NEW QUESTION 3
- (Topic 6)
Note: This question is part of a series of questions that present the same scenario. Each question in
the series contains a unique solution that might meet the stated goals. Some question sets might have
more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these
questions will not appear in the review screen.
You are a Dynamics 365 for Finance and Operations system administrator. You have a test environment that is used by several people at any given time.
You create a new data entity in your development and migrate the code to the test environment. In the test

environment, you are unable to find the data entity in the list. You need to locate the data entity.
Solution: Enable the Public API check box in the data entity. Does the solution meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 4
SIMULATION - (Topic 6)

You need to create a new number sequence named Fabrikam that will be used to invoice a new customer. The sequence number must support the manual entry of invoice numbers.
To complete this task, sign in to the Dynamics 365 portal.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
? Go to Navigation pane > Modules > Organization administration > Number sequences > Number sequences.
? Select Number sequence.
? In the Number sequence code field, type a value.
? In the Name field, type Fabrikam.
? In the Segments section, click Add.
? Select Alphanumeric and enter a value such as #### (for a four-digit number)
? In the General section, ensure that Manual is set to Yes.
? Under Number Allocation, enter 1 in the Smallest field.
? Click Save to save the number sequence.

NEW QUESTION 5
DRAG DROP - (Topic 6)
You are configuring a recurring integration in Dynamics 365 Supply Chain Management. The released products entity is enabled for change tracking.
The integration must meet the following requirements:
• Export released product information using the recurring integrations capability within the data management framework.
• Export only released products assigned to item group A.
• Export only the released product, which has been amended since the previous export. You need to configure the recurring integration.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
Add the data entity with a default refresh type set to **Full push only.**	
Add the Released Products entity with a default refresh type set to **Incremental push only.**	
Create a recurring data job and configure the processing recurrence to start immediately.	
Configure the filter criteria for item group A.	
Use the Export in batch function to trigger the export	
Configure an Export data project.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Step 1: Configure an Export data project
Set up a data project and recurring data jobs Create a data project
? On the main dashboard, select the Data management tile to open the Data
management workspace.
? Select the Import or Export tile to create a new data project.
? Enter a valid job name, data source, and entity name.
? Upload a data file for one or more entities. Make sure that each entity is added, and Note: You can select each entity data card to set up, review, or modify field maps, and to set up XSLT-based transforms that must be applied to inbound data. For export data projects, the entity card also shows a filter link, so that you can set up filters to filter data. Currently, all recurring data jobs in a data project use the same filter.that no errors occur.
? Select Save.
Step 2: Configure the filter criteria for item group A. Export only released products assigned to item group A.
Step 3: Create a recurring data job and configure processing recurrent to start immediately. Create a recurring data job
? On the Data project page, select Create recurring data job.
? Enter a valid name and a description for the recurring data job.
? On the Set up authorization policy tab, enter the application ID that was generated for your application, and mark it as enabled.
? Expand Advanced options tab, and specify either File or Data package.
File – Your external integration will push individual files so that they can be processed via this recurring data job. In this case, the format of the file that is expected is the same as the format that was specified when the entity was added to the data project.
Data package – You can push only data package files for processing. A data package is a new format that lets you submit multiple data files as a single unit that can be used in integration jobs.

Process messages in order – You can enable this option to force sequential processing of incoming files in an import scenario. This option is only applicable to files and not data packages.

? Select Set processing recurrence, and then, in the Define recurrence dialog box, set up a valid recurrence for your data job.

? Optional: Select Set monitoring recurrence, and set up a monitoring recurrence.

? Select OK, and then select Yes in the confirmation message box.

Step 4: Add the Released Products entity with a default refresh type set to Incremental push only.

Export only the released product, which has been amended since the previous export.

Export either all the records (full push) or only the records that have changed or been deleted (incremental push).

NEW QUESTION 10
- (Topic 6)
You are a Dynamics 365 for Finance and Operations system administrator.
A company named Contoso Ltd. is creating a new legal entity that will be similar to an existing legal entity. Team members copy key entities to the new legal entity using the Data management workspace. They indicate that there were already-configured pieces of data unique to the new legal entity before they ran the Copy into legal entity process.
The data import/export framework settings are listed in the table below:

Setting	Current value
Ignore error	Yes
Create error file	Yes
Remove duplicates	Yes

You need to determine what happened to the already-configured pieces of data. What happened to the data?

A. Any source legal entity data that already exists in the destination legal entity will be updated.
B. Any destination legal entity data will be deleted, and the source data will be inserted.
C. Any source legal entity data that already exists in the destination legal entity will be ignored.
D. Any source legal entity data that already exists in the destination legal entity will be displayed as an error for user action in the Data management workspace.

Answer: C

NEW QUESTION 71
HOTSPOT - (Topic 6)
You are preparing to import data into Dynamics 365 Finance.
You need to use the data management framework for the data import process. Which components should you use? To answer, select the appropriate options in the
answer area.
NOTE: Each correct selection a worth one pewit.

Answer Area

Purpose	Component
multiple underlying tables combined to complete a common data concept	data entity / data package / data project
a process that executes a schedule and processing options	data job / data package / data project

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: data package
Data package - A single compressed file that contains a data project manifest and data files. This is generated from a data job and used for import or export of multiple files with the manifest.
Note: A data package for a Dynamics 365 Finance and Operations app can consist of one or many data entities. A typical data package consists of a group of entities for a specific task, process, or function. For example, the data entities that are required for general ledger setup might be part of one data package. The format of a data package is a compressed file that contains a package manifest, a package header, and any additional files for the data entities that are included.
Box 2: data job
Data job - A job that contains an execution instance of the data project, uploaded files, schedule (recurrence), and processing options.

NEW QUESTION 129
- (Topic 6)
A company uses Dynamics 365 Supply Chain Management.
A batch job that is running in the production environment must be canceled.
You attempt to cancel the batch job. The batch job is not canceled within a reasonable time period.
You need to force the batch job to stop processing. What should you do?

A. Use the Abort function on the batch task.
B. Update the recurrence of the batch job.
C. Set the status of the batch job to Withhold.
D. Delete the batch job.

Answer: A

Explanation:
Cancel an executing batch job
Complete the following steps to immediately cancel the running task.
? Go to System administration > Inquiries > Batch jobs.
? Select a batch job that has a Status of Canceling.
? On the Batch tasks tab, select Abort on the task, and then select OK.
Note: Sometimes canceling a batch job can take a long time if already executing tasks will take a long time to finish. This option provides a system administrator or batch job manager with the ability to cancel already executing tasks for jobs that are in the process of being canceled. This provides a much faster mechanism to cancel a long running job that is impacting system usage elsewhere.

NEW QUESTION 174
DRAG DROP - (Topic 6)
A company uses Dynamics 365 Supply Management.

You must implement a guided process to manage actions that be performed when a customer reports a delivery that includes missing items.

You need to configure case management.

Where should you complete each configuration? To answer, drag the appropriate locations to the correct requirement. Each location may be used once, more than once, or into at all. You may need to drag the split bar between panes scroll to view content.

NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Case Process
You should set up processes that employees must follow for the cases that are opened in your organization. Processes help guarantee consistency for the people who are involved in cases, and also help employees resolve cases faster and more efficiently. You can set up a process for each case category that cases are assigned to. Although planning a separate process for each case type takes time, case resolution will go much more smoothly if the processes are planned out.
Box 2: Case category security Case category security by role
Only appropriate employees in an organization should have access to cases and related information. To control which employees have access to view, create, and update different types of cases, you can assign security roles to case category types. You must determine which security roles should have access to the various case category types.
Box 3: Case workflow
You can setup cases in a deeper way by using workflows in Organization administration.

NEW QUESTION 179
- (Topic 6)

You develop a Power Apps app that allows users to upload images. The app automatically resizes images and adds metadata tags to uploaded images.
The app must automatically tag images of checks within Dynamics 365 Finance. You must enable access to the Power App from Finance and pass a variable to indicate context to the app. Pop-up blockers are enabled on all user devices.
You need to configure the app.
What are two possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Add the app by using the Power Apps button on the standard Action pane.
B. Use JavaScript to open a modeless dialo
C. Pass the context with a querystring value.
D. Use JavaScript to open a new modal dialo
E. Pass the context with a querystring value.
F. Embed the app on a page as a FastTab.
G. Create a Power Automate flow that sends an email with a link to open the app.

NEW QUESTION 183
- (Topic 6)
You are the administrator of a Dynamic 365 Finance system.
Messages sent from the system exceed the sending limits of the Microsoft 365 Exchange Online service.
You need to prevent sending limits from being exceeded. What should you configure?

A. Attachment size limits
B. Email throttling
C. Email distributor batch job
D. Throttling priority mappings

Answer: B

Explanation:
The email throttling feature allows noninteractive email providers to adhere to a per-minute email sending limit, which prevents errors that are currently triggered when the system attempts to send more emails than the provider can handle. When email throttling is enabled, sending limits for Microsoft 365 email providers will be set automatically; manual configuration is required for all other email providers.

- (Topic 4)
You need to implement the testing feature to address the manufacturing business process concerns.
Which feature should you use?

A. Derived
B. Assignment
C. Operators
D. Channel
E. Snapshot

Answer: A

Explanation:
With the different bike configurations, Adventure Works Cycles would like to use a single business process but test against 10 different data configurations to streamline errors against data variations in the manufacturing process.
Derived test cases
The Regression suite automation tool (RSAT) lets you use the same task recording with multiple test cases, so that you can run a task with different data configurations. Select a test case in the Regression suite automation tool and then select New > Create Derived Test Case. This creates a child test case in Azure DevOps. The resulting derived test case is linked to its parent test case in Azure DevOps. It has an Excel parameters file attached but no recording file. The derived test case will appear in the Regression suite automation tool grid under the same test suite with the Derived column selected. By default, derived test cases are named after their parent test case with a numeric suffix.
