NEW QUESTION 1
- (Topic 5)
Your company has a Microsoft 365 subscription.
All users have computers that run Windows 10. The computers are joined to Azure Active Directory (Azure AD) and enrolled in Microsoft Intune. All the users are standard users.
The company plans to start using Microsoft Teams.
You need to deploy the Microsoft Teams client to the computers. What should you use?

A. an Azure AD app registration
B. a domain-based Group Policy Object (GPO)
C. Azure App Service
D. an app in Microsoft Intune

Answer: D

Explanation:

NEW QUESTION 2
- (Topic 5)
Your company has a Microsoft 365 subscription.
You need to prevent users from using Microsoft Teams to communicate with users in a partner company that uses an email domain named litewareinc.com.
What should you do from the Microsoft Teams admin center?

A. Turn off guest access.
B. Create a new messaging policy.
C. Modify the External access settings.
D. Create a new meeting policy.

Answer: C

NEW QUESTION 3
- (Topic 5)
You have a Microsoft 365 E3 subscription that contains 500 users. All the users have computers that run Windows 10 and are joined to Azure AD.
Vou need to generate a report that identifies which documents the users copied from Microsoft Teams to USB devices.
What should you do first?

A. Onboard the Windows 10 computers to Endpoint data loss prevention (Endpoint DLP).
B. Assign the Microsoft 365 ES compliance add-on to each user.
C. Create a custom data loss prevention (DLP) policy.
D. Assign the Enterprise Mobility + Security ES add-on to each user.

Answer: B

Explanation:
According to the Microsoft documentation1, to generate a report that identifies which documents the users copied from Teams to USB devices, you need to use advanced hunting on Microsoft Defender ATP. Advanced hunting lets you run queries to find threat activity involving USB devices, such as mounting and unmounting of USB drives or copying of files2.
To use advanced hunting, you need to have one of the following roles:
? Security administrator
? Security reader
? Security operator
? Global administrator
The Groups Administrator role does not have access to advanced hunting or Microsoft Defender ATP.
Therefore, based on this information, the correct answer is B. Assign the Microsoft 365 E5 compliance add-on to each user. This add-on includes Microsoft Defender ATP and allows you to use advanced hunting features3. Alternatively, you can request one of the roles that have access to advanced hunting, such as Security administrator or Global administrator.

NEW QUESTION 79
- (Topic 5)
You have a Microsoft 365 subscription. You plan to implement Microsoft Teams.
You need to perform network quality and connectivity tests from an on-premises network to Microsoft 365 Online services by using the Network Testing Companion
You install the Network Testing Companion module on a local Windows 10 device. Which additional software should you install to perform the tests?

A. the Microsoft Teams desktop client
B. Network Assessment Tool
C. Windows Assessment Toolkit
D. Windows Performance Analyzer (WPA)

Answer: B

Explanation:
According to the Microsoft documentation1, the Network Testing Companion is a PowerShell module that allows you to perform network quality and connectivity tests from an on-premises network to Microsoft 365 Online services by using the Network Testing Companion. The Network Testing Companion module requires the following software to be installed on the local Windows 10 device:
? PowerShell 5.1 or later
? .NET Framework 4.7.2 or later
? Microsoft Teams Network Assessment Tool
The Microsoft Teams Network Assessment Tool is a tool that tests the connectivity to various Teams servers deployed in the Microsoft Azure network. It measures network performance by streaming packets to the nearest edge site and back for a configurable amount of time2.
Therefore, based on this information, the correct answer is B. Network Assessment Tool. This tool is required to perform network quality and connectivity tests by using the Network Testing Companion module. The other options are either not related to network testing (the Microsoft Teams desktop client and Windows Performance Analyzer) or not required for the Network Testing Companion module (Windows Assessment Toolkit).
