- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Yes

“Allow interaction with custom apps” in the org-wide policy and “upload custom apps” in the global policy are set to on. This means that users can upload custom apps to teams that allow it and to teams for which they are owners.

Box 2: Yes

The global policy allows Microsoft Flow.

Box 3: No

The global policy allows Microsoft Planner. However, the org-wide settings blocks Microsoft Planner. In this case, the org-wide policy blocking the app will override the global policy meaning the app will be blocked. When an app is blocked, users will not be able to add the app to a team.

**NEW QUESTION 84**

SIMULATION - (Topic 4)

Task 1

Your company is opening a branch office in Miami. The office uses a network range of 10.10.10.0/24.

You need to restrict Teams bandwidth to 1.000 Kpbs for all the users working at the Miami office. The solution must NOT affect other offices.

A. Mastered

B. Not Mastered

**Answer: A**

**Explanation:**

To restrict Teams bandwidth by network range, you can use the Network Roaming Policy feature1. This feature allows you to define different media bit rate settings for different network locations based on the IP address ranges. Here are the steps to accomplish your task:

? Create a new network roaming policy with the desired media bit rate settings. For example, you can use the following PowerShell cmdlet to create a policy named "MiamiPolicy" with a maximum bit rate of 1000 Kbps for audio and video:

New-CsTeamsNetworkRoamingPolicy -Identity "MiamiPolicy" -MaxMediaBitRateKb 1000

? Assign the network roaming policy to the network range of the Miami office. You can use the following PowerShell cmdlet to assign the policy to the 10.10.10.0/24 network range:

New-CsTeamsNetworkRoamingPolicyAssignment -PolicyName "MiamiPolicy" - IPAddressRange "10.10.10.0/24"

? Verify that the policy is applied correctly by using the Get- CsTeamsNetworkRoamingPolicyAssignment cmdlet. You should see something like this:

Identity : 10.10.10.0/24 PolicyName : MiamiPolicy

IPAddressRange : 10.10.10.0/24 EffectiveTime : 8/1/2023 1:18:24 PM LastUpdateTime : 8/1/2023 1:18:24 PM

LastUpdateBy : admin@XXXXXXXXXXXX.onmicrosoft.com

LastUpdateBySid : S-1-5-21-XXXXXXXXXX-XXXXXXXXXX-XXXXXXXXXX-XXXXX

Note: You may need to wait for some time for the policy to take effect.

**NEW QUESTION 118**

- (Topic 5)

You are assigned the Groups Administrator role.

You discover that you cannot create an expiration policy in Microsoft 365.

You need to create the expiration policy. The solution must use the principle of least privilege.

What should you do first?

- A. Modify the global (Org-wide default) app permission policy.
- B. Request the Global Administrator role.
- C. Upgrade the Azure AD license.
- D. Purchase a Microsoft Defender for Identity license.

**Answer: B**

**Explanation:**

According to the Microsoft documentation<sup>1</sup>, to create an expiration policy for Microsoft 365 groups, you need to have one of the following roles:

- ? Global administrator
- ? Groups administrator
- ? User administrator

The Groups Administrator role allows you to manage all aspects of Microsoft 365 groups, including their settings, classifications, expiration policy, and naming policy<sup>2</sup>. However, this role does not allow you to create an expiration policy for Microsoft 365 groups.

Therefore, based on this information, the correct answer is B. Request the Global Administrator role. This role has the highest level of permissions and can perform any administrative task in Microsoft 365<sup>3</sup>. Alternatively, you can request the User Administrator role, which can also create an expiration policy for Microsoft 365 groups<sup>1</sup>.
