NEW QUESTION 12

- (Topic 5)

You have a Microsoft 365 subscription that uses Microsoft Teams. You feed 10 identify which teams were inactive during the past 90 days. What should you use?

- A. Teams advisor
B. the Office 365 Groups activity report
C. the Teams user activity report
D. the Teams usage report

Answer: D

Explanation:

According to the Microsoft documentation¹, you can use the Teams usage report in the Microsoft Teams admin center to get an overview of the usage activity in Teams. This includes the number of active users, channels, guests, and post messages via chat and conversations to know how many users in each team are actively using Teams to communicate and collaborate. However, this report only shows the last 7 or 28 days of activity of teams, which may not be enough to identify inactive teams over a longer period. Alternatively, you can use PowerShell scripts to generate activity reports that check the audit records of inactive teams and provide an HTML report file based on SharePoint site activity in the group's document library in the past 90 days and conversations that occurred in the mailbox in the past year². However, this method requires writing complex and time-consuming PowerShell commands, which may not be feasible for administrators who need to produce multiple reports on a daily basis.

Another method to detect inactive teams in your Teams environment is by setting an expiration policy for the associated group in Azure AD. This notifies the owner of the team or group by sending an email to renew or delete the team after specified days if no activity is detected³. However, this method also has some drawbacks, such as:

? The owner may fail to notice the email or renew the team within the timeline of the configured policy, resulting in the team being deleted automatically and not being restorable after 30 days.

? The expiration policy applies to all Microsoft 365 groups in an Azure AD organization, not just Teams. This may affect other groups that are not related to Teams.

? The expiration policy requires Azure AD Premium licenses for the members of all groups to which the policy is applied.

Therefore, based on this information, the correct answer is D. the Teams usage report. This report is the most straightforward and accessible way to find inactive teams in Microsoft Teams, even though it has some limitations. The other options are either not related to finding inactive teams (Teams advisor) or require additional licenses or permissions (the Office 365 Groups activity report and the Teams user activity report).

SIMULATION - (Topic 4)

Task 9

You need to deploy the Microsoft Viva Connections app to Teams and install the app as the first item on the app bar of the Teams client for all users.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To deploy the Microsoft Viva Connections app to Teams and install the app as the first item on the app bar of the Teams client for all users, you need to use the Teams admin center and PowerShell. Here are the steps to follow:

? Sign in to the Teams admin center with your Microsoft 365 username and password1.

? In the left navigation, go to Teams apps > Manage apps.

? Click Upload and then select the Viva Connections app package that you created using PowerShell2. If you have not created the app package yet, you can follow the instructions in this article to do so.

? After uploading the app package, click on the app name and then click Publish.

? In the left navigation, go to Teams apps > Setup policies.

? Select an existing policy or create a new one by clicking Add.

? In the Setup policy pane, under Installed apps, click Add apps and then select the Viva Connections app from the list.

? Drag and drop the Viva Connections app to reorder it as the first item on the app bar.

? Click Save and then Close.

? To assign the setup policy to all users, you can use PowerShell to run the following cmdlet:

```
Get-CsOnlineUser | Grant-CsTeamsAppSetupPolicy -PolicyName "YourPolicyName"
```

Replace "YourPolicyName" with the name of the policy that you created or modified in step 6.

Note: It may take up to 24 hours for the changes to take effect.

Now, you have deployed and installed the Microsoft Viva Connections app to Teams as the first item on the app bar for all users.

NEW QUESTION 41

SIMULATION - (Topic 4)

Task 6

You need to configure a virtual receptionist for your company's main office located at 1 Microsoft Way, Redmond. The solution must meet the following requirements:

- Callers must press 1 for the company directory to lookup by name.
- Callers must press 0 to hear the company address.
- Callers must be offered the same menu at all times.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To configure a virtual receptionist for your company's main office, you can use the Teams admin center to create and assign an auto attendant. An auto attendant is a voice menu system that allows callers to be transferred to an extension or a queue without speaking to an operator or receptionist. Here are the steps to create and assign an auto attendant that meets your requirements:

? Sign in to the Teams admin center with your Microsoft 365 username and password.

? In the left navigation, go to Voice > Auto attendants.

? Click Add (+) to create a new auto attendant.

? In the Basics tab, enter a name and an optional description for the auto attendant, such as "Main Office Receptionist".

? Under Phone number, select Assign and then choose a service number from the list or click Add new number to get a new one. A service number is a type of phone number that can handle hundreds of simultaneous calls and is used for services such as audio conferencing, auto attendants, and call queues.

? Click Apply and then Next.

? In the Greeting and menu tab, under Greeting, select Custom and then click Upload audio file to upload a recorded greeting message for the callers, such as "Welcome to Microsoft. Please listen carefully to the following options."

? Under Menu options, click Add (+) and then select Key press from the drop-down menu.

? In the Key press box, enter 1 and then select Dial by name from the Action drop- down menu. This will allow callers to press 1 for the company directory to lookup by name.

? Click Add (+) again and then select Key press from the drop-down menu.

? In the Key press box, enter 0 and then select Play audio file from the Action drop- down menu. This will allow callers to press 0 to hear the company address.

? Click Upload audio file and then upload a recorded message with the company address, such as "Our main office is located at 1 Microsoft Way, Redmond."

? Under Menu options, turn on the toggle for Repeat menu until caller hangs up or presses #. This will offer the same menu at all times.

? Click Next.

? In the Business hours tab, under Business hours, select 24/7 from the drop-down menu. This will make the auto attendant available at all times.

? Click Next.

? In the Review tab, review your settings and then click Save.

Now, you have configured a virtual receptionist for your company's main office that meets your requirements.

NEW QUESTION 44

- (Topic 3)

SIMULATION - (Topic 4)

Task 3

Adele Vance Is a member of your company s technology adoption team.

You need to provide only Adele with the ability to turn on and off Teams preview features.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To provide only Adele Vance with the ability to turn on and off Teams preview features, you need to create and assign a custom update policy for her. Here are the steps to do so:

? Sign in to the Microsoft Teams admin center with your Microsoft 365 username and password1.

? In the left navigation, go to Teams > Teams Update policies.

? Select Add to create a new policy or select an existing policy to open Update policy.

? Name the update policy, add a description, and select Enabled from the drop- down menu for Allow public preview. This option enables Teams Public Preview regardless of whether a user is enrolled in Office Current Channel (Preview). The end user must also opt in to Teams public preview in their Teams app2.

? Click Save and then Close.

? In the left navigation, go to Users and then search for Adele Vance from the list of users.

? In the user details page, go to Policies and then click Edit next to Assigned policies.

? In the Assigned policies pane, under Update policy, select the policy that you created or modified in step 4 from the drop-down menu.

? Click Apply and then Close.

Now, Adele Vance can turn on and off Teams preview features by following these steps in her Teams app3:

? Select the three dots to the left of your profile to display the Teams menu.

? Select About > Public preview.

? Select Switch to Public preview or Switch back to standard version.

- B. From the Microsoft Teams admin center, set the Microsoft Teams upgrade policy to Islands coexistence mode.
- C. From PowerShell, run the Grant-CsTeamsUpgradePolicy -PolicyName Islands cmdlet.
- D. From PowerShell, run the Grant-CsTeamsUpgradePolicy -PolicyName SfBOnly cmdlet.

Answer: A

NEW QUESTION 67

- (Topic 5)

Your company uses Microsoft Teams and a Microsoft calling plan. The company has a main office in Chicago.
The company opens a new office in Toronto that has 500 users.
You need to ensure that the correct address is available to emergency responders. What should you do?

- A. Create a calling policy and assign the policy to each user.
- B. Create a configuration profile and assign the profile to the device of each user.
- C. Add an emergency address, and then modify the outbound calling setting for each user.
- D. Add an emergency address, and then modify the location for each phone number.

Answer: D

Explanation:

According to the Microsoft documentation¹, you need to add an emergency address for each location where your users make and receive phone calls. An emergency address is a civic address—the physical or street address of a place of business for your organization. It is used to route emergency calls to the appropriate dispatch authorities and to assist in locating the emergency caller.

After you add an emergency address, you need to assign a phone number to it. You can assign either a user number or a service number. A user number is assigned to a specific user in your organization who makes and receives phone calls. A service number is used for services such as Audio Conferencing (for dial-in numbers), auto attendants, or call queues.

To assign a phone number to an emergency address, you need to modify the location for each phone number. You can do this by using the Microsoft Teams admin center or PowerShell. For example, to modify the location for a user number by using PowerShell, you can use the Set-CsOnlineVoiceUser cmdlet with the -LocationID parameter².

NEW QUESTION 79

- (Topic 5)

You are assigned the Groups Administrator role.

You discover that you cannot create an expiration policy in Microsoft 365.

You need to create the expiration policy. The solution must use the principle of least privilege.

What should you do first?

- A. Modify the global (Org-wide default) app permission policy.
- B. Request the Global Administrator role.
- C. Upgrade the Azure AD license.
- D. Purchase a Microsoft Defender for Identity license.

Answer: B

Explanation:

According to the Microsoft documentation¹, to create an expiration policy for Microsoft 365 groups, you need to have one of the following roles:

? Global administrator

? Groups administrator

? User administrator

The Groups Administrator role allows you to manage all aspects of Microsoft 365 groups, including their settings, classifications, expiration policy, and naming policy². However, this role does not allow you to create an expiration policy for Microsoft 365 groups.

Therefore, based on this information, the correct answer is B. Request the Global Administrator role. This role has the highest level of permissions and can perform any administrative task in Microsoft 365³. Alternatively, you can request the User Administrator role, which can also create an expiration policy for Microsoft 365 groups¹.

NEW QUESTION 134

- (Topic 5)

Your company has a Microsoft 365 subscription that uses an Azure AD tenant named contoso.com. You need to prevent guest users in the tenant from using cameras during Microsoft Teams meetings. Solution: From the Microsoft Teams admin center, you modify the External access settings. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

According to the Microsoft documentation⁴, external access settings in the Microsoft Teams admin center are used to control how users in your organization can communicate with users from other domains that use Teams or Skype for Business. External access settings do not affect how guest users in your tenant can use cameras during Teams meetings.

To prevent guest users in your tenant from using cameras during Teams meetings, you need to create and assign a custom meeting policy that has the Allow IP video setting turned off. You can do this by using the Microsoft Teams admin center or PowerShell. For example, to create and assign a custom meeting policy by using PowerShell, you can use the New-CsTeamsMeetingPolicy and Grant-CsTeamsMeetingPolicy cmdlets.
