NEW QUESTION 10

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are optimizing a network to better support voice and collaboration workloads in Microsoft Teams. When the users are at a specific corporate site, you need to prevent the users from adding video during calls. Solution: You run New-CsTeamsMeetingPolicy and set the -IPVideoMode parameter to DISABLED.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead run New-CsTeamsNetworkRoamingPolicy and set the -AllowIPVideo parameter to \$False.

Note: The New-CsTeamsNetworkRoamingPolicy cmdlet allows IT Admins to create policies for Network Roaming and Bandwidth Control experiences in Microsoft Teams.

The TeamsNetworkRoamingPolicy cmdlets enable administrators to provide specific settings from the TeamsMeetingPolicy to be rendered dynamically based upon the location of the Teams client. The TeamsNetworkRoamingPolicy cannot be granted to a user but instead can be assigned to a network site. The settings from the TeamsMeetingPolicy included are AllowIPVideo and MediaBitRateKb. When a Teams client is connected to a network site where a CsTeamRoamingPolicy is assigned, these two settings from the TeamsRoamingPolicy will be used instead of the settings from the TeamsMeetingPolicy.

Issues that affect outbound direct routing calls

You might experience various issues when you use Direct Routing to make outbound calls from a Microsoft Teams client to a Session Border Controller (SBC).

These issues include the following:

An incorrect caller ID is displayed to the call recipient. A connection to the SBC is not established.

Some users in a tenant are unable to make calls. No users in a tenant are able to make calls.

No users are able to make calls

If none of the users are able to make calls, the calls are probably not reaching the SBC. Check for one of the following causes.

Cause 1

Teams has a disabled gateway. Resolution 1

Use the Microsoft Teams admin center to make sure that the gateway that's used by Teams is available and enabled.

NEW QUESTION 43

- (Exam Topic 3)

You have a Teams Phone deployment that contains a branch office.

You need to restrict toll bypass for a user based on the office in which the user is working during an inbound or outbound PSTN call.

What should you use?

- A. a voice routing policy
- B. Local Media Optimization
- C. Location-Based Routing
- D. dial plans
- E. a calling policy

Answer: E

Explanation:

Calling policies in Teams

In Microsoft Teams, calling policies control which calling and call forwarding features are available to users. Calling policies determine whether a user can make private calls, use call forwarding or simultaneous ringing to other users or external phone numbers, route calls to voicemail, send calls to call groups, use delegation for inbound and outbound calls, and so on.

You can use the global (Org-wide default) policy that's created automatically or create and assign custom policies.

Calling policies include:

* Prevent toll bypass and send calls through the PSTN

Turning on this setting sends calls through the Public Switched Telephone Network (PSTN) and incur charges rather than sending them through the network and bypassing the tolls. This setting is off by default.

NEW QUESTION 69

- (Exam Topic 3)

You have a Microsoft Teams Phone deployment. You need to configure users to include a toll free phone number as part of their meeting invites. Which type of policy should you configure?

- A. voice routing
- B. audio conferencing
- C. customization
- D. meeting

Answer: B

Explanation:

Initial assignment of phone numbers that are included in the meeting invites for users

The phone numbers included in the meeting invites of users enabled for Audio Conferencing are defined in the TeamsAudioConferencingPolicy that's assigned to users. When a TeamsAudioConferencingPolicy is assigned to a user, all toll and toll-free phone numbers added in the policy are included in meeting invites for users who have that policy. If a user is assigned a TeamsAudioConferencingPolicy and there aren't any toll or toll-free phone numbers added to the policy, then in that case the phone numbers that appear in the meeting invites of these users are defined by the default conferencing toll phone number and the default conferencing toll-free phone number in each individual user's settings.

NEW QUESTION 84

- (Exam Topic 3)

You have a Microsoft Teams Phone deployment.

You need to ensure that incoming calls to a user are forwarded to a phone number of +15552224190 if the calls are NOT answered within 20 seconds.

How should you complete the PowerShell script? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

```
$Upn = (Get-CsOnlineVoiceUser)
```

▼
Grant-CsDialoutPolicy
Grant-CsIPPhonePolicy
Grant-CsOnlineVoiceRoutingPolicy
Set-CsOnlineAudioConferencingRoutingPolicy

```
-Identity $upn -UnansweredTarget "+15552224190"
```

```
-UnansweredDelay "00:00:20" -IsUnansweredEnabled $true
```

▼	SingleTarget
-ManageSettings	
-PhoneNumberType	
-UnansweredTargetType	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Grant-CsDialoutPolicy

Least bad option perhaps, but it does not seem to be a good answer.

* Grant-CsDialoutPolicy

Use the Grant-CsDialoutPolicy cmdlet to assign the tenant global, a group of users, or a per-user outbound calling restriction policy to one or more users.

Syntax

```
Grant-CsDialoutPolicy [[-Identity] <string>]
```

```
[[[-PolicyName] <string>] [-PassThru]
```

```
[-WhatIf] [-Confirm]
```

```
[<CommonParameters>]
```

Note: Set-CsUserCallingSettings would be a good answer, but it is not an option.

This cmdlet will set the call forwarding, simultaneous ringing and call group settings for the specified user.

-UnansweredTargetType

The unanswered target type. Supported values are Voicemail, SingleTarget, MyDelegates and Group.

SingleTarget is used when forwarding the unanswered call to another user or phone number. MyDelegates is used when forwarding the unanswered call to the user's delegates. Group is used when forwarding the unanswered call to the specified user's call group.

Box 2: -UnansweredTargetType Incorrect:

* Grant-CsIPPhonePolicy, Skype for Business Server 2019

Use the Grant-CsIPPhonePolicy cmdlet to assign an Internet Protocol (IP) phone policy to a user or a group of users. IP phone policies determine the features of Microsoft Teams, Skype for Business Online, or Skype for Business Server 2019 that are available to users. For example, you might enable the Better Together Over Ethernet feature for some users while disabling it for others.

Syntax

```
Grant-CsIPPhonePolicy, Skype for Business Server 2019 [[-Identity] <UserIdParameter>]
```

```
[-PolicyName] <String> [-Tenant <Guid>]
```

```
[-DomainController <Fqdn>] [-PassThru]
```

```
[-WhatIf] [-Confirm]
```

```
[<CommonParameters>]
```

* Grant-CsOnlineVoiceRoutingPolicy

Assigns a per-user online voice routing policy to one user, a group of users, or sets the Global policy instance. Online voice routing policies manage online PSTN usages for Phone System users.

Syntax

```
Grant-CsOnlineVoiceRoutingPolicy [[-Identity] <string>]
```

[[[-PolicyName] <string>]

[-PassThru] [-WhatIf]

[-Confirm] [<CommonParameters>]

NEW QUESTION 90

- (Exam Topic 3)

Normalization rules are configured as shown in the following exhibit.

Normalization rules

Normalization rules define how phone numbers expressed in various formats are to be translated. One or more normalization rules must be assigned to the dial plan and are matched from the top to bottom.

Rank	Name	Pattern	Translation
1	AU-NewSouthWales-Local	^([2-9]\d{7})\$	+61251
2	AU-TollFree	^(1[38]\d{4,8})\d*\$	+6151
3	AU-Premium	^(19\d{4,8})\$	+6151
4	AU-Mobile	^0([45]\d{8})\$	+6151
5	AU-National	^0([23578]\d{8})\d*(\D+\d+)?\$	+6151

Use the drop down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Answer Area

When dialing 70105000, the phone number will normalize to [answer choice].

▼

- +61270105000
- +61370105000
- +6170105000
- +70105000

Phone numbers that begin with 1900 will be evaluated by the [answer choice] normalization rule.

▼

- AU-Mobile
- AU-National
- AU-Premium
- AU-TollFree

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: +61270105000

Note:

Teams traverses the list of normalization rules from the top down and uses the first rule that matches the dialed number. If you set up a dial plan so that a dialed number can match more than one normalization rule, make sure the more restrictive rules are sorted above the less restrictive ones.
