NEW QUESTION 5
HOTSPOT - (Topic 6)
A company uses finance and operations apps. The company operates and ships to only the United States, Canada, and the United Kingdom. The company has online stores for each of the countries/regions.
The company requires its customers to purchase online merchandise from only the country/region where the customer is physically located and redirects the customer to the appropriate site.
You need to configure the requirements.
What should you configure? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Configuration
Define the country/region per online store.	▼
	Associate the country/region to the store.
	Create a party ID.
	Assign an address format.
	Create a default customer.
Ensure that customers purchase from only the country/region where they are physically located.	▼
	Set up geo detection.
	Split the country/region by statement method.
	Assign an organizational address.
	Create a default customer.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Associate the country/region to the store.
Associate countries and regions with online stores in Commerce headquarters
Countries and regions are associated with online stores (also known as online channels) in Commerce headquarters. When you associate a country or region with an online store, you indicate that customers who reside in that country or region should view the site that is mapped to that online store. You can associate multiple countries and regions with an online store as you require.
To associate countries or regions with an online store, follow these steps.
? Go to Retail and Commerce > Channels > Online stores, or search for "online stores" in the search box.
? Open the online channel that you want to associate countries or regions with.
? On the Countries/Regions FastTab, select Add, and then, in the Country/region field, select the country or region.
? Repeat these steps for any other countries or regions that you want to associate with the online channel.
Box 2: Set up geo detection
The geo detection and redirection feature in Dynamics 365 Commerce lets you detect your customers' geographic locations and then use that information to recommend the site that is most appropriate for the country or region where each customer lives.

NEW QUESTION 100
HOTSPOT - (Topic 6)
A company implements Dynamics 365 for Finance and Operations. It sets up and configures the system to support reporting requirements using Microsoft Power
BI.

The customer service manager wants to create reports in Power BI for analyzing customer order patterns, order fulfillment metrics, customer satisfaction KPIs, and customer service representative goal metrics. These reports compare aggregated information across multiple demographic regions and business lines for current trends against historic information.

The manager would like to use the reports to make individual team performance more visible to the managerial and executive teams. Since reports will be used by those teams as well as mobile users, the manager would like the report response to reflect the latest data without requiring the user to wait.

You need to determine which tool or functionality best fits the scenario.

Which feature or functionality should you use? To answer, select the appropriate feature or functionality in the dialog box in the answer area.

NOTE: Each correct selection is worth one point

Answer Area

Scenario	Feature or functionality
Stage the aggregate data for use by the reports.	Dynamics 365 system administration settings / Power BI desktop client / Lifecycle Services
Set the data source to use DirectQuery.	Dynamics 365 system administration settings / Power BI desktop client / Lifecycle Services
Publish the new reports to the production environment.	Dynamics 365 system administration settings / Power BI desktop client / Lifecycle Services

NEW QUESTION 108
- (Topic 6)
A company implements Dynamics 365 Supply Chain Management. The company is starting a short-term project that has a rigid budget.
The warehouse manager requests an environment that has demo data so that users can look at samples of the warehouse module. A cloud scale unit is not required.
You need to recommend a cost-effective environment. What should you recommend?

A. Tier 3
B. Tier 1
C. Tier 2
D. Tier 4

Answer: B

Explanation:
Environment types
You can use the following environment types for your project:
* Environment image (VHD) – These additional Tier-1 environments are hosted on- premises by using a virtual hard disk (VHD) that can be downloaded from Microsoft Dynamics Lifecycle Services (LCS).
* Standard – This environment is included in the standard offer and is managed by Microsoft in a Microsoft subscription. Standard environments include the production environment and a Tier-2 Standard Acceptance Test environment.
* Add-on – The add-on environments are in a Microsoft-managed subscription that the customer has purchased in addition to the standard offer. For example, an add-on environment might be an additional Tier-4 environment for performance testing.
* Cloud-hosted – Cloud-hosted environments are additional environments that are managed by the customer or partner in a customer or partner Microsoft Azure subscription. A cloud-hosted environment can include a Tier-1 demo environment.

Answer: A

Explanation:
Box 1: Dynamics 365 Commerce
Loyalty programs can help increase customer loyalty by rewarding customers for their interactions with the retailer's brand. In Dynamics 365 Commerce, you can set up simple or complex loyalty programs that apply across your legal entities in any commerce channel.
You can set up your loyalty program so that they include the following options.
* Set up multiple types of rewards that you offer in your loyalty programs, and track participation in your loyalty programs.
* Etc.
Box 2: Dynamics 365 Commerce
You can manage clienteling in Dynamics 365 Commerce.
Clienteling empowers sales associates to become trusted advisors and establish long-term relationships with their customers. Dynamics 365 Customer Insights helps organizations to gather disparate data, be it from transactional, observational, or behavioral sources, to gain a unified view of customers, and derive intelligent insights that drive key business processes.

NEW QUESTION 198
DRAG DROP - (Topic 6)
A company uses Dynamics 365 Supply Management.
You must implement a guided process to manage actions that be performed when a customer reports a delivery that includes missing items.
You need to configure case management.
Where should you complete each configuration? To answer, drag the appropriate locations to the correct requirement. Each location may be used once, more than once, or into at all. You may need to drag the split bar between panes scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Case Process
You should set up processes that employees must follow for the cases that are opened in your organization. Processes help guarantee consistency for the people who are involved in cases, and also help employees resolve cases faster and more efficiently. You can set up a process for each case category that cases are assigned to. Although planning a separate process for each case type takes time, case resolution will go much more smoothly if the processes are planned out.
Box 2: Case category security Case category security by role
Only appropriate employees in an organization should have access to cases and related information. To control which employees have access to view, create, and update different types of cases, you can assign security roles to case category types. You must determine which security roles should have access to the various case category types.
Box 3: Case workflow
You can setup cases in a deeper way by using workflows in Organization administration.

NEW QUESTION 208
- (Topic 4)
You need to implement the testing feature to address the manufacturing business process concerns.
Which feature should you use?

A. Derived
B. Assignment
C. Operators
D. Channel
E. Snapshot

Answer: A

Explanation:
With the different bike configurations, Adventure Works Cycles would like to use a single business process but test against 10 different data configurations to streamline errors against data variations in the manufacturing process.
Derived test cases
The Regression suite automation tool (RSAT) lets you use the same task recording with multiple test cases, so that you can run a task with different data configurations. Select a test case in the Regression suite automation tool and then select New > Create Derived Test Case. This creates a child test case in Azure DevOps. The resulting derived test case is linked to its parent test case in Azure DevOps. It has an Excel parameters file attached but no recording file. The derived test case will appear in the Regression suite automation tool grid under the same test suite with the Derived column selected. By default, derived test cases are named after their parent test case with a numeric suffix.
