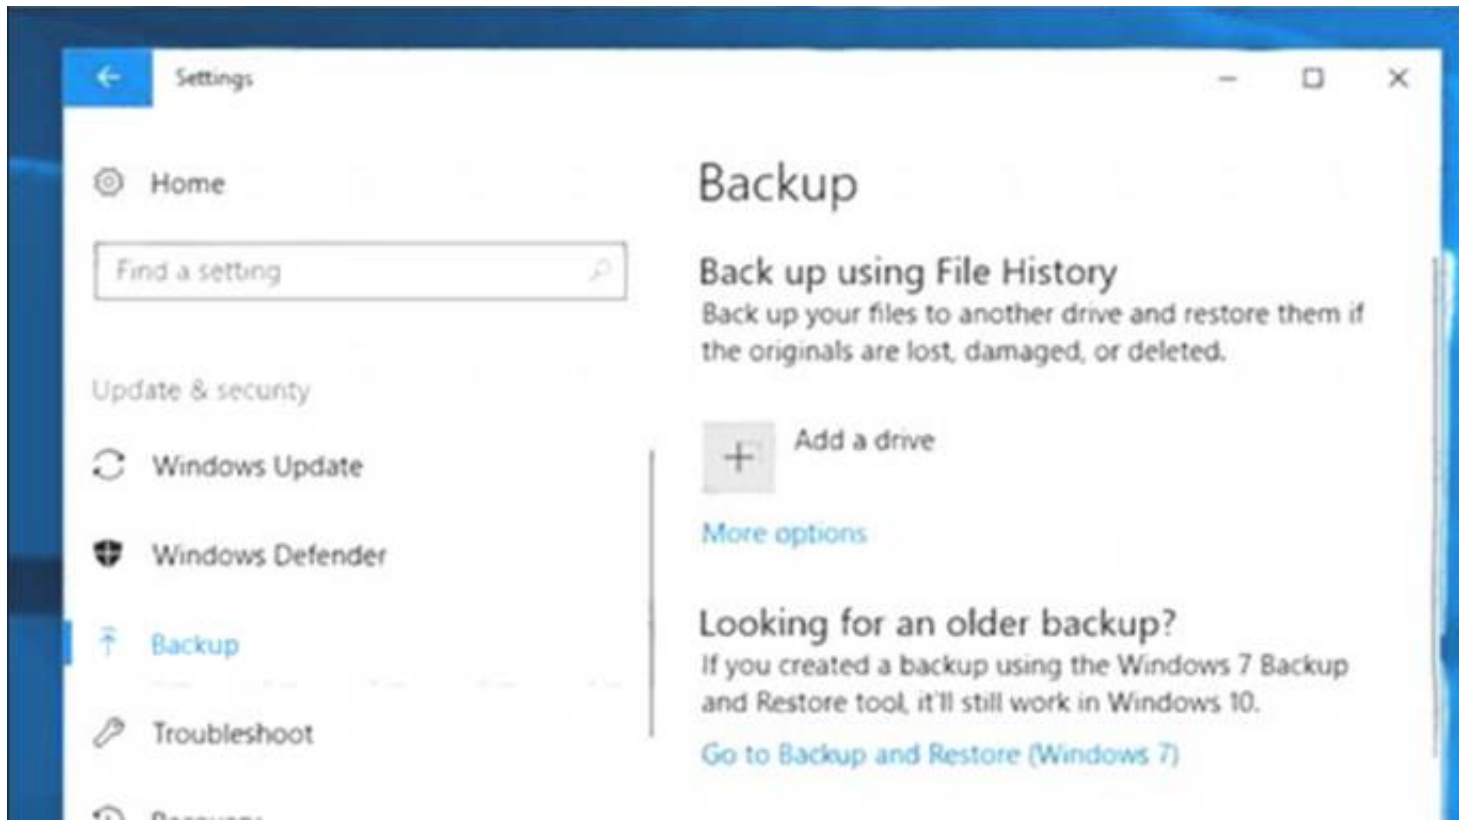

How to set up and enable File History

* 1. On Client1, go to Start > Settings > Update & Security.

* 2. Select Backup and click "Add a drive."

* 3. Select the drive or network location (\\DC1\Backups) you want to use for File History's backups.

Now click "More options." Here you can start a backup, change when your files are backed up, select how long to keep backed up files, add or exclude a folder, or switch File History to a different drive.

Click the “Back up now” button to start your first File History backup. Reference:
<https://lifehacker.com/how-to-back-up-your-computer-automatically-with-windows-1762867473>

NEW QUESTION 242

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10. You discover that when users are on their lock screen, they see a different background image every day, along with tips for using different features in Windows 10. You need to disable the tips and the daily background image for all the Windows 10 computers. Which Group Policy settings should you modify?

- A. Turn off the Windows Welcome Experience
- B. Turn off Windows Spotlight on Settings
- C. Do not suggest third-party content in Windows spotlight
- D. Turn off all Windows spotlight features

Answer: D

Explanation:

References:
<https://docs.microsoft.com/en-us/windows/configuration/windows-spotlight>

NEW QUESTION 243

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. The computers are configured as shown in the following table.

Name	Version	Organizational unit (OU)
Computer1	1909	Devices/OU1
Computer2	1909	Devices/OU2
Computer3	20H2	Devices/OU2

You have a Group Policy Object (GPO) named GPO1 that has the settings shown in the following exhibit.

Select the target Feature Update version

Select the target Feature Update version

Tasks Computers

You need to ensure that Windows feature updates on Client1 are deferred for 15 days when the updates become generally available. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- Select the Start button, then select Settings > Update & Security > Windows Update.
- Under Update settings, select Advanced options.
- From the boxes under Choose when updates are installed, select the number of days you would like to defer a feature update or a quality update. Reference:
<https://support.microsoft.com/en-us/help/4026834/windows-10-defer-feature-updates>

NEW QUESTION 249

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 11. You plan to change a registry setting on Computer1. You need to ensure that you can revert to the previous registry setting if the change causes an issue on Computer1. The solution must minimize administrative effort.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Enable system protection.
- B. Enable controlled folder access.
- C. Create a restore point.
- D. Create a recovery drive.
- E. Configure a dynamic lock policy.

Answer: AC

NEW QUESTION 251

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 belongs to a workgroup. You run the following commands on Computer1. New-LocalUser -Name User1 -NoPassword Add-LocalGroupMember User -Member User1 What is the effect of the configurations?

- A. User1 is prevented from signing in until the user is assigned additional user rights.
- B. User1 appears on the sign-in screen and can sign in without a password.
- C. User1 is prevented from signing in until an administrator manually sets a password for the user.
- D. User1 appears on the sign-in screen and must set a new password on the first sign-in attempts.

Answer: D

Explanation:

References:
<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.localaccounts/new-localuser?view=powershell-5.1>

NEW QUESTION 253

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You deploy Windows 10 to a computer named Computer1.

Computer1 contains a folder named C:\Folder1. Folder1 contains multiple documents.

You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab. Solution: You set up Backup and Restore (Windows 7) and include Folder1 in the backup. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Reference:

<https://support.microsoft.com/en-za/help/17128/windows-8-file-history>

NEW QUESTION 256

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live

environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

You need to prevent user names and passwords from being filled in on forms automatically when a user browses to websites from Client2. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- Open the Local Group Policy Editor.
- In the left pane of Local Group Policy Editor, navigate to Computer Configuration\Administrative Templates\Windows Components\Microsoft Edge
- In the right pane of Microsoft Edge in Local Group Policy Editor, double click/tap on the Configure Autofill policy to edit it.
- Select Disabled, click/tap on OK.
- In the right pane of Microsoft Edge in Local Group Policy Editor, double click/tap on the

- Configure Password Manager policy to edit it.
- Select Disabled, click/tap on OK.
- You can now close the Local Group Policy Editor.

Reference:

<https://docs.microsoft.com/en-us/microsoft-edge/deploy/available-policies> <https://www.tenforums.com/tutorials/115069-enable-disable-autofill-microsoft-edge-windows-10-a.html>

NEW QUESTION 261

- (Exam Topic 4)

You have a computer that runs Windows 10 Pro. The computer contains the users shown in the following table.

Name	Description
User1	Member of the local Administrators group
User2	Standard user
User3	Standard user

You need to use a local Group Policy Object (GPO) to configure one group of settings for all the members of the local Administrators group and another group of settings for all non-administrators.

What should you do?

- A. Use the runas command to open Gpedit.msc as each user.
- B. Run mmc as User2 and add the Group Policy Object Editor snap-in twice.
- C. Open Gpedit.msc as User1 and add two Administrative Templates.
- D. Run mmc as User1 and add the Security Templates snap-in twice.

Answer: B

Explanation:

Add the Group Policy Object Editor snap-in twice. Select Browse > Users > Administrators when you add the first snap-in and select Browse > Users > Non-Administrators when you add the second snap-in.

NEW QUESTION 266

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10. The domain contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1, Group2

Computer1 contains the shared folders shown in the following table.

Name	Path	Access-based enumeration
Share1\$	D:\Folder1	Disabled
Share2	D:\Folder2	Enabled

The shared folders have the permissions shown in the following table.

Name	Security permission	Sharing permission
Share1\$	Group1: Read Group2: Full control	Everyone: Read Group2: Full control
Share2	Group2: Full control	Everyone: Read Group2: Full control

For each of the following statements, select Yes if the statement is true. Otherwise select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
When User1 connects to \\Computer1, Share1\$ is visible.	<input type="radio"/>	<input type="radio"/>
When User2 connects to \\Computer1\Share1\$, the contents of D:\Folder1 are accessible.	<input type="radio"/>	<input type="radio"/>
When User1 connects to \\Computer1\Share2, the contents of D:\Folder2 are accessible.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

Share1\$ is a hidden share (dollar sign appended) so the share will never be visible. Box 2: Yes

User2 is in Group1 and Group2. Both groups have access to Share1\$. Therefore, the contents of the shared folder will be visible.

Box 3: No

User1 is in Group1. Group1 does not have the necessary security permission to access Share2. You need both security permissions (NTFS permissions) AND share permissions to view the contents of a shared folder. User1 has the necessary share permissions (Everyone: Read), but not the security permission.

NEW QUESTION 271

- (Exam Topic 4)

You are preparing to deploy Windows 10.

You download and install the Windows Assessment and Deployment Kit (Windows ADK). You need to create a bootable WinPE USB drive.

What should you do first?

- A. Run the MakeWinPEMedia command.
- B. Download and install Windows Configuration Designer.
- C. Run the WPEUcil command.
- D. Download and install the WinPE add-on.

Answer: D

Explanation:

WinPE used to be included in the Windows ADK. However, it is now provided as an add-on so the first step is to download and install the add-on.

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/winpe-create-usb-bootable-drive> <https://docs.microsoft.com/en-us/windows-hardware/get-started/adk-install>

NEW QUESTION 273

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1.

Solution: On Computer you share a folder. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 278

- (Exam Topic 4)

You have computers that run Windows 10 Enterprise as shown in the following table.

Name	Servicing channel
Computer1	Semi-Annual Channel (SAC)
Computer2	Long-Term Servicing Channel (LTSC) 2016

Both computers have applications installed and contain user data.

You plan to configure both computers to run Windows 10 Enterprise LTSC 2019 and to retain all the existing applications and data.

You need to recommend a method to deploy Windows 10 Enterprise LTSC 2019 to the computers. The solution must minimize effort to install and configure the applications.

What should you include in the recommendation for each computer? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Computer1:

- ☐ Perform a clean installation.
- ☐ Perform an in-place upgrade.
- ☐ Update the product key.

Computer2:

- ☐ Perform a clean installation.
- ☐ Perform an in-place upgrade.
- ☐ Update the product key.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated

References:

<https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-upgrade-paths>

NEW QUESTION 281

- (Exam Topic 4)

You have 15 computers that run Windows 10. Each computer has two network interfaces named Interface1 and Interface2.

You need to ensure that network traffic uses Interface1, unless Interface1 is unavailable. What should you do?

- A. Run the Set-NetIPInterface –InterfaceAlias Interface1 –InterfaceMetric 1 command.
- B. Run the Set-NetAdapterBinding –Name Interface2 –Enabled \$true –ComponentID ms_tcpip – ThrottleLimit 0 command.
- C. Set a static IP address on Interface 1.
- D. From Network Connections in Control Pane, modify the Provider Order.

Answer: A

Explanation:

References:

<https://tradingtechnologies.atlassian.net/wiki/spaces/KB/pages/27439127/How+to+Change+Network+Adapter+> <https://docs.microsoft.com/en-us/powershell/module/nettcpip/set-netipinterface?view=win10-ps>

NEW QUESTION 283

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You need to modify the Security Settings of Computer1 to meet the following requirements:

- A local group named Branch_Admns must be able to view and clear the Security log.
- Local users must be prompted to change their password three days before the password expires.

Which two nodes of the Local Group Policy Editor should you access to configure the settings? To answer, select the appropriate nodes in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated

User Rights Assignment > Manage auditing and security log.

Security Options > Interactive Logon: Prompt user to change password before expiration: 3 days.

NEW QUESTION 287

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a laptop named Computer1 that runs Windows 10.

When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.

Solution: From the Services console, you disable the Link-Layer Topology Discovery Mapper service. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 290

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. The following information is for technical support purposes only:

Lab Instance: 10921597

You need to connect to your company's network and create a VPN connection on Client2 named VPN1 that meets the following requirements:

VPN1 must connect to a server named vpn.contoso.com.

Only traffic to your company's network must be routed through VPN1. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- On Client2, click on the Start button and go to settings.
- Select Network & Internet.
- Select VPN on the left-hand side
- Click on the Add a VPN connection button.
- Next, select the VPN provider—This will almost always be Windows (built-in).
- Name your connection and enter the server name as provided by your IT technician. (VPN1 and vpn.contoso.com).
- Add in your username and password as provided by your IT technician.
- Click Save when done.
- Closeout the PC settings windows.

NEW QUESTION 292

- (Exam Topic 4)

Your company has an isolated network used for testing. The network contains 20 computers that run Windows 10. The computers are in a workgroup. During testing, the computers must remain in the workgroup.

You discover that none of the computers are activated.

You need to recommend a solution to activate the computers without connecting the network to the Internet. What should you include in the recommendation?

- A. Volume Activation Management Tool (VAMT)
- B. Key Management Service (KMS)
- C. Active Directory-based activation
- D. the Get-WindowsDeveloperLicense cmdlet

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/windows/deployment/volume-activation/introduction-vamt>

NEW QUESTION 293

- (Exam Topic 4)

You have a computer that runs Windows 10. You need to identify the following information:

- The name, username, and SID of the computer
- The user groups to which your user account belongs Which command should you run?

- A. whoami
- B. query
- C. msinfo32
- D. userinit

Answer: A

NEW QUESTION 296

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

Solution: From Update & Security in the Settings app, you turn on Pause Updates. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

<https://www.makeuseof.com/tag/5-ways-temporarily-turn-off-windows-update-windows-10/>

NEW QUESTION 298

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10.

You need to view the settings to Computer1 by Group Policy objects (GPOs) in the domain and local Group Policies.

Which command should you run?

- A. gpresult
- B. secedit
- C. gpupdate
- D. gpfixup

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-server/administration/windows-commands/gpresult>

NEW QUESTION 302

- (Exam Topic 4)

You deploy Windows 10 to a computer named Computer1.

Computer1 contains a folder named Folder1 contains multiple documents.

You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab.

What are three possible ways to achieve the goal? Each correct answer presents a complete the solution. NOTE: Each correct selection is worth one point.

- A. Enable File History and include Folder1 in the Documents library.
- B. Enable File History and add Folder1 to File History.
- C. Select Folder is ready for archiving from the properties of Folder1.
- D. Select Allow files in this folder to have contents indexed in addition to file properties from the properties of Folder1.
- E. Set up Backup and Restore (Windows 7) and include Folder1 in the backup.

Answer: ABE

NEW QUESTION 306

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 10 computers that run Windows 10. On a different computer named Computer1, you plan to create a collector-initiated subscription to gather the event logs from the Windows 10 computers.

You need to configure the environment to support the event log collection.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add Computer1 to the Event Log Readers group on the Windows 10 computers
- B. Add Computer1 to the Event Log Readers group on Computer1
- C. On the Windows 10 computers, change the Startup Type of Windows Event Collector to Automatic
- D. Enable Windows Remote Management (WinRM) on the Windows 10 computers
- E. Enable Windows Remote Management (WinRM) on Computer1

Answer: AD

Explanation:

References:

[https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc748890\(v=ws.11\)](https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc748890(v=ws.11))

NEW QUESTION 307

- (Exam Topic 4)

You have a public computer named Computer1 that runs Windows 10/ Computer1 contains a folder named Folder1.

You need to provide a user named User1 with the ability to modify the permissions of Folder1. The solution must use the principle of least privilege.

Which NTFS permission should you assign to User1?

- A. Full control
- B. Modify
- C. Write
- D. Read & execute

Answer: A

Explanation:

NEW QUESTION 309

- (Exam Topic 4)

You have a computer that runs Windows 10. The computer is in a workgroup. The computer is used to provide visitors with access to the Internet.

You need to configure the computer to meet the following requirements:

- Always sign in automatically as User1.
- Start an application named App1.exe at sign-in.

What should you use to meet each requirement? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Always sign in automatically as User1:

Group Policy preferences
BCDEdit
Registry Editor
MSConfig

Start an application named App1.exe at sign-in:

Group Policy preferences
BCDEdit
Registry Editor
MSConfig

- A. Mastered
- B. Not Mastered

Answer: A
