Microsoft

Exam Questions PL-600

Microsoft Power Platform Solution Architect

About Exambible

Your Partner of IT Exam

Found in 1998

Exambible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, Exambible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

    All examinations will be up to date.

* 24/7 Quality Support

    We will provide service round the clock.

* 100% Pass Rate

    Our guarantee that you will pass the exam.

* Unique Gurantee

    If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1
HOTSPOT - (Topic 1)
You need to recommend methods to resolve the organization's issues.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Issue	Resolution method
Users cannot see Power BI reports.	Add users to Microsoft 365. / Assign Power BI licenses to users. / Configure an on-premises data gateway.
Historical data does not appear in reports.	Configure Azure Data Lake. / Configure a custom connector. / Configure an on-premises data gateway.

Answer:

Issue	Resolution method
Users cannot see Power BI reports.	Add users to Microsoft 365. / Assign Power BI licenses to users. / Configure an on-premises data gateway.
Historical data does not appear in reports.	Configure Azure Data Lake. / Configure a custom connector. / Configure an on-premises data gateway.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Add users to Microsoft 365.
Scenario: Users cannot view Power BI reports within the Power Platform apps.
Issue: The people you share with may see a locked tile in a dashboard, or a "Permission required" message when they try to view a report.
Solution: You need to grant them permission to the underlying dataset.
? Go to the All or the Datasets + dataflows tab in your content list.
? Select More options (...) next to a dataset, then select Manage permissions.
? Select Add user.

? Enter the full email addresses for individuals, distribution groups, or security groups.
? Select Grant access.

Box 2: Configure an on-premises data gateway.

Scenario: The company plans to reference historical data in the [on-premises] existing system. The records held in these systems will not be migrated to the new solution except for medication information.

The on-premises data gateway acts as a bridge to provide quick and secure data transfer between on-premises data (data that isn't in the cloud) and several Microsoft cloud services. These cloud services include Power BI, PowerApps, Power Automate, Azure Analysis Services, and Azure Logic Apps. By using a gateway, organizations can keep databases and other data sources on their on-premises networks, yet securely use that on- premises data in cloud services.

NEW QUESTION 2
- (Topic 1)
You need to recommend a reporting solution for the organization.
Which two options should you recommend? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. AI Builder
B. SQL Server Reporting Services (SSRS)
C. Dynamics 365
D. Power BI

Answer: BC

Explanation:
Scenario:
? The reporting and analytics team must be able to create reports that include data from all facilities and all workers.
? Management reports must present an overview of the entire organization. Other reports may be limited to specific offices.
B: Power Apps apps can include reports that provide useful business information to the user. These reports are based on SQL Server Reporting Services and provide the same set of features that are available for typical SQL Server Reporting Services reports.
C: Microsoft Dynamics 365 online and Model-Driven PowerApps offers several advanced reporting options. Advanced reports are often necessary when business requirements demand complex calculations, returning multiple data sets, grouping large sets of data based on rules, and retrieving data from different data sources.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/add-reporting-to- app

https://powerusers.microsoft.com/t5/Building-Power-Apps/Creating-SSRS-Report-for-

Model-Driven-PowerApps/td-p/621866
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/powerapps-custom-visual

NEW QUESTION 3
- (Topic 2)
You need to recommend the field type to use for configuring meal selections during reservation.
Which field type should you recommend?

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Scenario:
? Customers can select a meal when they make a reservation and can save the meal choices as a customer preference.
? The company offers two types of meals: standard and vegetarian. Meal types can be temporarily unavailable. The airline is considering offering other meal types, such as gluten-free and low-sodium options.
In PowerApps Option set is one of the field types you can use in your Entity. The information type that Option Set stores is a list of text values. And here comes the Option Set advantage – once you define its text values you can centrally managed it.
Example:

Reference:
https://michalguzowski.pl/how-to-work-with-option-set-in-powerapps/

NEW QUESTION 4
- (Topic 2)

You need to create an Agent security role.
Which three actions should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Add security to the seat entity and assign users to the Agents role.
B. Add security to the Core Records and assign users to the Customer Service Representative role.
C. Copy the Microsoft Dataverse Basic User role.
D. Rename the Customer Service Representative role to Agents.
E. Copy the Customer Service Representative role.
F. Name the new role Agents.

Answer: BEF

Explanation:
Scenario: The security rule for agents must contain the privileges in the default Customer Service
Representative security role.

Create a security role by Copy Role:
Step 1 (E): Copy the Customer Service Representative role. Step 2 (F): Select the New Role Name.
Step 3: (B): When Copying Role is complete, navigate to each tab, ie Core Records, Business Management, Customization, etc.
Set the privileges on each tab. Reference:
https://docs.microsoft.com/en-us/power-platform/admin/create-edit-security-role

NEW QUESTION 5
DRAG DROP - (Topic 2)
You need to recommend a solution for integrating luggage information.
What should you recommend? To answer, drag the appropriate types to the correct tables. Each type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Luggage: Custom activity table

An activity can be thought of as any action for which an entry can be made on a calendar. An activity has time dimensions (start time, stop time, due date, and duration) that help determine when the action occurred or will occur. Activities also contain data that helps determine what action the activity represents, for example, subject and description.

Passenger: Customer table

The account and contact tables in Microsoft Dataverse are essential for identifying and managing customers, selling products and services, and providing superior service to the customers. A customer address table is used to store address and shipping information for a customer.

Scenario: The company has a custom app for managing and tracking passenger luggage. The app uses Microsoft Dataverse.

Agents need to view which pieces of luggage match to each passenger, and then need to add the total on the passenger record.

NEW QUESTION 6
- (Topic 2)

You need to select an appropriate app for Relecloud. Which app should you recommend?

A. Dynamics 365 Field Service
B. Dynamics 365 Sales
C. Dynamics 365 Project Operations
D. Dynamics 365 Customer Service

Answer: D

Explanation:

Microsoft Dynamics 365 Customer Service is a module for customer service automation that streamlines case and knowledge management, enables personalized customer service with a 360-degree customer view, and provides visibility into customer service department performance with dashboards and reports.

Reference:
https://docs.microsoft.com/en-us/dynamics365/customer-service/overview

NEW QUESTION 7
HOTSPOT - (Topic 2)
You need to recommend a collaboration tool for each group.
Which tool should you use? To answer, select the appropriate tool in the answer area.
NOTE: Each correct selection is worth one point.

Group	Tool
Maintenance supervisors	▼ Microsoft Teams / Notes / Power Apps portal / Posts
Aircraft maintenance vendors	▼ Dynamics 365 Workspace / Notes / Power Apps portal / Posts

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Microsoft Teams
Maintenance supervisors must not have access to Dynamics 365 Customer Service. The supervisors must be able to communicate with the contracts team about contracts.
Box 2: Dynamics 365 Workspace
Aircraft maintenance vendors must have only view and upload privileges to their invoices and receipts.
The Expense management mobile workspace lets users capture and upload a receipt, so that they can attach it to an expense report later.

NEW QUESTION 8
HOTSPOT - (Topic 3)
You need to design the quality inspection order data model.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Action
Obtain the serial number and other machine attributes for use in the inspection order.	▼ Use a virtual table. / Import to a custom table. / Create a lookup to Dynamics 365 Field Service.
Configure the relationship between inspection orders and inspection ratings.	▼ Create a one-to-many relationship and set the behavior to Parental. / Create a many-to-many relationship and set the behavior to Parental. / Create a one-to-many relationship and set the behavior to Cascade None. / Create a many-to-many relationship and set the behavior to Cascade None.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: Create a lookup to Dynamics 365 Field Service
Scenario: Machines are assigned serial numbers and placed in stock until they are shipped to customers.
Entity lookup: Allows technicians to choose a Dynamics 365 record. In the inspection designer interface, admins must select an entity and a field to display. For a chosen entity, the Name field and mandatory fields are the entity attributes that can be displayed in the lookup.
Box 2: Create a one-to-many relationship and set the behavior to Parental Scenario: Inspection orders must:
? Allow entry of quality ratings of passed or failed for each quality metric identified
for the machine being rated.
? Be automatically marked as failed if one inspection step rating is marked as failed.
Each inspection order can have one or many inspection steps, and each inspection step has a rating.
Note: Each pair of tables that are eligible to have a 1:N relationship can have multiple 1:N relationships between them. Yet usually only one of those relationships can be considered a parental table relationship.

NEW QUESTION 9
- (Topic 3)
You need to recommend a solution for creating the initial inspection checklists. What should you recommend?

A. Power Apps Maker portal

B. Dataverse for Teams

Power Apps Studio

6: Data Migration utility

Answer: B

Explanation:
Scenario: Standardized checklists must be stored in the solution for use by inspectors. A copy must be created when a new inspection is initiated.
Dataverse for Teams – built on Microsoft Dataverse – provides relational data storage, rich data types, enterprise-grade governance, and one-click solution deployment to the Microsoft Teams app store.
Dataverse for teams table creation has all of the things that are great about Microsoft Lists, without the major downsides.
Reference:
https://docs.microsoft.com/en-us/powerapps/teams/create-table

NEW QUESTION 10
HOTSPOT - (Topic 3)
You need to recommend solutions to meet the inspection requirements.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Solution
View, assign, and resolve inspection bottlenecks.	▼ Booking rules / Schedule board / Proficiency models
Automatically input measurement readings from inspection gauges	▼ Custom connector / Azure IoT Hub connector / Azure IoT Central connector / Microsoft Dataverse connector

Answer:

Requirement	Solution
View, assign, and resolve inspection bottlenecks.	▼ Booking rules / **Schedule board** / Proficiency models
Automatically input measurement readings from inspection gauges	▼ Custom connector / Azure IoT Hub connector / **Azure IoT Central connector** / Microsoft Dataverse connector

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Schedule board
The Dynamics 365 Field Service schedule board provides an overview of resource availability and bookings you can make.
Box 2: Azure IoT Central connector
Information about each machine produced must be transferred to Dynamics 365 Field Service.
The difference between IoT hub and IoT central is that IoT is an application platform that simplifies the creation of Internet of Things solutions. IoT central helps to reduce the challenges of implementing IoT development, operations, and management. IoT Central is a fully managed Software as a Service solution.
Note: There are three ways you can use to connect IoT-enabled devices into the Field Service solution:
? Connected Field Service for Azure IoT Central
? Connected Field Service for Azure IoT Hub
? Connected Field Service for non-Azure IoT providers using the extensible IoT provider framework

NEW QUESTION 10

HOTSPOT - (Topic 3)
You need to recommend components to meet the re-inspection requirements.
Which components should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Component
Initiate the creation of re-inspection orders.	▼ Dataflow Business rule Power Automate flow
Automatically set overall inspection ratings based on the checklist ratings.	▼ From event Business rule Custom action Rollup data type

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Power Automate flow
Scenario: Inspection orders must be automatically marked for re-inspection should a machine fail inspection. The new inspection order must be created by using the originating inspection order as a template.
Box 2: Business rule
? By combining conditions and actions, you can do any of the following with business rules:
? Set column values
? Clear column values
? Set column requirement levels
? Show or hide columns
? Enable or disable columns
? Validate data and show error messages
? Create business recommendations based on business intelligence.

NEW QUESTION 15
- (Topic 3)
You need to recommend a solution to collect the information required to meet reporting requirements.
What should you recommend?

A. Business process flow
B. Business rule
C. Business event
D. Business process modeler

Answer: A

Explanation:
Business rule can create business recommendations based on business intelligence. Scenario: Analytics and reporting
The solution must:
? Provide metrics including existing and upcoming demand by inspection station, average time spent per user at a station, and average time a machine spends at each inspection point.
? Provide metrics per inspector including number of inspections performed by month, and number of inspections per rating type (pass, fail).
? Provide a printed quality certificate to be included with each machine.
Reference:
https://docs.microsoft.com/en-us/learn/modules/define-create-business-rules/

NEW QUESTION 18
HOTSPOT - (Topic 3)
You need to recommend solutions to meet the integration requirements.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Solution
View, assign, and resolve inspection bottlenecks.	▼ Booking rules Schedule board Proficiency models
Automatically input measurement readings from inspection gauges	▼ Custom connector Azure IoT Hub connector Azure IoT Central connector Microsoft Dataverse connector

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Schedule board
Note: The Dynamics 365 Field Service schedule board provides an overview of resource availability and bookings you can make.
When you're looking at the schedule board for the current day, you'll see a blue line that indicates the current time of day. You can also see a picture of all the resources listed on the schedule board. To quickly view contact information for a resource, hover over their name to view the contact card.

Box 2: Azure IoT Central connector
Azure IoT Central makes it easy to connect, monitor, and manage your IoT devices at scale. With the IoT Central V3 connector, you can trigger workflows when a rule has fired, and take actions by executing commands, updating properties, getting telemetry from
devices, and more. Use this connector with your Azure IoT Central V3 application. This connector is available in the following products and regions:

Service	Class	Regions
Logic Apps	Standard	All Logic Apps regions ☑ except the following: - Azure Government regions - Azure China regions
Power Automate	Premium	All Power Automate regions except the following: - US Government (GCC) - US Government (GCC High) - China Cloud operated by 21Vianet
Power Apps	Premium	All Power Apps regions except the following: - US Government (GCC) - US Government (GCC High) - China Cloud operated by 21Vianet

NEW QUESTION 21
HOTSPOT - (Topic 4)
A company uses Dynamics 365 Sales and Power BI.
Sales managers must be able to keep track of changes to their pipeline in the following ways:
? Notify the sales managers when an Opportunity changes sales stage.
? Notify the sales managers when the pipeline drops below 2.5M USD.
? When reviewing the pipeline in Power BI, a sales executive must be able to add a Playbook to an Opportunity.
You need to recommend a solution that meets the company requirements.
Which combination of solutions should you recommend? To answer, select the appropriate option in the answer area.
NOTE: Each correct selection is worth one point.

Notify the sales manager when an Opportunity changes sales stage.	▼
	Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector
	Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 users
	Microsoft Power Automate, data alerts, and Microsoft Office 365 connector

Notify the sales managers when the pipeline drops below 2.5 USD.	▼
	Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector
	Microsoft Power Automate, Power BI data alerts, and Microsoft Office 365 connector
	Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

When reviewing the pipeline in Power BI, a sales executive must be able to add a Playbook to an Opportunity.	▼
	Power BI, Power Apps, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector
	Microsoft Power Automate, Data alerts, Microsoft Dataverse connector, and Microsoft Office 365 users
	Microsoft Power Automate, Data alerts, and Microsoft Office 365 connector
	Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft 365 Outlook connector
Use Microsoft Dataverse as the data source.
While Power Automate is a robust tool with ever-expanding capabilities, it also handles simple tasks with grace. A universal business need for many organizations is the ability to automate email notifications based on certain criteria: an opportunity is won, send an email to the sales manager; a case is closed, send an email to the customer; a work order is completed, send an email to the customer.
Power Automate can easily accommodate this using the Microsoft 365 Outlook connector.
Box 2: Microsoft Power Automate, Power Bi data alerts, and Microsoft 365 connector Data alerts in the Power BI service: Set alerts to notify you when data in your dashboards changes beyond limits you set.
Box 3: Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

NEW QUESTION 25
- (Topic 4)
You are designing a Power Platform solution for a company. The company issues each employee a tablet device.
The company wants to simply the opportunity management processes and automate when possible. The company identifies the following requirements:
? Users must have a visual guide to know which data to enter in each step of the opportunity management process.
? The system must automatically assign the opportunity to a manager for approval
once all data is entered.
? The system must notify an assignee each time an opportunity is assigned to them by using push notifications.
? When a user selects a push notification, the associated opportunity must display.
You need to recommend the Power Platform components that will meet their requirements.
Which three Power Platform components should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Business process flows
B. Power Apps mobile apps
C. Power Virtual Agents chatbots
D. Power Automate desktop flows
E. Power Automate cloud flows

Answer: ABE

Explanation:
A: Use business process flows to define a set of steps for people to follow to take them to a desired outcome. These steps provide a visual indicator that tells people where they are in the business process.
B: Push notifications are used in Power Apps mobile to engage app users and help them prioritize key tasks. In Power Apps, you can create notifications for Power Apps mobile by using the Power Apps Notification connector. You can send notifications to any app that you create in Power Apps.
E: Create a cloud flow when you want your automation to be triggered either automatically, instantly, or via a schedule.
_ Automated flows: Create an automation that is triggered by an event such as arrival of an email from a specific person, or a mention of your company in social media.
Reference:
https://docs.microsoft.com/en-us/power-automate/business-process-flows-overview https://docs.microsoft.com/en-us/powerapps/mobile/power-apps-mobile-notification

NEW QUESTION 26
- (Topic 4)
An organization plans to implement a solution to deliver the complete sales process for its sales teams. The organization does NOT have any physical barcode scanners.
To meet the organization business requirements, the proposed solution must include the following capabilities:
? Create and qualify leads to contacts

? Generate quotes and convert quotes to orders
? Scan product barcodes as part of the order generation process
You need to recommend a solution to help the organization achieve its business requirements.
What should you recommend?

A. Dynamics 365 mobile app and a Power Apps canvas app
B. Dynamics 365 for Phones only
C. Dynamics 365 Customer Service and Dynamics 365 Sales
D. Unified Service Desk

Answer: A

Explanation:
There is barcode scanner control in Power Apps. The control opens a native scanner on an Android or iOS device. The scanner automatically detects a barcode, a QR code, or a data- matrix code when in view.
Use the Dynamics 365 for phones or Dynamics 365 for tablets app to run customer engagement apps (such as Dynamics 365 Sales, Dynamics 365 Customer

Service, and Dynamics 365 Marketing), built on Microsoft Dataverse on your mobile device.
Reference:
https://docs.microsoft.com/en-us/dynamics365/field-service/mobile-power-app-system- barcode-scanning
https://docs.microsoft.com/en-us/dynamics365/mobile-app/overview

NEW QUESTION 29
HOTSPOT - (Topic 4)
A company uses Power Pages for article submissions. The article properties are stored in a table in Microsoft Dataverse and the content of the article is stored in a related Microsoft SharePoint library. The company invites different experts outside its organization to review an article before publishing it. The reviewers are granted access to the articles in Microsoft Dataverse. The company has the following requirements:
• Provide a app to canvas the reviewers that exposes both the article properties and content in read-only mode.
• Once the review is completed, the reviewer saves the review data, and the article and the review no longer appear in the app.
You need to recommend the components to be used for each requirement. Which options should you use?
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 30
HOTSPOT - (Topic 4)
You design a Power Platform solution for a customer. The solution uses Microsoft Dataverse as the data store. You are managing the go-live process for the solution.
The customer reports the following performance issues:
? Form load time is much slower than it was during testing.
? Overall system performance has been significantly slower that it was during testing.
You need to recommend how to troubleshoot system performance.
Which actions should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Review the fields that are on the form
Keep the number of table columns (fields) to a minimum.
The more table columns (formerly referred to as fields) you have in a form, the more data that needs to be downloaded to view each record.
Box 2: Review one to many relationships to verify whether cascade settings are necessary.

NEW QUESTION 34
- (Topic 4)
A company uses manual processes to track interactions with customers. The company wants to use Power Platform to improve productivity.
The company has the following requirements:
? Provide customers with an online portal where they can submit and review cases.
? Ensure that customers can chat online with a customer service representative at any time.
? Route chats to customer service representatives based on skill and availability.
You need to recommend a solution to the company.
Which three components should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Dynamics 365 Virtual Agents chatbots
B. Customer self-service portal
C. Dynamics 365 Field Service
D. Business process flows
E. Omnichannel for Customer Service

Answer: BDE

Explanation:
B: Customer self-service portal: A customer self-service portal enables customers to access self-service knowledge, support resources, view the progress of their cases, and provide feedback.   Note: Based on the selected environment in Power Apps, you can create a Dataverse starter portal or a portal in an environment containing customer engagement apps (Dynamics 365 Sales, Dynamics 365 Customer Service, Dynamics 365 Field Service, Dynamics 365 Marketing, and Dynamics 365 Project Service Automation).
E: Omnichannel for Customer Service offers a suite of capabilities that extend the power of Dynamics 365 Customer Service Enterprise to enable organizations to instantly connect and engage with their customers across digital messaging channels.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/portals/portal-templates https://docs.microsoft.com/en-us/dynamics365/customer-service/embed-chat-widget-portal

NEW QUESTION 37
- (Topic 4)
You are designing a Power Platform solution.
The company wants its development team to adopt the construction of repeatable components for its
implementation team to reuse on different entities and forms.
You need to recommend a technology that meets these requirements. Which technology would you recommend the developers adopt to assist the implementation team?

A. JavaScript
B. Power Apps Component Framework control
C. Web resource
D. Canvas app

Answer: B

Explanation:
                    Power Apps component framework empowers professional developers and app makers to create code components for model-driven and canvas apps (public preview) to provide enhanced user experience for the users to work with data on forms, views, and dashboards.
Reference:
https://docs.microsoft.com/en-us/powerapps/developer/component-framework/overview

NEW QUESTION 39
HOTSPOT - (Topic 4)
You are a Microsoft Power Platform architect designing integrations for a project. You have the following integration requirements:
• Post requests to a system that is not always available and limited in its ability to process high volumes of messages.
• Allow peer-to-peer communication between on-premises services and cloud-based model-driven Microsoft Power Platform apps.
• Stream large volumes of data from the company's website to a live Power BI dashboard.
• Support enterprise-level integrations with Dynamics 365 that can be billed on a consumption basis.
You need to use an Azure service for the integration requirements.
Which Azure services should you use? To answer, select the appropriate options in the answer area?
NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Service
Post requests to a system that is not always available and limited in its ability to process high volumes of messages.	Azure Service Bus ▼ **Azure Service Bus** Azure Notification Hub Azure Active Directory Azure ExpressRoute
Allow peer-to-peer communication between on-premises services and cloud-based model-driven Microsoft Power Platform apps.	Azure Relay ▼ **Azure Relay** Azure SQL Azure Cognitive Services Azure API Management
Stream large volumes of data from the company's website to a live Power BI dashboard.	Azure Event Hubs ▼ **Azure Event Hubs** Azure Service Bus Azure SQL
Support enterprise-level integrations with Dynamics 365 that can be billed on a consumption basis.	Azure Functions ▼ Azure Logic Apps **Azure Functions** Azure Service Bus

Answer:

Answer Area

Requirement	Service
Post requests to a system that is not always available and limited in its ability to process high volumes of messages.	Azure Service Bus ▼ **Azure Service Bus** Azure Notification Hub Azure Active Directory Azure ExpressRoute
Allow peer-to-peer communication between on-premises services and cloud-based model-driven Microsoft Power Platform apps.	Azure Relay ▼ **Azure Relay** Azure SQL Azure Cognitive Services Azure API Management

A. Mastered
B. Not Mastered

**Answer:** A

NEW QUESTION 42
- (Topic 4)
You are designing the data model for a school. The school wants to track students' enrollments in courses.
The system must meet the following requirements: Track the courses in which each student is enrolled. Track the students that are enrolled in each course.
Track dates when each student enrolled in each course and the person who approved the enrollment.
Allow users to create a report that details which students are enrolled in which courses. You need to recommend a data model that will fit the school's requirements.
Which logical model should you recommend?

A.

Student ◄ ── one-to-many ──► Enrollment

Course ◄ ── one-to-many ──────┘

B.

Student ◄ ── many-to-many ──► Course

C.

Student ◄ ── one-to-many ──► Course

D.

Student ◄ ── many-to-one ──► Course

A. Option A

B. Option B

Option C

C: Option D

Answer: A

Explanation:
Need a relationship table.
N:N (Many-to-Many): A table relationship that depends on a special Relationship table, sometimes called an Intersect table, so that many rows of one table can be related to many rows of another table.
When viewing rows of either table in a N:N relationship you can see a list of any rows of the other table that are related to it. Reference:
https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-entity- relationships

NEW QUESTION 45
HOTSPOT - (Topic 4)
You are supporting a recent go-live for a model-driven app that includes mobile offline functionality.
Users report the following issues:
? The process of downloading initial metadata for the app takes hours to complete.
? Some account views are unavailable when the app is offline.
? Changes to users' security privileges are not reflected in the mobile app.
? Contact data is not available when the app is offline.
You need to resolve the mobile app performance issues.
What should you review? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Issue	Resolution
The process of downloading initial metadata for the app takes hours to complete.	▼ Synchronize the mobile app. Remove organization data filters. Reduce records included in the profile filter.
Changes to users' security privileges are not reflected in the mobile app.	▼ Synchronize the mobile app. Reduce records included in the profile filter. Remove reference to tables not included in mobile profile.
Some account views are unavailable when the app is offline.	▼ Synchronize the mobile app. Reduce records included in the profile filter. Remove reference to tables not included in mobile profile.
Contact data is not available when the app is offline.	▼ Reduce records included in the profile filter. Update mobile profile to include contact information. Remove reference to tables not included in mobile profile.

Answer:

Issue	Resolution
The process of downloading initial metadata for the app takes hours to complete.	▼ Synchronize the mobile app. ~~Remove organization data filters.~~ *Reduce records included in the profile filter.*
Changes to users' security privileges are not reflected in the mobile app.	▼ *Synchronize the mobile app.* Reduce records included in the profile filter. Remove reference to tables not included in mobile profile.
Some account views are unavailable when the app is offline.	▼ Synchronize the mobile app. Reduce records included in the profile filter. *Remove reference to tables not included in mobile profile.*
Contact data is not available when the app is offline.	▼ Reduce records included in the profile filter. *Update mobile profile to include contact information.* Remove reference to tables not included in mobile profile.

A. Mastered
B. Not Mastered

Answer: A

NEW QUESTION 46
DRAG DROP - (Topic 4)
A new customer asks you to design a solution for a Power Apps app that uses Microsoft Dataverse.

The customer wants to keep the service process simple and save on both licensing and development time.
You need to recommend solutions for the customer.
What should you recommend? To answer, drag the appropriate setting to the correct drop targets. Each source may be used once, more than once, or not at all.
You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Solutions	Answer Area	
	Scenario	Solution
Canvas app	Show the app in Microsoft Outlook.	Solution
Model-driven app	Use Universal Resource Scheduling.	Solution
Dynamics 365 Customer Service	Take notes on a mobile phone and record GPS coordinates automatically.	Solution

Answer:

Solutions	Answer Area	
	Scenario	Solution
Canvas app	Show the app in Microsoft Outlook.	Model-driven app
Model-driven app	Use Universal Resource Scheduling.	Dynamics 365 Customer Service
Dynamics 365 Customer Service	Take notes on a mobile phone and record GPS coordinates automatically.	Canvas app

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Model-drive app
Integration with Microsoft Outlook requires a Model-driven app.
Box 2: Dynamics 365 Customer Service
Schedule anything in Dynamics 365 using Universal Resource Scheduling. You can enable scheduling for any entity in Dynamics 365 Sales, Field Service, Customer Service, and Project Service Automation, including custom entities.
Box 3: Canvas app

NEW QUESTION 47
- (Topic 4)
A company plans to automate business processes by using Power Automate. You identity a subprocess that must be implemented across multiple flows. You need to implement the subprocess so that it is maintainable and easy to navigate. What should you do?

A. Save a copy of the subprocess and then add any additional actions into the flow.
B. Initiate the subprocess with an automated trigger.
C. Copy the actions of the subprocess into the flow by using the clipboard.
D. Initiate the subprocess with an instant trigger.

Answer: B

NEW QUESTION 51
- (Topic 4)
You are designing a Microsoft Power Platform solution that uses Microsoft Dataverse.
You need to recommend a way to update currency exchange rates within Microsoft Dataverse.
What are two possible ways to achieve this goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Review AppSource for prebuilt solutions.
B. Create a Power Automate flow that uses a custom connection or HTTP request to an outside source for exchange rates.
C. Embed an iframe that points to a currency exchange service into a model-driven app.
D. Use the Power Bl connector to establish a link that updates Microsoft Dataverse with the current exchange rate.

Answer: AB

Explanation:
B: We need is a source for exchange rates. There are some published connectors, but you also use a free service called Exchange Rates API, which are based on the European Central Bank, and create a custom connection.
Now that we have our custom connector defined and have a way to request the latest exchange rates, the next step is to create a Power Automate flow that will update all of currencies setup in our Dataverse environment.
Dataverse is a multicurrency system, in which each record can be associated with its own currency. This currency is called the transaction currency. The multicurrency features enable users to perform financial transactions like opportunities, quotes, orders, and invoices in multiple currencies. This feature also provides a currency choice to the end user when a financial transaction occurs.
Reference:
https://readyxrm.blog/2021/03/10/updating-currency-exchange-rates-in-dataverse/

NEW QUESTION 56
- (Topic 4)
You are designing a Microsoft Power Platform solution to help a company manage sales leads.
The solution has the following requirements:
? Ensure that users follow a predefined sales process regardless of the device that employees use to access the app.
? Respond to sales events by using organization-defined best practices.
You need to recommend a component for the app. What should you recommend?

A. Power Automate cloud flow
B. Business process flow
C. Power Automate desktop flow
D. Playbook

Answer: B

Explanation:
You can help ensure that people enter data consistently and follow the same steps every time they work with a customer by creating a business process flow. For example, you might want to create a business process flow to have everyone handle customer service requests the same way, or to require that people get approval for an invoice before submitting an order. Business process flows use the same underlying technology as other processes, but the capabilities that they provide are very different from other features that use processes.
Reference:
https://docs.microsoft.com/en-us/power-automate/business-process-flows-overview

NEW QUESTION 58
HOTSPOT - (Topic 4)
A company plans to create a Microsoft Power Platform solution that integrates with Dynamics 365 Sates. The solution must meet the following requirements:
• Connect directly with a Microsoft Azure SQL database as an external data source at run time where specific data is available in the Dynamics 365 Sales solution without the need for data replication.
• An external system needs to send data to the company's Dynamics 365 Sales solution. You need to recommend the most suitable solution to integrate Dynamics 365 Sales with
both systems.
What should you recommend? To answer, select the appropriate option in the answer area.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 59
DRAG DROP - (Topic 4)
You are a Microsoft Power Platform architect.
You need to design a process to transport configuration and test data from one environment to a separate environment
Which four actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer area	
Import the ZIP file data.		1	
Import the CSV file data.		2	
Define the schema of the source data to be exported.		3	
Use the schema to export data.		4	
Download the Configuration Migration tool from NuGet.			
Create personal views to define the source data to be exported.			
Download the schema of the source data to be exported.			
Download the Configuration Migration tool from AppSource.			

A. Mastered
B. Not Mastered

Answer: A

Explanation:
https://learn.microsoft.com/en-us/power-platform/admin/manage-configuration-data

NEW QUESTION 63
HOTSPOT - (Topic 4)
A company uses Microsoft Dataverse to store patient Information-Patient information is managed using Dataverse forms. The company must enforce the following rules to manage data quality:
• Show or hide tabs in the main form based on the column value selected.
• Add a discount code automatically when a new patient row is added. You need to recommend a solution.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Solution
Show or hide tabs in the main form based on the column value selected.	Business process flow ▼
	Plug-in
	Client script
	Business rule
	Business process flow
Add a discount code automatically when a new patient row is added.	Business rule ▼
	Client script
	Business rule
	Classic workflow
	Business process flow

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Answer Area

Requirement	Solution
Show or hide tabs in the main form based on the column value selected.	Business process flow ▼
	Plug-in
	Client script
	Business rule
	Business process flow
Add a discount code automatically when a new patient row is added.	Business rule ▼
	Client script
	Business rule
	Classic workflow
	Business process flow

NEW QUESTION 66
- (Topic 4)
You are designing a Microsoft Power Platform solution that will include multiple applications.
You have the following requirements:
• Support agents managing cases.
• Project managers reviewing and updating their projects.
• Stock managers managing warehouses.
• New site visitors self-registering.
• Employees tracking time entries.
Which three requirements can you meet by implementing role-based applications? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

A. New site visitors self-resisting.
B. Project managers reviewing and updating their projects.
C. Stock managers managing warehouses.
D. Support agents managing cases.
E. Staff tracking time entries.

Answer: BCD

NEW QUESTION 67
DRAG DROP - (Topic 4)
A company plans to integrate Microsoft Power Platform with existing systems, including Microsoft Dynamics 365 Omni channel for Customer Service.
You need to recommend a solution for each requirement.
Which components should you recommend for the requirements?
To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Solutions	Answer Area	
Custom API	**Requirement**	**Solution**
Custom pages	Display information about the contact in the Omnichannel app.	
Microsoft Power Virtual Agent	Ensure only tables needed are exposed for integration purposes.	
	Display data hierarchy from other systems within Dynamics 365 without saving the data within Microsoft Dataverse.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Solutions	Answer Area	
Custom API	**Requirement**	**Solution**
Custom pages	Display information about the contact in the Omnichannel app.	Microsoft Power Virtual Agent
Microsoft Power Virtual Agent	Ensure only tables needed are exposed for integration purposes.	Custom API
	Display data hierarchy from other systems within Dynamics 365 without saving the data within Microsoft Dataverse.	Custom pages

NEW QUESTION 70
HOTSPOT - (Topic 4)
You are designing the security model for a Power Platform solution. The security model must meet the following requirements:
? Restrict sharing of data between Power Automate connectors.
? Ensure that environment administrators only see users who require access in the enabled user list.
You need to recommend security features for the solution.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Feature
Restrict sharing of data between Power Automate connectors	▼ Security group / Data loss prevention policy
Ensure that environment administrators only see users who require access in the enabled user list.	▼ Security group / Data loss prevention policy

Answer:

Requirement	Feature
Restrict sharing of data between Power Automate connectors	▼ Security group / **Data loss prevention policy**
Ensure that environment administrators only see users who require access in the enabled user list.	▼ **Security group** / Data loss prevention policy

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Data loss prevention policy
Data loss prevention (DLP) policies enforce rules for which connectors can be used together by classifying connectors as either Business or Non-Business. If you put a connector in the Business group, it can only be used with other connectors from that group in any given app or flow. Sometimes you might want to block the

usage of certain connectors altogether by classifying them as Blocked.
Box 2: Security group
If your company has multiple Microsoft Dataverse environments, you can use security
groups to control which licensed users can be a member of a particular environment.

NEW QUESTION 75
DRAG DROP - (Topic 4)
A company uses Microsoft Power Platform solutions.
The company plans to set up application lifecycle management (AIM) capabilities to store the solutions in source control, which will be used to automate the release process.
You need to set up the initial ALM infrastructure to store the solutions in source control. Which four actions should you perform in sequence?
To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 78
DRAG DROP - (Topic 4)
A company plans to integrate a model-driven app with external data sources. The company has the following requirements:
• Consume data in its data warehouse from Microsoft Dataverse.
• Use a plug-in to retrieve information from an external service.
You need to recommend a Microsoft Azure component for each requirement.
Which Azure components should you recommend? To answer, drag the appropriate Azure components to the correct requirements.
Each Azure component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 79
HOTSPOT - (Topic 4)
You are working with a customer to plan a go-live deployment to their production environment. The solution includes several apps and environment variables. The superuser team manages the production environment that is secured by using a specific environment Azure AD security group.
The following issues have been identified:
• The super user team cannot access make.powerapps.com to open and set the environment variables.
• Users are added to the environment Azure AD security group and are not able to access the model-driven app.

• Users are added to the environment Azure AD security group and are not able to access the canvas app.
You need to resolve the issues.
What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Issue	Resolution
The superuser team cannot set the environment variables.	Assign the System Customizer role. ▼
	Assign the System Customizer role.
	Assign the Basic User role.
	Assign the Service Reader role.
	Assign the Office Collaborator role.
Users cannot access the model-driven app.	Assign the Basic User role. ▼
	Assign the Basic User role.
	Assign the Service Reader role.
	Assign the Office Collaborator role.
	Add the Azure AD Security Group.
Users cannot access the canvas app.	Add users to an Azure AD Security Group. ▼
	Assign the System Customizer role.
	Assign the Service Reader role.
	Add users to the superuser team.
	Add users to an Azure AD Security Group.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Issue	Resolution
The superuser team cannot set the environment variables.	Assign the System Customizer role. ▼
	Assign the System Customizer role.
	Assign the Basic User role.
	Assign the Service Reader role.
	Assign the Office Collaborator role.
Users cannot access the model-driven app.	Assign the Basic User role. ▼
	Assign the Basic User role.
	Assign the Service Reader role.
	Assign the Office Collaborator role.
	Add the Azure AD Security Group.
Users cannot access the canvas app.	Add users to an Azure AD Security Group. ▼
	Assign the System Customizer role.
	Assign the Service Reader role.
	Add users to the superuser team.
	Add users to an Azure AD Security Group.

NEW QUESTION 82
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
                              After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A company uses a Microsoft Excel sheet to manage its loan application process. The company wants to optimize the process.
You need to discover inefficiencies in the process.
Solution: Upload the activity data stored in the Excel sheet to the process advisor feature. Use process mining to discover inefficiencies in the process.
Does the solution meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 84
HOTSPOT - (Topic 4)
You are supporting the go-live process for a company. The company is responsible for migrating data to the Microsoft Power Platform by using a custom solution.
The company reports the following issues:
• Migration processes fail due to operation timeouts.
• Records that include lookup columns often fail to load. You need to recommend a solution.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Issue	Solution
Migration processes fail due to operation timeouts.	Increase multithreading and/or batch size settings. ▼
	Increase multithreading and/or batch size settings.
	Decrease multithreading and/or batch size settings.
	Ensure you are loading data into all tables at the same time.
	Ensure you are loading data into tables in a particular order.
Records that include lookup columns often fail to load.	Ensure you are loading data into tables in a specific order. ▼
	Increase multithreading and/or batch size settings.
	Decrease multithreading and/or batch size settings.
	Ensure you are loading data into all tables at the same time.
	Ensure you are loading data into tables in a specific order.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Issue	Solution
Migration processes fail due to operation timeouts.	Increase multithreading and/or batch size settings. ▼
	Increase multithreading and/or batch size settings.
	Decrease multithreading and/or batch size settings.
	Ensure you are loading data into all tables at the same time.
	Ensure you are loading data into tables in a particular order.
Records that include lookup columns often fail to load.	Ensure you are loading data into tables in a specific order. ▼
	Increase multithreading and/or batch size settings.
	Decrease multithreading and/or batch size settings.
	Ensure you are loading data into all tables at the same time.
	Ensure you are loading data into tables in a specific order.

NEW QUESTION 86
HOTSPOT - (Topic 4)
You are designing a Microsoft Power Platform solution for a company.
Which components should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Component
Allow users to change the status of a record only if a custom column named Reason is populated.	▼ Business rule Power Automate flow Asynchronous plug-in Background workflow
Prompt users to update each opportunity product record when an opportunity is won or lost.	▼ JavaScript code Real-time workflow Power Automate flow Asynchronous plug-in

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Business rule
You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.
Box 2: Power Automate flow
Trigger the Power Automate flow with "When a record is updated", then add a Condition in the flow and configure it with Status Label equals to Won.

NEW QUESTION 89

- (Topic 4)
A local bank uses Microsoft Power Platform apps to store customer data.
The bank IT director discovers that all employees can see the social security numbers of their customers. The IT team does not understand how field-level security works and needs help with the design.
You need to recommend a solution to the bank that meets the following requirements:
• The system must restrict access to customer social security numbers to the vice president of finance only.
The vice president of finance must be able to read and update customer social security numbers.
Which two actions should you recommend? Each correct answer presents part of the solution.
NOT: Each correct selection is worth one point

A. Set the values for the read permission and for the update permission for social security number to yet
B. Enable field-level security for the member table.
C. Create a held-level security profile.
D. Enable field-level security for the social security number column.

Answer: CD

Explanation:
Field-level security is managed by the security profiles. To implement field-level security, a system administrator performs the following tasks.
? Enable field security on one or more fields for a given entity.
? Associate one more existing security profiles, or create one or more new security profiles to grant the appropriate access to specific users or teams.
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/field-level-security

NEW QUESTION 93
- (Topic 4)
You are evaluating a solution design for a model-driven app that will have a large number of complex forms.
Many of the forms take up to 10 seconds to load.
You need to recommend solution to speed up loading times for the forms.
Which two solutions should you recommend? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Consolidate and reduce scripts.
B. Use synchronous JavaScript requests.
C. Move scripts into the OnLoad event.
D. Remove unnecessary fields.

Answer: AD

Explanation:
Controls that require extra data beyond the primary record produce the most strain on form responsiveness and loading speed. These controls fetch data over the network and often involve a waiting period (seen as progress indicators) because it can take time to transmit the data.
Keep only the most frequently used of these controls on the default tab.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/design-performant- forms

NEW QUESTION 98
- (Topic 4)
You are assessing the capabilities of a project few a customer in the education sector. the solution must meet the following requirements
• include curriculum and student management capabilities.
• Conform to on-going Microsoft platform upgrades.
• Minimize custom coding and configuration
You need to recommend a solution. What should you recommend?

A. Power Apps portal
B. Microsoft Power Platform admin center
Microsoft 365 admin center
D: AppSource

Answer: A

NEW QUESTION 101
- (Topic 4)
You are designing a model-driven app that allows a company to manage sales opportunities.
The company has a complex security model that includes the following requirements:
? The vice president of sales must be able to see opportunities for sales managers and sales representatives.
? Sales managers must be able to see opportunities for all sales representatives.
? Sales representatives must only see opportunities that they own.
You need to recommend security tools for controlling user access.
Which two tools should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Account hierarchy
B. Field security profile
C. Position hierarchy
D. Security roles

Answer: CD

Explanation:
With the position hierarchy security, a user at a higher position has access to the records owned by a lower position user or by the team that a user is a member of, and to the records that are directly shared to the user or the team that a user is a member of.
The hierarchy security model is an extension to the earlier security models that use business units, security roles, sharing, and teams. It can be used in conjunction with all other existing security models.
Reference:
https://docs.microsoft.com/en-us/dynamics365/customerengagement/on- premises/developer/security-dev/
hierarchical-security-control-access-entities

NEW QUESTION 105
DRAG DROP - (Topic 4)
You are a Microsoft Power Platform solution architect capturing requirements for a national retail chain protect. The project has the following requirements
• Retail employees must use the application on a company- prowled tablet device.
• The app must store data offline
• Environment capacity must be monitored to ensure usage stays within 80 percent of available capacity
• Apps are shared with security group teams for users to access.
You need to identify the project s functional and non-functional requirements.
How should you categorize the requirements? To answer, drag the appropriate categories to the correct requirements. Each category may be used once, more than once, or not at all You may need to drag the split bar between panes or scroll to view content.

Answer:

A. Mastered
B. Not Mastered

Answer: A

NEW QUESTION 110
HOTSPOT - (Topic 4)
You need to design a Power Platform solution that meets the following requirements:
? Capture data from a row during deletion to be used in an automated process.
? Use AI to process forms and automate data entry from paper-based forms.
Which requirements can be met by using out-of-the box Power Platform components?
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Yes
This can be done with Dataverse flows: The When a row is added, modified or deleted trigger runs a flow whenever a row of a selected table and scope changes or is created.
Box 2: Yes
AI Builder is a Microsoft Power Platform capability that provides AI models that are designed to optimize your business processes. AI Builder enables your business to use AI to automate processes and glean insights from your data in Power Apps and Power Automate.

NEW QUESTION 114
HOTSPOT - (Topic 4)
You are designing a Power Platform solution for a company that provides in-home appliance maintenance. When a customer schedules a service appointment, a dispatcher assigns one technician for a specific time and location.
The solution must capture information about the technician assigned to each appointment and the list of tools that the technician must bring to the appointment.
You need to recommend the data type for the captured information.

Which data type should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Data type
Capture information about the technician assigned to each service appointment.	▼ Choice Choices Customer Lookup
Select the tools that the technician must bring to an appointment.	▼ Choices Customer Lookup Text

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Choice
Like Choices below, but can only select one of the option.
Box 2: Choices
You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form they can select one, multiple, or all the values displayed in a drop-down list.

NEW QUESTION 115
- (Topic 4)
You are designing a Power Platform solution.
During quality assurance testing the API limits are reached. You need to identify and resolve the issue.
Which two actions should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Allocate Microsoft Dataverse capacity add-on subscriptions.
B. Use the out-of-the-box User Summary report from the Reports section of the solution's model-driven app.
C. In the Power Platform admin center Review the Home tab Dataverse analytics dashboard.
D. In the Power Platform admin center, review the Usage section of the Power Apps analytics dashboard.
E. In the Power Platform admin center, review the Runs section of the Power Automate analytics dashboard.
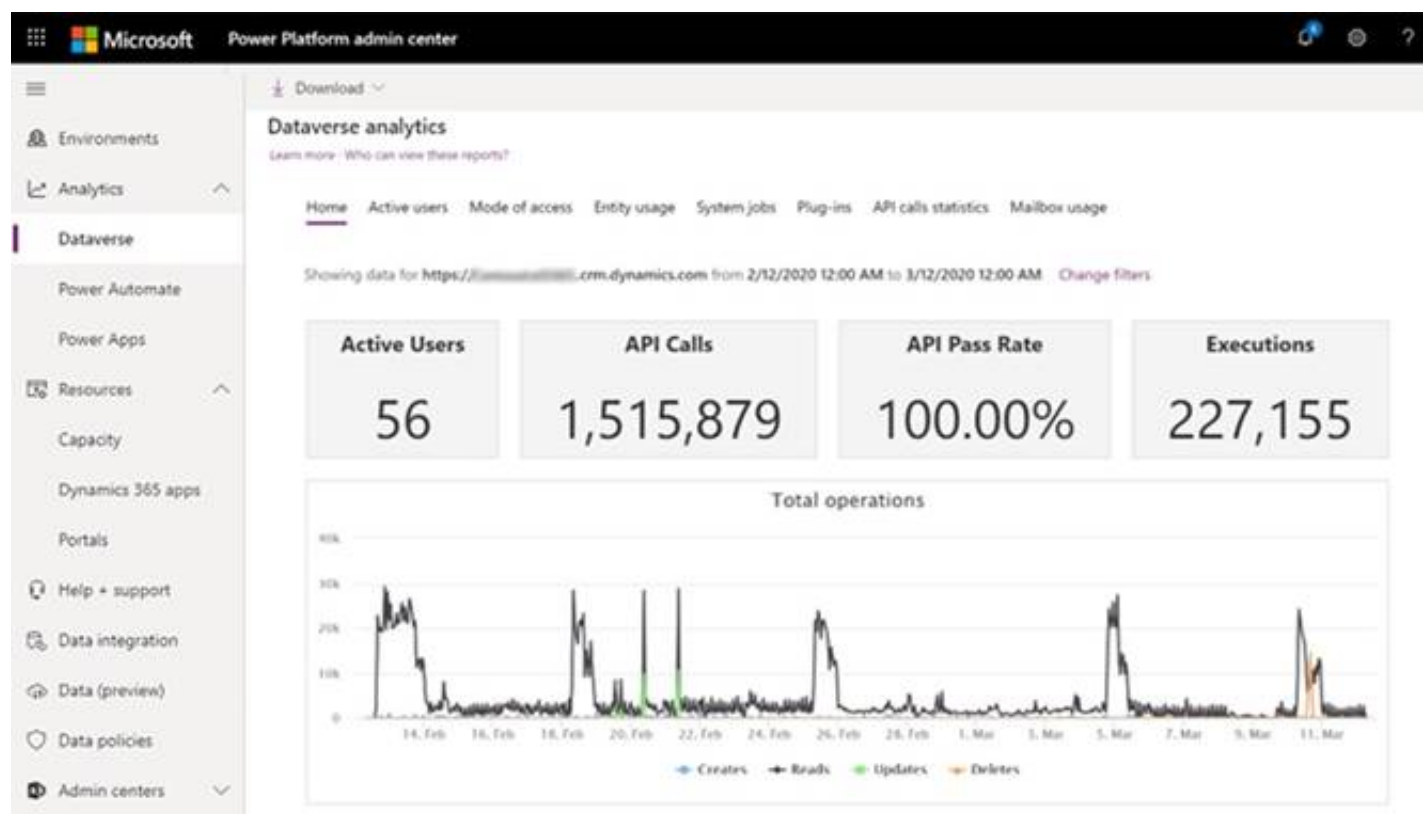

Answer: AC

Explanation:
A: When users exceed their limits, administrators can see this in the admin center (see below). You can do either one of the following:
? Adjust the app or flow to use fewer API requests
? Purchase the Power Apps and Power Automate capacity add-on for your organization.
C: Home (default) Dashboard.
This is the default dashboard that provides information on the number of active Dataverse users, storage usage, the most active workflows, and more.

API Calls: API Calls Number of API calls that were made by the Dataverse environment for the selected time period.

Reference:
https://docs.microsoft.com/en-us/power-platform/admin/api-request-limits-allocations https://docs.microsoft.com/en-us/power-platform/admin/analytics-common-data-service

NEW QUESTION 116
- (Topic 4)
You are designing an integration between an Azure SQL database and a model-driven app-You have the following requirements:
• Audit updates to the data.
• Assign security role access to tables at the user level.
• Assign security role access to tables at the organization level.
• Enable change tracking.
• Add and update data.
You need to implement virtual tables.

Which two requirements can you meet by using virtual tables? Each correct answer presents a complete solution.
NOTE Each correct selection is worth one point.

A. Enable change tracking.
B. Assign security role access to tables at the user level.
C. Add and update data.
D. Assign security role access to tables at the organization level.
E. Audit updates to the data.

Answer: BD

NEW QUESTION 119
- (Topic 4)
You are implementing a solution that includes applications which perform high-volume Microsoft Dataverse operations.
The applications must not experience a loss of functionality or loss of performance due to service protection API limits.
You need to evaluate metrics for the service protection API limits.
Which three metrics should you evaluate? Each correct answer pat of the solution. NOTE Each correct selection is worth one point.

A. Number of concurrent connections per user account.
B. Number of API requests per web server.
C. Amount of API calls made within plug-in code.
D. Amount of execution time that can be used for each connection.
E. Number of API requests per connection.

Answer: ADE

NEW QUESTION 122
HOTSPOT - (Topic 4)
A company is creating a Power Platform solution to manage employees.
The company has the following requirements:
? Allow only the human resource manager to change an employee's employment status when an employee is dismissed.
? Allow only approved device types to access the solution and company data.
You need to recommend a solution that meets the requirements.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Configuration
Allow only the human resource manager to change an employee's employment status when an employee is dismissed.	▼ Team access Privacy preference Field security profile Hierarchy security profile
Allow only approved device types to access the solution and company data.	▼ Endpoint security Compliancy policy Conditional access Mobile threat integration

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: Field security profile
Record-level permissions are granted at the entity level, but you may have certain fields associated with an entity that contain data that is more sensitive than the other fields. For these situations, you use field-level security to control access to specific fields.
Field-level security is available for the default fields on most out-of-box entities, custom fields, and custom fields on custom entities. Field-level security is managed by the security profiles.
Box 2: Compliancy policy
Compliance policy settings – Tenant-wide settings that are like a built-in compliance policy that every device receives. Compliance policy settings set a baseline for how compliance policy works in your Intune environment, including whether devices that haven't received any device compliance policies are compliant or noncompliant.
Note: Mobile device management (MDM) solutions like Intune can help protect organizational data by requiring users and devices to meet some requirements. In Intune, this feature is called compliance policies.
Compliance policies in Intune:
Define the rules and settings that users and devices must meet to be compliant.
Include actions that apply to devices that are noncompliant. Actions for noncompliance can alert users to the conditions of noncompliance and safeguard data on noncompliant devices.
Can be combined with Conditional Access, which can then block users and devices that don't meet the rules.

NEW QUESTION 127
- (Topic 4)
A company uses a third-party cloud-based app to make real-time business decisions. The app has a RESTful API.
You must design a Microsoft Power Platform solution that interacts with the third-party app. Changes made in the Microsoft Power Platform solution must be reflected in the cloud app.
You need to recommend technologies to integrate the Microsoft Power Platform solution with the cloud app.
Which two technologies should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Scheduled Power Automate cloud flow with a custom connector to the cloud app
B. Power Virtual Agents
C. Custom plug-on registered with Microsoft Dataverse
D. Model-driven app

Answer: AC

Explanation:
A: To enable Logic Apps, Power Automate, or Power Apps to communicate with the REST or SOAP API, use a custom connector, which is a wrapper around a REST API (Logic Apps also supports SOAP APIs).
C: Custom APIs are a powerful way to connect to any existing API, hosted anywhere, from PowerApps. You do not need a PowerApps Enterprise subscription to register or use a Custom API.
Custom APIs are RESTful endpoints that you can connect to and use from PowerApps. All you'll need is a Swagger definition file for your endpoint.
Reference:
