NEW QUESTION 9

- (Exam Topic 2)

Which report should the New York office auditors view?

- A. DLP policy matches
B. DLP false positives and overrides
C. DLP incidents
D. Top Senders and Recipients

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies>

This report also shows policy matches over time, like the policy matches report. However, the policy matches report shows matches at a rule level; for example, if an email matched three different rules, the policy matches report shows three different line items. By contrast, the incidents report shows matches at an item level; for example, if an email matched three different rules, the incidents report shows a single line item for that piece of content. Because the report counts are aggregated differently, the policy matches report is better for identifying matches with specific rules and fine tuning DLP policies. The incidents report is better for identifying specific pieces of content that are problematic for your DLP policies.

- Windows 10
- Android
- OS

On which devices can you configure the Endpoint DLP policies?

- A. Windows 10 only
