### NEW QUESTION 3

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

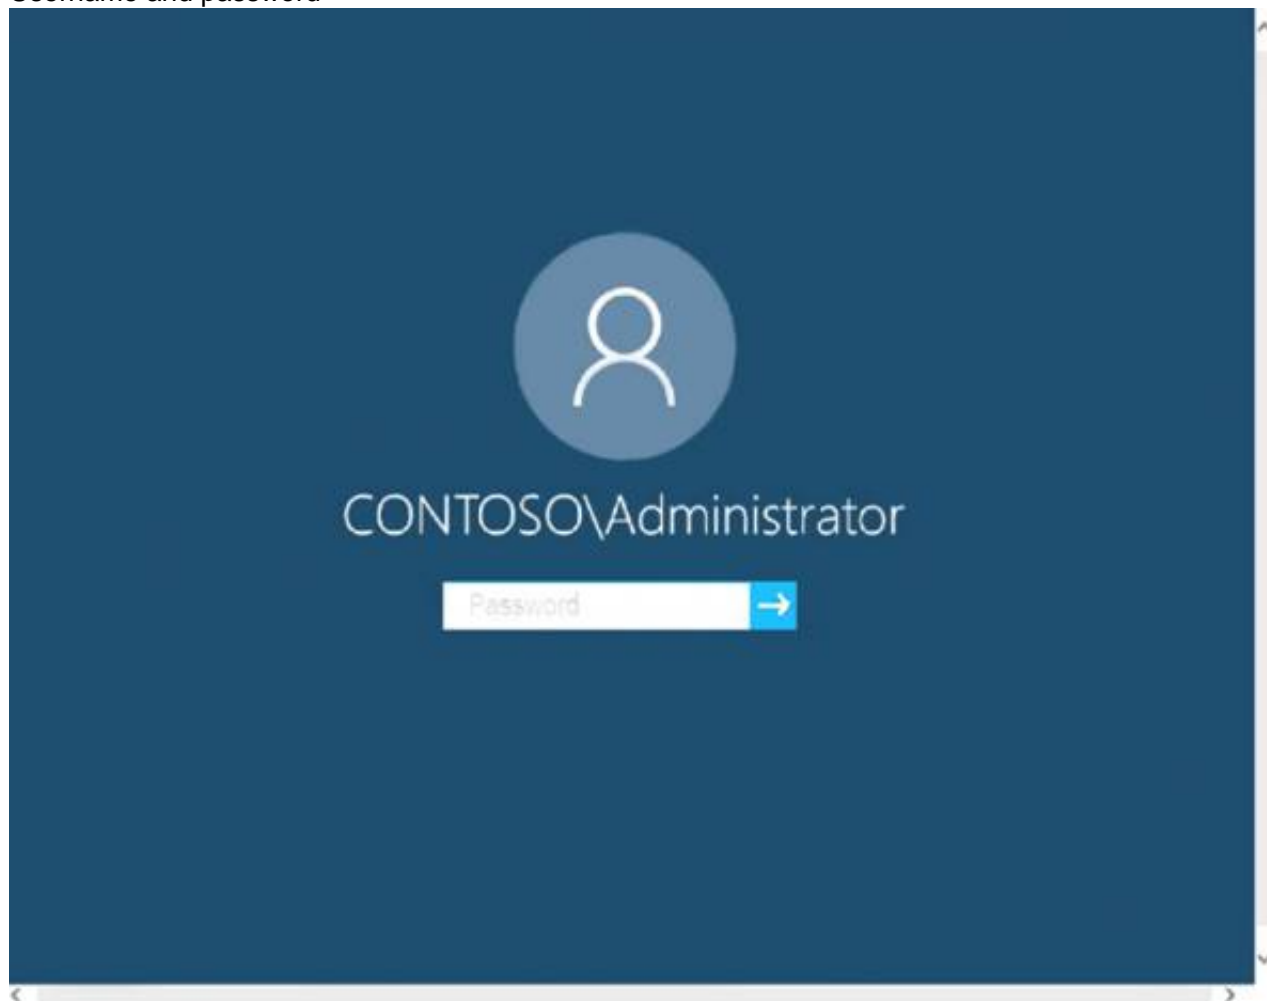

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Users in the Finance group report that they cannot copy files to Client1\Finance. You need to resolve the issue. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

- Open File Explorer.
- Browse and find the file or folder you want to have full access.
- Right-click it, and select Properties.
- Click the Security tab to access the NTFS permissions.
- Click the Advanced button.
- On the "Advanced Security Settings" page, you need to click the Change link, in the Owner's field.
- Click the Advanced button.
- On the "Select User or Group" page, click the Find Now button.
- From the search result, select your user account, and click OK.
- On the "Select User or Group" page, click OK.
- Click Apply.
- Click OK.
- Click OK again.
- Click OK one more time to complete this task.

It's important to note that if you're taking ownership of a folder, you can check the Replace ownership on subcontainers and object option in the Advanced Security Settings page to take control of the subfolders inside of the folder.

Now you'll need to grant full access control to your account, to do this use the following steps:

- Right-click the file or folder and select Properties.
- Click the Security tab to access the NTFS permissions.
- Click the Advanced button.
- Under the Permissions tab, click Add.
- Click Select a principal to add your user account.
- On the "Select User or Group" page, click the Find Now button.
- From the search result, select your user account, and click OK.
- On the "Select User or Group" page, click OK.
- On "Permission Entry", check the Full control option.
- Click OK.
- Click OK.
- Click Apply.
- Click OK.
- Click OK to close the file or folder properties to complete the task.

You can now assign the necessary permissions to the Finance group.

If you right-click on a file or folder, choose Properties and click on the Security tab, we can now try to edit some permissions. Go ahead and click the Edit button to get started.

At this point, there are a couple of things you can do. Firstly, you'll notice that the Allow column is probably greyed out and can't be edited. This is because of the inheritance I was talking about earlier. However, you can check items on the Deny column.

When you click the Add button, you have to type in the user name or group name into the box and then click on Check Names to make sure it's correct. If you don't remember the user or group name, click on the Advanced button and then just click Find Now. It will show you all the users and groups.

Click OK and the user or group will be added to the access control list. Now you can check the Allow column or Deny column.

**NEW QUESTION 8**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User3 on Computer1.

Does this meet the goal?

- A. Yes
- B. No

**Answer: A**

**Explanation:**

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.

User3 is a domain administrator. References:

#### NEW QUESTION 52

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10.

The domain contains the users shown in the following table.

Name	Member of
Admin1	Domain Admins, Group1
User1	Group1
User2	Group2

Computer1 has four printers as shown in the following table.

Name	Type	Added by	Permissions
Printer1	Local printer	Admin1	Print: Group1 Manage the printer: Group1
Printer2	Network printer	Admin1	Print: Domain Users Manage the printer: Domain Users
Printer3	Local printer	User1	Print: Group1 Manage the printer: Group1
Printer4	Local printer	User2	Print: Domain Users Manage the printer: Domain Users

Which printers will be available to User1 when the user signs in to Computer1?

- A. Printer3 only
- B. Printed and Printer3 only
- C. Printed, Printer2. and Printer3 only
- D. Printed, Printer3, and Printer4 only
- E. Printed, Printer2, Printer3, and Printer4

**Answer: E**

#### NEW QUESTION 57

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. A user named Mia Hamm has a computer named Computer1. Mia Hamm reports that when she logs on to

Computer1, she cannot access servers on the network but she can access computers on the internet.

You run the ipconfig command on Computer1 and receive the following output.

```

You successfully ping the default gateway, the DNS servers, and the DHCP server. You need to resolve the connectivity problem on Computer1. Which setting should you configure? To answer, select the appropriate options in the answer area.

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface Description automatically generated

The preferred DNS server is located on the internet as it has a public IP Address. The local DNS server should be the preferred DNS server. We could manually change the preferred and alternate DNS server addresses or we could select the "Obtain DNS server address automatically" option to have the DNS servers configured through DHCP.

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question In this section, you will NOT be able to return to it. As a result these question will not appear In the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is m the local Administrators group on each computer.

You sign m to Compute1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer?.

Solution: On Computer2, you create a Windows Defender Firewall rule that allows eventvwr.exe. Does this meet the goal?

- A. Yes  
B. No

**Answer:** B

**NEW QUESTION 65**

- (Exam Topic 4)

You have several computers that run Windows 10. The computers are in a workgroup and have BitLocker Drive Encryption (BitLocker) enabled.

You join the computers to Microsoft Azure Active Directory (Azure AD).

You need to ensure that you can recover the BitLocker recovery key for the computers from Azure AD. What should you do first?

- A. Disable BitLocker.  
B. Add a BitLocker key protector.  
C. Suspend BitLocker.  
D. Disable the TPM chip.

#### NEW QUESTION 68

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the computers shown in the following table.

Name	Operating system
Computer1	Windows 10 Enterprise
Computer2	Windows 10 Pro
Computer3	Windows 10 Pro

Microsoft Defender Application Guard is installed on the computers.

Application Guard Group Policy settings are applied to the computers as shown in the following table.

Setting	State
Turn on Windows Defender Application Guard in Managed Mode	Enabled
Configure Windows Defender Application Guard clipboard settings	Enabled
Allow files to download and save to the host operating system from Windows Defender Application Guard	Enabled

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

#### Answer Area

#### NEW QUESTION 71

- (Exam Topic 4)

You need to ensure that User1 can perform a Resultant Set of Policy (RSOP) analysis for User2. The solution must use the principle of least privilege.

The screenshot shows a checkbox labeled "Do not display user policy settings in the results (display computer policy settings only)". Below the checkbox are three buttons: "< Back", "Next >", and "Cancel". The "Next >" button is highlighted with a blue border.

What should you do first?

- A. Add User1 to the local Administrators group.
- B. Add User2 to the local Performance Monitor Users group.
- C. Run RSoP from an elevated-privilege account.
- D. Add User1 to the local Performance Monitor Users group.

Answer: D

#### NEW QUESTION 73

- (Exam Topic 4)

You have a computer that runs Windows 11 and hosts the Hyper-V virtual machines shown in the following table.

Name	Generation	Configuration version
VM1	1	9.0
VM2	1	10.0
VM3	2	8.0
VM4	2	10.0

You need to install Windows 11 on a virtual machine. On which virtual machine can you install Windows 11?

- A. VM2only
- B. VM4only
- C. VM3 and VM4 only
- D. VM2 and VM4 only
- E. VM1.VM2,VM3, andVM4

**Answer:** E

#### NEW QUESTION 76

- (Exam Topic 4)

You are troubleshooting the network connectivity of a computer that runs Windows 10. The computer is connected physically to the network but rejects network traffic from an external source. You need to reinstall the TCP/IP stack on the computer. What should you run?

- A. the necsh int ip resec command
- B. the Resec-NetAdapcerAdvancedPropercy cmdlet
- C. the netcf g -d command
- D. the Debug-NetworkController cmdlet

**Answer:** A

#### NEW QUESTION 78

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Administrators
User2	Users

You have a file named File1.reg that contains the following content.

```
Windows Registry Editor Version 5.00
```

```
[HKEY_CURRENT_USER\System\Key1]
```

```
[HKEY_LOCAL_MACHINE\System\Key2]
```

You need to identify what occurs when User1 and User2 double-click File1.reg.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

### Answer Area

When User1 double-clicks **File1.reg**:

▼

No change is made to registry.

Only Key1 is added to the registry.

Only Key2 is added to the registry.

Key1 and Key2 are added to the registry.

When User2 double-clicks **File1.reg**:

▼

No change is made to registry.

Only Key1 is added to the registry.

Only Key2 is added to the registry.

Key1 and Key2 are added to the registry.

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

Box 1:

User1 is a member of the Administrators group so has permission to add keys to both registry hives. Box 2:  
User2 is a standard user so does not have permission to add a key to the HKEY\_LOCAL\_MACHINE registry hive so Key2 will not be imported.

#### NEW QUESTION 82

- (Exam Topic 4)

You have the source files shown in the following table.

Source	Location
Custom Windows 10 image	D:\Folder1\Image1.wim
Windows 10 language pack DVD	E:\

You mount an image from Image1.wim to a folder named C:\Mount. You need to add the French language pack to the mounted image. How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### NEW QUESTION 108

- (Exam Topic 4)

Your company uses Microsoft Deployment Toolkit (MDT) to deploy Windows 10 to new computers. The company purchases 1,000 new computers.

You need to ensure that the Hyper-V feature is enabled on the computers during the deployment. What are two possible ways to achieve the goal? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Add a task sequence step that adds a provisioning package.
- B. In a Group Policy object (GPO), from Computer Configuration, configure Application Control Policies.
- C. Add a custom command to the Unattend.xml file.
- D. Add a configuration setting to Windows Deployment Services (WDS).
- E. Add a task sequence step that runs dism.exe.

**Answer:** AE

#### Explanation:

References:

Provisioning package works with Windows Configuration Designer to provision win10 features and runtime settings. WCD (provisioning Package) is GUI based while DISM is command line based and dose same function. Unattend.xml / answer files are used with installation media. It contains settings, definitions and values to use during Windows Setup. In an answer file, you specify various setup options. These options include how to partition disks, where to find the Windows image that will be installed, and which product key to apply.

**NEW QUESTION 110**

- (Exam Topic 4)

Your company has an on-premises network that contains an Active Directory domain. The domain is synced to Microsoft Azure Active Directory (Azure AD). All computers in the domain run Windows 10 Enterprise.

You have a computer named Computer1 that has a folder named C:\Folder1. You want to use File History to protect C:\Folder1.

Solution: You enable File History on Computer1. You then enable archiving for Folder1.

Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

**Explanation:**

File History only backs up copies of files that are in Libraries, and Desktop folders and the OneDrive files available offline on your PC. If you have files or folders elsewhere that you want backed up, you can add them to one of these folders.

#### NEW QUESTION 179

- (Exam Topic 4)

Your company is not connected to the internet. The company purchases several new computers with Windows 10 Pro for its users. None of the new computers are activated. You need to activate the computers without connecting the network to the Internet. What should you do?

- A. Make use of the Volume Activation Management Tool (VAMT).
- B. Make use of the Key Management Service (KMS).
- C. Make use of the Windows Process Activation Service.
- D. Run the Get-WmiObject -query cmdlet.

**Answer: B**

**Explanation:**

You can configure one of the computers as a Key Management Service (KMS) host and activate the KMS host by phone. The other computers in the isolated network can then activate using the KMS host.

Installing a KMS host key on a computer running Windows 10 allows you to activate other computers running Windows 10 against this KMS host and earlier versions of the client operating system, such as Windows 8.1 or Windows 7. Clients locate the KMS server by using resource records in DNS, so some configuration of DNS may be required. This scenario can be beneficial if your organization uses volume activation for clients and MAK-based activation for a smaller number of servers. To enable KMS functionality, a KMS key is installed on a KMS host; then, the host is activated over the Internet or by phone using Microsoft's activation services.

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 100 computers that run Windows 10.

You need to configure the computers to send the error events in the System log to a computer named Computer1 that runs Windows 10.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

#### Answer Area

Computer1:

Create a source-initiated subscription.
Create a collector-initiated subscription.
Create a custom view in Event Viewer.
Configure Event Forwarding by using a Group Policy Object (GPO).

100 Windows 10 computers:

Create a source-initiated subscription.
Create a collector-initiated subscription.
Create a custom view in Event Viewer.
Configure Event Forwarding by using a Group Policy Object (GPO).

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

Source-initiated subscriptions allow you to define a subscription on an event collector computer without defining the event source computers, and then multiple remote event source computers can be set up (using a group policy setting) to forward events to the event collector computer. Source:

#### NEW QUESTION 221

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com. The domain contains the users shown in the following table.

Name	Member of
User1	Group1, Group3
User2	Group1, Group2
User3	Group2, Group3

The domain contains a computer named Computer1 that runs Windows10. Computer1 has a file named File1.txt that has the permissions shown in the exhibit.  
(Click the Exhibit tab.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can modify File1.txt.	<input type="radio"/>	<input type="radio"/>
User2 can modify File1.txt.	<input type="radio"/>	<input type="radio"/>
User3 can read File1.txt.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: No

User1 only has Read access to the file. Box 2: Yes

User2 is in Group2 which has full control. The condition states that if the user is also a member of Group3, the permission would not apply. However, User2 is not in Group3 so the full control permission does apply.

Box 3: No

User3 is in Group3 which does have Read access. However, the condition states that if the user is also in Group1 or Group2 then the permission does not apply.

User3 is in Group2 so the Read permission granted to Group3 does not apply to User3.

#### NEW QUESTION 225

- (Exam Topic 4)

**NEW QUESTION 247**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

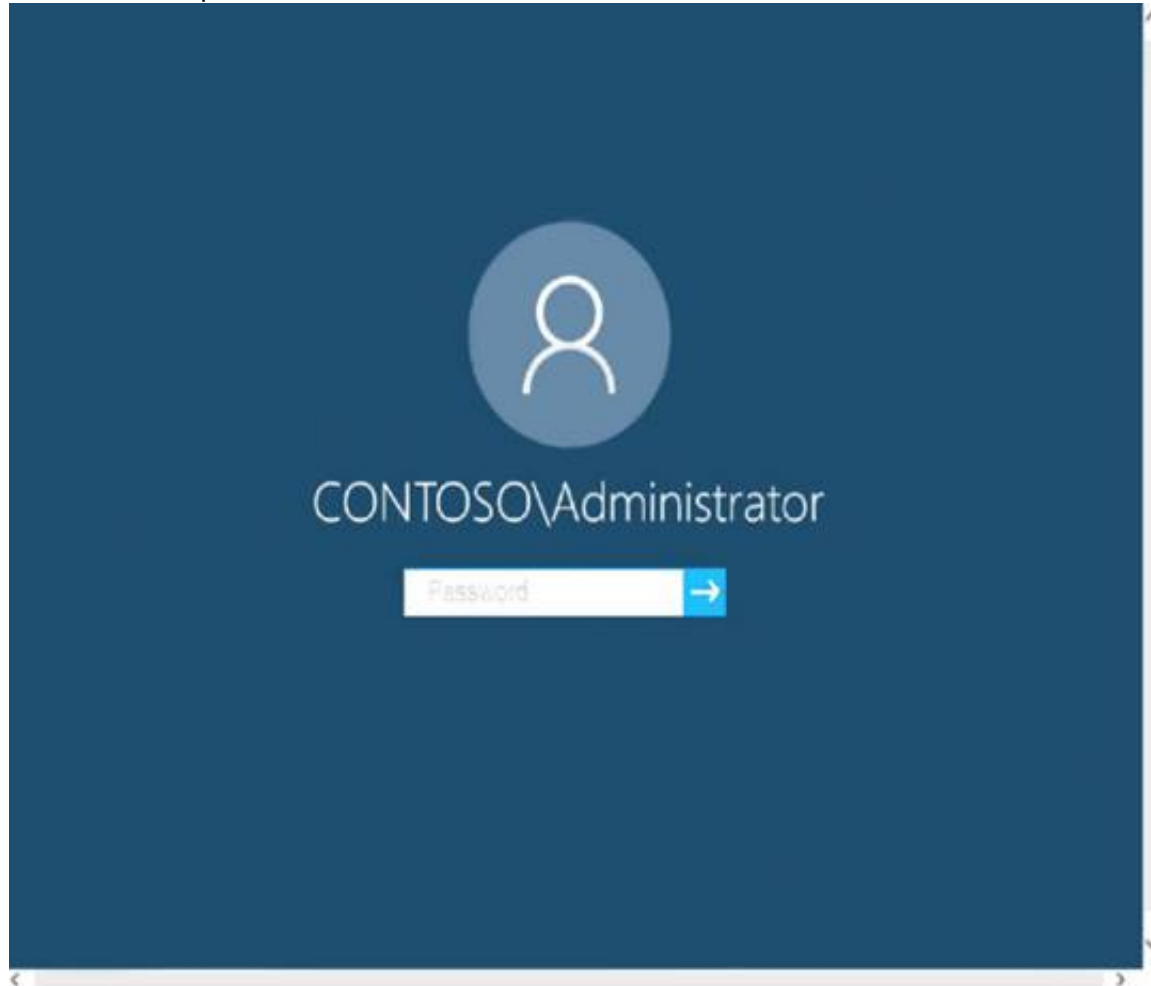

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.
