

## Exam Questions MD-100

Windows 10

<https://www.2passeasy.com/dumps/MD-100/>

NEW QUESTION 1

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 11.

You receive a notification that Computer1 is running low on disk space. You need to remove the following files from Computer1:

- Unused apps
- Unused Microsoft OneDrive content
- Non-critical files for Microsoft Defender Antivirus The solution must minimize administrative effort.

Which tool should you use to remove each type of file? To answer, drag the appropriate tools to the correct file types. Each tool may be used once, more not at all. You may need to drag the split bar between panes or scroll to view content.

Tools

Cleanup recommendations

Disk Cleanup

Disk Management

Storage Sense

File types

Unused apps: Tool

Unused OneDrive content: Tool

Non-critical files for Microsoft Defender Antivirus: Tool

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Tools

Unused apps: Disk Cleanup

Unused OneDrive content: Disk Management

Non-critical files for Microsoft Defender Antivirus: Cleanup recommendations

NEW QUESTION 2

- (Exam Topic 4)

Your company purchases 20 laptops that use a new hardware platform. In a test environment, you deploy Windows 10 to the new laptops. Some laptops frequently generate stop errors.

You need to identify the cause of the issue. What should you use?

- A. Reliability Monitor  
B. Task Manager  
C. System Configuration  
D. Performance Monitor

Answer: A

Explanation:

References:  
<https://lifehacker.com/how-to-troubleshoot-windows-10-with-reliability-monitor-1745624446>

NEW QUESTION 3

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 has the local users shown in the following table.

Name	Member of
User1	Administrators
User2	Event Log readers
User3	Device Owners
User4	Power Users
User5	Users

Which users can analyze the event logs on Computer1? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

Users who can analyze security event logs:

▼

☐ User1 only  
☐ User1 and User2 only  
☐ User1 and User2, and User3 only  
☐ User1, User2, User3, and User4 only  
☐ User1, User2, User3, User4, and User5

Users who can analyze system event logs:

▼

☐ User1 only  
☐ User1 and User2 only  
☐ User1 and User2, and User3 only  
☐ User1, User2, User3, and User4 only  
☐ User1, User2, User3, User4, and User5

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/local-accounts#sec-localsy>

#### NEW QUESTION 4

- (Exam Topic 4)

You have computers that run Windows 10. The computers are joined to an Azure Active Directory (Azure AD) tenant and enrolled in Microsoft Intune. You need to recommend a solution for help desk administrators that meets the following requirements:

- The administrators must assist users remotely by connecting to each user's computer.
- The remote connections must be initiated by the administrators. The users must approve the connection.
- Both the users and the administrators must be able to see the screen of the users' computer.
- The administrators must be able to make changes that require running applications as a member of each computer's Administrators group.

Which tool should you include in the recommendation?

- A. Remote Desktop
- B. Intune
- C. Remote Assistance
- D. Quick Assist

**Answer:** B

**Explanation:**

References:

<https://docs.microsoft.com/en-us/mem/intune/remote-actions/remote-assist-mobile-devices>

#### NEW QUESTION 5

- (Exam Topic 4)

You have three computers that run Windows 10 as shown in the following table.

Name	TPM version	Operating system
Computer1	None	Windows 10 Enterprise
Computer2	2.0	Windows 10 Pro
Computer3	1.2	Windows 10 Enterprise

All the computers have C and D volumes. The Require additional authentication at startup Group Policy settings is disabled on all the computers. Which volumes can you encrypt by using BitLocker Drive Encryption (BitLocker)? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

## Answer Area

You can encrypt volume C on:

▼
Computer1 only
Computer2 only
Computer3 only
Computer1 and Computer3 only
Computer2 and Computer3 only
Computer1, Computer2 and Computer3

You can encrypt volume D on:

▼
Computer1 only
Computer2 only
Computer3 only
Computer1 and Computer3 only
Computer2 and Computer3 only
Computer1, Computer2 and Computer3

- A. Mastered
- B. Not Mastered

**Answer:** A

### Explanation:

Volume C on = Computer 2 and 3 only Volume D on = C1, C2, C3

The "Require additional authentication at startup" setting is located in the Computer Configuration\ Administrative Templates\ Windows Components\ BitLocker Drive Encryption\ Operating System Drives path. If the policy is disabled and there is no TPM chip installed, operating system drives can not be encrypted using BitLocker. Additional data volumes can be protected using a password as a key protector for example.

References:

<https://www.windowscentral.com/how-use-bitlocker-encryption-windows-10>

## NEW QUESTION 6

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant.

Some users sign in to their computer by using Windows Hello for Business.

A user named User1 purchases a new computer and joins the computer to Azure AD.

User1 attempts to configure the sign-in options and receives the error message shown in the exhibit.

### Sign-in options

**\*Some settings are hidden or managed by your organization.**

Windows Hello

Sign in to Windows, apps and services by teaching Windows to recognize you.

Windows Hello isn't available on this device.

[See how it works and find compatible devices.](#)

You open Device Manager and confirm that all the hardware works correctly.

You need to ensure that User1 can use Windows Hello for Business facial recognition to sign in to the computer.

What should you do first?

- A. Purchase an infrared (IR) camera.
- B. Upgrade the computer to Windows 10 Enterprise.
- C. Enable UEFI Secure Boot.
- D. Install a virtual TPM driver.

**Answer:** B

### Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-planning-guide>

## NEW QUESTION 7

- (Exam Topic 4)

You are a network administrator at your company.

A user attempts to start a computer and receives the following error message: "Bootmgr is missing." You need to resolve the issue.

You start the computer in the recovery mode.

Which command should you run next? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

▼	▼
Bootrec	/FixMbr
Diskpart	/RebuildBcd
Sfc	/ScanNow
	/offbootdir

- A. Mastered  
 B. Not Mastered

**Answer:** A

**Explanation:**

References: <https://neosmart.net/wiki/bootmgr-is-missing/>

#### NEW QUESTION 8

- (Exam Topic 4)

You have the computer shown in the following table.

Name	Windows 10 edition	Servicing channel
Computer1	Windows 10 Pro	Preview Build - Fast
Computer2	Windows 10 Pro	Semi-annual
Computer3	Windows 10 Enterprise	Long-term

You plan to configure deployment rings for Windows 10 quality and feature updates.

What is the maximum number of days you can defer installing quality updates, and which computers support installing feature updates from Windows Update? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Maximum number of days you can defer installing quality updates:

7 days  
 30 days  
 180 days  
 365 days

Computers that support installing feature updates from Windows Update:

Computer1 only  
 Computer2 only  
 Computer3 only  
 Computer1 and Computer2 only  
 Computer1, Computer2, and Computer3

- A. Mastered  
 B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-configure-wufb>

#### NEW QUESTION 9

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You need to prevent standard users from changing the wireless network settings on Computer1. The solution must allow administrators to modify the wireless network settings.

What should you use?

- A. Windows Configuration Designer  
 B. MSConfig  
 C. Local Group Policy Editor  
 D. an MMC console that has the Group Policy Object Editor snap-in

**Answer:** C

#### NEW QUESTION 10

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

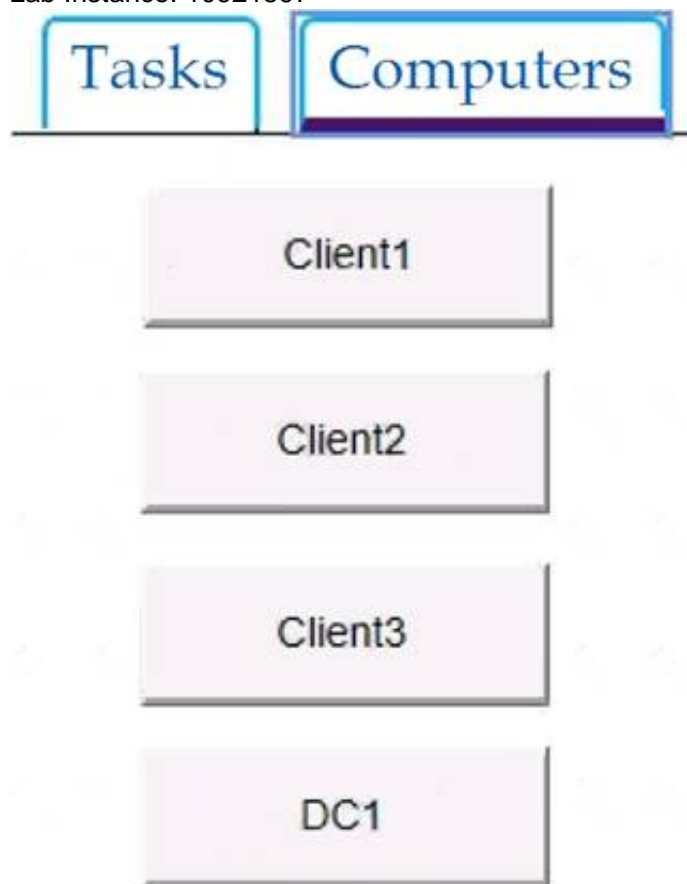

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a group named Group2 on Client2. The members of Group2 must be able to change the system time. The solution must use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

- > On Client2, Press Windows+R
- > Type lusrmgr.msc
- > Right click Groups and click New Group.
- > Type in the Group name and a description.

- Click Add to add members to this group. Specify the name of the user or group or computer to be added.
- Click Create and Close.
- Press the Win + R keys to open Run, type secpol.msc into Run, and click/tap on OK to open Local Security Policy.
- Expand open Local Policies in the left pane of Local Security Policy, click/tap on User Rights Assignment, and double click/tap on the Change the system time policy in the right pane.
- Click/tap on the Add User or Group button.
- Click/tap on the Object Types button.
- Check all the boxes for Object types, and click/tap on the OK.
- Click/tap on the Advanced button.
- Click/tap on the Find Now button, select the name of the user or group
- Click/tap on OK.
- Click/tap on OK.
- When finished, you can close Local Users and Groups.

<https://www.windows-active-directory.com/local-user-management.html> <https://www.tenforums.com/tutorials/92910-allow-prevent-users-groups-change-time-windows-10-a.html#optio>

### NEW QUESTION 10

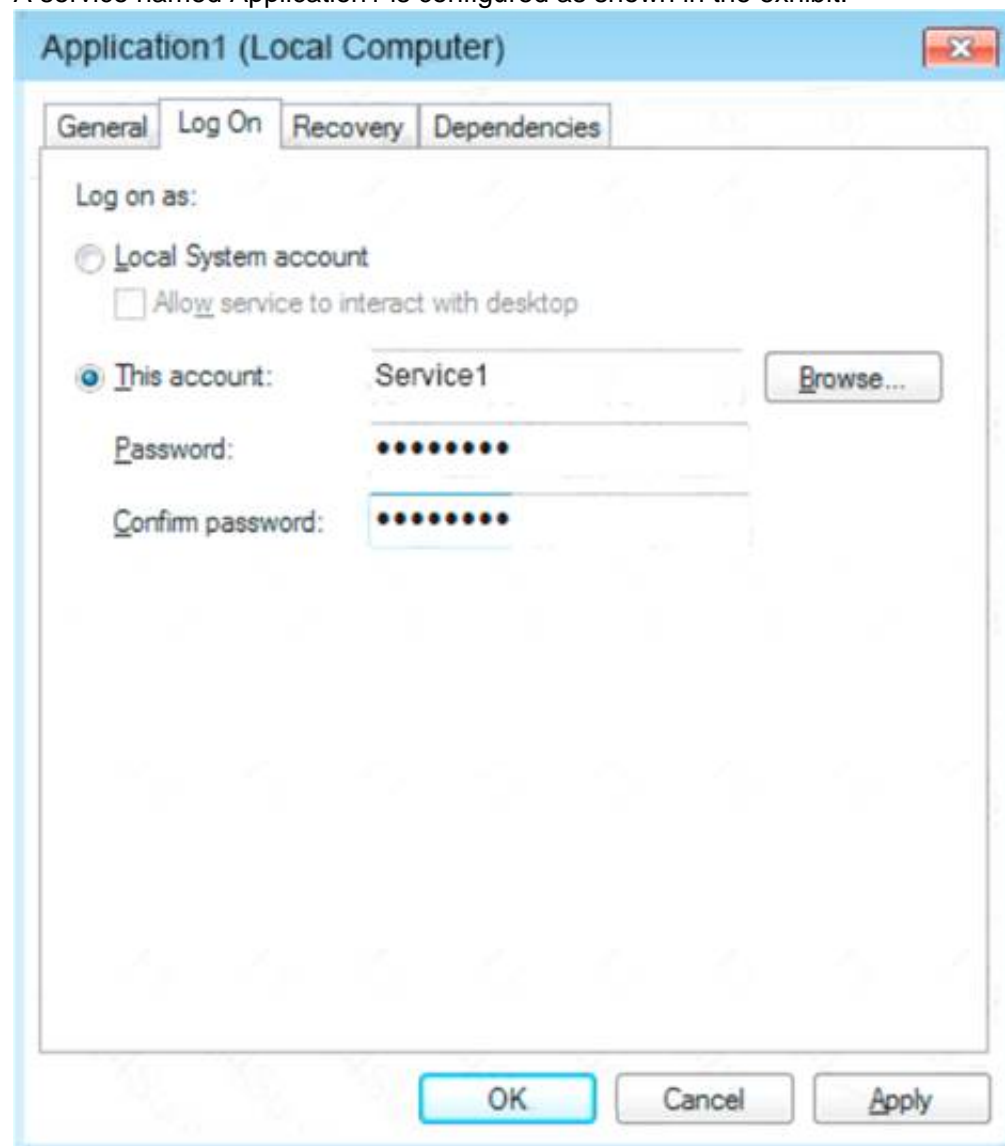

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files.

You need to ensure that the identity used by Application1 cannot be used by a user to sign in to the desktop on Computer1. The solution must use the principle of least privilege.

Solution: On Computer1, you assign Service1 the deny log on as a service user right. Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/deny-log-on-as-a-s>

### NEW QUESTION 15

- (Exam Topic 4)

You have a computer named Client1 that runs Windows 10 and has Windows Sandbox enabled.

You create a script named Script1.cmd. On Client1, you save Script1.cmd to a folder named C:\Scripts. You need to ensure that when you sign in to Windows Sandbox, Script1.cmd runs automatically.

How should you complete the configuration file? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

## Answer Area

```
<Configuration>
  <MappedFolders>
    <MappedFolder>
      <HostFolder>C:\Scripts</HostFolder>
      <ReadOnly>true</ReadOnly>
    </MappedFolder>
  </MappedFolders>
  <LogonCommand>
    <Command>C:\Users\
      Administrator
      Guest
      WDAGUtilityAccount
    \
      C$\Scripts
      Desktop\Scripts
      Scripts
    \Script1.cmd</Command>
  </LogonCommand>
</Configuration>
```

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

## Answer Area

```
<Configuration>
  <MappedFolders>
    <MappedFolder>
      <HostFolder>C:\Scripts</HostFolder>
      <ReadOnly>true</ReadOnly>
    </MappedFolder>
  </MappedFolders>
  <LogonCommand>
    <Command>C:\Users\
      Administrator
      Guest
      WDAGUtilityAccount
    \
      C$\Scripts
      Desktop\Scripts
      Scripts
    \Script1.cmd</Command>
  </LogonCommand>
</Configuration>
```

## NEW QUESTION 17

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and is joined to an Active Directory domain named adatum.com. A user named Admin1 signs in to Computer1 and runs the whoami command as shown in the following exhibit.

```

Command Prompt
c:\Users\admin1>whoami /user /groups /priv

USER INFORMATION
-----
User Name      SID
=====
adatum\admin1  S-1-5-21-4534338-1127018997-2609994386-4602

GROUP INFORMATION
-----

C:\Users\admin1>

```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

### Answer Area

On Computer1, if Admin1 attempts to open Device Manager, [answer choice].

▼

Admin1 will be prompted for credentials

Admin1 will be prompted for consent

Admin1 will be denied access

Device Manager will open without a prompt

On Computer1, if Admin1 attempts to run the command prompt as an administrator, [answer choice].

▼

Admin1 will be prompted for credentials

Admin1 will be prompted for consent

Admin1 will be denied access

the command prompt will open without a prompt

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

On Computer1, if Admin attempts to open Device Manager, [answer choice].

▼

Admin1 will be prompted for credentials

Admin1 will be prompted for consent

Admin1 will be denied access

Device Manager will open without a prompt

On Computer1, if Admin attempts to run the command prompt as an administrator, [answer choice].

▼

Admin1 will be prompted for credentials

Admin1 will be prompted for consent

Admin1 will be denied access

Device Manager will open without a prompt

### NEW QUESTION 22

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User3 on Computer1.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.

User3 is a domain administrator. References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

**NEW QUESTION 26**

- (Exam Topic 4)

You plan to install Windows 10 Pro by using an answer file. You open Windows System Image Manager.

You need to create an answer file. What should you do first?

- A. Open the Install.wim file from the Windows 10 installation media.
- B. Open the Boot.wim file from the Windows 10 installation media.
- C. Install the WinPE add-on for the Windows Assessment and Deployment Kit (Windows ADK).
- D. Install the Windows Assessment and Deployment Kit (Windows ADK).

**Answer:** C

**NEW QUESTION 30**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10. The computer contains a folder. The folder contains sensitive data.

You need to log which user reads the contents of the folder and modifies and deletes files in the folder. Solution: From the properties of the folder, you configure

the Auditing settings and from Audit Policy in the

local Group Policy, you configure Audit object access.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

References:

[https://www.netwrix.com/how\\_to\\_detect\\_who\\_changed\\_file\\_or\\_folder\\_owner.html](https://www.netwrix.com/how_to_detect_who_changed_file_or_folder_owner.html)

**NEW QUESTION 32**

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains named Computer1 that runs Windows 10.

On Computer1, you create an NTFS folder and assign Full control permissions to Everyone.

You share the folder as Share1 and assign the permissions shown in the following table.

Name	Permission
User1	Full control
User2	Change

When accessing Share1, which two actions can be performed by User1 but not by User2? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Delete a file created by another user.
- B. Set the permissions for a file.
- C. Rename a file created by another user.
- D. Take ownership of file.
- E. Copy a file created by another user to a subfolder.

**Answer:** BD

**Explanation:**

References:

<https://www.varonis.com/blog/ntfs-permissions-vs-share/>

#### NEW QUESTION 36

- (Exam Topic 4)

You have 100 computers that run Windows 10. You have no servers. All the computers are joined to Microsoft Azure Active Directory (Azure AD). The computers have different update settings, and some computers are configured for manual updates. You need to configure Windows Update. The solution must meet the following requirements:

- The configuration must be managed from a central location.
- Internet traffic must be minimized.
- Costs must be minimized.

How should you configure Windows Update? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Windows Update technology to use:

▼

Windows Server Update Services (WSUS)

Microsoft System Center Configuration Manager

Windows Update for Business

Manage the configuration by using:

▼

A Group Policy object (GPO)

Microsoft System Center Configuration Manager

Microsoft Intune

Manage the traffic by using:

▼

Delivery Optimization

BranchCache

Peer cache

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-optimize-windows-10-updates> <https://docs.microsoft.com/en-us/windows/deployment/update/waas-delivery-optimization>

#### NEW QUESTION 40

- (Exam Topic 4)

You are troubleshooting Windows 10 updates that fail to install on a computer that runs Windows 10. You delete the contents of the SoftwareDistribution folder. You need to delete the signatures of the Windows Update packages. Which folder should you delete?

- A. %systemroot%\system32\catroot2
- B. %systemdrive%\recovery
- C. %systemroot%\WinSxS
- D. %systemdrive%\System Volume Information

**Answer:** A

#### Explanation:

References:

<https://tipsmake.com/how-to-delete-pending-updates-on-windows-10>

#### NEW QUESTION 44

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User1 on Computer1.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

#### Explanation:

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges. User1 is a standard user. References:  
<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

#### NEW QUESTION 46

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro.

You have a mobile device. You use Bluetooth to pair the mobile device to Computer1. You want to enable dynamic lock on Computer1.

What should you do?

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

- > On Computer1, select the Start button > Settings > Accounts > Sign-in options.
- > Under Dynamic lock, select the Allow Windows to automatically lock your device when you're away check box.

Reference:

<https://support.microsoft.com/en-za/help/4028111/windows-lock-your-windows-10-pc-automatically-when-you>

#### NEW QUESTION 49

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to a Microsoft Azure Active Directory (Azure AD) tenant.

The company plans to purchase computers preinstalled with Windows 10 Pro for all users. The company the following requirements:

- > The new computers must be upgraded to Windows 10 Enterprise automatically.
- > The new computers must be joined to Azure AD automatically when the user starts the new computers for the first time.
- > The users must not be required to accept the End User License Agreement (EULA).

You need to deploy the new computers. What should you do?

- A. Make use of the wipe and load refresh deployment method.
- B. Perform in-place upgrade on the new computers.
- C. Provide provisioning packages for the new computers.
- D. Make use of Windows Autopilot.

**Answer:** D

#### Explanation:

Windows Autopilot is a collection of technologies used to set up and pre-configure new devices, getting them ready for productive use. You can also use Windows Autopilot to reset, repurpose and recover devices.

The OEM Windows 10 installation on the new computers can be transformed into a "business-ready" state, applying settings and policies, installing apps, and even changing the edition of Windows 10 being used (e.g. from Windows 10 Pro to Windows 10 Enterprise) to support advanced features.

The only interaction required from the end user is to connect to a network and to verify their credentials. Everything beyond that is automated.

Reference:

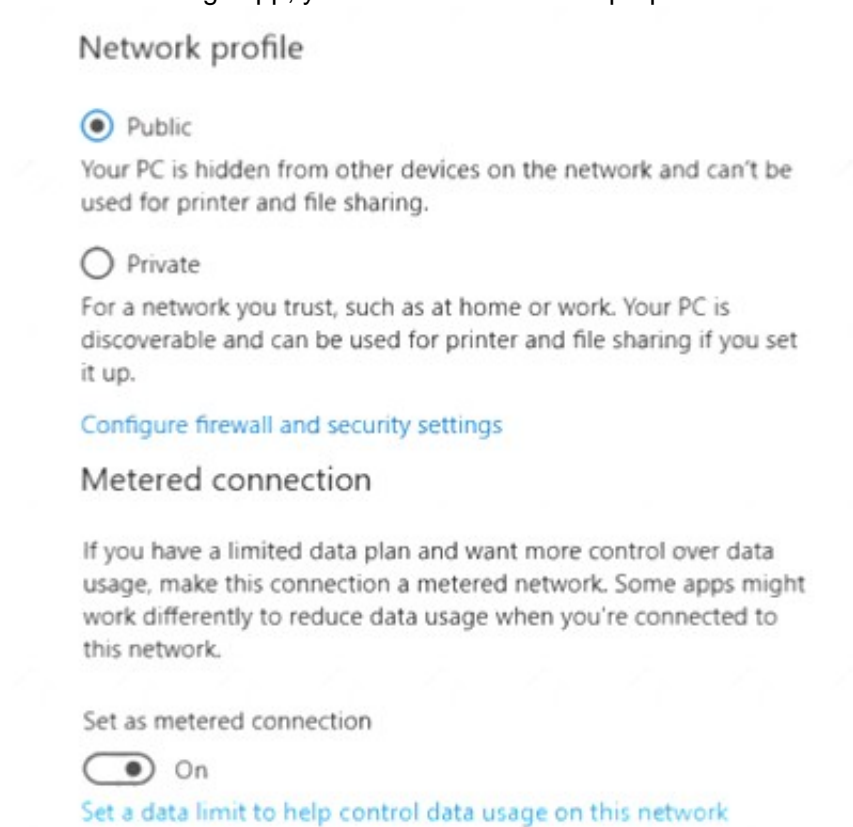

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

#### NEW QUESTION 54

- (Exam Topic 4)

You have a computer that runs Windows 10.

From the Settings app, you view the connection properties shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
 NOTE: Each correct selection is worth one point.

To enable Windows Remote Management (WinRM), you must first [answer choice].

set the Network profile to Private  
run winrm qc at the command prompt  
turn off Metered connection

To ensure that Microsoft OneDrive syncs, you must first [answer choice].

set the Network profile to Private  
run winrm qc at the command prompt  
turn off Metered connection

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To enable Windows Remote Management (WinRM), you must first [answer choice].

set the Network profile to Private  
run winrm qc at the command prompt  
turn off Metered connection

To ensure that Microsoft OneDrive syncs, you must first [answer choice].

set the Network profile to Private  
run winrm qc at the command prompt  
turn off Metered connection

#### NEW QUESTION 57

- (Exam Topic 4)

You have computers that run Windows 10 and are configured as shown in the following table.

Name	TPM	BitLocker Drive Encryption enabled on drive C	BitLocker Drive Encryption enabled on drive D
Computer1	No	Yes	Yes
Computer2	Yes	No	Yes
Computer3	Yes	Yes	No

You have a removable USB drive named USBDrive1 that is encrypted by using BitLocker to Go. You plan to use USBDrive1 on Computer1, Computer2, and Computer3.

You need to identify on which computers you can enable automatic unlocking of BitLocker on USBDrive1. Which computers should you identify?

- A. Computer2 and Computer3 only
- B. Computer3 only
- C. Computer1 and Computer3 only
- D. Computer1, Computer2, and Computer3

Answer: C

Explanation:

The BitLocker key is stored in the registry when you enable auto-unlock but only if the operating system drive is encrypted with BitLocker. A TPM is not required.

#### NEW QUESTION 61

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

Several users have signed in to Computer1 and have a profile.

You create a taskbar modification file named LayoutModification.xml.

You need to ensure that LayoutModification.xml will apply to all users who sign in to Computer1. To which folder should you copy LayoutModification.xml?

- A. C:\Users\Public\Public Desktop
- B. C:\Windows\ShellExperiences
- C. C:\Users\Default\AppData\Local\Microsoft\Windows\Shell\
- D. C:\Windows\System32\Configuration

Answer: C

Explanation:

Reference:

https://docs.microsoft.com/en-us/windows/configuration/start-layout-xml-desktop

#### NEW QUESTION 64

- (Exam Topic 4)

You have two computers named Computer1 and Computer2 that run Windows 10. The computers are in a workgroup.

You perform the following configurations on Computer1:

- > Create a user named User1.
- > Add User1 to the Remote Desktop Users group. You perform the following configurations on Computer2:
- > Create a user named User1 and specify the same user password as the one set on Computer1.
- > Create a share named Share2 and grant User1 Full control access to Share2.
- > Enable Remote Desktop.

What are the effects of the configurations? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

If User1 attempts to access Share2 from Computer1, the user will:

Access Share2 without a prompt  
Be prompted for credentials  
Be denied access to Share2

If User1 attempts to sign in to Remote Desktop on Computer2 from Computer1, the user will:

Sign in to Remote Desktop without a prompt  
Be prompted for credentials and be able to sign in as User1.  
Be prompted for credentials and be prevented from signing in as User1.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

If User1 attempts to access Share2 from Computer1, the user will:

Access Share2 without a prompt  
Be prompted for credentials  
Be denied access to Share2

If User1 attempts to sign in to Remote Desktop on Computer2 from Computer1, the user will:

Sign in to Remote Desktop without a prompt  
Be prompted for credentials and be able to sign in as User1.  
Be prompted for credentials and be prevented from signing in as User1.

#### NEW QUESTION 68

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of
User1	Domain Admins
User2	Backup Operators

The domain contains a computer named Computer1. Computer1 contains the users shown in the following table.

Name	Member of
User3	Administrators
User4	Users

On Computer1, you create a restore point named RP1.

Which users can restore RP1 on Computer1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Can restore RP1 on Computer1 while Windows is running:

User3 only
User1 and User3 only
User3 and User4 only
User1, User2, and User3 only
User1, User3, and User4 only

Can restore RP1 if Computer1 restarts by using Advanced startup:

User3 only
User1 and User3 only
User3 and User4 only
User1, User2, and User3 only
User1, User3, and User4 only

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Reference:

[https://ss64.com/nt/syntax-security\\_groups.html](https://ss64.com/nt/syntax-security_groups.html)

NEW QUESTION 72

- (Exam Topic 4)

You are a network administrator at your company.

A user attempts to start a computer and receives the following error message: "Bootmgr is missing." You need to resolve the issue.

You start the computer in recovery mode.

Which command should you run next? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Bootrec
Diskpart
Sfc

/FixMbr
/RebuildBcd
/ScanNow
/offbootdir

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References: [https://neosmart.net/wiki/bootrec/#Bootrec\\_in\\_Windows10](https://neosmart.net/wiki/bootrec/#Bootrec_in_Windows10)

NEW QUESTION 75

- (Exam Topic 4)

You have a computer named Client1 that runs Windows 10 and has Windows Sandbox enabled. You need to create a Windows Sandbox configuration file.

How should you format the file, and which file extension should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Format: 

YAML

JSON

XML

YAML

Extension: 

.wsb

.sbx

.vmcx

.wsb

- A. Mastered  
 B. Not Mastered

Answer: A

Explanation:

Answer Area

### NEW QUESTION 80

- (Exam Topic 4)

You have a file named Reg1.reg that contains the following content.

```
Windows Registry Editor Version 5.00
```

```
[HKEY_CLASSES_ROOT\Directory\Background\shell\Notepad]
```

```
[HKEY_CLASSES_ROOT\Directory\Background\shell\Notepad\command]
```

```
@="notepad.exe"
```

What is the effect of importing the file?

- A. A key named command will be renamed as notepad.exe.  
 B. In a key named Notepad, the command value will be set to @="notepad.exe".  
 C. In a key named command, the default value will be set to notepad.exe.

Answer: C

### NEW QUESTION 81

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of domain group
User1	Authenticated Users
User2	Device Managers Authenticated Users
User3	Help Desk Authenticated Users

The Authenticated Users group has the Add workstations to domain user right in the Default Domain Controllers Policy.

The Device Managers and Help Desk groups are granted the Create Computer objects permission for the Computers container of the domain.

You have 15 workgroup computers that run Windows 10. Each computer contains a local user account named LocalAdmin1 that is a member of the following groups:

- > Administrators
- > Device Owners
- > Authenticated Users

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

### Statements

Yes

No

User1 can join all the computers to the domain.

☐
☐

User2 can join a maximum of 10 computers to the domain.

☐
☐

User3 can join all the computers to the domain.

☐
☐

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: No

User1 is a member of the Authenticated Users group which has the Add workstations to domain user right. However, with the Add workstations to domain user right, you are restricted to joining a maximum of 10 computers to the domain.

Box 2: No

User2 is a member of the Authenticated Users group which has the Add workstations to domain user right. User2 is also a member of the Device Managers group which is granted the Create Computer objects permission for the Computers container of the domain. The Create Computer objects permission overrides the 10-computer limit imposed by the Add workstations to domain user right so User2 can join more than 10 computers to the domain.

Box 3: Yes

User3 is a member of the Authenticated Users group which has the Add workstations to domain user right. User3 is also a member of the Help Desk group which is granted the Create Computer objects permission for the Computers container of the domain. The Create Computer objects permission overrides the 10-computer limit imposed by the Add workstations to domain user right so User3 can join all the computers to the domain.

**NEW QUESTION 86**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you run the winrm quickconfig command.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Windows Remote Management is a component of the Windows Hardware Management features that manage server hardware locally and remotely.

References:

<https://docs.microsoft.com/en-us/windows/win32/winrm/about-windows-remote-management>

**NEW QUESTION 88**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

The relevant services on Computer1 are shown in the following table.

Name	Startup type	Status	Dependent on
Service1	Automatic	Stopped	Service2, Service3
Service2	Automatic	Stopped	Service6
Service3	Disabled	Running	None
Service4	Disabled	Stopped	Service5
Service5	Automatic	Running	None
Service6	Manual	Stopped	None

Which service will start after you restart Computer1?

- A. Service3 and Services only
- B. Service 1, Setvice2. and Services
- C. Service2, Services, and Service6
- D. Services only

**Answer:** C

**Explanation:**

Service1 cannot start because it is dependent on Service3 which is disabled.

Service2 will start because it is set to Automatic. Service2 starting will cause Service6 to start. Service3 will not start because it is disabled.

Service4 will not start because it is disabled.

Service5 will start because it is set to Automatic and is not dependent on any other services. Service6 will start because Service2 is dependent on Service6.

**NEW QUESTION 91**

- (Exam Topic 4)

You have a computer that runs Windows 10. You view the domain services status as shown in the following exhibit.

```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

### Answer Area

Microsoft Edge is configured by using [answer choice].

▼

a Group Policy object (GPO)

Microsoft Intune

the Internet Explorer Administration Kit (IEAK)

The computer is [answer choice].

▼

enrolled in Microsoft Intune

managed by using Endpoint Configuration Manager

joined to an on-premises Active Directory domain

- A. Mastered  
B. Not Mastered

Answer: A

### Explanation:

Device is Azure AD joined; not domain joined.

The MDM URLs in the exhibit indicate the device is enrolled in Intune. References:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/troubleshoot-device-dsregcmd>

<https://github.com/MicrosoftLearning/MD-101T00-ManagingModernDesktops/blob/master/Instructions/Labs/04>

### NEW QUESTION 95

- (Exam Topic 4)

You have a computer that runs Windows 11 and hosts the Hyper-V virtual machines shown in the following table.

Name	Generation	Configuration version
VM1	1	9.0
VM2	1	10.0
VM3	2	8.0
VM4	2	10.0

You need to install Windows 11 on a virtual machine. On which virtual machine can you install Windows 11?

- A. VM2only  
B. VM4only

- C. VM3 and VM4 only
- D. VM2 and VM4 only
- E. VM1, VM2, VM3, and VM4

**Answer:** E

#### NEW QUESTION 100

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

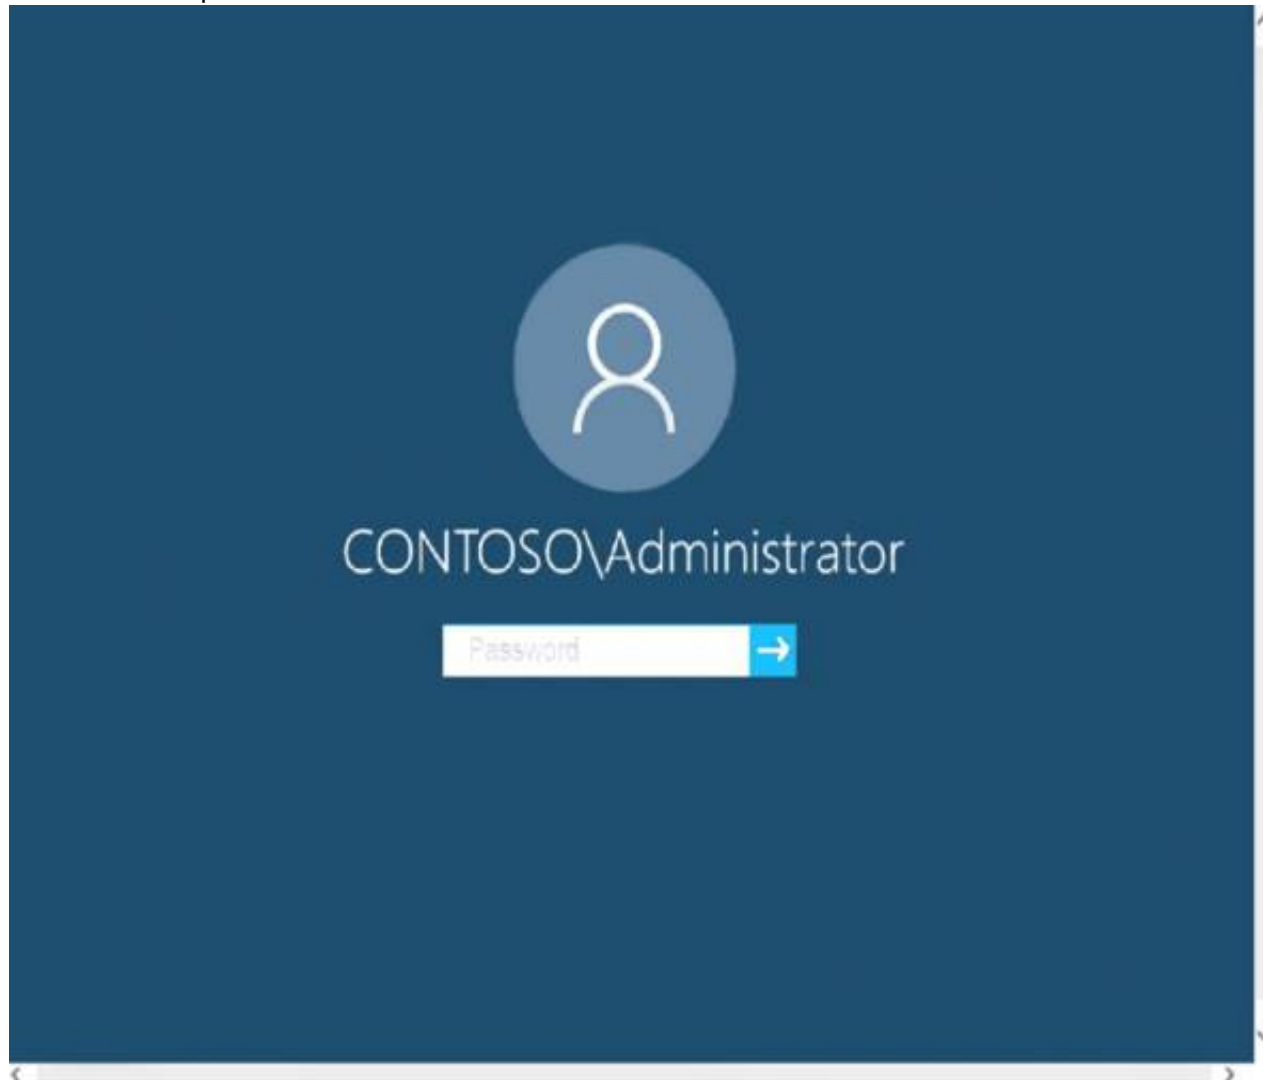

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

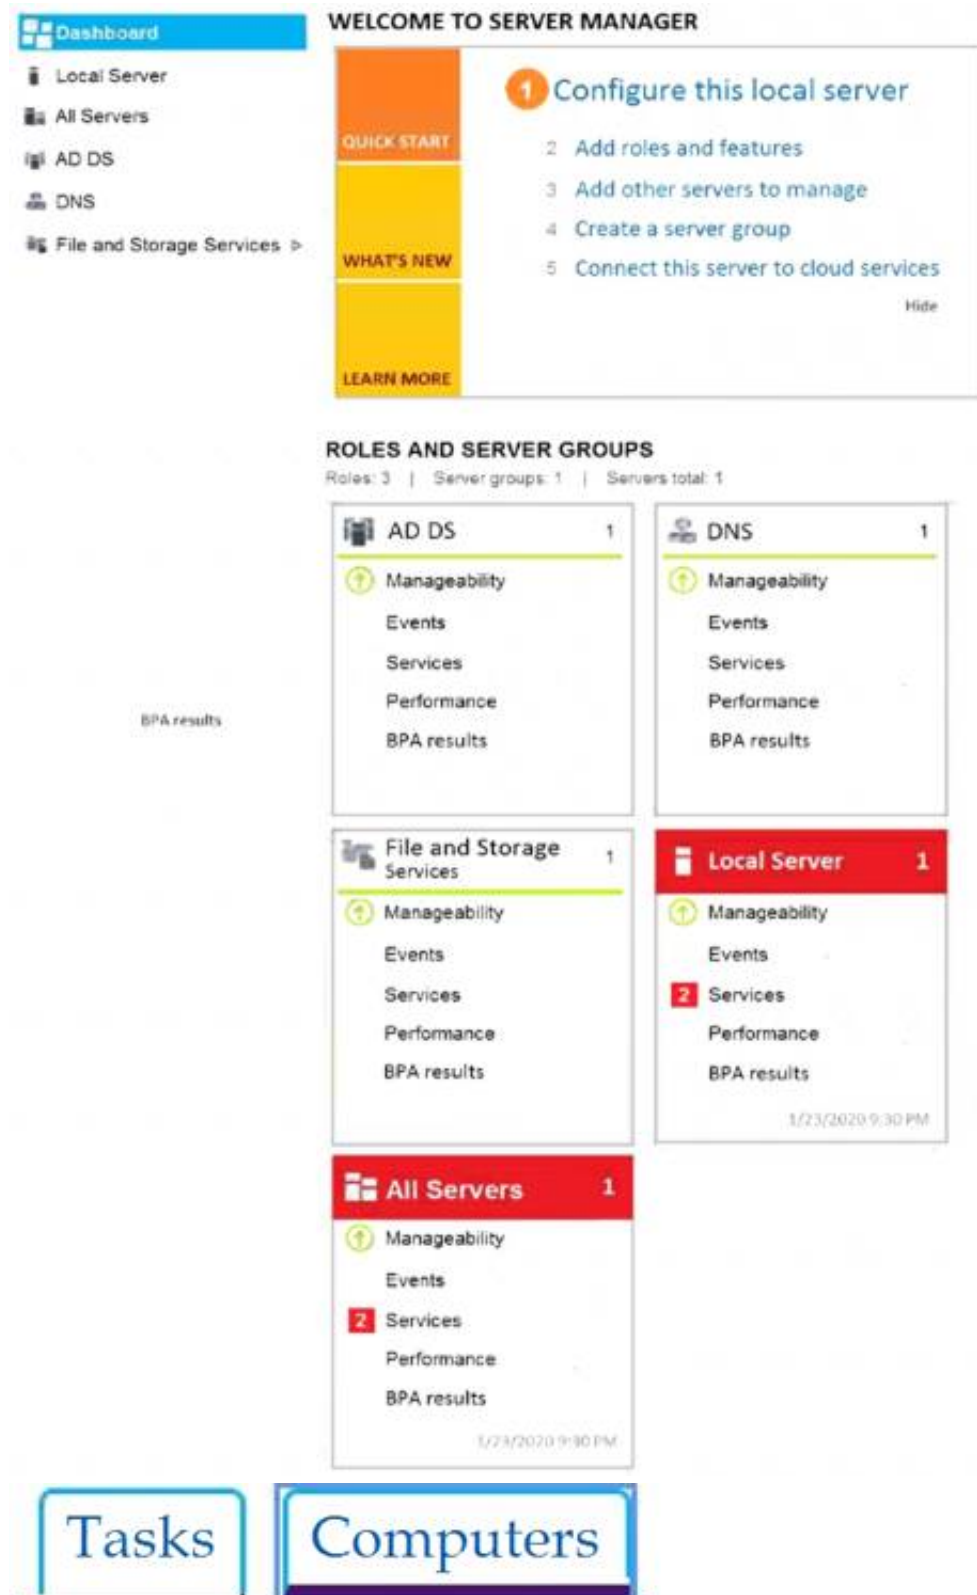

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

You need to ensure that all the current and future users in the Active Directory domain can establish Remote Desktop connections to Client1. The solution must use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Step 1. Add Remote Desktop Users to the Remote Desktop Users Group.

- Open Server Manager.
- From Tools menu, select Active Directory Users and Computers
- Double click at your domain on the left and then select Builtin.
- Open Remote Desktop Users on the right pane.

- > At Members tab, click Add.
- > Type the AD users that you want to give Remote access to the RDS Server and click OK.
- > After selecting the remote desktop users, click OK again to close the window.

Step 2. Allow the log on through remote desktop Services.

- \* 1. Open Group Policy Editor. To do that:
  - \* a. Simultaneously press the Windows + R keys to open run command box. 
  - \* b. Type gpedit.msc and press Enter.
- \* 2. In Group Policy Editor navigate to: Computer Configuration > Windows Settings > Security Settings > Local Policies > User Rights Assignment.
- \* 3. At the right Pane: double click at Allow log on through Remote Desktop Services.
- \* 4. Click Add User or Group.
- \* 5. Type remote and then click Check Names.
- \* 6. Select the Remote Desktop Users and click OK.
- \* 7. Click OK at 'Select users, computers...' window.
- \* 8. Finally click OK again and close Group Policy Editor.

### NEW QUESTION 103

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User2 on Computer1.

Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

#### Explanation:

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.

User2 is a domain user, not an administrator. Use User3's credentials instead. References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

### NEW QUESTION 105

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a user named User1. User1 creates a Microsoft account.

User1 needs to sign in to cloud resources by using the Microsoft account without being prompted for credentials.

Which settings should User1 configure?

- A. User Accounts in Control Panel
- B. Email & app accounts in the Settings app
- C. Users in Computer Management
- D. Users in Active Directory Users and Computers

**Answer: B**

#### Explanation:

References:

<https://support.microsoft.com/en-za/help/4028195/microsoft-account-how-to-sign-in>

### NEW QUESTION 110

- (Exam Topic 4)

You have a computer that runs Windows 10.

You discover that Windows updates are failing to install on the computer.

You need to generate a log file that contains detailed information about the failures. Which cmdlet should you run?

- A. Get-LogProperties
- B. Get-WindowsErrorReporting
- C. Get-WindowsUpdateLog
- D. Get-WinEvent

**Answer: C**

#### Explanation:

References:

<https://docs.microsoft.com/en-us/powershell/module/windowsupdate/get-windowsupdate-log?view=win10-ps>

### NEW QUESTION 112

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a Microsoft Deployment Toolkit (MDT) deployment share. You create a task sequence, and then you run the MDT deployment wizard on Computer1.

Does this meet the goal?

A. Yes

B. No

**Answer: A**

#### Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/upgrade-to-windows-10-with-the>

### NEW QUESTION 116

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

The domain contains the user accounts shown in the following table.

Name	Member of
User1	Domain Admins
User2	Domain Users
User3	Domain Users

Computer2 contains the local groups shown in the following table.

Name	Members
Group1	ADATUM\User2 ADATUM\User3
Group2	ADATUM\User2
Group3	ADATUM\User3
Administrators	ADATUM\Domain Admins ADATUM\User3
Remote Desktop Users	Group1

The relevant user rights assignments for Computer2 are shown in the following table.

Policy	Security Setting
Allow log on through Remote Desktop Services	Administrators, Remote Desktop Users
Deny log on through Remote Desktop Services	Group2
Deny log on locally	Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

#### Statements

Yes

No

User1 can establish a Remote Desktop session to Computer2.

☐
☐

User2 can establish a Remote Desktop session to Computer2.

☐
☐

User3 can establish a Remote Desktop session to Computer2.

☐
☐

A. Mastered

B. Not Mastered

Answer: A

**Explanation:**

Box 1: Yes

User1 is an administrator and has the Allow log on through Remote Desktop Services.

Box 2: No

User2 is a member of Group2 which has the Deny log on through Remote Desktop Services. Box 3: Yes

User3 is a member of the administrators group and has the Allow log on through Remote Desktop Services.

Note: Deny permissions take precedence over Allow permissions. If a user belongs to two groups, and one of them has a specific permission set to Deny, that user is not able to perform tasks that require that permission even if they belong to a group that has that permission set to Allow.

References:

<https://docs.microsoft.com/en-us/azure/devops/organizations/security/about-permissions?view=azure-devops&ta>

**NEW QUESTION 121**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User1 has a computer named Computer1 that runs Windows 10. Computer1 is joined to an Azure Active Directory (Azure AD) tenant named contoso.com. User1 joins Computer1 to contoso.com by using user1@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: In Azure AD, you create a group named Group1 that contains User1 and User2. You grant Group1 Modify access to Folder1.

Does this meet the goal?

A. Yes

B. No

Answer: A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc75417>

**NEW QUESTION 122**

- (Exam Topic 4)

You have the source files shown in the following table.

Source	Location
Custom Windows 10 image	D:\Folder1\Image1.wim
Windows 10 language pack DVD	E:\

You mount an image from Image1.wim to a folder named C:\Mount. You need to add the French language pack to the mounted image.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

▼

/Image:

Add-WindowsCapability

Add-WindowsFeature

Dism.exe

Setup.exe

▼

/Add-Package /PackagePath:"E:\x64\langpacks\Microsoft-Windows-Client-Language-Pack\_x64\_fr-fr.cab"

"C:\Mount"

"C:\Mount\Windows"

"C:\Windows"

"D:\Folder1\Image1.wim"

A. Mastered

B. Not Mastered

Answer: A

**Explanation:**

Note: The referenced document has the mount directory as C:\Mount\Windows. In this question, the mount directory is C:\Mount.

Reference:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-language-packs-to-windows>

**NEW QUESTION 123**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted

from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

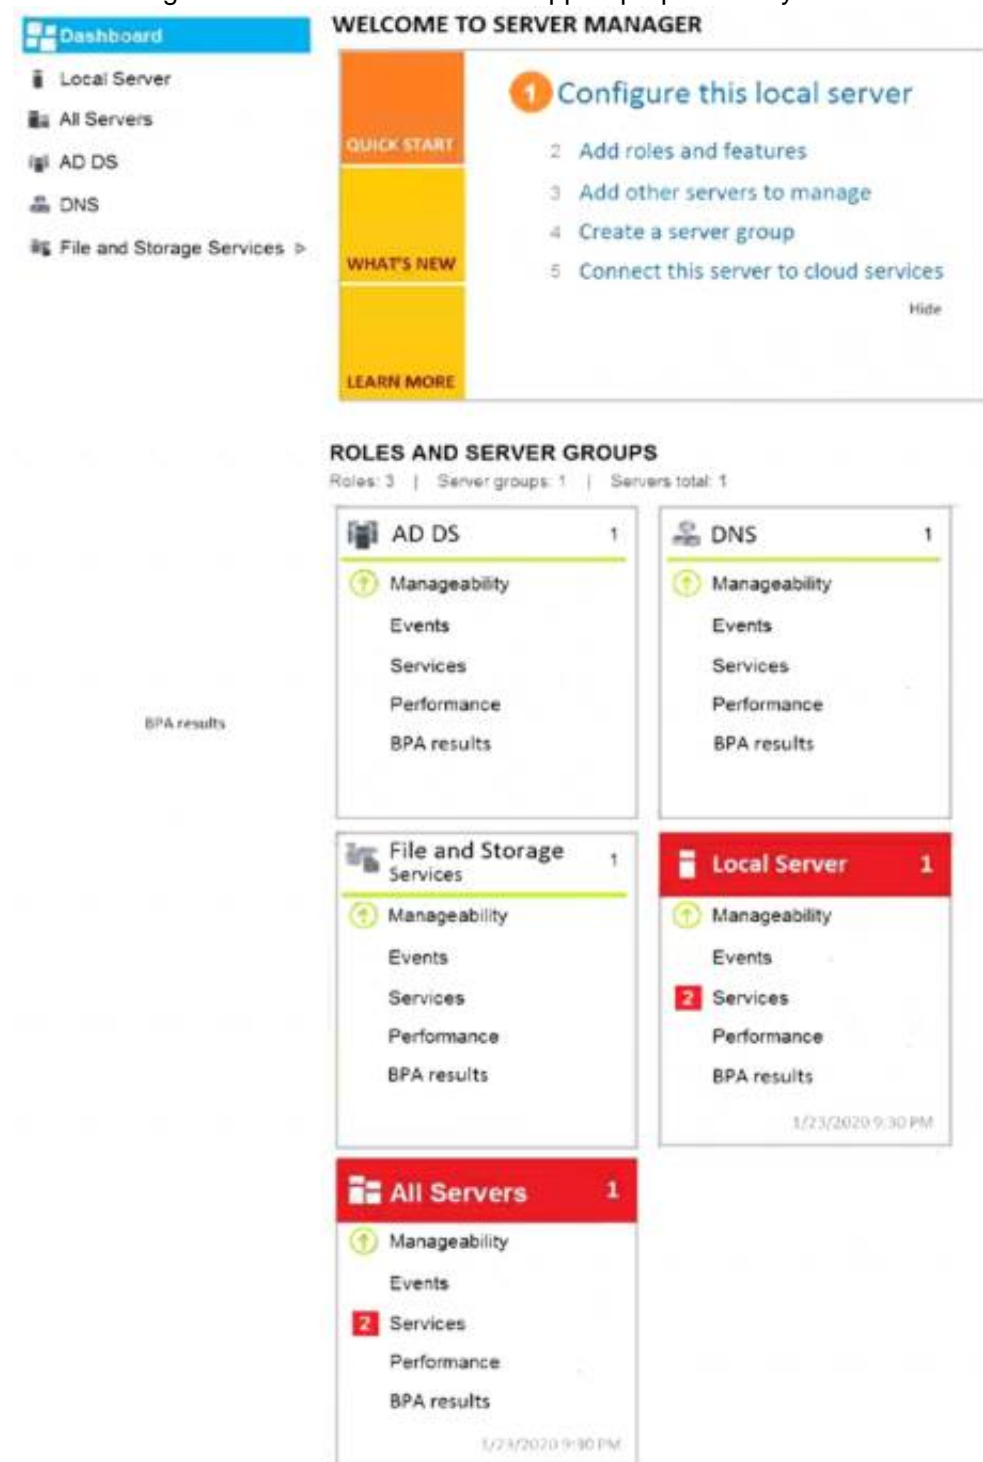

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

The following information is for technical support purposes only: Lab Instance: 11145882

## Tasks Computers

Users who attempt to sign in to the domain from Client3 report that the sign-ins fail. You need to resolve the issue. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

### Explanation:

- > Use a local administrator account to log on to the computer.
- > Select Start, press and hold (or right-click) Computer > Properties.
- > Select Change settings next to the computer name.
- > On the Computer Name tab, select Change.
- > Under the Member of heading, select Workgroup, type a workgroup name, and then select OK.
- > When you are prompted to restart the computer, select OK.
- > On the Computer Name tab, select Change again.
- > Under the Member of heading, select Domain, and then type the domain name.
- > Select OK, and then type the credentials of the user who has permissions in the domain.
- > When you are prompted to restart the computer, select OK.
- > Restart the computer.

### NEW QUESTION 124

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users
User3	Users

You need to configure the desktop background for User1 and User2 only.

Solution: You create two new local Group Policy Objects (GPOs) and apply one GPO to User1 and the other GPO to User2. You configure the Desktop Wallpaper setting in each GPO.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

### Explanation:

Reference:

<https://www.windowscentral.com/how-apply-local-group-policy-settings-specific-users-windows-10>

### NEW QUESTION 126

- (Exam Topic 4)

Your network contains an Active Directory domain. All users have been issued with computers that run Windows 8.1.

A user named Mia Hamm has a computer named Computer1. You upgrade Computer1 to Windows 10 by performing a clean installation of Windows 10 without formatting the drives.

You need to migrate the settings for Mia Hamm from Windows 8.1 to Windows 10. Which two actions should you perform?

NOTE: Each correct selection is worth one point.

- A. Run scanstate.exe and specify the C:\Users folder
- B. Run loadstate.exe and specify the C:\Windows.old folder
- C. Run usmultils.exe and specify the C:\Users folder
- D. Run scanstate.exe and specify the C:\Windows.old folder
- E. Run loadstate.exe and specify the C:\Users folder
- F. Run usmultils.exe and specify the C:\Windows.old folder

**Answer:** DE

**Explanation:**

D: As we have performed a clean installation of Windows 10 without formatting the drives, User1's Windows 8.1 user profile will be located in the \Windows.old folder. Therefore, we need to run scanstate.exe on the \Windows.old folder.

E: User1's Windows 10 profile will be in the C:\Users folder so we need to run loadstate.exe to apply the changes in the C:\Users folder.

<https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-common-migration-scenarios#bkmk-fourpcrc>

**NEW QUESTION 130**

- (Exam Topic 4)

A user has a computer that runs Windows 10.

When the user connects the computer to the corporate network, the user cannot access the internal corporate servers. The user can access servers on the Internet.

You run the ipconfig command and receive the following output.

```
Connection-specific DNS Suffix . : 
Description . . . . . : Ethernet 1
Physical Address. . . . . : 00-50-B6-7B-E4-81
DHCP Enabled. . . . . : Yes
Autoconfiguration Enabled . . . . : Yes
Link-local IPv6 Address . . . . . : fe80::5d56:3419:e83b:3c46%17(Preferred)
IPv4 Address. . . . . : 192.168.0.121(Preferred)
Subnet Mask . . . . . : 255.255.255.0
Lease Obtained. . . . . : Wednesday, October 31, 2018 8:07:14 AM
Lease Expires . . . . . : Wednesday, October 31, 2018 8:07:14 PM
Default Gateway . . . . . : 192.168.0.1
DHCP Server . . . . . : 192.168.0.2
DHCPv6 IAID . . . . . : 536891574
DHCPv6 Client DUID. . . . . : 00-01-00-01-22-AC-5F-64-00-50-B6-7B-E4-81
DNS Servers . . . . . : 131.107.10.60
                        192.168.0.3
NetBIOS over Tcpi. . . . . : Enabled
```

You send a ping request and successfully ping the default gateway, the DNS servers, and the DHCP server. Which configuration on the computer causes the issue?

- A. the DNS servers
- B. the IPv4 address
- C. the subnet mask
- D. the default gateway address

**Answer:** A

**NEW QUESTION 131**

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Users
User2	Users, Administrators

Computer1 contains an image file named C:\Folder\Image.jpg.

Computer1 has the Local Computer\Administrators Policy shown in the following table.

Setting	State
Remove Recycle Bin icon from desktop	Not configured
Desktop Wallpaper	Disabled

Computer1 has the Local Computer\Non-Administrators Policy shown in the following table.

Setting	State	Path
Remove Recycle Bin icon from desktop	Enabled	<i>Not applicable</i>
Desktop Wallpaper	Enabled	C:\Folder\Image.jpg

Computer1 has the local computer policy shown in the following table.

Setting	State
Remove Recycle Bin icon from desktop	Disabled
Desktop Wallpaper	Not configured

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can change the desktop wallpaper.	<input type="radio"/>	<input type="radio"/>
User2 has the Recycle Bin on the desktop.	<input type="radio"/>	<input type="radio"/>
User1 has the Recycle Bin on the desktop.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text Description automatically generated

#### NEW QUESTION 136

- (Exam Topic 4)

A user purchases a new computer that has Windows 10 Home preinstalled. The computer has a biometric fingerprint reader.

You need to ensure that the user can use the fingerprint reader to sign in to the computer by using an Azure Active Directory (Azure AD) account.

What should you do first?

- A. Register the computer to Azure AD.
- B. Install the latest feature updates on the computer.
- C. Upgrade the computer to Windows 10 Enterprise.
- D. Upgrade the computer to Windows 10 Pro.

**Answer:** D

#### NEW QUESTION 139

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

From Event Viewer on Computer1, you have a task named Action1 that is attached to the following event: ➤ Log: System

- Source: Kernel-General
- Event ID: 16

You need to modify the settings of Action1. What should you use?

- A. the Settings app
- B. Task Scheduler
- C. Event Viewer
- D. System Configuration

**Answer:** C

**Explanation:**

An Event Viewer task is created and modified in Event Viewer. References:

<https://www.techrepublic.com/article/how-to-use-custom-views-in-windows-10s-event-viewer/>

#### NEW QUESTION 142

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will

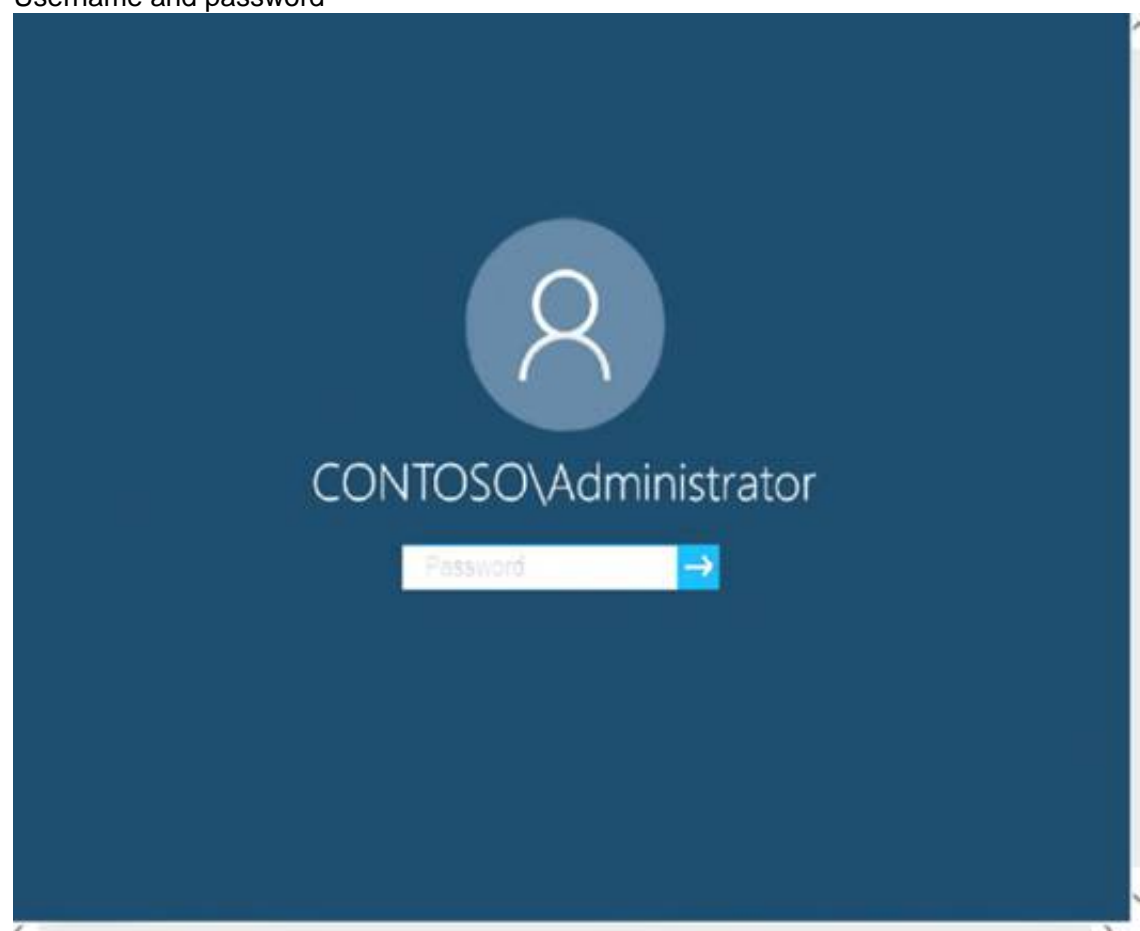

be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

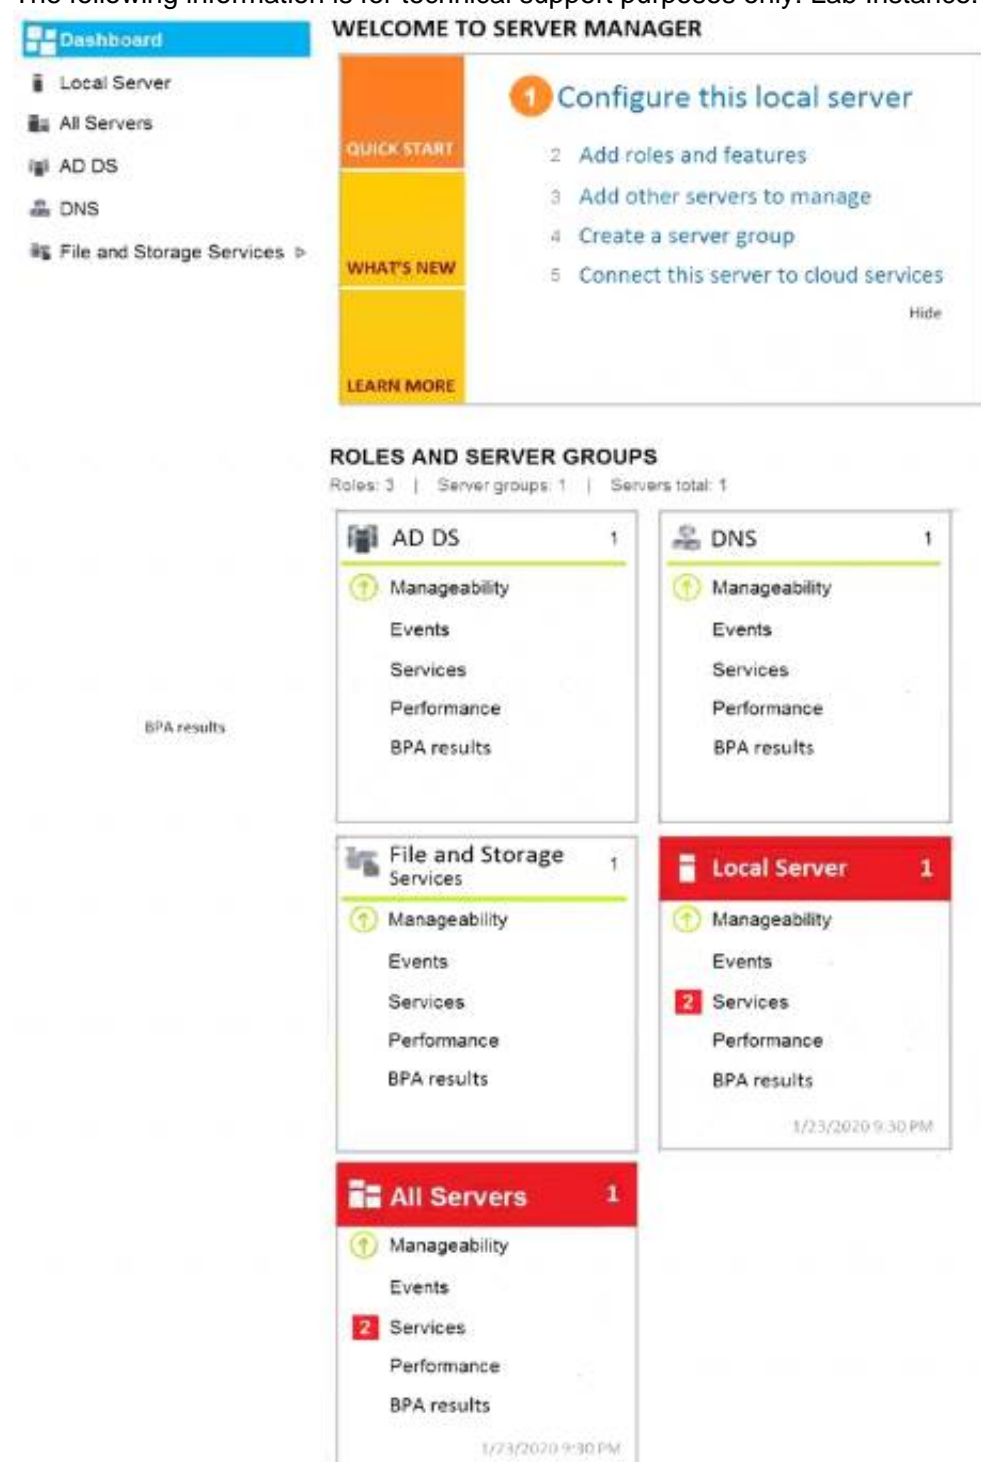

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

You need to create an HTML report that shows which policies and policy settings are applied to CONTOSO\User1 on Client1. You must save the output to a file named Report.html in a folder named Folder1 on the C drive of Client1.  
 To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

On Client1, log in as administrator. Open command prompt and type:  
 gpresult /h CONTOSO\User1\C:\Folder1\Report.html

**NEW QUESTION 145**

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.

You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.

Solution: You use Windows Autopilot and create a deployment profile. You generalize each computer, and the you restart the computers.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**NEW QUESTION 147**

- (Exam Topic 4)

Your company has an on-premises network that contains an Active Directory domain. The domain is synced to Microsoft Azure Active Directory (Azure AD). All computers in the domain run Windows 10 Enterprise.

You have a computer named Computer1 that has a folder named C:\Folder1. You want to use File History to protect C:\Folder1.

Solution: You enable File History on Computer1. You then encrypt the contents of Folder1.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

File History only backs up copies of files that are in Libraries, and Desktop folders and the OneDrive files available offline on your PC. If you have files or folders elsewhere that you want backed up, you can add them to one of these folders.

Reference:

<https://support.microsoft.com/en-us/help/17128/windows-8-file-history>

**NEW QUESTION 152**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. You are troubleshooting connectivity issues on Computer1.

You need to view the remote addresses to which Computer1 has active TCP connections. Which tool should you use?

- A. Performance Monitor
- B. Task Manager
- C. Resource Monitor
- D. Windows Defender Firewall with Advanced Security

Answer: C

#### NEW QUESTION 154

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.

You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.

Solution: You use Microsoft Deployment Toolkit (MDT) and create a task sequence. One each compute, you run the task sequence.

Does the meet the goal?

A. Yes

B. No

Answer: B

#### NEW QUESTION 157

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live

environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

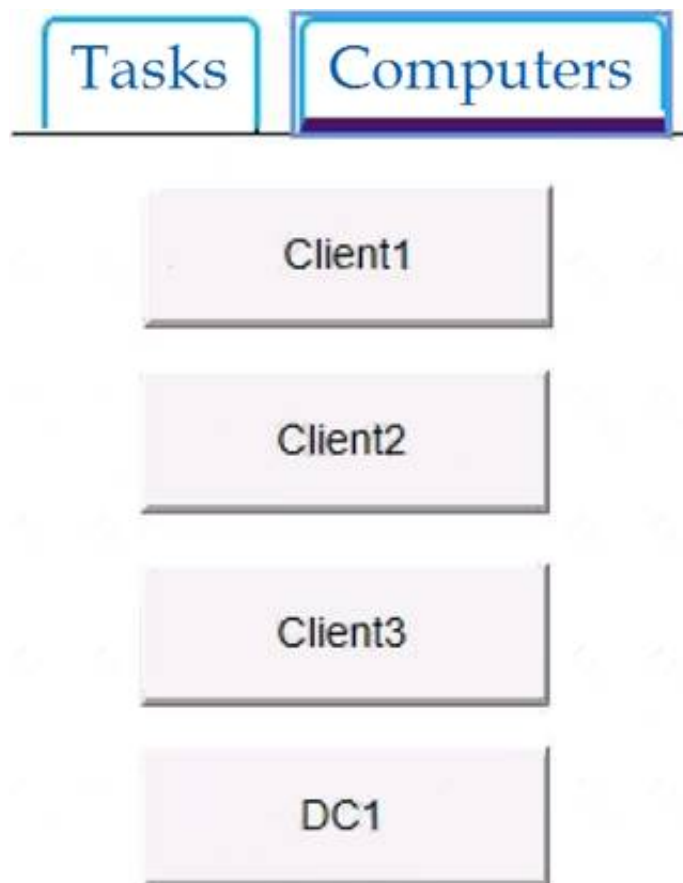

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

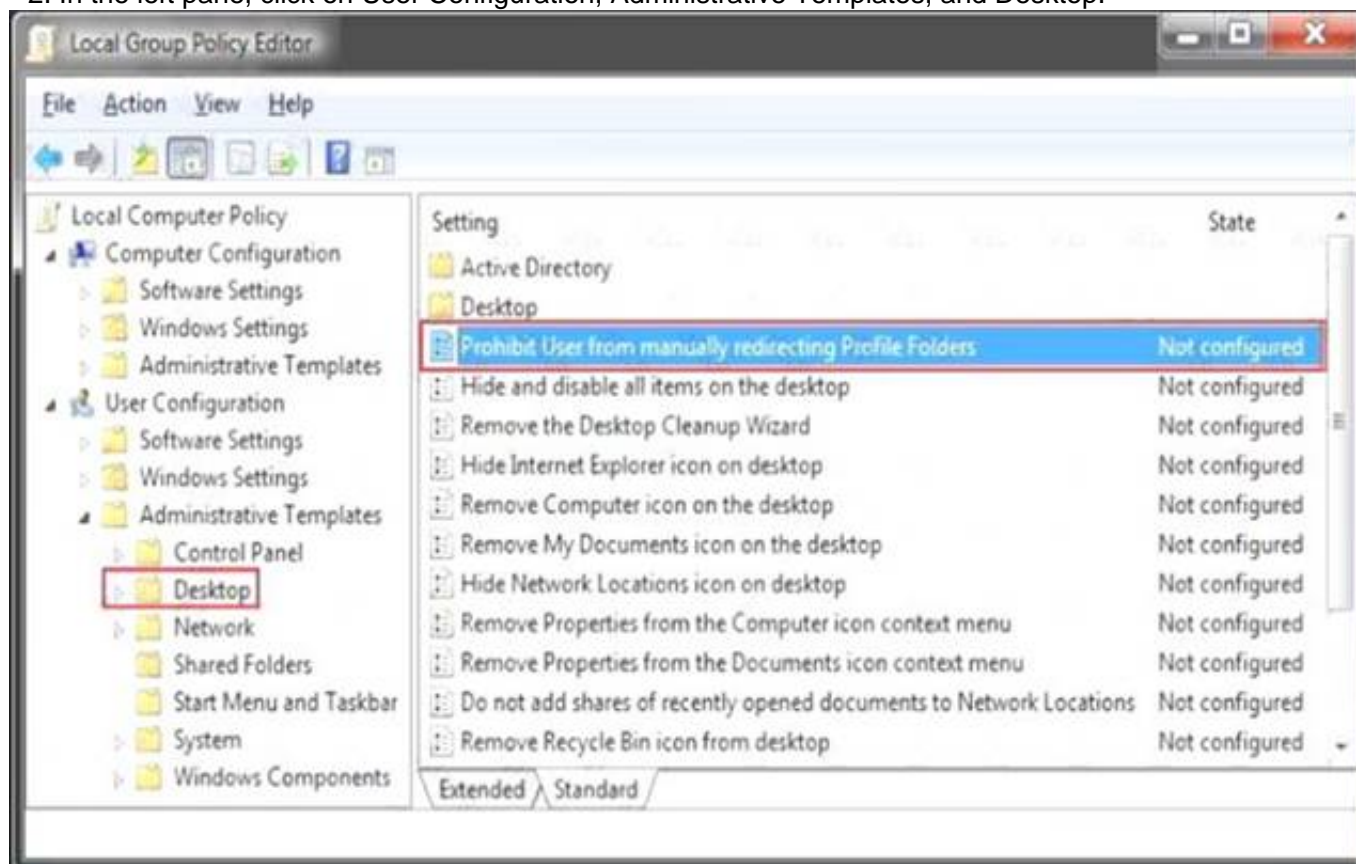

You need to enable the Prohibit User from manually redirecting Profile Folders Group Policy setting only for the administrative users of Client3. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

- \* 1. Open the Administrator Group Local Group Policy Editor.
- \* 2. In the left pane, click on User Configuration, Administrative Templates, and Desktop.

- \* 3. In the right pane, right click on Prohibit User from Manually redirecting Profile Folders and click on Properties.
- \* 4. To Prevent User Profile Folders Location Change Select (dot) Enabled and click on OK.

\* 5. Close the Local Group Policy Editor window. References:  
<https://www.vistax64.com/threads/user-profile-folders-prevent-or-allow-location-change.180719/>

#### NEW QUESTION 159

- (Exam Topic 3)

You need to ensure that you can manage Computer2 by using Windows Admin Center on Server1. What should you do on Computer2?

- A. Install the Remote Server Administration Tool (RSAT) optional features.
- B. Run the winrm quickconfig command.
- C. Set the Windows Management Service Startup type to Automatic and start the service.
- D. Run the Sec-Location cmdlet.

**Answer: B**

#### Explanation:

References:

<https://docs.microsoft.com/en-us/windows-server/manage/windows-admin-center/azure/manage-azure-vms>

#### NEW QUESTION 162

- (Exam Topic 3)

You need to configure Delivery Optimization to meet the technical requirements. Which download mode should you use?

- A. Simple (99)
- B. Group (2)
- C. Internet (3)
- D. HTTP Only (0)
- E. Bypass (100)

**Answer: D**

#### Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-delivery-optimization-reference#download>

#### NEW QUESTION 167

- (Exam Topic 2)

You need to meet the quality update requirement for ComputerA. For how long should you defer the updates?

- A. 14 days
- B. 10 years
- C. 5 years
- D. 180 days
- E. 30 days

Answer: E

**Explanation:**

References:

<https://www.thewindowsclub.com/delay-defer-feature-updates-365-days-windows-10>

**NEW QUESTION 171**

- (Exam Topic 2)

You need to meet the technical requirements for the helpdesk users.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

Add the help desk users to:

▼
The local Administrators group on the Windows 10 computers
The Domain Computrers group in the domain group
The Event Log Readers group in the domain group
The local Event Log Readers group on the Windows 10 computers
The Group Policy Creators Owners group in the domain group
The local Power Users group on the Windows 10 computers

Troubleshooting tool that the helpdesk users should use:

▼
Get-GPOReport
GPRresult
GPOupdate
Group Policy Object Editor

A. Mastered

B. Not Mastered

Answer: A

**Explanation:**

References:

<https://www.itprotoday.com/compute-engines/what-group-policy-creator-owners-group>

**NEW QUESTION 173**

- (Exam Topic 2)

You need to meet the technical requirements for the HR department users.

Which permissions should you assign to the HR department users for the D:\Reports folder? To answer, select the appropriate permissions in the answer area.

NOTE: Each correct selection is worth one point.

A. Mastered

B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://www.online-tech-tips.com/computer-tips/set-file-folder-permissions-windows/>

#### NEW QUESTION 174

- (Exam Topic 1)

You need to recommend a solution to monitor update deployments. What should you include in the recommendation?

- A. Windows Server Update (WSUS)
- B. the Update Management solution in Azure Automation
- C. the Update Compliance solution in Azure Log Analytics
- D. the Azure Security Center

**Answer:** C

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/update-compliance-monitor>

#### NEW QUESTION 175

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. Computer1 is experiencing connectivity issues.

You need to view the IP addresses of any remote computer that Computer1 has an active TCP connection to. Should you do?

- A. In Windows Administrative Tools, open Performance Monitor
- B. In the Control Panel, open Network and Internet Then select Network and Sharing Center
- C. In Windows Administrative Tools, open Resource Monitor
- D. In the Setting ap
- E. open Update and Security Then open Windows Security and select Firewall and Network protection

**Answer:** C

#### NEW QUESTION 176

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.

You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.

Solution. You use System image manager (Windows SIM) to create an answer file. You use Windows Deployment Service (WDS) to add an install image. You start each computer by using PXE, and then install the image.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

#### NEW QUESTION 177

- (Exam Topic 4)

Your office has a dedicated wireless network for guests.

You plan to provide access cards that will have a QR code for guests. The QR code will link to a network configuration file stored on a publicly accessible website and provide the wireless network settings for Windows 10 devices.

Which tool should you use to create the configuration file and which file type should you use for the configuration file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

### Answer Area

Tool:

	▼
Connection Manager Administration Kit (CMAK)	
Local Group Policy Editor Microsoft Deployment	
Microsoft Deployment Toolkit (MDT)	
Windows Autopilot	
Windows Configuration Designer	

File type:

	▼
ADMX	
CAB	
PPKG	
WIM	
XML	

- A. Mastered  
 B. Not Mastered

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-packages>

**NEW QUESTION 179**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10.

You configure Microsoft Edge settings by using domain and local Group Policy Objects (GPOs).

You need to generate a report that contains all the Microsoft Edge policy settings applied to a computer. What should you do?

- A. From Microsoft Edge, open `edge://settings`.  
 B. From a command prompt, run `scanstate` and specify the `/apps` parameter.  
 C. From a command prompt, run `scanstate` and specify the `/genconfig` parameter.  
 D. From a command prompt, run `gpresult` and specify the `/H` parameter.

**Answer:** D

**NEW QUESTION 181**

- (Exam Topic 4)

You have a computer that runs Windows 11 and hosts a Hyper-V virtual machine named VMI. You create the disks shown in the following table.

Name	Format	Type	Parent
Base1	VHD	Fixed size	<i>Not applicable</i>
Base2	VHDX	Fixed size	<i>Not applicable</i>
Disk1	VHD	Dynamically expanding	<i>Not applicable</i>
Disk2	VHD	Differencing	Base1.vhd
Disk3	VHDX	Dynamically expanding	<i>Not applicable</i>
Disk4	VHDX	Differencing	Base2.vhdx

You add Disk1, Disk2, Disk3, and Disk4 to a SCSI controller attached to VMI. You need to identify the following:

Which disks will increase in size automatically when files are copied to the disks. Which disks can be manually increased in size while VMI is running.

What should you identify? To answer, select the appropriate options in the answer area.

Disks that will increase in size automatically:

Base1 and Disk2 only  
 Base2 and Disk4 only  
**Disk1 and Disk3 only**  
 Disk3 and Disk4 only  
 Base2, Disk3, and Disk4 only  
 Disk1, Disk2, Disk3, and Disk4

Disks that can be manually increased in size while VM1 is running:

Base1 and Disk2 only  
 Base2 and Disk4 only  
 Disk1 and Disk3 only  
 Disk3 and Disk4 only  
 Base2, Disk3, and Disk4 only  
**Disk1, Disk2, Disk3, and Disk4**

- A. Mastered  
 B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application, Word, website Description automatically generated

**NEW QUESTION 182**

- (Exam Topic 4)

Your network contains an Active Directory domain that contains the objects shown in the following table.

Name	Type	Member of
User1	User	Group1
User2	User	Group2
Group1	Global group	None
Group2	Domain local group	None
Computer1	Computer	Group1
Computer2	Computer	Group1

Computer1 contains the shared folders shown in the following table.

Name	NTFS permission	Share permission	Folder enumeration mode
Share1	Group1: Write	Group1: Full control	Access-based
Share2\$	Group2: Full control	Group2: Read	Unrestricted

The computers have the network configurations shown in the following table.

Name	Network Discovery	Windows Defender Firewall
Computer1	On	Incoming connections: Block all connections to apps that are not on the list of allowed apps
Computer2	Off	Incoming connections: Block all connections to apps that are not on the list of allowed apps

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Share1 is listed if User1 connects to \\Computer1 from Computer2.	<input type="radio"/>	<input type="radio"/>
Share1 is listed if User2 connects to \\Computer1 from Computer2.	<input type="radio"/>	<input type="radio"/>
Share2\$ is listed if User2 connects to \\Computer1 from Computer2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

User1 is in Group1 which has permission to access the share so the share will be visible. Box 2: No

User2 is in Group2 which does not have permission to access Share1. Access-based enumeration is enabled so Share1 will not be listed as User2 does not have permission to access it.

Box 3: No

Share2\$ is a hidden share (dollar sign appended) so the share will never be listed.

#### NEW QUESTION 186

- (Exam Topic 4)

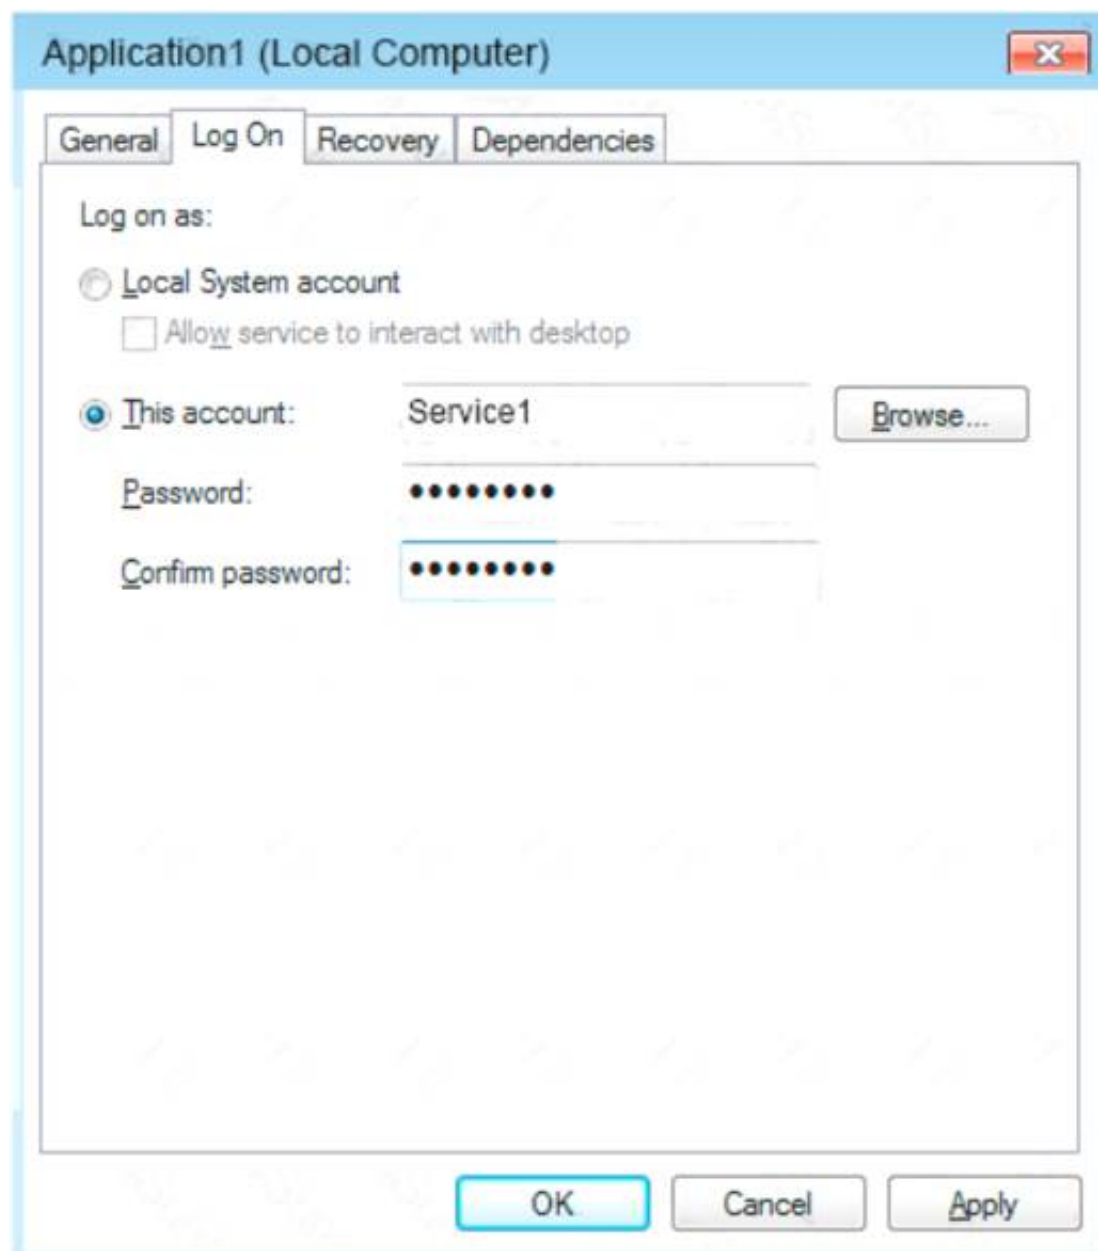

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows10.

A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files. You need to ensure that the identity used by Application1 cannot be used by a user to sign in to the desktop on Computer1. The solution must use the principle of least privilege. Solution: On Computer1, you configure Application1 to sign in as the LocalSystem account and select the Allow service to interact with desktop check box. You delete the Service1 account. Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

**Explanation:**

<https://docs.microsoft.com/en-us/windows/win32/services/localsystem-account>

**NEW QUESTION 191**

- (Exam Topic 4)

You have a computer that runs Windows 8.1.

You upgrade the computer to Windows 10.

You need to analyze the actions that occurred during the upgrade and review the performance statistics for errors by using Windows Event Log viewer.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Event log file: Install.etl  
Setup.etl  
UpdateSessionOrchestration.etl  
WindowsUpdate.etl

File location: \Windows.~BT\Sources\Panther  
\Windows\Logs  
\Windows\Panther  
\Windows\Temp

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Event log file:

- Install.etl
- Setup.etl
- UpdateSessionOrchestration.etl
- WindowsUpdate.etl

File location:

- \\$Windows.~BT\Sources\Panther
- \Windows\Logs
- \Windows\Panther
- \Windows\Temp

**NEW QUESTION 193**

- (Exam Topic 4)

Your company has a computer named Computer1 that runs Windows 10. Computer1 is used to provide guests with access to the Internet. Computer1 is a member of a workgroup.

You want to configure Computer1 to use a user account sign in automatically when the computer is started. The user must not be prompted for a user name and password.

What should you do?

- A. Configure Group Policy preferences.
- B. Run the BCDBoot command.
- C. Edit the Registry.
- D. Run the MSConfig command.

**Answer: C**

**Explanation:**

In the registry, add a default user name and a default password in the HKEY\_LOCAL\_MACHINE\SOFTWARE\Microsoft\Windows NT\CurrentVersion\Winlogon sbukey.

Reference:

<https://support.microsoft.com/en-us/help/324737/how-to-turn-on-automatic-login-in-windows>

**NEW QUESTION 194**

- (Exam Topic 4)

Your company has an on-premises network that contains an Active Directory domain. The domain is synced to Microsoft Azure Active Directory (Azure AD). All computers in the domain run Windows 10 Enterprise. You have a computer named Computer1 that has a folder named Folder1.

You must provide users in group named Group1 with the ability to view the list of files in Folder1. Your solution must ensure that the principle of least privilege is maintained.

What should you do?

- A. Assign the Full control permissions for the Folder1 folder to Group1.
- B. Assign the Read permissions for the Folder1 folder to Group1.
- C. Assign the List folder permissions for the Folder1 folder to Group1.
- D. Assign the Take ownership permissions for the Folder1 folder to Group1.

**Answer: C**

**Explanation:**

Reference:

<https://www.online-tech-tips.com/computer-tips/set-file-folder-permissions-windows/>

**NEW QUESTION 196**

- (Exam Topic 4)

You install Windows 10 Pro on a computer named CLIENT1.

You need to ensure that all per-user services are disabled on CLIENT1. The solution must minimize administrative effort.

What should you use?

- A. a Group Policy administrative template
- B. Device Manager
- C. Task Manager
- D. Group Policy preferences

**Answer: D**

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/application-management/per-user-services-in-windows>

**NEW QUESTION 198**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Users, Group1
User2	Administrators

Computer1 contains the folders shown in the following table.

Name	Path	Permission	Share permission
Folder1	D:\Folder1	Administrators: Full control Group1: Read	Group1: Full control
Folder2	E:\Folder2	Administrators: Full control	None

You move Folder1 into Folder2.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can connect to Folder1 by using a path of \\Computer1\Folder1 UNC.	<input type="radio"/>	<input type="radio"/>
User1 can read the content in E:\Folder2\Folder1 when the user signs in to Computer1.	<input type="radio"/>	<input type="radio"/>
User2 can connect to Folder1 by using a path of \\Computer1\E\$\Folder2\Folder1 UNC.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: No

If you move a shared folder, the share will no longer work.

Box 2: No

Folder1 will inherit the permissions of Folder2. User1 does not have permission to access Folder2. Box 3: Yes

User2 is a member of the Administrators group so he can access the administrative share \\Computer1\E\$. User2 has Full Control permission to Folder2 so he can access \\Computer1\E\$\Folder2.

Folder1 will inherit the permissions of Folder2 so User2 can access \\Computer1\E\$\Folder2\Folder1.

### NEW QUESTION 203

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you enable the Remote Event Log Management inbound rule from Windows Defender Firewall.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc76643>

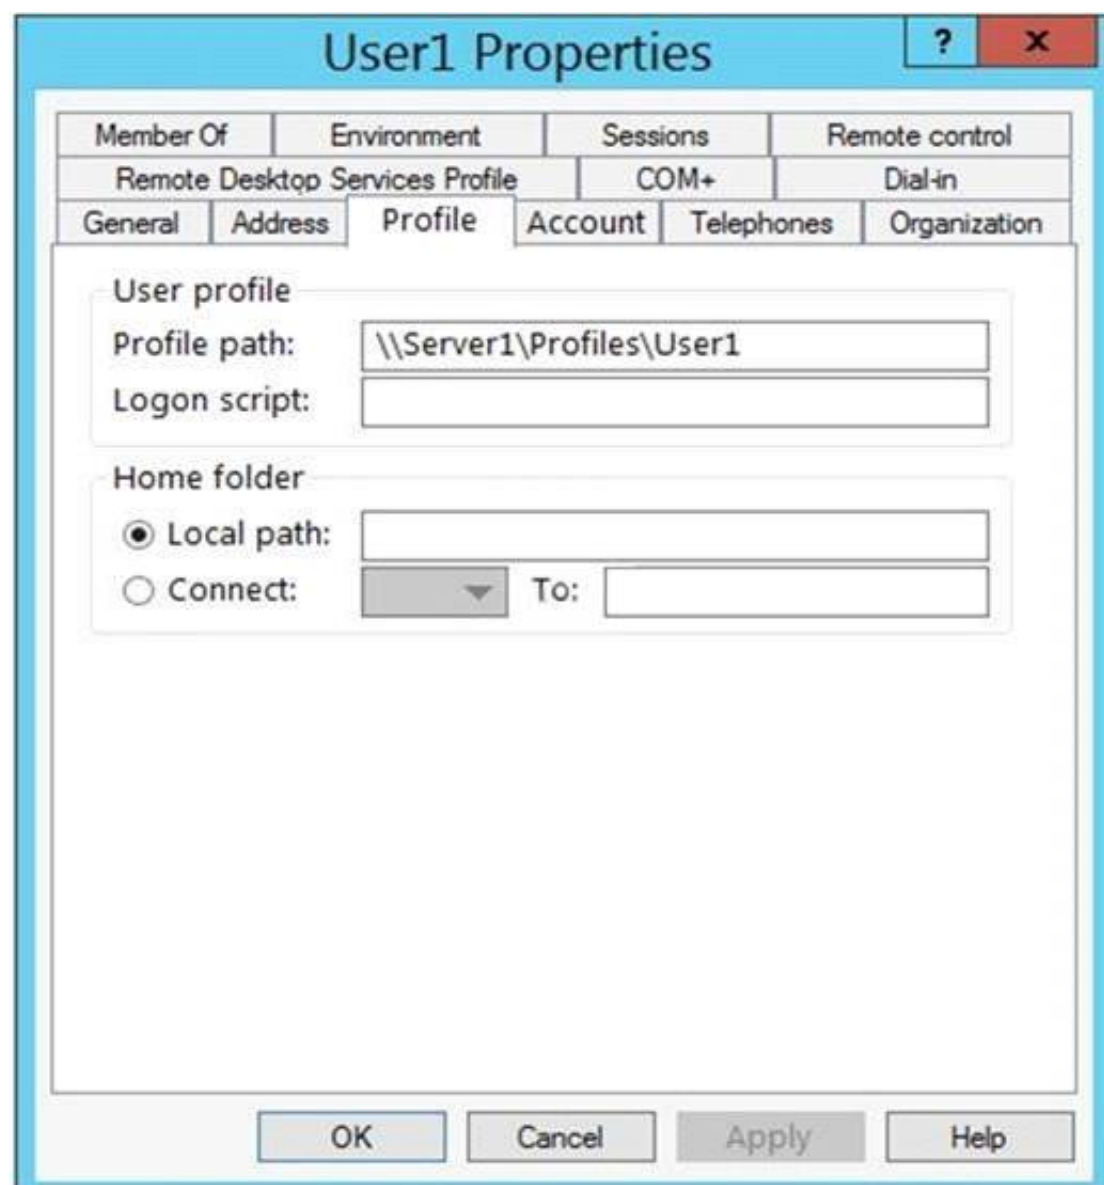

### NEW QUESTION 206

- (Exam Topic 4)

Your network contains an on-premises Active Directory forest named contoso.com. The forest contains a user named User1 and two computers named Computer1 and Computer2 that run Windows 10.

User1 is configured as shown in the following exhibit.

You rename file \\Server1\Profiles\User1.V6\NTUSER.DAT as NTUSER.MAN.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

### Statements

Yes No

On Computer1, if User1 adds a shortcut to the desktop, the shortcut will appear when the user signs in to Computer2.

☐ ☐

On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing back in to Computer1.

☐ ☐

On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing in to Computer2.

☐ ☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

### Statements

Yes No

On Computer1, if User1 adds a shortcut to the desktop, the shortcut will appear when the user signs in to Computer2.

☐ ☒

On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing back in to Computer1.

☒ ☐

On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing in to Computer2.

☐ ☒

### NEW QUESTION 207

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a group named Group1.

All the computers in the domain run Windows 10. Each computer contains a folder named C:\Documents that has the default NTFS permissions set.

You add a folder named C:\Documents\Templates to each computer.

- \_ You need to configure the NTFS permissions to meet the following requirements: All domain users must be able to open the files in the Templates folder.
- \_ Only the members of Group1 must be allowed to edit the files in the Templates folder.

How should you configure the NTFS settings on the Templates folder? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

Inheritance:

- Enable inheritance.
- Disable inheritance and remove permissions.
- Disable inheritance and copy explicit permissions.

Permissions for domain users:

- Allow Read&Execute
- Deny Read&Execute
- Allow Modify
- Deny Modify

Permissions for Group1:

- Allow Read&Execute
- Deny Read&Execute
- Allow Modify
- Deny Modify

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Inheritance:

- Enable inheritance.
- Disable inheritance and remove permissions.
- Disable inheritance and copy explicit permissions.

Permissions for domain users:

- Allow Read&Execute
- Deny Read&Execute
- Allow Modify
- Deny Modify

Permissions for Group1:

- Allow Read&Execute
- Deny Read&Execute
- Allow Modify
- Deny Modify

#### NEW QUESTION 210

- (Exam Topic 4)

Your company has a wireless access point that uses WPA2-Enterprise. You need to configure a computer to connect to the wireless access point. What should you do first?

- A. Create a provisioning package in Windows Configuration Designer.
- B. Request a passphrase.
- C. Request and install a certificate.
- D. Create a Connection Manager Administration Kit (CMAK) package.

Answer: B

Explanation:

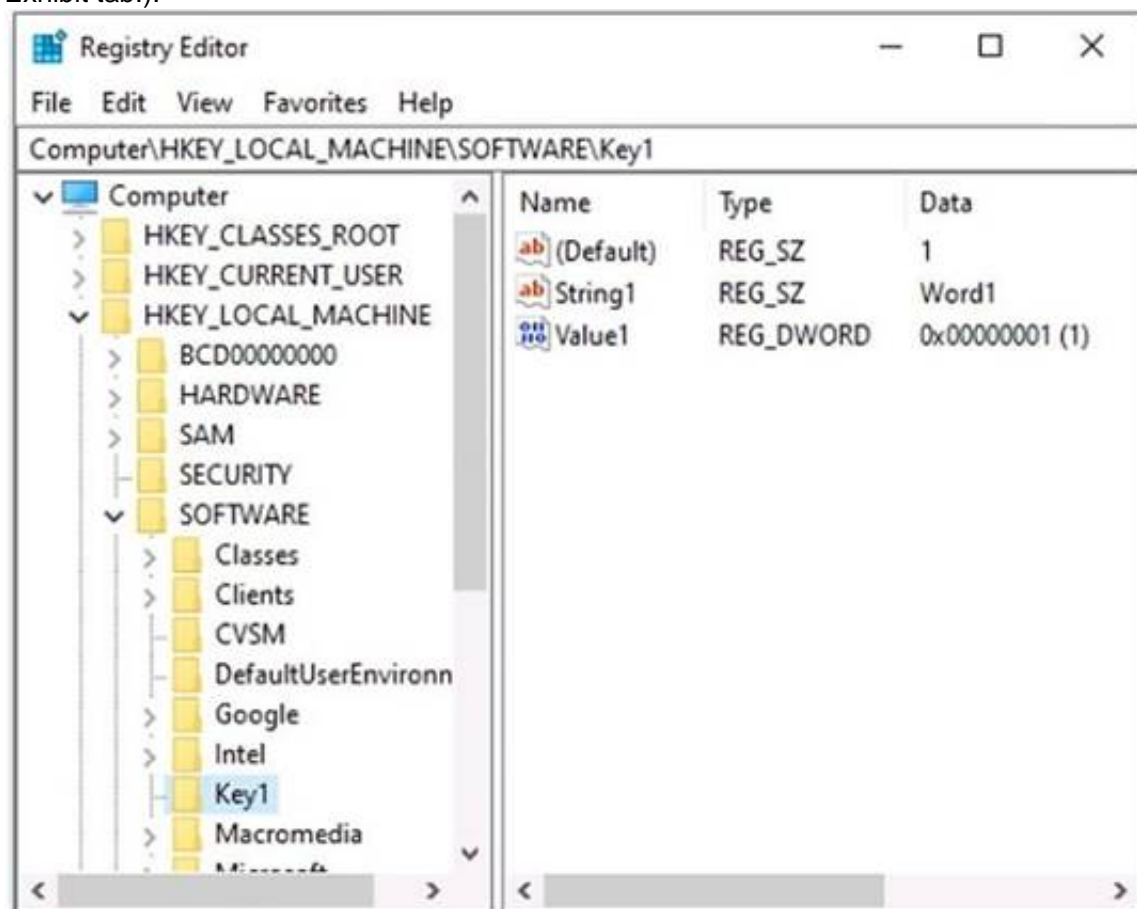

References:

<https://support.microsoft.com/en-za/help/17137/windows-setting-up-wireless-network>

#### NEW QUESTION 212

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 contains a registry key named Key1 that has the values shown in the exhibit. (Click the Exhibit tab.).

You have a Registration Entries (.reg) file named File1.reg that contains the following text.

Windows Registry Editor Version 5.00 [HKEY\_LOCAL\_MACHINE\SOFTWARE\Key1]

"String1"=

@="2"

You need to identify the effect of importing File1.reg to Computer1.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

String1 will:

be deleted
have a value of –
have a value of Word1
have no value

Value1 will:

be deleted
have a value of 1
have a value of 2
have no value

- A. Mastered
- B. Not Mastered

Answer: A

#### Explanation:

Box 1: String1 will be deleted.

To delete a value, append equals and then minus to the value. For example: "String1"=

Box 2: Value1 will have a value of 1

@="2" sets the default value to 1 but Value1 already has a DWORD value.

A DWORD (32-bit) value is a hexadecimal value. Value1 is 0x00000001 which is 1. References:

<https://www.computerhope.com/issues/ch000848.htm> <https://www.computerperformance.co.uk/vista/reg-create/>

#### NEW QUESTION 217

- (Exam Topic 4)

You have Windows 10 devices that use custom device drivers.

You need to test new builds of Windows before the builds are made available to the general public. The solution must ensure that the builds are installed as soon as possible.

Which Windows readiness level should you configure?

- A. Preview Build - Slow
- B. Semi-Annual Channel
- C. Release Preview
- D. Preview Build - Fast

Answer: D

#### NEW QUESTION 220

- (Exam Topic 4)

You have two workgroup computers named Computer1 and Computer2 that run Windows 10. The computers contain the local security principals shown in the following table.

Name	Type	Computer
User1	User	Computer1
GroupA	Group	Computer1
GroupB	Group	Computer1
User2	User	Computer2
GroupC	Group	Computer2

Which security principals can be members of GroupA and GroupC? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

GroupA:

User1 only  
 User1 and User2 only  
 User1 and GroupB only  
 User1, User2, GroupB, and GroupC

GroupC:

User2 only  
 User1 and User2 only  
 User1, User2, GroupA, and GroupB

- A. Mastered
- B. Not Mastered

Answer: A

#### Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated

#### NEW QUESTION 221

- (Exam Topic 4)

Your company has a branch office that contains 25 workgroup computers. The computers run Windows 10 Pro.

Users report that they cannot see other computers from Network in File Explorer. What should you do to resolve the issue?

- A. Set Network profile to Private.
- B. Turn off random hardware addresses for the network connection.
- C. Set Network profile to Public.
- D. Configure the network connection as a metered connection.

Answer: A

#### NEW QUESTION 224

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a user named Admin1. All computers run Windows 10.

You enable Windows PowerShell remoting on the computers.

You need to ensure that Admin1 can establish remote PowerShell connections to the computers. The solution must use the principle of least privilege.

To which group should you add Admin1?

- A. Access Control Assistance Operators
- B. Power Users
- C. Remote Desktop Users
- D. Remote Management Users

Answer: D

#### Explanation:

References:

<https://4sysops.com/wiki/enable-powershell-remoting/>

#### NEW QUESTION 228

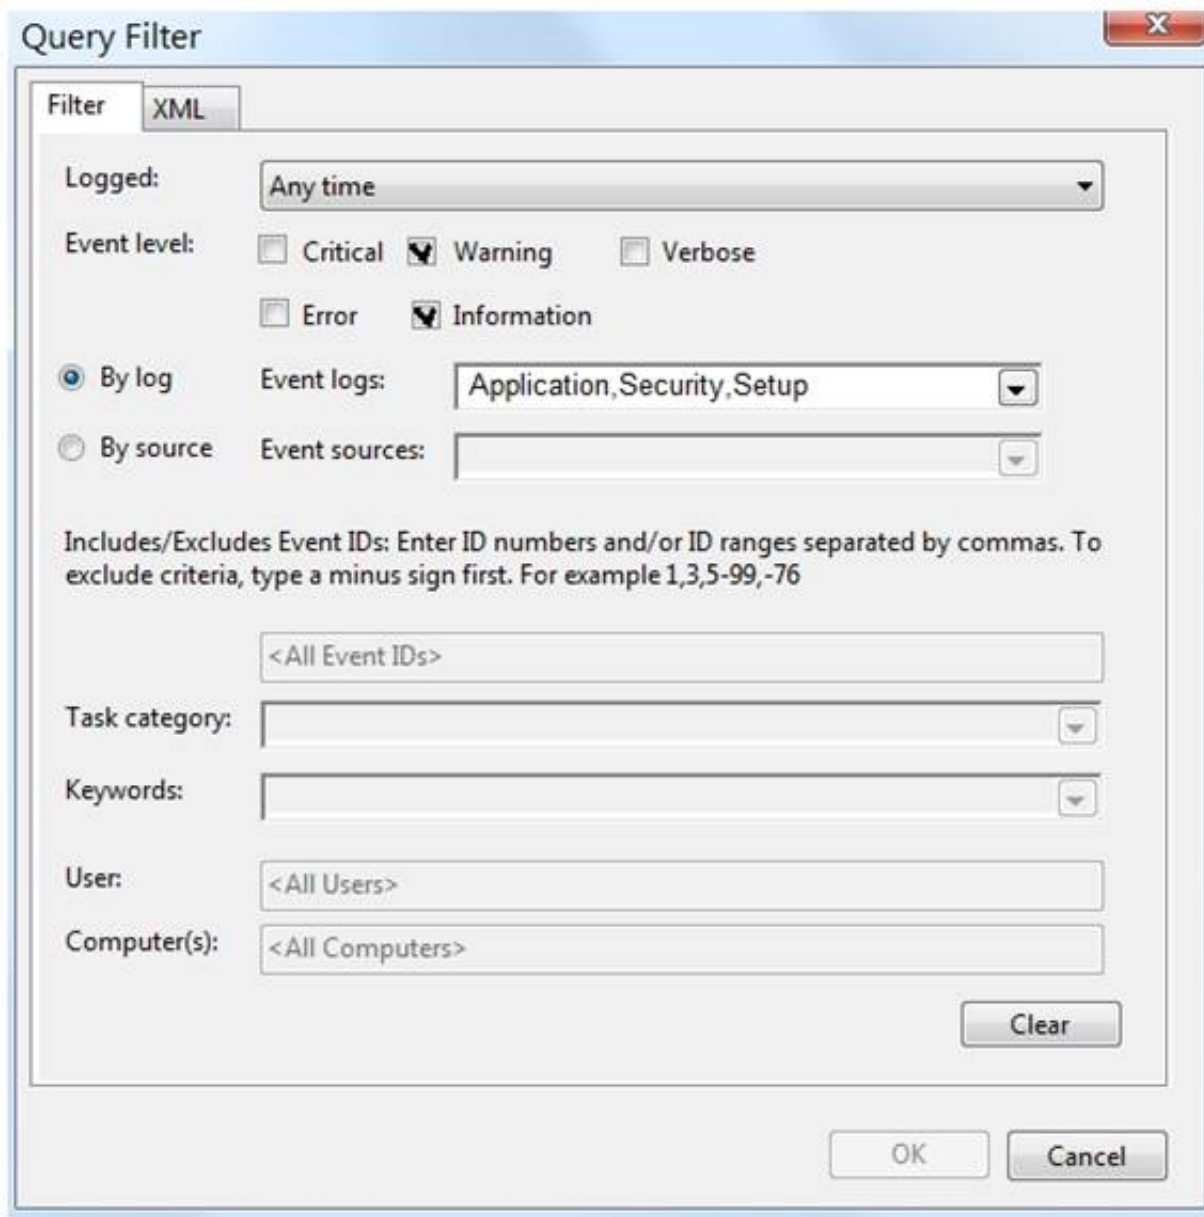

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows

10 and are joined to the domain.

On Computer1, you create an event subscription named Subscription1 for Computer2 as shown in the Subscription1 exhibit. (Click the Subscription1 tab.)

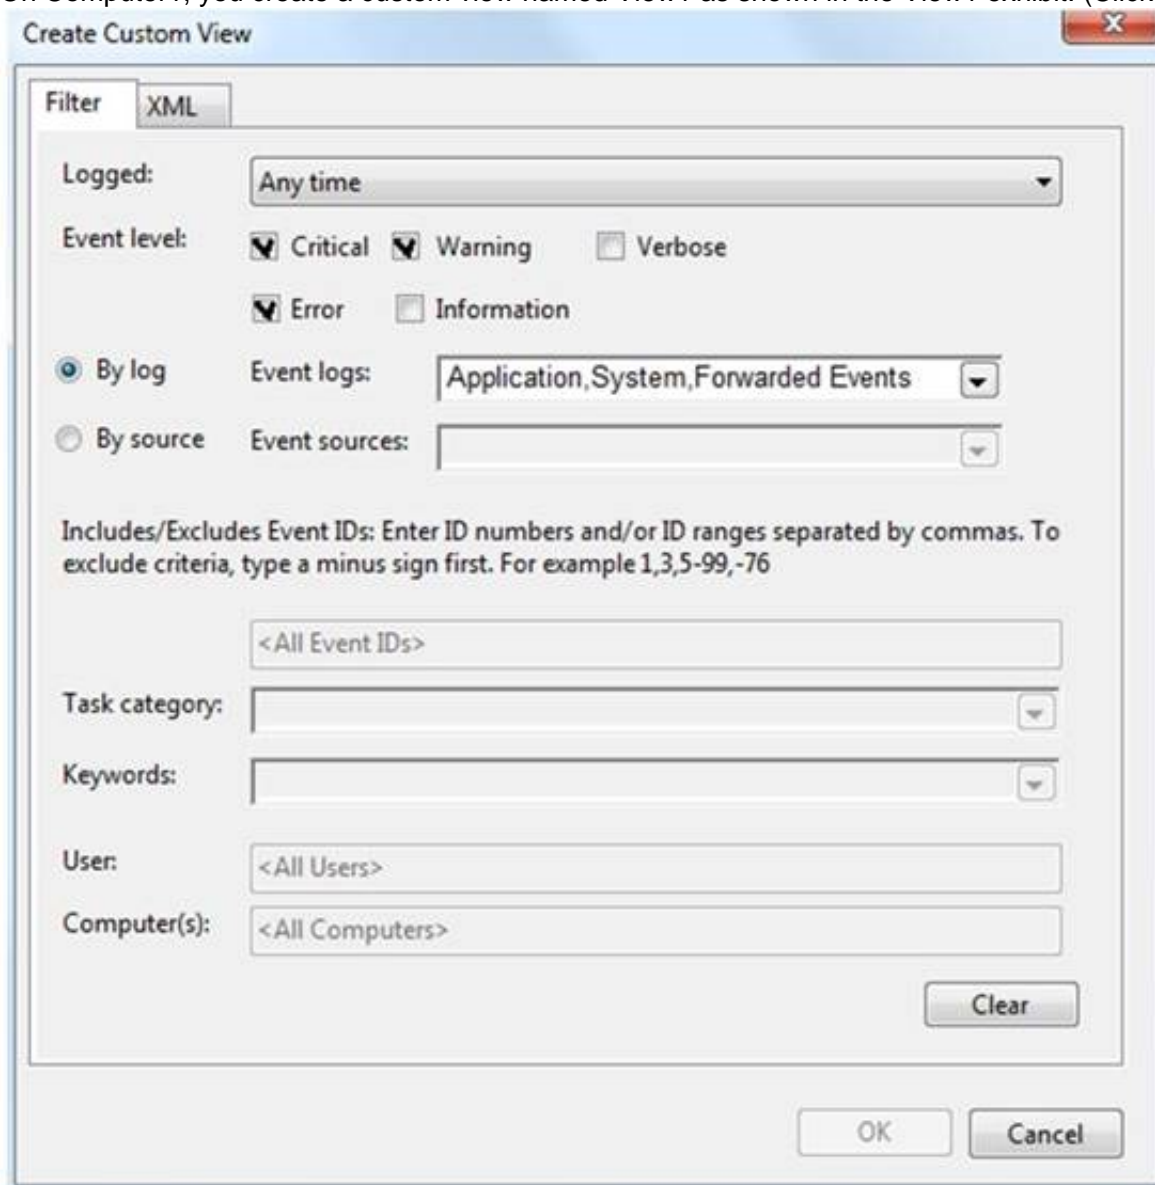

The Query Filter dialog box is shown with the following settings:

- Filter:** XML
- Logged:** Any time
- Event level:**
  - ☐ Critical
  - ☒ Warning
  - ☐ Verbose
  - ☐ Error
  - ☒ Information
- By log:** Event logs: Application, Security, Setup
- By source:** Event sources: (empty)
- Includes/Excludes Event IDs:** Enter ID numbers and/or ID ranges separated by commas. To exclude criteria, type a minus sign first. For example 1,3,5-99,-76
- Task category:** (empty)
- Keywords:** (empty)
- User:** <All Users>
- Computer(s):** <All Computers>
- Buttons:** Clear, OK, Cancel

Subscription1 is configured to use forwarded events as the destination log.

On Computer1, you create a custom view named View1 as shown in the View1 exhibit. (Click the View1 tab.)

The Create Custom View dialog box is shown with the following settings:

- Filter:** XML
- Logged:** Any time
- Event level:**
  - ☒ Critical
  - ☒ Warning
  - ☐ Verbose
  - ☒ Error
  - ☐ Information
- By log:** Event logs: Application, System, Forwarded Events
- By source:** Event sources: (empty)
- Includes/Excludes Event IDs:** Enter ID numbers and/or ID ranges separated by commas. To exclude criteria, type a minus sign first. For example 1,3,5-99,-76
- Task category:** (empty)
- Keywords:** (empty)
- User:** <All Users>
- Computer(s):** <All Computers>
- Buttons:** Clear, OK, Cancel

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
If a critical event is added to the system log on Computer2, the event will be visible in View1.	<input type="radio"/>	<input type="radio"/>
If a warning event is added to the setup log on Computer1, the event will be visible in View1.	<input type="radio"/>	<input type="radio"/>
If an information event is added to the application log on Computer2, the event will be forwarded to Computer1	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
 B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
If a critical event is added to the system log on Computer2, the event will be visible in View1.	<input type="radio"/>	<input checked="" type="radio"/>
If a warning event is added to the setup log on Computer1, the event will be visible in View1.	<input type="radio"/>	<input checked="" type="radio"/>
If an information event is added to the application log on Computer2, the event will be forwarded to Computer1	<input checked="" type="radio"/>	<input type="radio"/>

#### NEW QUESTION 233

- (Exam Topic 4)

You have a workgroup computer that runs Windows 10.

You need to set the minimum password length to 12 characters. What should you use?

- A. Local Group Policy Editor  
 B. User Accounts in Control Panel  
 C. System Protection in System Properties  
 D. Sign-in options in the Settings app

Answer: A

#### NEW QUESTION 236

- (Exam Topic 4)

You have computers that run Windows 10.

You have users who report issues about computers as shown in the following table.

User name	Computer name	Issue
User1	Computer1	After User1 installs a new application, Computer1 is much slower, occasionally crashes, and must restart.
User2	Computer2	After User 2 installs a feature update, Computer2 freezes frequently and fails to load devices.

You need to resolve the issues as quickly as possible. The solution must minimize manual reconfigurations of the computers.

What should you do on each computer? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

## Answer Area

Computer1:

Uninstall an update.
Restore from a system restore point.
Go back to a previous version of Windows 10.

Computer2:

Uninstall an update.
Restore from a system restore point.
Go back to a previous version of Windows 10.

- A. Mastered  
 B. Not Mastered

Answer: A

Explanation:

## Answer Area

Computer1:

Uninstall an update.
Restore from a system restore point.
Go back to a previous version of Windows 10.

Computer2:

Uninstall an update.
Restore from a system restore point.
Go back to a previous version of Windows 10.

## NEW QUESTION 238

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a network share. From Windows 8.1 on Computer1, you run setup.exe from the network share.

Does this meet the goal?

- A. Yes  
 B. No

Answer: B

## NEW QUESTION 239

- (Exam Topic 4)

You have a computer that runs Windows 10. A feature update is installed automatically. You need to roll back the feature update.

Up to how many days after the feature update is installed can you roll back the installation, and what should you use to perform the roll back? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

To roll back the feature update, use:

Go back to the previous version of Windows 10
Reset this PC option
Uninstall an update in Control Panel

The rollback can be performed up to:

7 days after
10 days after
35 days after

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Table Description automatically generated

Reference:

<https://www.howtogeek.com/235474/how-to-roll-back-builds-and-uninstall-updates-on-windows-10/>

**NEW QUESTION 243**

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 has the user accounts shown in the following table.

Name	Member of
User1	Users
User2	Users, Event Log Readers
User3	Users, Backup Operators

In Event Viewer, you create two custom views named View1 and View2. View1 shows errors and warnings from the Security event log. View2 shows errors and warnings from the System event log. Which users can use the views? To answer, select the appropriate options in the answer area. NOTE Each correct selection is worth one point.

## Answer Area

View1: 

	▼
User2 only	
User2 and User3 only	
User1, User2, and User3	

View2: 

	▼
User2 only	
User2 and User3 only	
User1, User2, and User3	

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

## Answer Area

View1: 

	▼
User2 only	
User2 and User3 only	
User1, User2, and User3	

View2: 

	▼
User2 only	
User2 and User3 only	
User1, User2, and User3	

### NEW QUESTION 246

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

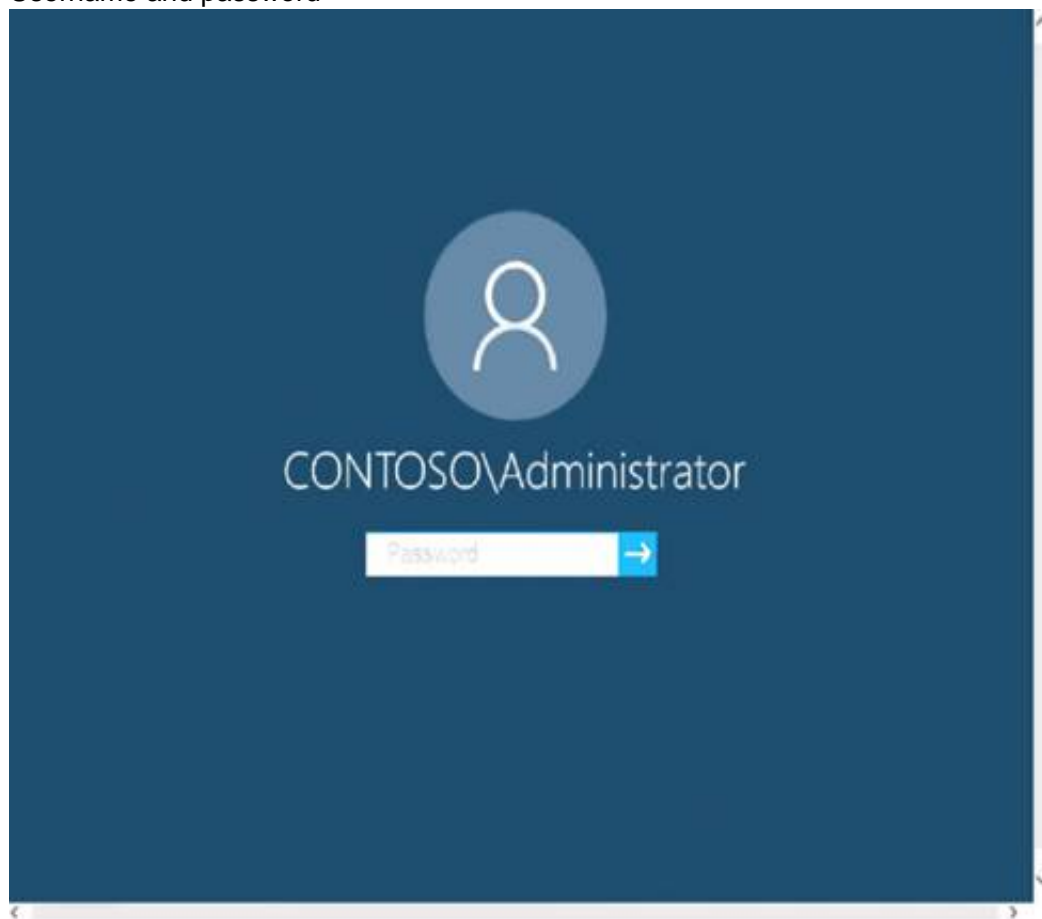

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

### BPA results

A. Mastered  
B. Not Mastered

**Explanation:**

\* 1. Run the following command from an elevated privilege command prompt on the Windows Server domain controller to configure Windows Remote Management:

\* 2. Start group policy by running the following command:

visit - <https://www.2PassEasy.com>

- \* 3. Under the Computer Configuration node, expand the Administrative Templates node, then expand the Windows Components node, then select the Event Forwarding node.
  - \* 4. Right-click the SubscriptionManager setting, and select Properties. Enable the SubscriptionManager setting, and click the Show button to add a server address to the setting. Add at least one setting that specifies the event collector computer. The SubscriptionManager Properties window contains an Explain tab that describes the syntax for the setting.
  - \* 5. After the SubscriptionManager setting has been added, run the following command to ensure the policy is applied:  
 gpupdate /force  
 Configuring the event collector computer
  - \* 1. Run the following command from an elevated privilege command prompt on the Windows Server domain controller to configure Windows Remote Management:  
 winrm qc -q
  - \* 2. Run the following command to configure the Event Collector service:  
 wecutil qc /q
  - \* 3. Create a source initiated subscription. This can either be done programmatically, by using the Event Viewer, or by using Wecutil.exe. If you use Wecutil.exe, you must create an event subscription XML file and use the following command:  
 wecutil cs configurationFile.xml
- Reference:  
<https://docs.microsoft.com/en-us/windows/win32/wec/setting-up-a-source-initiated-subscription#forwarding-the>

#### NEW QUESTION 251

- (Exam Topic 4)

Your network contains an Active Directory forest. The forest contains a root domain named contoso.com and a child domain named corp.contoso.com.

You have a computer named Computer1 that runs Windows 10. Computer1 is joined to the corp.contoso.com domain.

Computer1 contains a folder named Folder1. In the Security settings of Folder1, Everyone is assigned the Full control permissions.

On Computer1, you share Folder1 as Share1 and assign the Read permissions for Share1 to the Users group. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
All the local users on Computer1 have Read access to \\Computer1\Share1.	<input type="radio"/>	<input type="radio"/>
All the users in the corp.contoso.com domain have Read access to \\Computer1\Share1.	<input type="radio"/>	<input type="radio"/>
All the users in the contoso.com domain have Read access to \\Computer1\Share1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://www.techrepublic.com/article/learn-the-basic-differences-between-share-and-ntfs-permissions/>

#### NEW QUESTION 253

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and contains the users in the following table.

User	Member of
User1	Administrators
User2	Device Owners
User3	Power Users
User4	Users
User5	Users

You need to identify which users can start the Windows Recovery Environment (WinRE) command prompt on Computer1. Which user should you identify for each scenario? To answer, select the appropriate options in the answer area.

## Answer Area

Start the WinRE command prompt by using the Boot Options menu in Windows 10:

▼

User1 only  
User1 and User2 only  
User1 and User3 only  
User1, User2, and User3 only  
Everyone

Start the WinRE command prompt from the Windows 10 installation media:

▼

User1 only  
User1 and User2 only  
User1 and User3 only  
User1, User2, and User3 only  
Everyone

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Start the WinRE command prompt by using the Boot Options menu in Windows 10:

▼

User1 only  
User1 and User2 only  
User1 and User3 only  
User1, User2, and User3 only  
Everyone

Start the WinRE command prompt from the Windows 10 installation media:

▼

User1 only  
User1 and User2 only  
User1 and User3 only  
User1, User2, and User3 only  
Everyone

## NEW QUESTION 256

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Administrators
User2	Power Users, Users
User3	Backup Operators, Users
User4	Users

You plan to add a key named Key1 to the following three registry branches:

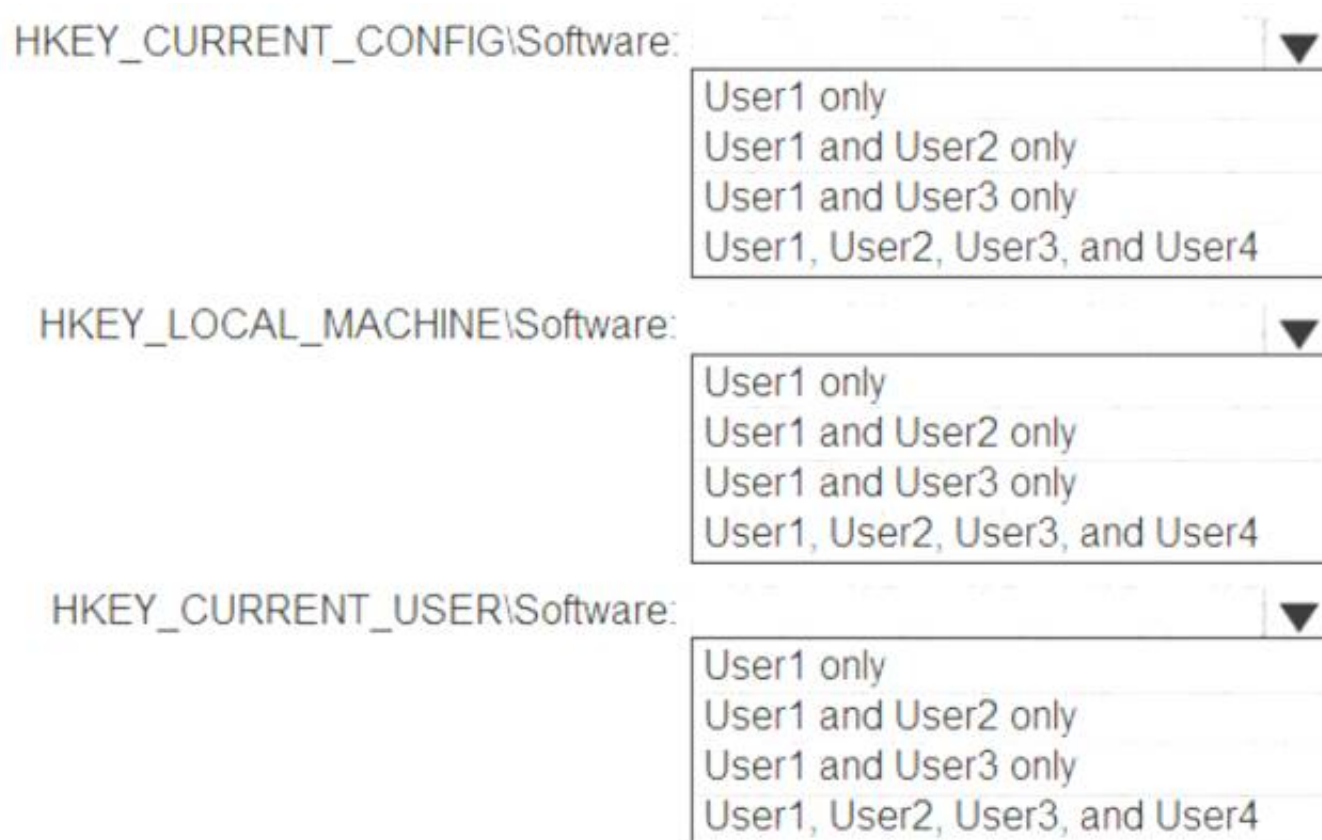

- > HKEY\_CURRENT\_CONFIG\Software
- > HKEY\_LOCAL\_MACHINES\Software
- > HKEY\_CURRENT\_USER\Software

You need to identify which users can add Key1.

What user or users should you identify for each branch? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1 and Box 2.

These are system-wide registry keys so only Administrators can modify them. Box 3.

This key affects only the logged in user. Therefore, any user can modify this key.

**NEW QUESTION 261**

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 contains five local user accounts.

You need to ensure that all users who sign in to Computer1 see a picture named Image1.jpg as the desktop background.

What should you do?

- A. From the Settings app
- B. modify the Background settings.
- C. From the Local Group Policy Editor, modify the Desktop settings.
- D. Rename Image1.jpg as Desktop.jpg and copy the picture to the C:\Windows\system32\ folder.
- E. Rename Image1.jpg as Desktop.jpg and copy the picture to the C:\Users\Default\Desktop\ folder.

**Answer:** B

**Explanation:**

References:

<https://www.top-password.com/blog/set-a-default-background-wallpaper-for-windows-10-desktop/>

**NEW QUESTION 265**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 11. You plan to change a registry setting on Computer1.

You need to ensure that you can revert to the previous registry setting if the change causes an issue on Computer1. The solution must minimize administrative effort.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Enable system protection.
- B. Enable controlled folder access.
- C. Create a restore point.
- D. Create a recovery drive.
- E. Configure a dynamic lock policy.

**Answer:** AC

**NEW QUESTION 267**

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com. The domain contains the users shown in the following table.

Name	Member of
User1	Group1, Group3
User2	Group1, Group2
User3	Group2, Group3

The domain contains a computer named Computer1 that runs Windows10. Computer1 has a file named File1.txt that has the permissions shown in the exhibit.

(Click the Exhibit tab.)

Name: C:\Folder1\File1.txt

Owner: administrator (ADATUM\administrator)

Change

PermissionsShareAuditingEffective Access

For additional information, double-click a permission entry. To modify a permission entry, select the entry and click Edit (if available).

Permission entries:

Type	Principal	Access	Condition
Allow	Domain Admins (...)	Full control	
Allow	Group1 (ADATUM\...)	Read	Member of each ({Group1 (ADATUM\Group1), Group3 (ADATUM\Group3)})
Allow	Group2 (ADATUM\...)	Full control	Not member of any ({Group3 (ADATUM\Group3)})
Allow	Group3 (ADATUM\...)	Read	Not member of any ({Group1 (ADATUM\Group1), Group2 (ADATUM\Group2)})

Add

Remove

View

Enable inheritance

OK

Cancel

Apply

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can modify File1.txt.	<input type="radio"/>	<input type="radio"/>
User2 can modify File1.txt.	<input type="radio"/>	<input type="radio"/>
User3 can read File1.txt.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Box 1: No  
User1 only has Read access to the file. Box 2: Yes  
User2 is in Group2 which has full control. The condition states that if the user is also a member of Group3, the permission would not apply. However, User2 is not in Group3 so the full control permission does apply.  
Box 3: No  
User3 is in Group3 which does have Read access. However, the condition states that if the user is also in Group1 or Group2 then the permission does not apply. User3 is in Group2 so the Read permission granted to Group3 does not apply to User3.

NEW QUESTION 270

- (Exam Topic 4)  
Your network contains an Active Directory domain that is synced to a Microsoft Azure Active Directory (Azure AD) tenant. All users have been issued with laptop computers as well as desktop computers that run Windows 10 Enterprise. All users have Microsoft 365 E3 licenses.  
A user named Mia Hamm informs you that she must perform a BitLocker recovery on her laptop but she does not have her BitLocker recovery key.  
You need to ensure that Mia Hamm can perform a BitLocker recovery on her laptop. What should you do?

- A. Instruct Mia Hamm to log on to her desktop computer and run the repair-bde.exe command.  
B. Instruct Mia Hamm to use the BitLocker Recovery Password Viewer to view the computer object of the laptop.  
C. Instruct Mia Hamm to log on to her desktop computer and go to https://account.activedirectory.windowsazure.com and view the user account profile.  
D. Instruct Mia Hamm to run the Enable-BitLocker cmdlet on her laptop.

Answer: C

Explanation:

The BitLocker recovery key is stored in Azure Active Directory. Reference:  
https://cedonpartners.com/blog/storing-recovering-bitlocker-keys-azure-active-directory/

NEW QUESTION 272

- (Exam Topic 4)  
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.  
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.  
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.  
Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.  
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

### NEW QUESTION 275

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the computers shown in the following table.

Name	Operating system
Computer1	Windows 8.1 Enterprise
Computer2	Windows 10 Pro
Computer3	Windows 10 Pro for Workstation

On which computers can you perform an in-place upgrade to Windows 10 Enterprise?

- A. Computer3 only
- B. Computer2 and Computer3 only
- C. Computer2 only
- D. Computer1
- E. Computer1, and Computer3

**Answer:** D

### Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-upgrade-paths> <https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-edition-upgrades>

### NEW QUESTION 276

- (Exam Topic 4)

Your network contains an Active Directory domain. the domain contains a computer named Computer1 that runs Windows 10. The domain contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1, Group2

Computer contains the shared folders shown in the following table.

Name	Path	Access-based enumeration
Share1\$	D:\Folder1	Disabled
Share2	D:\Folder2	Enabled

The shared folders have the permissions shown in the following table.

Name	Security permission	Sharing permission
Share1\$	Group1: Read Group2: Full control	Everyone: Read Group2: Full control
Share2	Group2: Full control	Everyone: Read Group2: Full control

For each of the following statements, select Yes if the statement is true. Otherwise select No. NOTE: Each correct selection is worth one point.

## Answer Area

Statements	Yes	No
When User1 connects to \\Computer1, Share1\$ is visible.	<input type="radio"/>	<input type="radio"/>
When User2 connects to \\Computer1\Share1\$, the contents of D:\Folder1 are accessible.	<input type="radio"/>	<input type="radio"/>
When User1 connects to \\Computer1\Share2, the contents of D:\Folder2 are accessible.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
 B. Not Mastered

**Answer:** A

### Explanation:

Box 1: No

Share1\$ is a hidden share (dollar sign appended) so the share will never be visible. Box 2: Yes

User2 is in Group1 and Group2. Both groups have access to Share1\$. Therefore, the contents of the shared folder will be visible.

Box 3: No

User1 is in Group1. Group1 does not have the necessary security permission to access Share2. You need both security permissions (NTFS permissions) AND share permissions to view the contents of a shared folder. User1 has the necessary share permissions (Everyone: Read), but not the security permission.

### NEW QUESTION 278

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer 1 that runs Windows 10. You need to be able to reset computer accounts from Computer!. What should you do first?

- A. From Windows Defender Firewall, allow Windows Remote Management  
 B. Add the RSAT: Active Directory Domain Services and Lightweight Directory Services Tools optional feature.  
 C. From Windows Defender Firewall, allow Remote Service Management  
 D. Add the RSAT: Server Manager optional feature.

**Answer:** B

### NEW QUESTION 283

- (Exam Topic 4)

You are preparing to deploy Windows 10.

You download and install the Windows Assessment and Deployment Kit (Windows ADK). You need to create a bootable WinPE USB drive.

What should you do first?

- A. Run the MakeWinPEMedia command.  
 B. Download and install Windows Configuration Designer.  
 C. Run the WPEUcil command.  
 D. Download and install the WinPE add-on.

**Answer:** D

### Explanation:

WinPE used to be included in the Windows ADK. However, it is now provided as an add-on so the first step is to download and install the add-on.

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/winpe-create-usb-bootable-drive> <https://docs.microsoft.com/en-us/windows-hardware/get-started/adk-install>

### NEW QUESTION 285

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1.

Solution: On Computer you share a folder. Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

#### NEW QUESTION 287

- (Exam Topic 4)

You need to configure Device1 to meet the following requirements:

- Deny User1 the right to sign in locally.
- Ensure that a logon script runs only when User2 signs in to Device1.
- Ensure that no login scripts run when User1 or Admin1 sign in to Device1.

Which two policies should you modify? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Local Computer\Admin1 Policy
- B. Local Computer\Administrators Policy
- C. Local Computer\Non-Administrators Policy IS
- D. Local Computer\User1 Policy
- E. Local Computer\User2 Policy
- F. Local Computer Policy

**Answer: DE**

#### NEW QUESTION 292

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the local users shown in the following table.

Name	Member of
Administrator	Administrators, Users
User1	Backup Operators, Users
User2	Device Owners, Users
User3	Users

The Users group has Modify permissions to a folder named D:\Folder1. User3 creates a file named File1.docx in Folder1. Which users can take ownership of File1.docx?

- A. Administrator and User1 only
- B. Administrator only
- C. Administrator, User1, and User2
- D. Administrator and User2 only

**Answer: B**

#### Explanation:

Only a member of the Administrator's group can take ownership of a file or folder.

#### NEW QUESTION 296

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the folders shown in the following table.

Name	Volume	File system	Permission
Folder1	C	NTFS	Full control to Everyone
Folder2	C	NTFS	Full control to Everyone
Folder3	D	NTFS	Full control to Everyone

On Computer1, you create the users shown in the following table.

Name	Member of
User1	Users
User2	Backup Operators, Users
User3	Cryptographic Operators, Users
User4	Administrators, Users

User1 encrypts a file named File1.txt that is in a folder named C:\Folder1.

What is the effect of the configuration? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Users who can move File1.txt to C:\Folder2:

Users who can move File1.txt to D:\Folder3:

- A. Mastered  
 B. Not Mastered

Answer: A

Explanation:

References:

<https://support.microsoft.com/en-za/help/310316/how-permissions-are-handled-when-you-copy-and-move-files>

#### NEW QUESTION 298

- (Exam Topic 4)

Your company has a main office and a branch office. The offices connect to each other by using a WAN link. Access to the Internet is provided through the main office.

The branch office contains 25 computers that run Windows 10. The computers contain small hard drives that have very little free disk space.

You need to prevent the computers in the branch office from downloading updates from peers on the network. What should you do?

- A. From the Settings app, modify the Delivery Optimizations settings.  
 B. Configure the network connections as metered connections.  
 C. Configure the computers to use BranchCache in hosted cache mode.  
 D. Configure the updates to use the Semi-Annual Channel (Targeted) channel.

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-branchcache>

#### NEW QUESTION 300

- (Exam Topic 4)

You have 15 computers that run Windows 10. Each computer has two network interfaces named Interface1 and Interface2.

You need to ensure that network traffic uses Interface1, unless Interface1 is unavailable. What should you do?

- A. Run the Set-NetIPInterface -InterfaceAlias Interface1 -InterfaceMetric 1 command.  
 B. Run the Set-NetAdapterBinding -Name Interface2 -Enabled \$true -ComponentID ms\_tcpip -ThrottleLimit 0 command.  
 C. Set a static IP address on Interface 1.  
 D. From Network Connections in Control Pane, modify the Provider Order.

Answer: A

Explanation:

References:

<https://tradingtechnologies.atlassian.net/wiki/spaces/KB/pages/27439127/How+to+Change+Network+Adapter+> <https://docs.microsoft.com/en-us/powershell/module/nettcpip/set-netipinterface?view=win10-ps>

#### NEW QUESTION 301

- (Exam Topic 4)

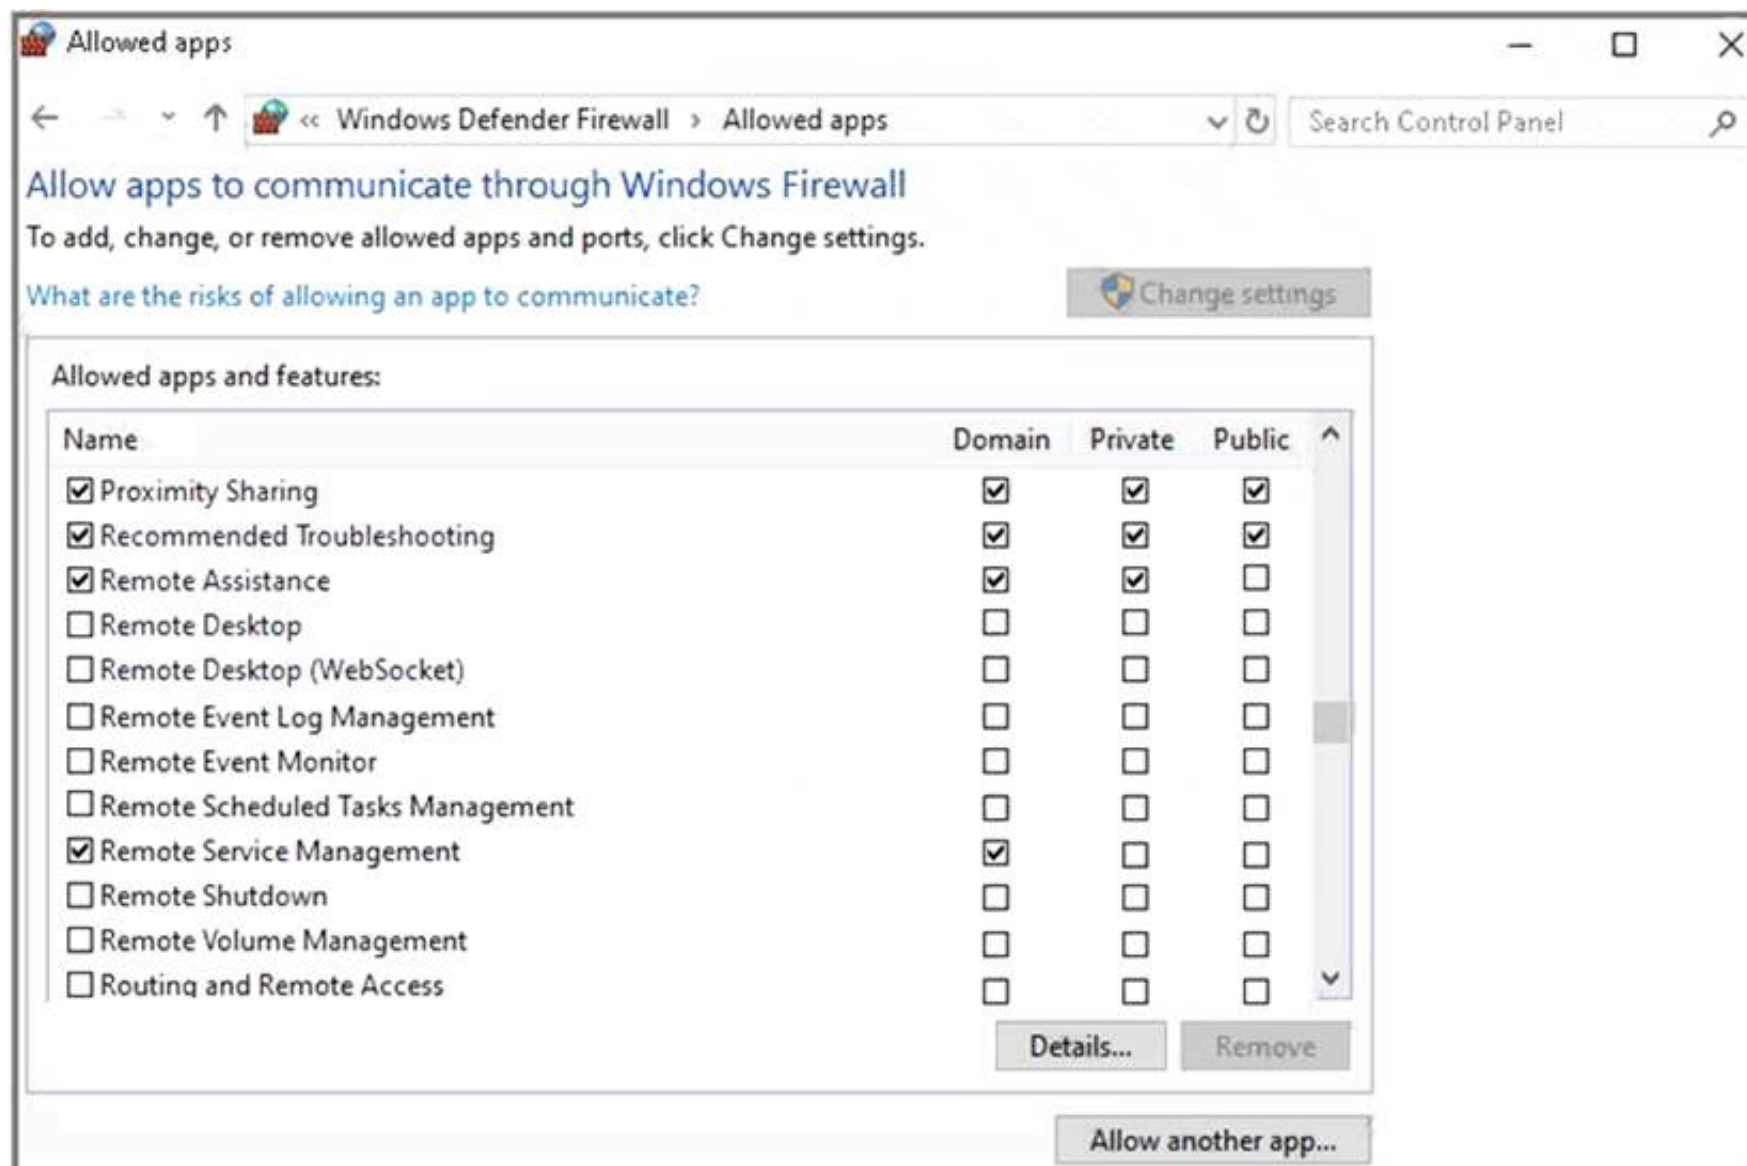

Your network contains an Active Directory domain named adatum.com, a workgroup, and computers that run Windows 10. The computers are configured as shown in the following table.

Name	Member of	Active Windows Defender Firewall profile
Computer1	Adatum.com	Domain
Computer2	Adatum.com	Domain
Computer3	Workgroup	Public

The local Administrator accounts on Computer1, Computer2, and Computer3 have the same user name and password.

On Computer1, Windows Defender Firewall is configured as shown in the following exhibit.

The services on Computer1 have the following states.

Status	Name	DisplayName
Stopped	RasAuto	Remote Access Auto Connection Manager
Running	RasMan	Remote Access Connection Manager
Stopped	RemoteAccess	Routing and Remote Access
Stopped	RemoteRegistry	Remote Registry
Stopped	RetailDemo	Retail Demo Service
Running	RmSvc	Radio Management Service
Running	RpcEptMapper	RPC Endpoint Mapper
Stopped	RpcLocator	Remote Procedure Call (RPC) Locator
Running	RpcSs	Remote Procedure Call (RPC)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
From Computer2, you can use Disk Management to manage Computer1 remotely.	<input type="radio"/>	<input type="radio"/>
From Computer2, you can use Registry Editor to edit the registry of Computer1 remotely.	<input type="radio"/>	<input type="radio"/>
From Computer3, you can use Performance Monitor to monitor the performance of Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

Because the firewall is blocking Remote Volume Management.

Box 2: No

Because the Remote Registry Service is stopped. Box 3: No

Because the Remote Registry Service is stopped. Perfmon needs both the RPC service and the Remote Registry service to be running.

#### NEW QUESTION 304

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the

stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users
User3	Users

You need to configure the desktop background for User1 and User2 only.

Solution: From the local computer policy, you configure the Filter Options settings for the computer policy. Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

#### NEW QUESTION 308

- (Exam Topic 4)

You have a computer named Client1 that runs Windows 11. You perform the following actions on Client1:

- Enable Hyper-V.
- Create a virtual machine that runs Windows 11 Pro.

You need to connect to VM1 by using enhanced session mode. What should you do first?

- A. Enable Remote Assistance on Client1.
- B. Enable Remote Assistance on VM1.
- C. Enable Remote Desktop on VM1.
- D. Enable Remote Desktop on Client1.

**Answer: B**

#### NEW QUESTION 312

- (Exam Topic 4)

You have several computers that run Windows 10.

All users have Microsoft OneDrive for Business installed. Users frequently save files to their desktop.

You need to ensure that all the users can recover the files on their desktop from OneDrive for Business. Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Copy ADMX and ADML files to C:\Users\Public\Desktop\
- B. From Backup in the Settings app, add a drive
- C. Configure the Silently move Windows known folders to OneDrive settings
- D. Copy ADMX and ADML files to C:\Windows\PolicyDefinitions
- E. Configure the Save documents to OneDrive by default setting

**Answer: CD**

#### Explanation:

<https://docs.microsoft.com/en-us/onedrive/plan-onedrive-enterprise> <https://docs.microsoft.com/en-us/onedrive/use-group-policy#KFMOptInNoWizard>

#### NEW QUESTION 315

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a laptop named Computer1 that runs Windows 10.

When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.

Solution: From the properties of the Wi-Fi adapter, you disable Link-Layer Topology Discovery Responder. Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

#### NEW QUESTION 317

- (Exam Topic 4)

Your company has an isolated network used for testing. The network contains 20 computers that run Windows 10. The computers are in a workgroup. During testing, the computers must remain in the workgroup.

You discover that none of the computers are activated.

You need to recommend a solution to activate the computers without connecting the network to the Internet. What should you include in the recommendation?

- A. Volume Activation Management Tool (VAMT)
- B. Key Management Service (KMS)
- C. Active Directory-based activation

D. the Get-WindowsDeveloperLicense cmdlet

**Answer:** B

**Explanation:**

<https://docs.microsoft.com/en-us/windows/deployment/volume-activation/introduction-vamt>

#### NEW QUESTION 319

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

Solution: From Update & Security in the Settings app, you turn on Pause Updates. Does this meet the goal?

A. Yes

B. No

**Answer:** A

**Explanation:**
