

# Microsoft

## Exam Questions MD-100

Windows 10

NEW QUESTION 1

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 11.

You receive a notification that Computer1 is running low on disk space. You need to remove the following files from Computer1:

- Unused apps
  - Unused Microsoft OneDrive content
  - Non-critical files for Microsoft Defender Antivirus
- The solution must minimize administrative effort.

Which tool should you use to remove each type of file? To answer, drag the appropriate tools to the correct file types. Each tool may be used once, more not at all. You may need to drag the split bar between panes or scroll to view content.

Tools

Cleanup recommendations

Disk Cleanup

Disk Management

Storage Sense

File types

Unused apps: Tool

Unused OneDrive content: Tool

Non-critical files for Microsoft Defender Antivirus: Tool

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Unused OneDrive content: Disk Management

Non-critical files for Microsoft Defender Antivirus: Cleanup recommendations

NEW QUESTION 2

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

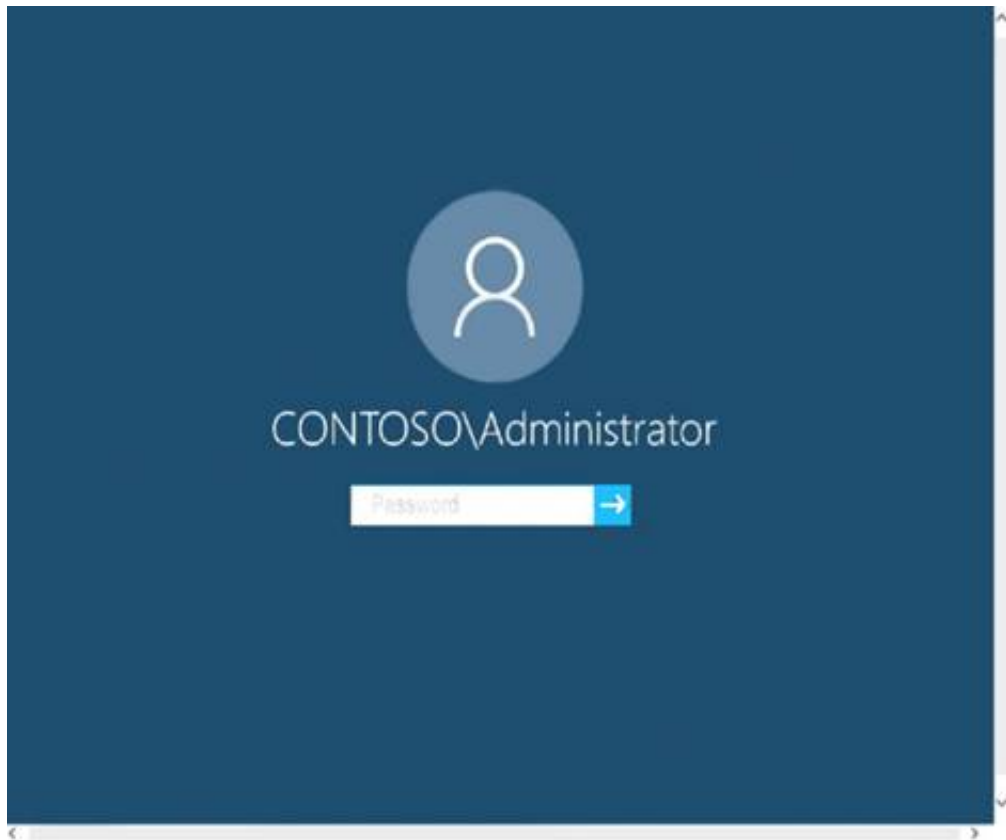

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

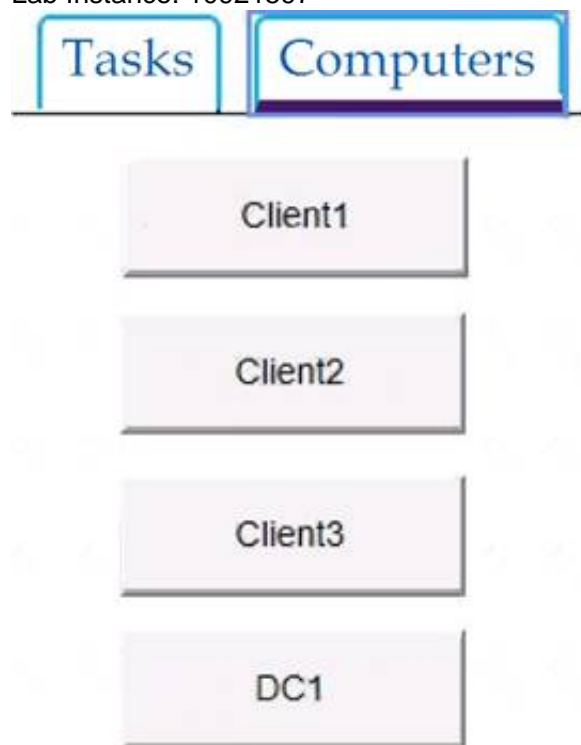

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a file named Private.txt in a folder named Folder1 on the C drive of Client2.

You need to encrypt Private.txt and ensure that a user named User1 can view the contents of Private.txt.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

- > After creating Private.txt and saving it Folder1, right-click on the Private.txt, and select Properties from the context menu.
- > On the General tab, click Advanced. Next, check the box "Encrypt contents to secure data" and click OK.
- > A window will pop up asking you whether or not you want to encrypt the file and its parent folder. Select the "Encrypt the file only" and click OK.
- > Private.txt will now show its file name in green color.
- > Right-click Private.txt and then select Properties.
- > Click Advanced on the General tab.
- > Click Details on the Advanced Attributes tab to open the User Access dialog box.
- > Click Add to open the Encrypting File System dialog box and then select User1.
- > Click OK to add User1 to the list of users who have access to the file.
- > Click OK until you've exited out of the dialog boxes.

### NEW QUESTION 3

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 11.

You need to ensure that when Computer1 is low on disk space, the computer automatically cleans up temporary files and empties the Recycle Bin.

What should you use?

- A. Optimize Drives
- B. Disk Cleanup
- C. Storage Sense
- D. Storage Spaces

**Answer:** C

### NEW QUESTION 4

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.

You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts. The solution must persist between PowerShell sessions.

Solution: From a command prompt, you run `set.exe PATHEXT=d:\scripts`. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

### NEW QUESTION 5

- (Exam Topic 4)

You have computers that run Windows 10. The computers are joined to an Azure Active Directory (Azure AD) tenant and enrolled in Microsoft Intune.

You need to recommend a solution for help desk administrators that meets the following requirements:

- The administrators must assist users remotely by connecting to each user's computer.
- The remote connections must be initiated by the administrators. The users must approve the connection.
- Both the users and the administrators must be able to see the screen of the users' computer.
- The administrators must be able to make changes that require running applications as a member of each computer's Administrators group.

Which tool should you include in the recommendation?

- A. Remote Desktop
- B. Intune
- C. Remote Assistance
- D. Quick Assist

**Answer:** B

#### Explanation:

References:

<https://docs.microsoft.com/en-us/mem/intune/remote-actions/remote-assist-mobile-devices>

### NEW QUESTION 6

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

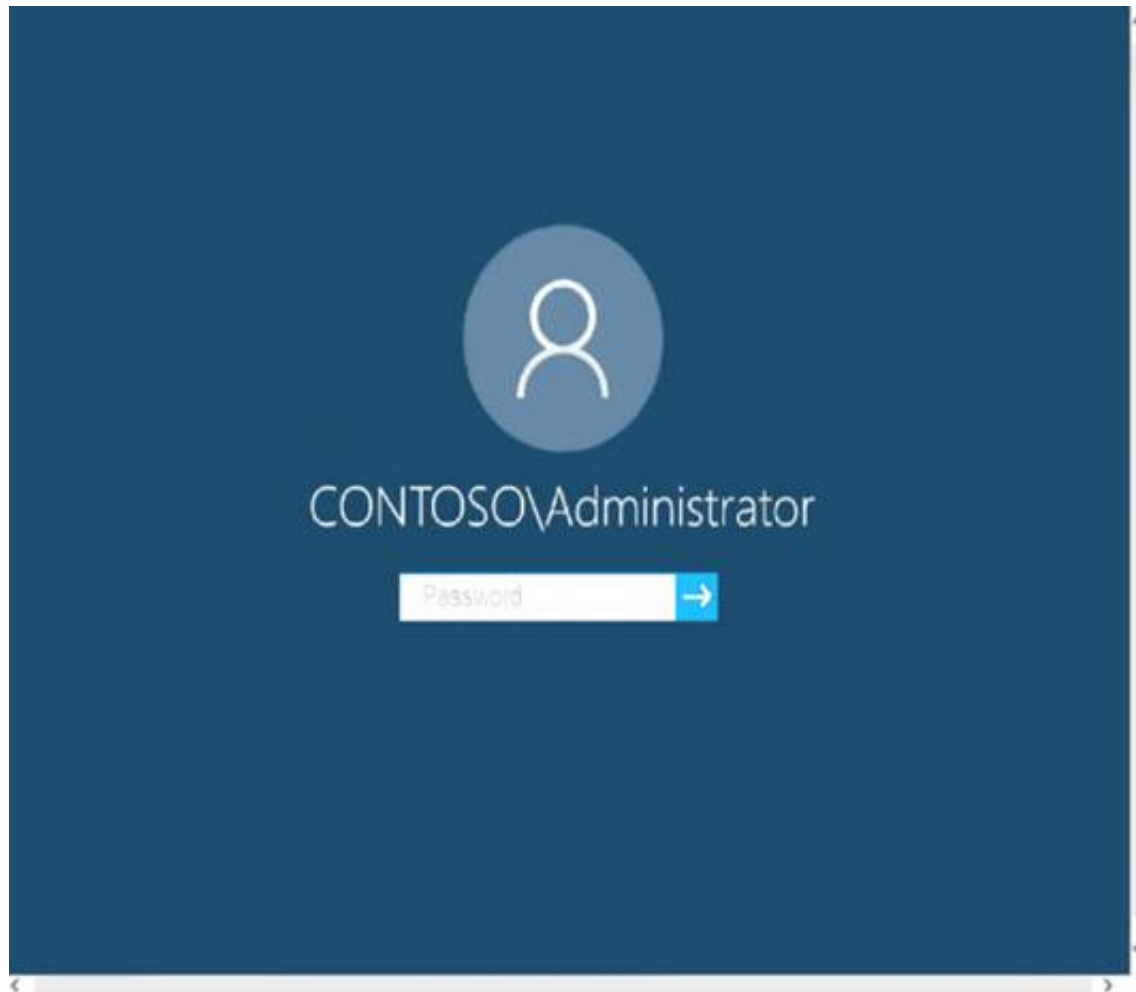

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

## Tasks Computers

Users in the Finance group report that they cannot copy files to Client1\Finance. You need to resolve the issue. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

### Explanation:

- > Open File Explorer.
- > Browse and find the file or folder you want to have full access.
- > Right-click it, and select Properties.
- > Click the Security tab to access the NTFS permissions.
- > Click the Advanced button.
- > On the "Advanced Security Settings" page, you need to click the Change link, in the Owner's field.
- > Click the Advanced button.
- > On the "Select User or Group" page, click the Find Now button.
- > From the search result, select your user account, and click OK.
- > On the "Select User or Group" page, click OK.
- > Click Apply.
- > Click OK.
- > Click OK again.
- > Click OK one more time to complete this task.

It's important to note that if you're taking ownership of a folder, you can check the Replace ownership on subcontainers and object option in the Advanced Security Settings page to take control of the subfolders inside of the folder.

Now you'll need to grant full access control to your account, to do this use the following steps:

- > Right-click the file or folder and select Properties.
- > Click the Security tab to access the NTFS permissions.
- > Click the Advanced button.
- > Under the Permissions tab, click Add.
- > Click Select a principal to add your user account.
- > On the "Select User or Group" page, click the Find Now button.
- > From the search result, select your user account, and click OK.
- > On the "Select User or Group" page, click OK.
- > On "Permission Entry", check the Full control option.
- > Click OK.
- > Click OK.
- > Click Apply.
- > Click OK.
- > Click OK to close the file or folder properties to complete the task.

You can now assign the necessary permissions to the Finance group.

If you right-click on a file or folder, choose Properties and click on the Security tab, we can now try to edit some permissions. Go ahead and click the Edit button to get started.

At this point, there are a couple of things you can do. Firstly, you'll notice that the Allow column is probably greyed out and can't be edited. This is because of the inheritance I was talking about earlier. However, you can check items on the Deny column.

When you click the Add button, you have to type in the user name or group name into the box and then click on Check Names to make sure it's correct. If you don't remember the user or group name, click on the Advanced button and then just click Find Now. It will show you all the users and groups.

Click OK and the user or group will be added to the access control list. Now you can check the Allow column or Deny column.

<https://www.windowscentral.com/how-take-ownership-files-and-folders-windows-10> <https://www.online-tech-tips.com/computer-tips/set-file-folder-permissions-windows/>

**NEW QUESTION 7**

- (Exam Topic 4)

You have the computers shown in the following table.

Name	Windows 10 edition	Servicing channel
Computer1	Windows 10 Education	Semi-annual
Computer2	Windows 10 Pro	Semi-annual
Computer3	Windows 10 Enterprise	Semi-annual

You apply the 20H2 feature update as soon as the update is available.

How many months of servicing does each computer support without installing another feature update? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Computer1:

6 months

12 months

18 months

30 months

Computer2:

6 months

12 months

18 months

30 months

Computer3:

6 months

12 months

18 months

30 months

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Table Description automatically generated with medium confidence

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/get-started-updates-channels-tools>

**NEW QUESTION 8**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2.

Solution: On Computer2, you create a Windows Defender Firewall rule that allows eventvwr.exe. Does this meet the goal?

- A. Yes
- B. No

Answer: B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc76643>

**NEW QUESTION 9**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

Solution: From Network & Internet in the Settings app, you set the network connections as metered connections.

Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

**Explanation:**

References:  
<https://www.makeuseof.com/tag/5-ways-temporarily-turn-off-windows-update-windows-10/>

#### NEW QUESTION 10

- (Exam Topic 4)

You have a computer that runs Windows 11 and has Windows Sandbox enabled. You need to create a custom Windows Sandbox configuration file. Which file extension should you use?

- A. .ps
- B. .json
- C. .wsb
- D. .xml

**Answer: C**

#### NEW QUESTION 10

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You need to prevent standard users from changing the wireless network settings on Computer1. The solution must allow administrators to modify the wireless network settings.

What should you use?

- A. Windows Configuration Designer
- B. MSConfig
- C. Local Group Policy Editor
- D. an MMC console that has the Group Policy Object Editor snap-in

**Answer: C**

#### NEW QUESTION 14

- (Exam Topic 4)

You have a computer that runs Windows 10.

You need to be able to recover the computer by using System Image Recovery.

What should you use to create a system image?

- A. Windows System Image Manager (Windows SIM)
- B. Backup and Restore (Windows 7)
- C. File History
- D. System Protection

**Answer: B**

**Explanation:**

Reference:  
[https://answers.microsoft.com/en-us/windows/forum/windows\\_10/how-to-create-a-system-image-in-windows-10/](https://answers.microsoft.com/en-us/windows/forum/windows_10/how-to-create-a-system-image-in-windows-10/)

#### NEW QUESTION 19

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains computers that run Windows 11.

You have a workgroup computer named Computer1 that runs Windows 11 and contains a user named User1. Each computer contains a folder named C:\Folder1.

Each C:\Folder1 contains three files named Image1.jpg.

Image2.jpg. and Image3.jpg.

Contoso.com has the Default Domain Policy configured as shown in the following table.

Policy	Value
Minimum password length	7
Desktop Wallpaper	Enabled C:\Folder1\Image1.jpg

Contoso.com has the Default Domain Controllers Policy configured as shown in the following table.

Policy	Value
Minimum password length	10
Desktop Wallpaper	Enabled C:\Folder1\Image2.jpg

Computer1 has a local Group Policy configured as shown in the following table.

Policy	Value
Minimum password length	5
Desktop Wallpaper	Enabled C:\Folder1\Image3.jpg

You join Computer1 to contoso.com and User1 signs in to the computer.  
What is the minimum password length and the desktop wallpaper for User1? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Answer Area

Minimum password length:

5

Image3.jpg

Desktop wallpaper:

Image3.jpg

Image1.jpg

Image2.jpg

Image3.jpg

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Minimum password length:

5

Image3.jpg

Desktop wallpaper:

Image3.jpg

Image1.jpg

Image2.jpg

image3.jpg

NEW QUESTION 20

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.  
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.  
Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.  
A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.  
You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User3 on Computer1.  
Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges. User3 is a domain administrator. References: <https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

**NEW QUESTION 24**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the local users shown in the following table.

Name	Member of
Administrator	Administrators, Users
User1	Users
User2	Users

Computer1 contains the folders shown in the following table.

Name	Path
Folder1	D:\Folder1
Folder2	D:\Folder2
Folder3	E:\Folder3

The Users group has Full control permissions to Folder1, Folder2, and Folder3. User1 encrypts two files named File1.docx and File2.docx in Folder1 by using EFS.

Which users can move each file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Users who can move File1.docx to Folder2:

User1 only  
User1 and Administrator only  
User1, User2, and Administrator

Users who can move File2.docx to Folder3:

User1 only  
User1 and Administrator only  
User1, User2, and Administrator

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

EFS works by encrypting a file with a bulk symmetric key. The symmetric key that is used to encrypt the file is then encrypted with a public key that is associated with the user who encrypted the file. Because the encryption & decryption operations are performed at a layer below NTFS, it is transparent to the user and all their applications.

Box 1: User1, User2, and Administrator Box 2: User1, User2, and Administrator

All three are members of the Users group that has Full control permissions to Folder1, Folder2, and Folder3.

**NEW QUESTION 27**

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains named Computer1 that runs Windows 10.

On Computer1, you create an NTFS folder and assign Full control permissions to Everyone.

You share the folder as Share1 and assign the permissions shown in the following table.

Name	Permission
User1	Full control
User2	Change

When accessing Share1, which two actions can be performed by User1 but not by User2? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Delete a file created by another user.
- B. Set the permissions for a file.
- C. Rename a file created by another user.
- D. Take ownership of file.
- E. Copy a file created by another user to a subfolder.

**Answer:** BD

**Explanation:**

References:

<https://www.varonis.com/blog/ntfs-permissions-vs-share/>

**NEW QUESTION 29**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users
User3	Users

You need to configure the desktop background for User1 and User2 only.

Solution: You create a new local group to which you add User1 and User2. You create a local Group Policy Object (GPO) and configure the Desktop Wallpaper setting in the GPO. At a command prompt, you run the gpupdate.exe/Force command.

Does this meet the goal?

- A. Yes
- B. No

**Answer: A**

**Explanation:**

References:

<https://www.windowscentral.com/how-apply-local-group-policy-settings-specific-users-windows-10>

**NEW QUESTION 33**

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer 1.

Solution: On Computer2, you allow incoming ICMFV6 traffic in Windows Defender Firewall. Does this meet the goal?

- A. Yes
- B. No

**Answer: A**

**NEW QUESTION 38**

- (Exam Topic 4)

You have 100 computers that run Windows 10. You have no servers. All the computers are joined to Microsoft Azure Active Directory (Azure AD).

The computers have different update settings, and some computers are configured for manual updates. You need to configure Windows Update. The solution must meet the following requirements:

- The configuration must be managed from a central location.
- Internet traffic must be minimized.
- Costs must be minimized.

How should you configure Windows Update? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Windows Update technology to use:

▼

Windows Server Update Services (WSUS)

Microsoft System Center Configuration Manager

Windows Update for Business

Manage the configuration by using:

▼

A Group Policy object (GPO)

Microsoft System Center Configuration Manager

Microsoft Intune

Manage the traffic by using:

▼

Delivery Optimization

BranchCache

Peer cache

- A. Mastered  
 B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-optimize-windows-10-updates> <https://docs.microsoft.com/en-us/windows/deployment/update/waas-delivery-optimization>

#### NEW QUESTION 43

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: You create a local group on Computer1 and add the Guest account to the group. You grant the group Modify access to Share1.

Does this meet the goal?

- A. Yes  
 B. No

**Answer:** B

#### NEW QUESTION 46

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User1 on Computer1.

Does this meet the goal?

- A. Yes  
 B. No

**Answer:** B

**Explanation:**

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.

User1 is a standard user. References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

NEW QUESTION 50

- (Exam Topic 4)

You have computers that run Windows 10 and are configured as shown in the following table.

Name	TPM	BitLocker Drive Encryption enabled on drive C	BitLocker Drive Encryption enabled on drive D
Computer1	No	Yes	Yes
Computer2	Yes	No	Yes
Computer3	Yes	Yes	No

You have a removable USB drive named USBDrive1 that is encrypted by using BitLocker to Go. You plan to use USBDrive1 on Computer1, Computer2, and Computer3.

You need to identify on which computers you can enable automatic unlocking of BitLocker on USBDrive1. Which computers should you identify?

- A. Computer2 and Computer3 only
- B. Computer3 only
- C. Computer1 and Computer3 only
- D. Computer1, Computer2, and Computer3

Answer: C

Explanation:

The BitLocker key is stored in the registry when you enable auto-unlock but only if the operating system drive is encrypted with BitLocker. A TPM is not required.

NEW QUESTION 55

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2016 and a computer named Computer1 that runs Windows 10.

Server1 contains a share named Backup. All users can read and write data in Backup.

On Monday at 13:00, you configure Backup and Restore (Windows 7) on Computer1 to use the following settings:

- > Backup Destination: \\Server1\Backup
- > What do you want to back up?: Local Disk (D:), Include a system image of drives: System Reserved, (C:)
- > Schedule: Daily at 23:00

You need to identify how many backups will be available on Thursday at 17:00.

What should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Local Disk (D:) backups:

▼

One backup that uses ZIP files

One backup that uses a VHDX file

Three backups that use ZIP files

Three backups that use VHDX files

System image backups of drive C:

▼

One backup that uses ZIP files

One backup that uses a VHDX file

Three backups that use ZIP files

Three backups that use VHDX files

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

[https://www.windowscentral.com/how-make-full-backup-windows-10#create\\_system\\_image\\_windows10](https://www.windowscentral.com/how-make-full-backup-windows-10#create_system_image_windows10)<https://www.surepassexam.com/MD-100-exam-dumps.html>

NEW QUESTION 60

- (Exam Topic 4)

You have a computer named Client1 that runs Windows 11. Client1 hosts a Hyper-V virtual machine named VM1 that runs Windows 11 Pro. VM1 is in the running state.

You need to enable Windows Sandbox on VM1.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

From VM1, run the Enable-WindowsOptionalFeature cmdlet.

Stop VM1.

From Client1, run the Set-VmProcessor cmdlet.

From Client1, run the Enable-WindowsOptionalFeature cmdlet.

Sign in to VM1.

Start VM1.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

From VM1, run the Enable-WindowsOptionalFeature cmdlet.

Stop VM1.

From Client1, run the Set-VmProcessor cmdlet.

From Client1, run the Enable-WindowsOptionalFeature cmdlet.

Sign in to VM1.

Start VM1.

Answer Area

Stop VM1.

From Client1, run the Set-VmProcessor cmdlet.

From Client1, run the Enable-WindowsOptionalFeature cmdlet.

Sign in to VM1.

Start VM1.

NEW QUESTION 64

- (Exam Topic 4)

You are a network administrator at your company.  
A user attempts to start a computer and receives the following error message: "Bootmgr is missing." You need to resolve the issue.  
You start the computer in recovery mode.  
Which command should you run next? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Bootrec

Diskpart

Sfc

/FixMbr

/RebuildBcd

/ScanNow

/offbootdir

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References: https://neosmart.net/wiki/bootrec/#Bootrec\_in\_Windows10

NEW QUESTION 66

- (Exam Topic 4)

You have a computer named Client1 that runs Windows 10 and has Windows Sandbox enabled. You need to create a Windows Sandbox configuration file.  
How should you format the file, and which file extension should you use? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:  
Answer Area

NEW QUESTION 68

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com. You have a workgroup computer named Computer1 that runs Windows 10. You need to add Computer1 to contoso.com. What should you use?

- A. Computer Management
- B. dsregcmd.exe
- C. the Settings app
- D. netdom.exe

Answer: C

Explanation:

You join a computer to a domain, including an Azure AD domain in the Settings panel in Windows 10, under System->About  
References: <https://aadguide.azurewebsites.net/aadjoin/>

NEW QUESTION 72

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10. The domain contains the users shown in the following table.

Name	Member of
Admin1	Domain Admins, Group1
User1	Group1
User2	Group2

Computer1 has four printers as shown in the following table.

Format: 

YAML

JSON

XML

YAML

Extension: 

.wsb

.sbx

.vmcx

.wsb

Format: 

YAML

JSON

XML

YAML

Extension: 

.wsb

.sbx

.vmcx

.wsb

Name	Type	Added by	Permissions
Printer1	Local printer	Admin1	Print: Group1 Manage the printer: Group1
Printer2	Network printer	Admin1	Print: Domain Users Manage the printer: Domain Users
Printer3	Local printer	User1	Print: Group1 Manage the printer: Group1
Printer4	Local printer	User2	Print: Domain Users Manage the printer: Domain Users

Which printers will be available to User1 when the user signs in to Computer1?

- A. Printer3 only
- B. Printed and Printer3 only
- C. Printed, Printer2. and Printer3 only
- D. Printed, Printer3, and Printer4 only
- E. Printed, Printer2, Printer3, and Printer4

**Answer:** E

### NEW QUESTION 73

- (Exam Topic 4)

You are troubleshooting the failed installation of a VPN application on a device. During the installation, the application displays a Stop error, and you must restart the device. After the restart you discover that the device can no longer connect to the network. What should you use to resolve the issue?

- A. Network reset
- B. Network Adapter troubleshooter
- C. Incoming Connections troubleshooter
- D. Remote Assistance

**Answer:** B

### NEW QUESTION 78

- (Exam Topic 4)

You have several computers that run Windows 10. The computers are in a workgroup and have BitLocker Drive Encryption (BitLocker) enabled. You join the computers to Microsoft Azure Active Directory (Azure AD).

You need to ensure that you can recover the BitLocker recovery key for the computers from Azure AD. What should you do first?

- A. Disable BitLocker.
- B. Add a BitLocker key protector.
- C. Suspend BitLocker.
- D. Disable the TPM chip.

**Answer:** B

### Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/prepare-your-organization-f>

### NEW QUESTION 79

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

The relevant services on Computer1 are shown in the following table.

Name	Startup type	Status	Dependent on
Service1	Automatic	Stopped	Service2, Service3
Service2	Automatic	Stopped	Service6
Service3	Disabled	Running	None
Service4	Disabled	Stopped	Service5
Service5	Automatic	Running	None
Service6	Manual	Stopped	None

Which service will start after you restart Computer1?

- A. Service3 and Services only
- B. Service 1, Setvice2. and Services
- C. Service2, Services, and Service6
- D. Services only

**Answer:** C

### Explanation:

Service1 cannot start because it is dependent on Service3 which is disabled.

Service2 will start because it is set to Automatic. Service2 starting will cause Service6 to start. Service3 will not start because it is disabled.

Service4 will not start because it is disabled.  
Service5 will start because it is set to Automatic and is not dependent on any other services. Service6 will start because Service2 is dependent on Service6.

NEW QUESTION 83

- (Exam Topic 4)  
You have a computer named Client1 that runs Windows 11 Home. You need to ensure that you can create virtual machines on Client1. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Restart the operating system

Enter a Windows 11 Pro product key

Enter a Windows 11 Enterprise product key

From Programs and Features, enable the Hyper-V Windows feature

From the Activation settings in the Settings app, select **Change product key**

Answer Area

>

<

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:  
Graphical user interface, application Description automatically generated

NEW QUESTION 86

- (Exam Topic 4)  
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.  
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.  
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.  
Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.  
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.  
Username and password

Use the following login credentials as needed:

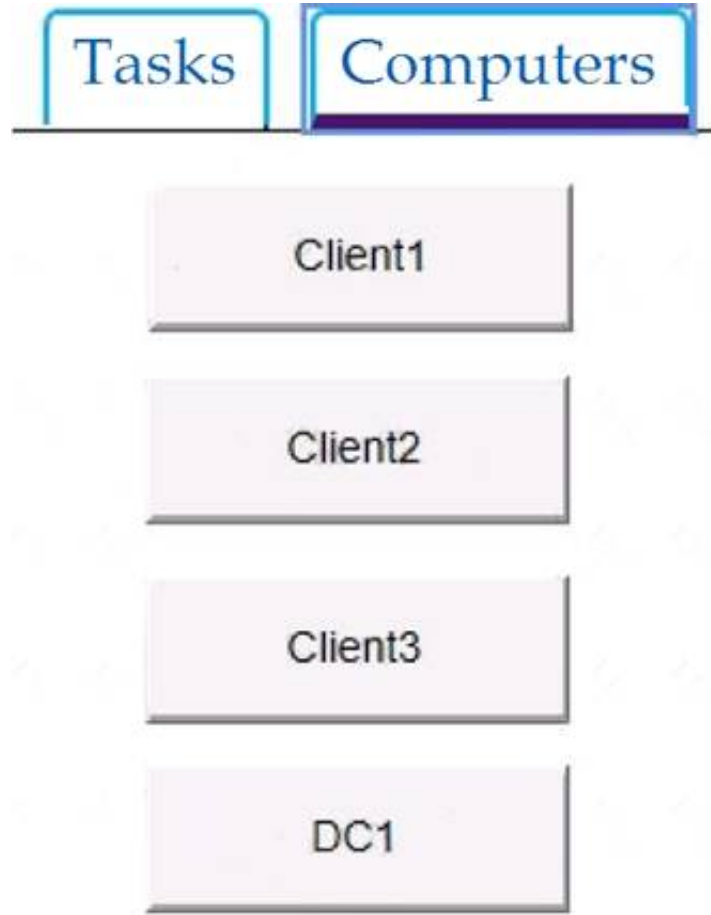

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a user account named User5 on Client2. The solution must meet the following requirements:

- Prevent User5 from changing the password of the account.
- Ensure that User5 can perform backups.
- Use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

- On Client2, press the Win + X keys on your keyboard. Then, click or tap the Computer Management option from the menu.
- Expand the Local Users and Groups from the left side of the window, and select Users.
- Right-click somewhere on the blank space found in the middle section of the window, and click or tap on New User. This opens the New User window, where you can enter all the details about the new user account.
- Type the user name and, optionally, its full name and description.
- Type the password to be used for that user and confirm it.
- Select the User cannot change password check box.
- Click Create and Windows immediately creates the user account. When you are done creating user accounts, click Close in the New User window.
- Press the Win + R keys to open Run, type secpol.msc into Run, and click/tap on OK to open Local Security Policy.
- Expand open Local Policies in the left pane of Local Security Policy, click/tap on User Rights Assignment, and double click/tap on the Back up files and directories policy in the right pane.
- Click/tap on the Add User or Group button.
- Click/tap on the Object Types button.
- Check all the boxes for Object types, and click/tap on the OK.
- Click/tap on the Advanced button.
- Click/tap on the Find Now button, select the name of the user or group
- Click/tap on OK.
- Click/tap on OK.
- When finished, you can close Local Users and Groups.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

**Answer Area**

Microsoft Edge is configured by using [answer choice].

a Group Policy object (GPO)

Microsoft Intune

the Internet Explorer Administration Kit (IEAK)

The computer is [answer choice].

enrolled in Microsoft Intune

managed by using Endpoint Configuration Manager

joined to an on-premises Active Directory domain

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Device is Azure AD joined; not domain joined.  
The MDM URLs in the exhibit indicate the device is enrolled in Intune. References:  
<https://docs.microsoft.com/en-us/azure/active-directory/devices/troubleshoot-device-dsregcmd>  
<https://github.com/MicrosoftLearning/MD-101T00-ManagingModernDesktops/blob/master/Instructions/Labs/04>

**NEW QUESTION 88**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.  
Computer1 was off for one year. During that time, two feature updates and 12 quality updates were released.  
From the Microsoft Update Catalog website, you download the missing updates and save the updates to Computer1.  
You need to ensure that Computer1 runs the latest version of Windows 10 and is fully updated. The solution must minimize the amount of time required to update the computer.  
What should you do?

- A. Install the last feature update, and then install the last quality update.
- B. Install the last quality update, and then install both feature updates.
- C. Install the last quality update, and then install the last feature update.
- D. Install the last feature update, and then install all the quality updates released after the feature update.
- E. Install all the quality and feature updates in the order in which they were released.

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/get-started-updates-channels-tools>

**NEW QUESTION 92**

- (Exam Topic 4)

You are troubleshooting the network connectivity of a computer that runs Windows 10. The computer is connected physically to the network but rejects network traffic from an external source. You need to reinstall the TCP/IP stack on the computer. What should you run?

- A. the `necsh int ip resec` command
- B. the `Resec-NetAdapcerAdvancedPropercy` cmdlet
- C. the `netcf g -d` command
- D. the `Debug-NecworkController` cmdlet

**Answer:** A

**Explanation:**

Reference: <https://howtofix.guide/reset-tcp-ip/>

**NEW QUESTION 97**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a user named User1. User1 creates a Microsoft account. User1 needs to sign in to cloud resources by using the Microsoft account without being prompted for credentials. Which settings should User1 configure?

- A. User Accounts in Control Panel
- B. Email & app accounts in the Settings app
- C. Users in Computer Management
- D. Users in Active Directory Users and Computers

**Answer:** B

**Explanation:**

References:

<https://support.microsoft.com/en-za/help/4028195/microsoft-account-how-to-sign-in>

**NEW QUESTION 102**

- (Exam Topic 4)

Your network contains an Active Directory domain named `adatum.com`. The domain contains two computers named `Computer1` and `Computer2` that run Windows 10.

The domain contains the user accounts shown in the following table.

Name	Member of
User1	Domain Admins
User2	Domain Users
User3	Domain Users

`Computer2` contains the local groups shown in the following table.

Name	Members
Group1	ADATUM\User2 ADATUM\User3
Group2	ADATUM\User2
Group3	ADATUM\User3
Administrators	ADATUM\Domain Admins ADATUM\User3
Remote Desktop Users	Group1

The relevant user rights assignments for `Computer2` are shown in the following table.

Policy	Security Setting
Allow log on through Remote Desktop Services	Administrators, Remote Desktop Users
Deny log on through Remote Desktop Services	Group2
Deny log on locally	Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input type="radio"/>
User2 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input type="radio"/>
User3 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

Answer: A

**Explanation:**

Box 1: Yes

User1 is an administrator and has the Allow log on through Remote Desktop Services.

Box 2: No

User2 is a member of Group2 which has the Deny log on through Remote Desktop Services. Box 3: Yes

User3 is a member of the administrators group and has the Allow log on through Remote Desktop Services.

Note: Deny permissions take precedence over Allow permissions. If a user belongs to two groups, and one of them has a specific permission set to Deny, that user is not able to perform tasks that require that permission even if they belong to a group that has that permission set to Allow.

References:

<https://docs.microsoft.com/en-us/azure/devops/organizations/security/about-permissions?view=azure-devops&ta>

**NEW QUESTION 104**

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Administrators
User2	Users

You have a file named File1.reg that contains the following content.

```
Windows Registry Editor Version 5.00
```

```
[HKEY_CURRENT_USER\System\Key1]
```

```
[HKEY_LOCAL_MACHINE\System\Key2]
```

You need to identify what occurs when User1 and User2 double-click File1.reg.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

When User1 double-clicks **File1.reg**:  

No change is made to registry.  
Only Key1 is added to the registry.  
Only Key2 is added to the registry.  
Key1 and Key2 are added to the registry.

  
When User2 double-clicks **File1.reg**:  

No change is made to registry.  
Only Key1 is added to the registry.  
Only Key2 is added to the registry.  
Key1 and Key2 are added to the registry.

- A. Mastered  
B. Not Mastered

Answer: A

**Explanation:**

Box 1:

User1 is a member of the Administrators group so has permission to add keys to both registry hives. Box 2:

User2 is a standard user so does not have permission to add a key to the HKEY\_LOCAL\_MACHINE registry hive so Key2 will not be imported.

**NEW QUESTION 108**

- (Exam Topic 4)

You have two computers named Client1 and Client2 that run Windows 10. You perform the following actions on Client1:

- Enable Hyper-V.
- Create a virtual machine named VM1 that runs Windows 10 Pro.
- Install a Microsoft SQL Server 2019 instance on VM1. You plan to deploy a copy of VM1 to Client2.

You need to create an export of VM1. The solution must ensure that the captured state is transactional^ consistent.

Which three PowerShell commands should you run in sequence on Client1? To answer, move the appropriate cmdlets from the list of cmdlets to the answer area and arrange them in the correct order.

Commands

Get-VMCheckpoint -VMName VM1

Set-VM -Name VM1 -CheckpointType Production

Checkpoint-VM Name VM1

Restore-VMCheckpoint -Name VM1Checkpoint -Confirm:\$false

Export-VMCheckpoint -VMName VM1 -Name VM1Checkpoint -Path C:\Export

Answer Area

**NEW QUESTION 113**

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. You want to use Computer1to test new Windows features.

You need to configure Computer1to receive preview builds of Windows 10 as soon as they are available. You open the Update & Security section in the Settings app.

What should you configure? To answer, select the appropriate options in the answer area.

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://insider.windows.com/en-us/getting-started/>

**NEW QUESTION 118**

- (Exam Topic 4)

You have a computer that runs Windows 10. The computer contains a folder. The folder contains sensitive data.

You need to log which user reads the contents of the folder and modifies and deletes files in the folder. You need to log which user reads the contents of the folder and modifies and deletes files in the folder.

Solution: from the properties of the folder, you configure the Auditing settings and from the Audit Policy in the local Group Policy, you configure Audit system events.

Does this meet the goal?

- A. Yes  
B. No

**Answer:** B

**Explanation:**

Files and folders are objects and are audited through object access, not through system events. References:

[https://www.netwrix.com/how\\_to\\_detect\\_who\\_changed\\_file\\_or\\_folder\\_owner.html](https://www.netwrix.com/how_to_detect_who_changed_file_or_folder_owner.html)

**NEW QUESTION 121**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users
User3	Users

You need to configure the desktop background for User1 and User2 only.  
 Solution: You create two new local Group Policy Objects (GPOs) and apply one GPO to User1 and the other GPO to User2. You configure the Desktop Wallpaper setting in each GPO.  
 Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:  
<https://www.windowscentral.com/how-apply-local-group-policy-settings-specific-users-windows-10>

NEW QUESTION 125

- (Exam Topic 4)  
 You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Users
User2	Users, Administrators

Computer1 contains an image file named C:\Folder\Image.jpg.  
 Computer1 has the Local Computer\Administrators Policy shown in the following table.

Setting	State
Remove Recycle Bin icon from desktop	Not configured
Desktop Wallpaper	Disabled

Computer1 has the Local Computer\Non-Administrators Policy shown in the following table.

Setting	State	Path
Remove Recycle Bin icon from desktop	Enabled	Not applicable
Desktop Wallpaper	Enabled	C:\Folder\Image.jpg

Computer1 has the local computer policy shown in the following table.

Setting	State
Remove Recycle Bin icon from desktop	Disabled
Desktop Wallpaper	Not configured

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can change the desktop wallpaper.	<input type="radio"/>	<input type="radio"/>
User2 has the Recycle Bin on the desktop.	<input type="radio"/>	<input type="radio"/>
User1 has the Recycle Bin on the desktop.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**  
Graphical user interface, text Description automatically generated

**NEW QUESTION 130**

- (Exam Topic 4)  
You have a computer named Computer1 that runs Windows 10.  
From Event Viewer on Computer1, you have a task named Action1 that is attached to the following event: ➤ Log: System  
➤ Source: Kernel-General  
➤ Event ID: 16  
You need to modify the settings of Action1. What should you use?

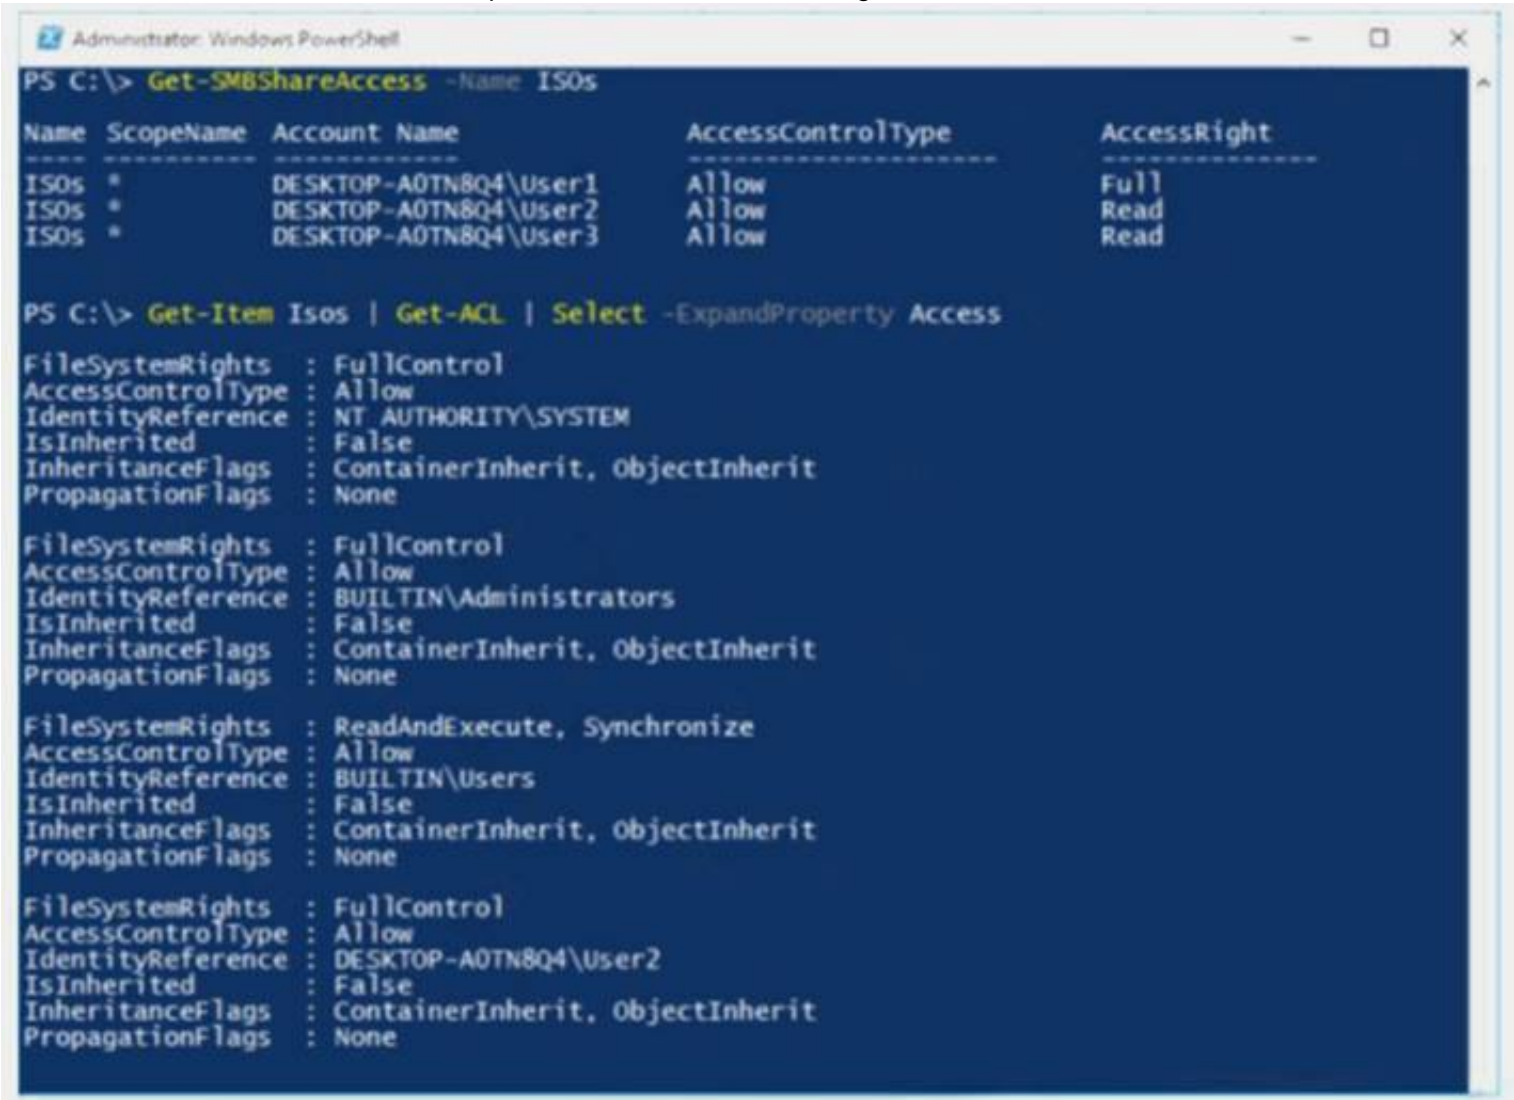

- A. the Settings app
- B. Task Scheduler
- C. Event Viewer
- D. System Configuration

**Answer:** C

**Explanation:**  
An Event Viewer task is created and modified in Event Viewer. References:  
<https://www.techrepublic.com/article/how-to-use-custom-views-in-windows-10s-event-viewer/>

**NEW QUESTION 134**

- (Exam Topic 4)  
You have a computer that runs Windows 10. The computer contains a folder named C:\ISOs that is shared in ISOs.  
You run several commands on the computer as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

[answer choice] can delete files in the ISOs share.

▼
None of the users
Only User1
Only User2
Only User3
Only User1 and User2
Only User1 and User3
Only User2 and User3
User1, User2, and User3

[answer choice] can read the files in the ISOs share.

▼
None of the users
Only User1
Only User2
Only User3
Only User1 and User2
Only User1 and User3
Only User2 and User3
User1, User2, and User3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

[answer choice] can delete files in the ISOs share.

▼
None of the users
Only User1
Only User2
Only User3
Only User1 and User2
Only User1 and User3
Only User2 and User3
User1, User2, and User3

[answer choice] can read the files in the ISOs share.

▼
None of the users
Only User1
Only User2
Only User3
Only User1 and User2
Only User1 and User3
Only User2 and User3
User1, User2, and User3

#### NEW QUESTION 135

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10. The computer contains a folder. The folder contains sensitive data.

You need to log which user reads the contents of the folder and modifies and deletes files in the folder. Solution: From the properties of the folder, you configure the Auditing settings and from the Audit Policy in

the local Group Policy, you configure Audit directory service access.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:

[https://www.netwrix.com/how\\_to\\_detect\\_who\\_changed\\_file\\_or\\_folder\\_owner.html](https://www.netwrix.com/how_to_detect_who_changed_file_or_folder_owner.html)

**NEW QUESTION 139**

- (Exam Topic 4)

Your company uses Microsoft Deployment Toolkit (MDT) to deploy Windows 10 to new computers. The company purchases 1,000 new computers.

You need to ensure that the Hyper-V feature is enabled on the computers during the deployment. What are two possible ways to achieve the goal? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Add a task sequence step that adds a provisioning package.
- B. In a Group Policy object (GPO), from Computer Configuration, configure Application Control Policies.
- C. Add a custom command to the Unattend.xml file.
- D. Add a configuration setting to Windows Deployment Services (WDS).
- E. Add a task sequence step that runs dism.exe.

**Answer:** AE

**Explanation:**

References:

Provisioning package works with Windows Configuration Designer to provision win10 features and runtime settings. WCD (provisioning Package) is GUI based while DISM is command line based and dose same function. Unattend.xml / answer files are used with installation media. It contains settings, definitions and values to use during Windows Setup. In an answer file, you specify various setup options. These options include how to partition disks, where to find the Windows image that will be installed, and which product key to apply.

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/create-a-windows-10-reference-im>

**NEW QUESTION 144**

- (Exam Topic 4)

You sign in to a computer that runs Windows 10 Pro.

You need to ensure that after a restart, the computer starts automatically in Safe Mode with Networking. What should you use to configure the restart options?

- A. bootcfg
- B. BCDEdit
- C. Windows System Image Manager (Windows SIM)
- D. bootrec

**Answer:** B

**Explanation:**

Reference:

<https://www.lifewire.com/how-to-force-windows-to-restart-in-safe-mode-2625163>

**NEW QUESTION 146**

- (Exam Topic 4)

Your company has an on-premises network that contains an Active Directory domain. The domain is synced to Microsoft Azure Active Directory (Azure AD). All computers in the domain run Windows 10 Enterprise.

You have a computer named Computer1 that has a folder named C:\Folder1. You want to use File History to protect C:\Folder1.

Solution: You enable File History on Computer1. You then enable archiving for Folder1.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

File History only backs up copies of files that are in Libraries, and Desktop folders and the OneDrive files available offline on your PC. If you have files or folders elsewhere that you want backed up, you can add them to one of these folders.

Reference:

<https://support.microsoft.com/en-us/help/17128/windows-8-file-history>

**NEW QUESTION 147**

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains 70 remote users. The remote users work from various locations.

Recently, each remote user purchased a personal computer that runs Windows 10 Home.

You need to configure the VPN settings on the computers automatically by using the least amount of administrative effort.

What should you use?

- A. an unattend answer file
- B. a Group Policy Object (GPO)
- C. Windows Autopilot
- D. a provisioning package

**Answer:** D

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-packages>

**NEW QUESTION 148**

- (Exam Topic 3)

Which users can sign in to Computer3 when the computer starts in Safe Mode?

- A. User31 only
- B. User31 and User32 only
- C. User31 andAdmin1 only
- D. User31, User 32, User33, and Admin1
- E. User31,User32, and User33 only

**Answer:** A

**Explanation:**

Only users with membership of the local Administrators group can log on to a computer in safe mode. Admin1 cannot log in because Computer3 is not joined to the domain.

References:

<https://support.microsoft.com/en-us/windows/advanced-startup-options-including-safe-mode-b90e7808-80b5-a2>

**NEW QUESTION 149**

- (Exam Topic 3)

On Computer1, you need to configure the custom Visual Effects performance settings. Which user accounts can you use?

- A. Admm1,User11, and User13 only
- B. Admin1 only
- C. Admin1, User11, and User12 only
- D. Admin1, User11, User12, and User13
- E. Admin1 and User11 only

**Answer:** D

**NEW QUESTION 154**

- (Exam Topic 3)

You implement the planned changes for Computer1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>
User2 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>
User3 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

A screenshot of a computer Description automatically generated with low confidence

Box 1: Yes

User1 already has full control access through membership of Group1. Therefore, User1 can write to the file. Box 2: No

The planned changes will grant User2 full control access to the file. However, User2 is a member of Group2 which has Deny/Write access. The Deny permission will always take precedence. Therefore, User2 will not be able to write to the file.

Box 3: No

The planned changes will grant User3 full control access to the folder. That permission will be inherited by the file. However, User3 is a member of Group2 which has Deny/Write access. The Deny permission will always take precedence. Therefore, User3 will not be able to write to the file.

**NEW QUESTION 159**

- (Exam Topic 2)

You need to meet the technical requirement for Computer1.

What should you do? To answer, select the appropriate options in the answer area.

## Answer Area

User who should configure Kiosk (assigned access):

	▼
User1	
User2	
User3	
User11	
User12	

Configure Kiosk (assigned access) for:

	▼
User4	
User5	
User12	
User13	

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

## Answer Area

User who should configure Kiosk (assigned access):

	▼
User1	
User2	
User3	
User11	
User12	

Configure Kiosk (assigned access) for:

	▼
User4	
User5	
User12	
User13	

### NEW QUESTION 162

- (Exam Topic 2)

You need to meet the technical requirement for User6. What should you do?

- A. Add User6 to the Remote Desktop Users group in the domain.
- B. Remove User6 from Group2 in the domain.
- C. Add User6 to the Remote Desktop Users group on Computer2.
- D. Add User6 to the Administrators group on Computer2.

**Answer:** B

### NEW QUESTION 163

- (Exam Topic 1)

You need to recommend a solution to monitor update deployments. What should you include in the recommendation?

- A. Windows Server Update (WSUS)
- B. the Update Management solution in Azure Automation
- C. the Update Compliance solution in Azure Log Analytics
- D. the Azure Security Center

**Answer:** C

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/update-compliance-monitor>

### NEW QUESTION 166

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. Computer1 is experiencing connectivity issues. You need to view the IP addresses of any remote computer that Computer1 has an active TCP connection to. Should you do?

- A. In Windows Administrative Tools, open Performance Monitor
- B. In the Control Panel, open Network and Internet Then select Network and Sharing Center
- C. In Windows Administrative Tools, open Resource Monitor
- D. In the Setting ap
- E. open Update and Security Then open Windows Security and select Firewall and Network protection

**Answer:** C

#### NEW QUESTION 169

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.

You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.

Solution. You use System image manager (Windows SIM) to create an answer file. You use Windows Deployment Service (WDS) to add an install image. You start each computer by using PXE, and then install the image.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

#### NEW QUESTION 171

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

On Computer1, you create the local users shown in the following table.

Name	Member of
User1	Users
User2	Users, Guests
User3	Power Users, Guest
User4	Guests, Users, Administrators
User5	Users, Distributed COM Users

Which three user profiles will persist after each user signs out? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. User1
- B. User2
- C. User3
- D. User4
- E. User5

**Answer:** ADE

#### NEW QUESTION 173

- (Exam Topic 4)

Your office has a dedicated wireless network for guests.

You plan to provide access cards that will have a QR code for guests. The QR code will link to a network configuration file stored on a publicly accessible website and provide the wireless network settings for Windows 10 devices.

Which tool should you use to create the configuration file and which file type should you use for the configuration file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Tool:

Connection Manager Administration Kit (CMAK)  
Local Group Policy Editor Microsoft Deployment  
Microsoft Deployment Toolkit (MDT)  
Windows Autopilot  
Windows Configuration Designer

File type:

ADMX  
CAB  
PPKG  
WIM  
XML

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:  
Reference:  
<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-packages>

NEW QUESTION 177

- (Exam Topic 4)  
You enable controlled folder access in audit mode for several computers that run Windows 10. You need to review the events audited by controlled folder access. Which Event Viewer log should you view?

- A. Applications and Services\Microsoft\Windows\Windows Defender\Operational
- B. Applications and Services\Microsoft\Windows\Known Folders\Operational
- C. Windows\Security

Answer: A

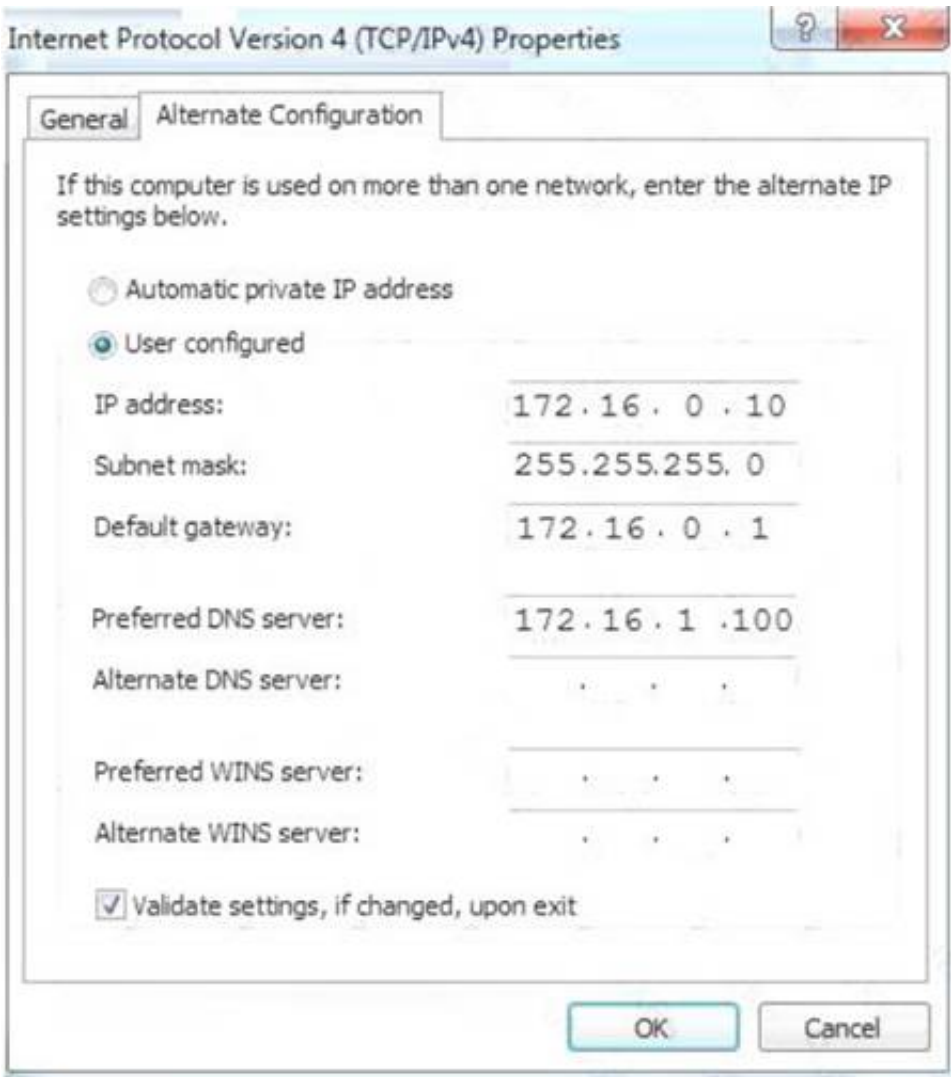

Explanation:  
<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/evaluate-controlled-folder-access>

NEW QUESTION 181

- (Exam Topic 4)  
Your network contains the segments shown in the following table.

Name	IP address space	Covered by DHCP	Next available IP address
Segment1	172.16.0.0/24	Yes	172.16.0.58
Segment2	192.168.1.0/24	No	Not applicable

You have a computer that runs Windows 10.  
The network interface of the computer is configured as shown in the exhibit. (Click the Exhibit tab.)

You need to identify which IP address the computer will have on the network when the computer connects to the segments. Which IP address should you identify for each segment? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Segment1: 

▼

172.16.0.10

172.16.0.58

An address that starts with 169.254

Segment2: 

▼

172.16.0.10

172.16.0.58

An address that starts with 169.254

An address that starts with 192.168.1

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Segment1: 

▼

172.16.0.10

172.16.0.58

An address that starts with 169.254

Segment2: 

▼

172.16.0.10

172.16.0.58

An address that starts with 169.254

An address that starts with 192.168.1

You need to ensure that User1 can add a third-party driver package for a printer to the driver store of the computer. The solution must use the principle of the least privilege.

To which local group should you add User 1, and what should User1 run? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Group:

Run:

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated

#### NEW QUESTION 188

- (Exam Topic 4)

You have a computer that runs Windows 8.1.

You upgrade the computer to Windows 10.

You need to analyze the actions that occurred during the upgrade and review the performance statistics for errors by using Windows Event Log viewer.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Event log file:

File location:

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Event log file:

- Install.etl
- Setup.etl
- UpdateSessionOrchestration.etl**
- WindowsUpdate.etl

File location:

- \\$Windows.~BT\Sources\Panther
- \Windows\Logs
- \Windows\Panther**
- \Windows\Temp

#### NEW QUESTION 192

- (Exam Topic 4)

Your company has an on-premises network that contains an Active Directory domain. The domain is synced to Microsoft Azure Active Directory (Azure AD). All computers in the domain run Windows 10 Enterprise. You have a computer named Computer1 that has a folder named Folder1. You must provide users in group named Group1 with the ability to view the list of files in Folder1. Your solution must ensure that the principle of least privilege is maintained.

What should you do?

- A. Assign the Full control permissions for the Folder1 folder to Group1.
- B. Assign the Read permissions for the Folder1 folder to Group1.
- C. Assign the List folder permissions for the Folder1 folder to Group1.
- D. Assign the Take ownership permissions for the Folder1 folder to Group1.

**Answer: C**

#### Explanation:

Reference:

<https://www.online-tech-tips.com/computer-tips/set-file-folder-permissions-windows/>

#### NEW QUESTION 196

- (Exam Topic 4)

Your network contains an on-premises Active Directory forest named contoso.com. The forest contains a user named User1 and two computers named Computer1 and Computer2 that run Windows 10.

User1 is configured as shown in the following exhibit.

**User1 Properties**

Member Of	Environment	Sessions	Remote control
Remote Desktop Services Profile		COM+	Dial-in

General | Address | **Profile** | Account | Telephones | Organization

**User profile**

Profile path: \\Server1\Profiles\User1

Logon script:

**Home folder**

☒ Local path:

☐ Connect: To:

OK Cancel Apply Help

You rename file \\Server1\Profiles\User1.V6\NTUSER.DAT as NTUSER.MAN.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
On Computer1, if User1 adds a shortcut to the desktop, the shortcut will appear when the user signs in to Computer2.	<input type="radio"/>	<input type="radio"/>
On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing back in to Computer1.	<input type="radio"/>	<input type="radio"/>
On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing in to Computer2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
On Computer1, if User1 adds a shortcut to the desktop, the shortcut will appear when the user signs in to Computer2.	<input type="radio"/>	<input checked="" type="radio"/>
On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing back in to Computer1.	<input checked="" type="radio"/>	<input type="radio"/>
On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing in to Computer2.	<input type="radio"/>	<input checked="" type="radio"/>

#### NEW QUESTION 199

- (Exam Topic 4)

Your company is not connected to the internet. The company purchases several new computers with Windows 10 Pro for its users.

None of the new computers are activated.

You need to activate the computers without connecting the network to the Internet.

What should you do?

- A. Make use of the Volume Activation Management Tool (VAMT).  
B. Make use of the Key Management Service (KMS).  
C. Make use of the Windows Process Activation Service.  
D. Run the Get-WmiObject -query cmdlet.

Answer: B

Explanation:

You can configure one of the computers as a Key Management Service (KMS) host and activate the KMS host by phone. The other computers in the isolated network can then activate using the KMS host.

Installing a KMS host key on a computer running Windows 10 allows you to activate other computers running Windows 10 against this KMS host and earlier versions of the client operating system, such as Windows 8.1 or Windows 7. Clients locate the KMS server by using resource records in DNS, so some configuration of DNS may be required. This scenario can be beneficial if your organization uses volume activation for clients and MAK-based activation for a smaller number of servers. To enable KMS functionality, a KMS key is installed on a KMS host; then, the host is activated over the Internet or by phone using Microsoft's activation services.

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/volume-activation/activate-using-key-management-servi>

#### NEW QUESTION 200

- (Exam Topic 4)

You have a computer that runs Windows 10. You need to configure a picture password.

What should you do? D18912E1457D5D1DDCBD40AB3BF70D5D

- A. From Control Panel, configure the User Accounts settings.  
B. From the Settings app, configure the Sign-in options.  
C. From the Local Group Policy Editor, configure the Account Policies settings.  
D. From Windows PowerShell, run the Set-LocalUser cmdlet and specify the InputObject parameter.

Answer: B

#### NEW QUESTION 205

- (Exam Topic 4)

You have a Windows 10 device named Device1.

You plan purchase a wireless display device that will stream audio and video from Device1. Which wireless feature or protocol should the display device support?

- A. Wi-Fi sense
- B. Miracast
- C. near field communications (NFC)
- D. Bluetooth

**Answer:** B

**NEW QUESTION 208**

- (Exam Topic 4)

You have two workgroup computers named Computer1 and Computer2 that run Windows 10. The computers contain the local security principals shown in the following table.

Name	Type	Computer
User1	User	Computer1
GroupA	Group	Computer1
GroupB	Group	Computer1
User2	User	Computer2
GroupC	Group	Computer2

Which security principals can be members of GroupA and GroupC? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

GroupA:

User1 only

User1 and User2 only

User1 and GroupB only

User1, User2, GroupB, and GroupC

GroupC:

User2 only

User1 and User2 only

User1, User2, GroupA, and GroupB

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application, chat or text message Description automatically generated

**NEW QUESTION 212**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a user named Admin1. All computers run Windows 10.

You enable Windows PowerShell remoting on the computers.

You need to ensure that Admin1 can establish remote PowerShell connections to the computers. The solution must use the principle of least privilege.

To which group should you add Admin1?

- A. Access Control Assistance Operators
- B. Power Users
- C. Remote Desktop Users
- D. Remote Management Users

**Answer:** D

**Explanation:**

References:

<https://4sysops.com/wiki/enable-powershell-remoting/>

**NEW QUESTION 215**

- (Exam Topic 4)

You have a workgroup computer that runs Windows 10.

You need to configure User Account Control (UAC) to meet the following requirements:

- Ensure that the local Administrator account is always be prompted to approve elevation of privilege.
- Enforce public key infrastructure (PKI) signature checks for any interactive apps that request elevation of privilege.

Which two policy settings should you modify? To answer, select the settings in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Policy	Security Setting
User Account Control: Virtualize file and registry write failures to per-user locations	Enabled
User Account Control: Switch to the secure desktop when prompting for elevation	Enabled
User Account Control: Run all administrators in Admin Approval Mode	Enabled
User Account Control: Only elevate UIAccess applications that are installed in secure locations	Enabled
User Account Control: Only elevate executables that are signed and validated	Disabled
User Account Control: Detect application installations and prompt for elevation	Enabled
User Account Control: Behavior of the elevation prompt for standard users	Prompt for credentials
User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode	Prompt for consent for non-W
User Account Control: Allow UIAccess applications to prompt for elevation without using the secure desktop	Disabled
User Account Control: Admin Approval Mode for the Built-in Administrator account	Not Defined

- A. Mastered  
 B. Not Mastered

**Answer: A**

**Explanation:**

Policy	Security Setting
User Account Control: Virtualize file and registry write failures to per-user locations	Enabled
User Account Control: Switch to the secure desktop when prompting for elevation	Enabled
User Account Control: Run all administrators in Admin Approval Mode	Enabled
User Account Control: Only elevate UIAccess applications that are installed in secure locations	Enabled
User Account Control: Only elevate executables that are signed and validated	Disabled
User Account Control: Detect application installations and prompt for elevation	Enabled
User Account Control: Behavior of the elevation prompt for standard users	Prompt for credentials
User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode	Prompt for consent for non-W
User Account Control: Allow UIAccess applications to prompt for elevation without using the secure desktop	Disabled
User Account Control: Admin Approval Mode for the Built-in Administrator account	Not Defined

**NEW QUESTION 216**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You test Windows updates on Computer1 before you make the updates available to other computers. You install a quality update that conflicts with a customer device driver.

You need to remove the update from Computer1.

Solution: From an elevated command prompt, you run the vmic qfe delete command. Does this meet the goal?

- A. Yes  
 B. No

**Answer: B**

**NEW QUESTION 217**

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) deployment share named Share1. You add Windows 10 images to Share1 as shown in the following table.

Name	In WIM file	Description
Image1	Install1.wim	Default Windows 10 Pro image from the Windows 10 installation media
Image2	Install1.wim	Default Windows 10 Enterprise image from the Windows 10 installation media
Image3	Install2.wim	Default Windows 10 Pro for Workstations image from the Windows 10 installation media
Image4	Custom1.wim	Custom Windows 10 Enterprise image without any additional applications
Image5	Custom2.wim	Custom Windows 10 Enterprise image that includes custom applications

Which images can be used in the Standard Client Task Sequence, and which images can be used in the Standard Client Upgrade Task Sequence?  
 Answer Area

Standard Client Task Sequence:
 

Image3 only  
 Image3, Image4, and Image5 only  
 Image1, Image2, and Image3 only  
 Image1, Image2, Image3, and Image4 only  
 Image1, Image2, Image3, Image4, and Image5

Standard Client Upgrade Task Sequence:
 

Image3 only  
 Image3, Image4, and Image5 only  
 Image1, Image2, and Image3 only  
 Image1, Image2, Image3, and Image4 only  
 Image1, Image2, Image3, Image4, and Image5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:  
 Answer Area

Standard Client Task Sequence:
 

Image3 only  
 Image3, Image4, and Image5 only  
 Image1, Image2, and Image3 only  
 Image1, Image2, Image3, and Image4 only  
 Image1, Image2, Image3, Image4, and Image5

Standard Client Upgrade Task Sequence:
 

Image3 only  
 Image3, Image4, and Image5 only  
 Image1, Image2, and Image3 only  
 Image1, Image2, Image3, and Image4 only  
 Image1, Image2, Image3, Image4, and Image5

**NEW QUESTION 220**

- (Exam Topic 4)  
 You have computers that run Windows 10.  
 You have users who report issues about computers as shown in the following table.

User name	Computer name	Issue
User1	Computer1	After User1 installs a new application, Computer1 is much slower, occasionally crashes, and must restart.
User2	Computer2	After User 2 installs a feature update, Computer2 freezes frequently and fails to load devices.

You need to resolve the issues as quickly as possible. The solution must minimize manual reconfigurations of the computers.  
 What should you do on each computer? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

Computer1:
 

Uninstall an update.  
 Restore from a system restore point.  
 Go back to a previous version of Windows 10.

Computer2:
 

Uninstall an update.  
 Restore from a system restore point.  
 Go back to a previous version of Windows 10.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Computer1:	<div><div></div><div>Uninstall an update.</div><div>Restore from a system restore point.</div><div>Go back to a previous version of Windows 10.</div></div>
Computer2:	<div><div></div><div>Uninstall an update.</div><div>Restore from a system restore point.</div><div>Go back to a previous version of Windows 10.</div></div>

NEW QUESTION 225

- (Exam Topic 4)

You have a computer that runs Windows 10. A feature update is installed automatically. You need to roll back the feature update. Up to how many days after the feature update is installed can you roll back the installation, and what should you use to perform the roll back? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

To roll back the feature update, use:	<div><div></div><div>Go back to the previous version of Windows 10</div><div>Reset this PC option</div><div>Uninstall an update in Control Panel</div></div>
The rollback can be performed up to:	<div><div></div><div>7 days after</div><div>10 days after</div><div>35 days after</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Table Description automatically generated  
Reference:  
<https://www.howtogeek.com/235474/how-to-roll-back-builds-and-uninstall-updates-on-windows-10/>

NEW QUESTION 226

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and contains the users in the following table.

User	Member of
User1	Administrators
User2	Device Owners
User3	Power Users
User4	Users
User5	Users

You need to identify which users can start the Windows Recovery Environment (WinRE) command prompt on Computer1. Which user should you identify for each scenario? To answer, select the appropriate options in the answer area.

## Answer Area

Start the WinRE command prompt by using the Boot Options menu in Windows 10:

▼

User1 only  
User1 and User2 only  
User1 and User3 only  
User1, User2, and User3 only  
Everyone

Start the WinRE command prompt from the Windows 10 installation media:

▼

User1 only  
User1 and User2 only  
User1 and User3 only  
User1, User2, and User3 only  
Everyone

- A. Mastered  
 B. Not Mastered

**Answer:** A

**Explanation:**

Start the WinRE command prompt by using the Boot Options menu in Windows 10:

▼

User1 only  
User1 and User2 only  
User1 and User3 only  
User1, User2, and User3 only  
Everyone

Start the WinRE command prompt from the Windows 10 installation media:

▼

User1 only  
User1 and User2 only  
User1 and User3 only  
User1, User2, and User3 only  
Everyone

## NEW QUESTION 230

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named UserA.

You have two computers named Computer1 and Computer2 that run Windows 10 and are joined to contoso.com.

You need to ensure that UserA can connect to Computer2 from Computer1 by using Remote Desktop. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. On Computer1, modify the registry.
- B. On Computer2, modify the registry.
- C. On Computer1, modify the properties of UserA.
- D. On Computer1, enable Remote Desktop.
- E. On Computer2, modify the properties of UserA.
- F. On Computer 2, enable Remote Desktop.
- G. On Computer2, add the Everyone group to the Remote Desktop Users group.
- H. On Computer1, add the Everyone group to the Remote Desktop Users group.

**Answer:** EFG

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/client-management/connect-to-remote-aadj-pc>

## NEW QUESTION 234

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 contains five local user accounts.

You need to ensure that all users who sign in to Computer1 see a picture named Image1.jpg as the desktop background.

What should you do?

- A. From the Settings app
- B. modify the Background settings.

- C. From the Local Group Policy Editor, modify the Desktop settings.
- D. Rename Image1.jpg as Desktop.jpg and copy the picture to the C:\Windows\system32\folder.
- E. Rename Image1.jpg as Desktop.jpg and copy the picture to the C:\Users\Default\Desktop\folder.

**Answer:** B

**Explanation:**

References:  
<https://www.top-password.com/blog/set-a-default-background-wallpaper-for-windows-10-desktop/>

**NEW QUESTION 237**

- (Exam Topic 4)  
Your network contains an Active Directory domain. The domain contains computers that run Windows 10. The computers are configured as shown in the following table.

Name	Version	Organizational unit (OU)
Computer1	1909	Devices/OU1
Computer2	1909	Devices/OU2
Computer3	20H2	Devices/OU2

You have a Group Policy Object (GPO) named GPO1 that has the settings shown in the following exhibit.

Select the target Feature Update version

Select the target Feature Update version

Previous SettingNext Setting

Not Configured

Enabled

Disabled

Comment:

Supported on:

At least Windows Server 2016 or Windows 10

Options:

Help:

OK

Cancel

Apply

A domain administrator links GPO1 to OU2.  
For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

**Answer Area**

Statements	Yes	No
Computer1 will install Windows 10, version 2004.	<input type="radio"/>	<input type="radio"/>
Computer2 will install Windows 10, version 2004.	<input type="radio"/>	<input type="radio"/>
Computer3 will install Windows 10, version 2004.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Text Description automatically generated

Reference:

<https://support.microsoft.com/en-us/topic/feature-update-through-windows-10-version-20h2-enablement-packag>

**NEW QUESTION 239**

- (Exam Topic 4)

Your network contains an Active directory domain. The domain contains 1,000 computers that run Windows 10.

You need to prevent computers of the research department from appearing in network in File Explorer. What should you do?

- A. Disable the Network List Service
- B. Configure DNS to use an external provider
- C. Turn off network discovery
- D. Modify the %systemroot%\system32\drivers\etc\Network ile

**Answer:** C

**NEW QUESTION 242**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 belongs to a workgroup. You run the following commands on Computer1.

New-LocalUser –Name User1 –NoPassword Add-LocalGroupMember User –Member User1 What is the effect of the configurations?

- A. User1 is prevented from signing in until the user is assigned additional user rights.
- B. User1 appears on the sign-in screen and can sign in without a password.
- C. User1 is prevented from signing in until an administrator manually sets a password for the user.
- D. User1 appears on the sign-in screen and must set a new password on the first sign-in attempts.

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.localaccounts/new-localuser? view=powershell-5.1>

**NEW QUESTION 247**

- (Exam Topic 4)

You need to enable BitLocker Drive Encryption (BitLocker) on a computer named Computer1 that runs Windows 10. Computer1 has the following configurations:

- Contains only one 200-GB NTFS volume named C:\
- Contains 50 GB of unallocated disk space
- Is the member of a workgroup
- Has TPM enabled

What should you do first?

- A. Create a VHD.
- B. Disable TPM.
- C. Create an additional volume.
- D. Join Computer1 to an Azure Active Directory (Azure AD) tenant.

**Answer:** C

**Explanation:**

Two partitions are required to run BitLocker because pre-startup authentication and system integrity verification must occur on a separate partition from the encrypted operating system drive. This configuration helps protect the operating system and the information in the encrypted drive.

Reference:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-overview-and-req>

**NEW QUESTION 250**

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 contains five local user accounts. You need to ensure that all users who sign in to Computer1 see a picture named image1.jpg as the desktop background.

What should you do?

- A. Desktop.jpg and copy the picture to the C:\Users\Default\Desktop folder
- B. From the Settings app, modify the Background settings.
- C. From the local Group Policy Edito
- D. modify the Desktop settings.
- E. Rename Image1.jpg as Desktop.jpg and copy the picture to the C:\Windows\system32\ folder.

**Answer:** B

**NEW QUESTION 254**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the computers shown in the following table.

Name	Operating system
Computer1	Windows 8.1 Enterprise
Computer2	Windows 10 Pro
Computer3	Windows 10 Pro for Workstation

On which computers can you perform an in-place upgrade to Windows 10 Enterprise?

- A. Computer3 only
- B. Computer2 and Computer3 only
- C. Computer2 only
- D. Computer2
- E. Computer2, and Computer3

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-upgrade-paths> <https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-edition-upgrades>

#### NEW QUESTION 255

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 has a folder named C:\Folder1.

You need to meet the following requirements:

- Provide a user named Jon Ross with the ability to modify the permissions of C:\Folder1.
- Ensure that the principle of least privilege is maintained.

What should you do?

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

- In Windows Explorer, right-click the C:\Folder1 folder, and then click Properties.
- Click on the Security tab, and then click Edit.
- In the Permissions dialog box, add Jon Ross.
- Specify the Allow Modify permissions for the Jon Ross.
- Click OK twice to close the Security dialog box.
- Click OK twice to close the Properties dialog box.

Reference:

<https://docs.microsoft.com/en-us/iis/web-hosting/configuring-servers-in-the-windows-web-platform/configuring>

#### NEW QUESTION 260

- (Exam Topic 4)

You are preparing to deploy Windows 10.

You download and install the Windows Assessment and Deployment Kit (Windows ADK). You need to create a bootable WinPE USB drive.

What should you do first?

- A. Run the MakeWinPEMedia command.
- B. Download and install Windows Configuration Designer.
- C. Run the WPEUcil command.
- D. Download and install the WinPE add-on.

**Answer:** D

**Explanation:**

WinPE used to be included in the Windows ADK. However, it is now provided as an add-on so the first step is to download and install the add-on.

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/winpe-create-usb-bootable-drive> <https://docs.microsoft.com/en-us/windows-hardware/get-started/adk-install>

#### NEW QUESTION 265

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the local users shown in the following table.

Name	Member of
Administrator	Administrators, Users
User1	Backup Operators, Users
User2	Device Owners, Users
User3	Users

The Users group has Modify permissions to a folder named D:\Folder1. User3 creates a file named File1.docx in Folder1. Which users can take ownership of File1.docx?

- A. Administrator and User1 only
- B. Administrator only
- C. Administrator, User1, and User2
- D. Administrator and User2 only

Answer: B

Explanation:

Only a member of the Administrator’s group can take ownership of a file or folder.

NEW QUESTION 270

- (Exam Topic 4)

You have a workgroup computer that runs Windows 10. You create a local user named User1.

User1 needs to be able to share and manage folders located in a folder named C:\Share by using the Shared Folders snap-in. The solution must use the principle of least privilege.

To which group should you add User1?

- A. Device Owners
- B. Users
- C. Power Users
- D. Administrators

Answer: D

NEW QUESTION 271

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the folders shown in the following table.

Name	Volume	File system	Permission
Folder1	C	NTFS	Full control to Everyone
Folder2	C	NTFS	Full control to Everyone
Folder3	D	NTFS	Full control to Everyone

On Computer1, you create the users shown in the following table.

Name	Member of
User1	Users
User2	Backup Operators, Users
User3	Cryptographic Operators, Users
User4	Administrators, Users

User1 encrypts a file named File1.txt that is in a folder named C:\Folder1.

What is the effect of the configuration? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Users who can move File1.txt to C:\Folder2:

▼

User1 only

User1 and User2 only

User1, User2, and User3 only

User1, User2, User3, and User4

Users who can move File1.txt to D:\Folder3:

▼

User1 only

User1 and User2 only

User1, User2, and User3 only

User1, User2, User3, and User4

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

<https://support.microsoft.com/en-za/help/310316/how-permissions-are-handled-when-you-copy-and-move-files>

**NEW QUESTION 275**

- (Exam Topic 4)

You have a computer that runs Windows 10 and contains two local users named User1 and User2. You need to ensure that the users can perform the following actions:

- User1 must be able to adjust the date and time.
- User2 must be able to clear Windows logs.

The solution must use the principle of least privilege.

To which group should you add each user? To answer, drag the appropriate groups to the correct users. Each group may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Groups	Answer Area
Administrators	User1: <input type="text"/>
Event Log Readers	User2: <input type="text"/>
Performance Log Users	
Power Users	
System Managed Accounts Group	

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Groups	Answer Area
Administrators	User1: <input type="text" value="Administrators"/>
Event Log Readers	User2: <input type="text" value="Event Log Readers"/>
Performance Log Users	
Power Users	
System Managed Accounts Group	

**NEW QUESTION 280**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You need to modify the Security Settings of Computer1 to meet the following requirements:

- A local group named Branch\_Admns must be able to view and clear the Security log.
- Local users must be prompted to change their password three days before the password expires.

Which two nodes of the Local Group Policy Editor should you access to configure the settings? To answer, select the appropriate nodes in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated  
User Rights Assignment > Manage auditing and security log.  
Security Options > Interactive Logon: Prompt user to change password before expiration: 3 days.

NEW QUESTION 281

- (Exam Topic 4)  
You have a computer named Computer1 that runs Windows 10 and has Windows Assessment and Deployment Kit (Windows ADK) installed. Computer1 has the drives shown in the following table.

Letter	Description
C	Operating system
D	Data drive
E	DVD drive that contains the Windows 10 installation files

You need to create Windows 10 unattended answer file. What should you do first?

- A. From File Explorer, copy Install.wim from drive E to drive D.
- B. From Windows System Image Manager, select Select Windows Image, and then select Install.wimfrom drive E.
- C. From Windows System Image Manager, select Select Windows Image, and then select Boot.wim from drive E.
- D. From File Explorer, copy Boot.wim from drive E to drive D.

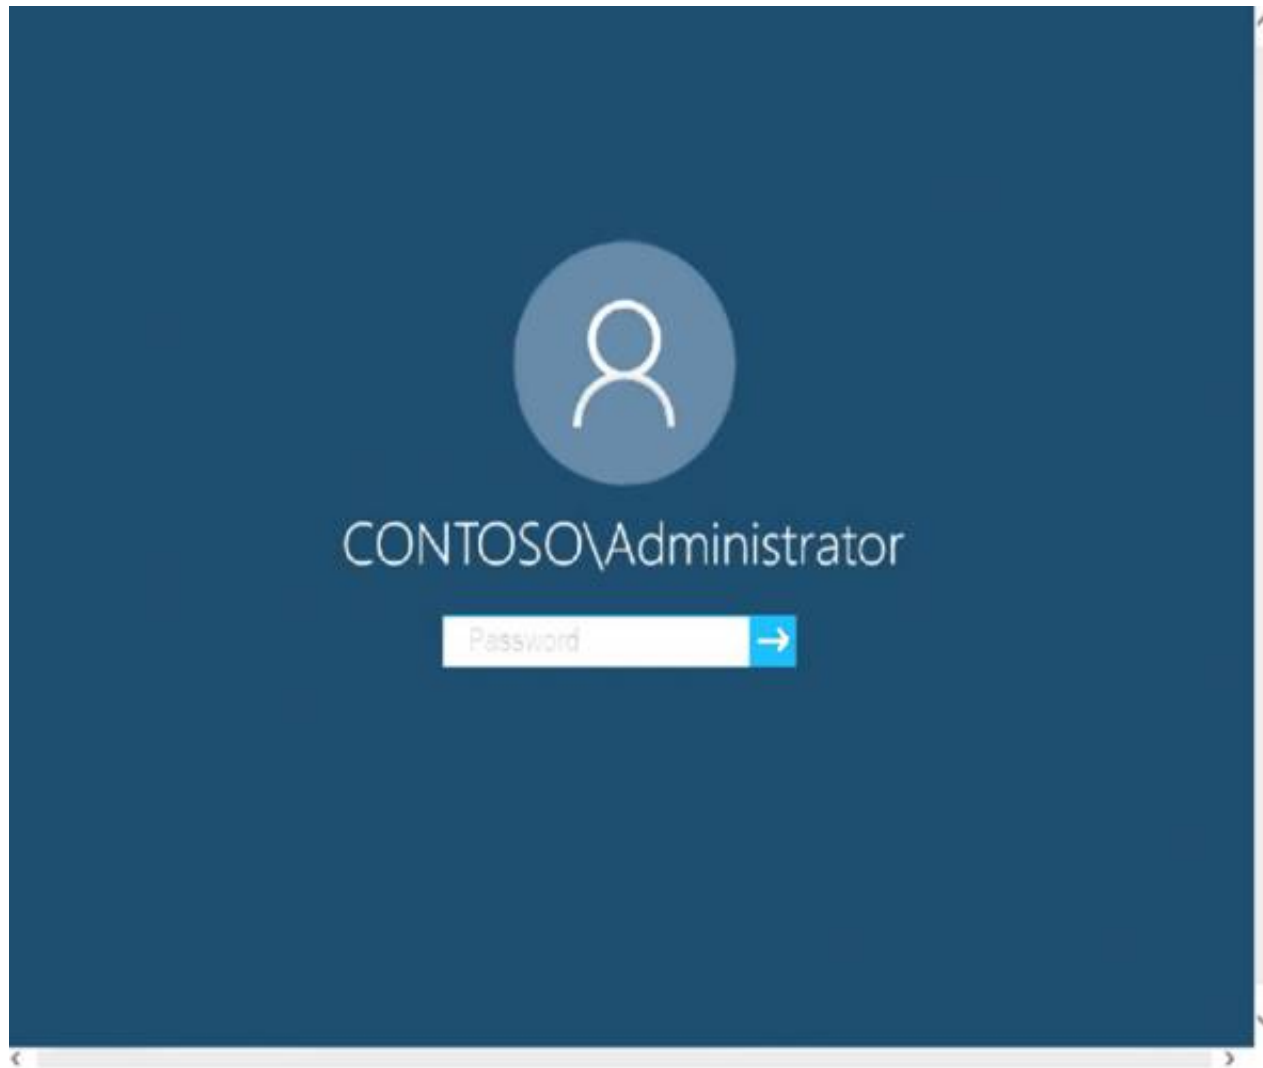

Answer: A

Explanation:

NEW QUESTION 286

- (Exam Topic 4)  
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.  
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.  
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.  
Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.  
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.  
Username and password

Use the following login credentials as needed:

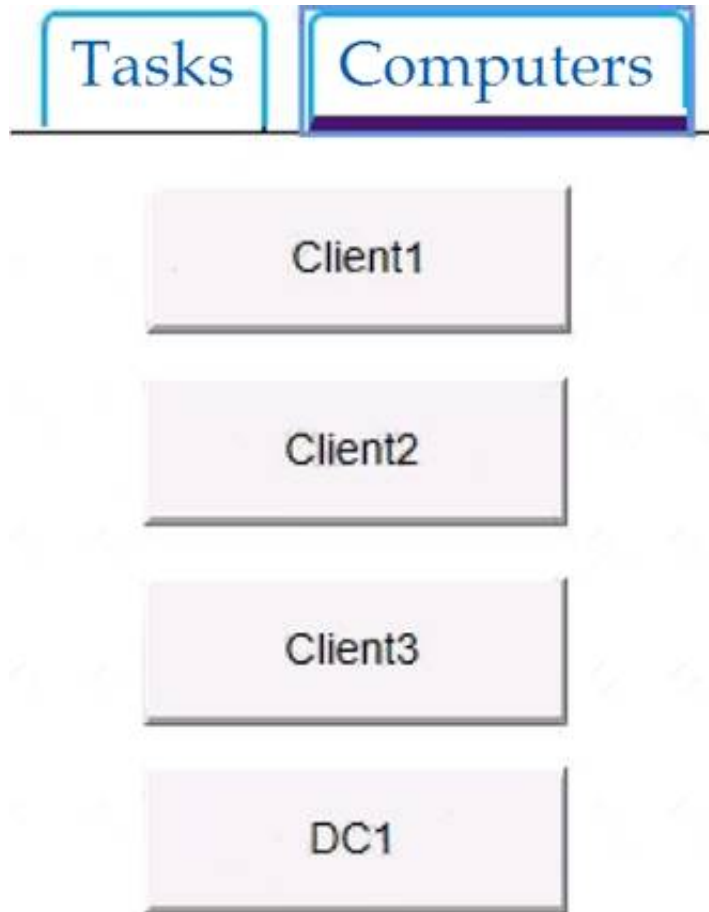

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to connect to your company's network and create a VPN connection on Client2 named VPN1 that meets the following requirements:  
 VPN1 must connect to a server named vpn.contoso.com.

Only traffic to your company's network must be routed through VPN1. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

- On Client2, click on the Start button and go to settings.
- Select Network & Internet.
- Select VPN on the left-hand side
- Click on the Add a VPN connection button.
- Next, select the VPN provider—This will almost always be Windows (built-in).
- Name your connection and enter the server name as provided by your IT technician. (VPN1 and vpn.contoso.com).

- Add in your username and password as provided by your IT technician.
- Click Save when done.
- Closeout the PC settings windows.

#### NEW QUESTION 288

- (Exam Topic 4)

Your company has an isolated network used for testing. The network contains 20 computers that run Windows 10. The computers are in a workgroup. During testing, the computers must remain in the workgroup.

You discover that none of the computers are activated.

You need to recommend a solution to activate the computers without connecting the network to the Internet. What should you include in the recommendation?

- A. Volume Activation Management Tool (VAMT)
- B. Key Management Service (KMS)
- C. Active Directory-based activation
- D. the Get-WindowsDeveloperLicense cmdlet

**Answer:** B

**Explanation:**

<https://docs.microsoft.com/en-us/windows/deployment/volume-activation/introduction-vamt>

#### NEW QUESTION 293

- (Exam Topic 4)

You have a computer that runs Windows 10.

You need to view the Windows Update diagnostic log. What should you do first?

- A. From File Explorer, go to the C:\Windows\Logs\WindowsUpdate folder and select Show hidden files, folders, and drives.
- B. From Windows Update in the Settings app
- C. configure Advanced options.
- D. From Event Viewer, modify the properties of the WindowsUpdateClient operational log.
- E. From Windows PowerShell, run the Get-WindowsUpdateLog cmdlet.

**Answer:** D

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/powershell/module/windowsupdate/get-windowsupdate-log?view=windowsserv>

#### NEW QUESTION 295

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10.

You need to view the settings to Computer1 by Group Policy objects (GPOs) in the domain and local Group Policies.

Which command should you run?

- A. gpresult
- B. secedit
- C. gpupdate
- D. gpfixup

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows-server/administration/windows-commands/gpresult>

#### NEW QUESTION 299

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that contain the users shown in the following table.

Name	Role
Admin1@contoso.com	Security administrator
Admin2@contoso.com	Cloud device administrator
User1@contoso.com	None

You have a computer named Computer1 that runs Windows 10.

Name	Member of
Admin1	Network Configuration Operators
Admin2	Power Users
User1	Administrator

User1 joins Computer1 to Azure AD by using user1@contoso.com.  
 For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1@contoso.com is a member of the local Administrators group on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin1@contoso.com can configure the firewall and Windows Defender on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin2@contoso.com can install software on Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
User1@contoso.com is a member of the local Administrators group on Computer1.	<input checked="" type="radio"/>	<input type="radio"/>
Admin1@contoso.com can configure the firewall and Windows Defender on Computer1.	<input type="radio"/>	<input checked="" type="radio"/>
Admin2@contoso.com can install software on Computer1.	<input checked="" type="radio"/>	<input type="radio"/>

**NEW QUESTION 302**

- (Exam Topic 4)  
 Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2

You have a server named Server1 that runs Windows Server 2019 and has the Windows Deployment Services role installed. Server1 contains an x86 boot image and three Windows 10 install images. The install images are shown in the following table.

Name	Architecture	User permission
Image1	x64	Full control: Administrators, WDSServer
Image2	x64	Full control: Administrators Read: Group1
Image3	x86	Full control: Administrators, WDSServer Read: Group2

You purchase a computer named Computer1 that is compatible with the 64-bit version of Windows 10.  
 For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
 NOTE: Each correct selection is worth one point.

**Answer Area**

Statements	Yes	No
User1 can install Image1 on Computer1 by using Windows Deployment Services (WDS)	<input type="radio"/>	<input type="radio"/>
User1 can install Image2 on Computer1 by using Windows Deployment Services (WDS)	<input type="radio"/>	<input type="radio"/>
User2 can install Image3 on Computer1 by using Windows Deployment Services (WDS)	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

**NEW QUESTION 305**

- (Exam Topic 4)  
You have a computer that runs Windows 10.  
The computer fails to start, and you receive the following error message: "BOOTMGR image is corrupt. The system cannot boot".  
You need to repair the system partition.  
Which command should you run from Windows Recovery Environment (WinRE)?

- A. fdisk.exe
- B. chkdsk.exe
- C. diskpart.exe
- D. bcdboot.exe

**Answer:** C

**Explanation:**  
DiskPart, which has replaced fdisk, is a command-line utility that provides the ability to manage disks, partitions or volumes in your computer running all versions of operating system since Windows 2000.  
References:  
<https://www.diskpart.com/windows-10/diskpart-windows-10-1203.html>

**NEW QUESTION 307**

- (Exam Topic 4)  
Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10.  
You discover a known compatibility issue between a feature update and a device driver on the computers. You need to test the installation of the feature update on a test computer.  
Which Windows Update setting should you configure by using a Group Policy Object (GPO)?

- A. Automatic Updates detection frequency
- B. Disable safeguards for Feature Updates
- C. Select the target Feature Update version
- D. Reschedule Automatic Updates scheduled installations

**Answer:** B

**Explanation:**  
Reference:  
<https://docs.microsoft.com/en-us/windows/deployment/update/safeguard-opt-out>

**NEW QUESTION 310**

- (Exam Topic 4)  
You enable Windows PowerShell remoting on a computer that runs Windows 10. You need to limit which PowerShell cmdlets can be used in a remote session.  
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Run the New-PSSession cmdlet.

Create a PS1 file that contains a list of the cmdlets.

Run the New-PSSessionConfigurationFile cmdlet.

Create a PSSC file that contains a list of the cmdlets.

Run the Register-PSSessionConfiguration cmdlets.

Run the Enter-PSSession cmdlet.

Answer Area

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**  
\* 1. New  
\* 2. Register
