

## MS-203 Dumps

### Microsoft 365 Messaging

<https://www.certleader.com/MS-203-dumps.html>

## NEW QUESTION 1

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online subscription that uses a namespace of litwareinc.com.

You create a connector in Exchange Online that is configured as shown in the following exhibit.

|                               |                    |
|-------------------------------|--------------------|
| Name                          | : Contoso          |
| Enabled                       | : True             |
| UseMXRecord                   | : True             |
| ConnectorType                 | : Partner          |
| RecipientDomains              | : {Contoso.com}    |
| SmartHosts                    | : {}               |
| TlsDomain                     | : Contoso.com      |
| TlsSettings                   | : DomainValidation |
| IsTransportRuleScoped         | : False            |
| RouteAllMessagesViaOnPremises | : False            |
| CloudServiceMailEnabled       | : False            |
| AllAcceptedDomains            | : False            |

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

If an email message is sent to info@contoso.com, the message [answer choice].

▼

will always be delivered by using TLS

will never be delivered by using TLS

will sometimes be delivered by using TLS

If a user attempts to send an email message to info@contoso.com, and the receiving server does not have a certificate that contains the name contoso.com, [answer choice].

▼

the message will be delivered unencrypted

the messages will not be delivered

the message will be delivered by using TLS

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

If an email message is sent to info@contoso.com, the message [answer choice].

▼

will always be delivered by using TLS

will never be delivered by using TLS

will sometimes be delivered by using TLS

If a user attempts to send an email message to info@contoso.com, and the receiving server does not have a certificate that contains the name contoso.com, [answer choice].

▼

the message will be delivered unencrypted

the messages will not be delivered

the message will be delivered by using TLS

## NEW QUESTION 2

- (Topic 5)

You have a Microsoft 365 tenant that contains a user named User1.

User1 reports that she cannot configure a mail profile in Microsoft Outlook for Windows. User1 receives the following error message: "Encrypted connection to your mail server is not available."

You verify that User1 is assigned a Microsoft Office 365 Enterprise F3 license and can send email messages from her account by using Outlook on the web.

You need to ensure that User1 can connect to Outlook successfully. What should you do?

- A. Run the Microsoft Support and Recovery Assistant for Office 365.
- B. Activate the installation of Office 365 ProPlus.
- C. Modify the license assigned to User1.
- D. Install a new certificate on the computer of User1.

**Answer:** C

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/exchange/troubleshoot/outlook-issues/encrypted-connection-unavailable>**NEW QUESTION 3**

SIMULATION - (Topic 5)

SIMULATION

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

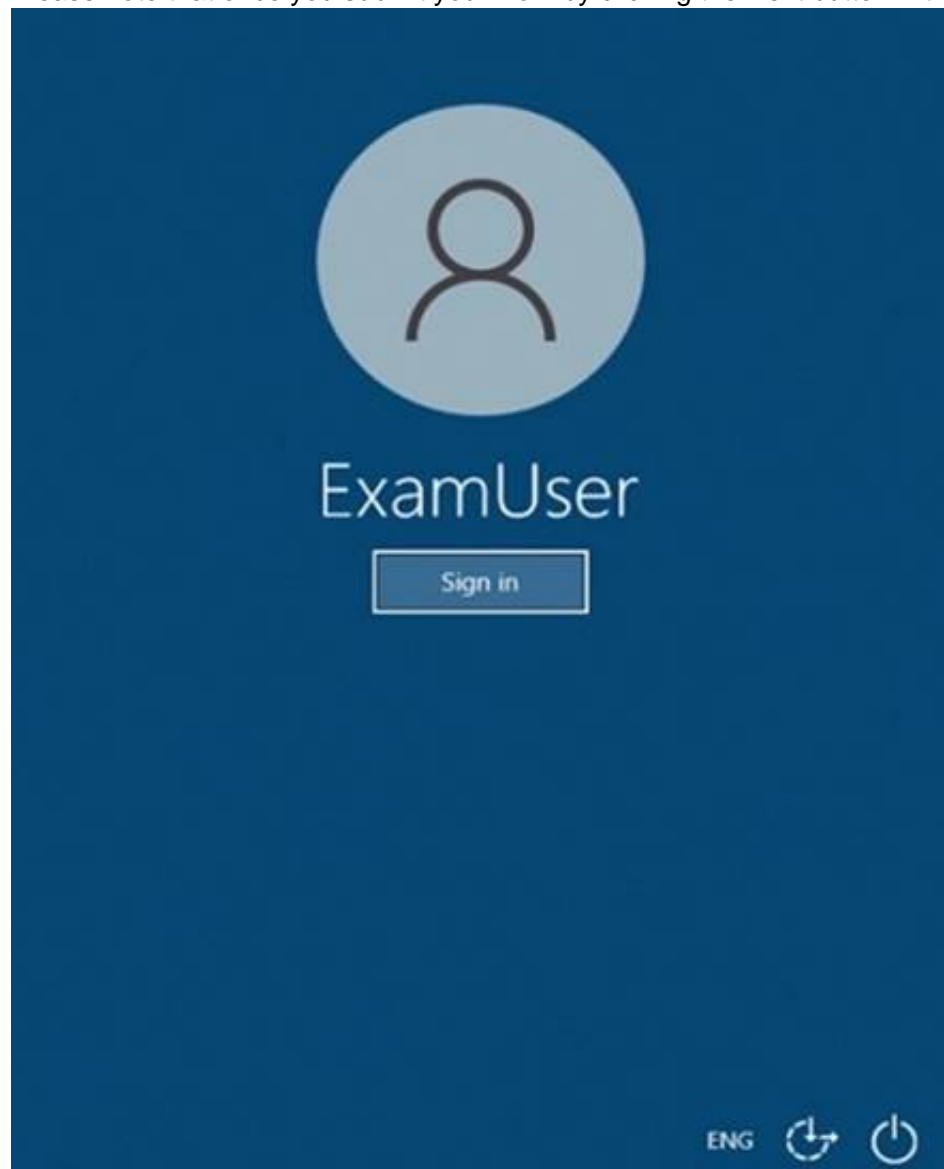

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you

as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@abc.com

Microsoft 365 Password: xxxxxx

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only.

Lab Instance: XXXXXX

You need to ensure that the users in your tenant can only share calendar availability information with users in the tenant and users in a domain named contoso.com.

To complete this task, sign in to the Microsoft 365 admin center.

- A. Mastered
- B. Not Mastered

**Answer: A****Explanation:**

? From the Microsoft 365 admin center dashboard, go to Admin > Exchange.

? Go to Organization > Sharing.

? Under Organization Sharing, click New +.

? In new organization relationship, in the Relationship name box, type a friendly name for the organization relationship.

? In the Domains to share with box, type the domain for the external Microsoft 365, Office 365, or Exchange on-premises organization you want to let see your calendars. If you need to add more than one domain, you can do it after you create the organization relationship by editing it.

? Select the Enable calendar free/busy information sharing check box to turn on calendar sharing with the domains you listed. Set the sharing level for calendar free/busy information and set which users can share calendar free/busy information.

? To set the free/busy access level, select one of the following values:

- Calendar free/busy information with time only
- Calendar free/busy with time, subject, and location

To set which users will share calendar free/busy information, select one of the following values:

- Everyone in your organization

- A specified security group
- ? Click Browse to pick the security group from a list, then click OK.
- ? Click Save to create the organization relationship.

#### NEW QUESTION 4

DRAG DROP - (Topic 5)

Your company has three departments name Dept1, Dept2. and Dept3 and a Microsoft Exchange Online tenant.

You need to increase security for the email messages sent from the departments. The solution must meet the following requirements:

- « Users in Dept1 must be able to digitally sign and encrypt email messages as required.
- + Email messages sent from Dept2 to an external email domain must be encrypted automatically during transit only.
- « Email messages sent from Dept3 to an external email domain must be encrypted until the recipient opens the message.
- « Implementation costs must be minimized.

‘Which type of encryption should you use for each department? To answer, drag the appropriate encryption types to the correct departments. Each encryption type may be used

The screenshot shows a drag-and-drop interface. On the left, under the heading "Encryption types", there are four rectangular boxes: "IPsec", "Microsoft Purview Message Encryption", "S/MIME", and "TLS". On the right, under the heading "Answer Area", there are three rows, each representing a department: "Dept1:", "Dept2:", and "Dept3:". Each row has a corresponding box labeled "Encryption type". Arrows indicate that the encryption types can be dragged from the left list to the department boxes on the right.

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

? Users in Dept1 should use S/MIME encryption<sup>1</sup>. S/MIME is a standard for public key encryption and signing of email messages<sup>1</sup>. It allows users to digitally sign and encrypt email messages as required using certificates<sup>1</sup>. S/MIME provides end-to-end encryption and ensures message integrity and sender authentication<sup>1</sup>.

? Email messages sent from Dept2 to an external email domain should use TLS encryption<sup>1</sup>. TLS is a protocol that encrypts the connection or session between two servers<sup>1</sup>. It protects email messages during transit only and does not require any action from the sender or recipient<sup>1</sup>. TLS provides opportunistic encryption and ensures message confidentiality and server authentication<sup>1</sup>.

? Email messages sent from Dept3 to an external email domain should use Microsoft Purview Message Encryption<sup>2</sup>. Microsoft Purview Message Encryption is an online service that encrypts email messages and attachments using rights management policies<sup>2</sup>. It allows users to send encrypted email messages to anyone inside or outside the organization using various email services<sup>2</sup>. Microsoft Purview Message Encryption provides persistent encryption and ensures message confidentiality and authorization policies<sup>2</sup>.

#### NEW QUESTION 5

SIMULATION - (Topic 5)

SIMULATION

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

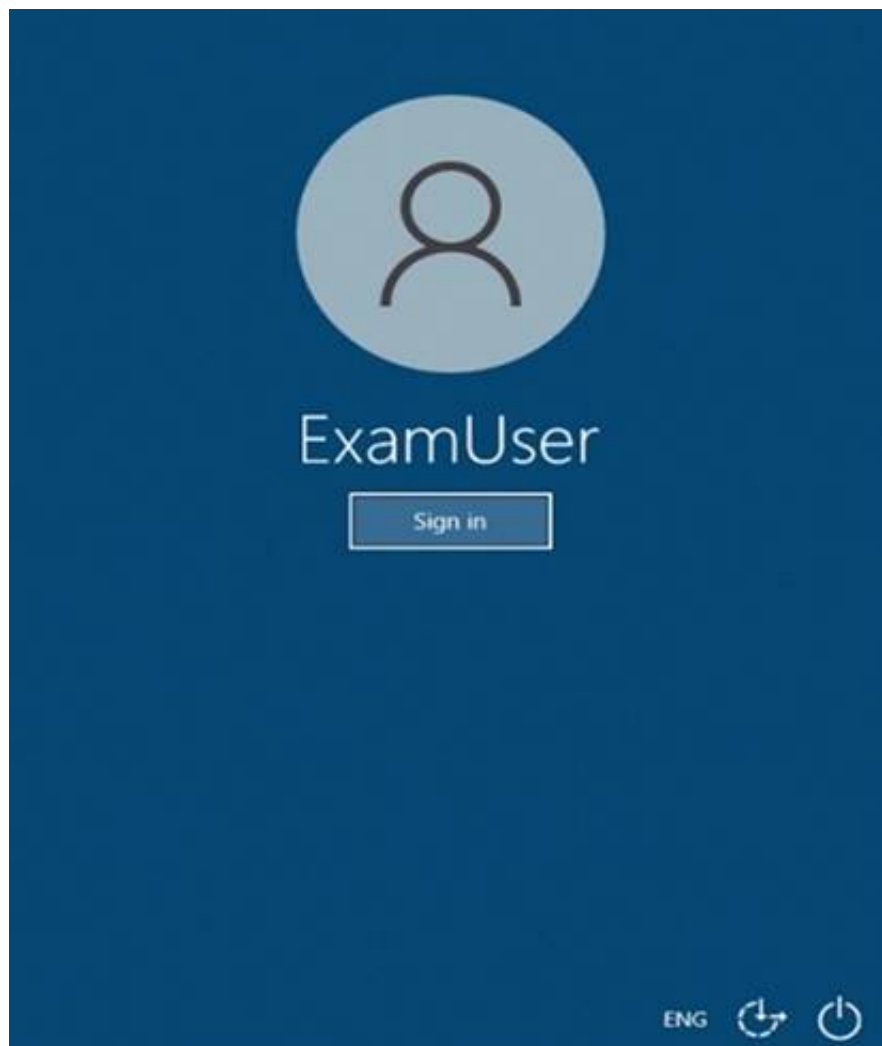

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@abc.com

Microsoft 365 Password: xxxxxx

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only.

Lab Instance: XXXXXX

You need to ensure that the email messages in mailboxes and the documents in Microsoft OneDrive folders of all the users in your organization are retained for only five years.

To complete this task, sign in to the Microsoft 365 admin center.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

? From the Microsoft 365 compliance center, select Policies > Retention.

? Select New retention policy to start the Create retention policy configuration, and name your new retention policy.

? For the Choose the type of retention policy to create page, select Static. Adaptive policies don't support the locations for Exchange public folders or Skype for Business.

? Depending on your selected scope:

- On the Choose locations page, toggle on or off any of the locations except the locations for Teams and Yammer. For each location, you can leave it at the default to apply the policy to the entire location.

? Information specific to locations:

- Exchange email and Exchange public folders
- SharePoint sites and OneDrive accounts
- Microsoft 365 Groups
- Skype for Business

? For Decide if you want to retain content, delete it, or both page, specify the configuration options for retaining and deleting content.

You can create a retention policy that just retains content without deleting, retains and then deletes after a specified period of time, or just deletes content after a specified period of time.

? Complete the configuration and save your settings.

**NEW QUESTION 6**

DRAG DROP - (Topic 5)

You have a Microsoft Exchange Server 2019 hybrid deployment. All user mailboxes are migrated to Exchange Online.

You need to migrate the public folders from the on-premises organizations to Exchange Online.

Which three actions should you perform in sequence before you create the migration batch? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

| Actions   | Answer Area |
|---|-------------|
| From Exchange Online, create the target public folder mailboxes.  |             |
| From Exchange Online, run the Set-organizationConfig -RemotePublicFoldermailboxes \$Null -PublicFoldersEnabled Local command      |             |
| From Exchange on-premises, run the SetmailPublicFolderExternalAddress.ps1 script  |             |
| From Exchange on-premises, run the Export-ModernPublicFolderStatistics.ps1 script   |             |
| From Exchange on-premises, run the Set-OrganizationConfig -RemotePublicFolderMailboxes \$Null -PublicFoldersEnabled Local command |             |
| From Exchange on-premises, run the ModernPublicFolderToMailboxMapgenerator.ps1 script.  |             |

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/Exchange/collaboration/public-folders/migrate-to-exchange-online?view=exchserver-2019>

<https://docs.microsoft.com/en-us/Exchange/collaboration/public-folders/migrate-to-exchange-online?view=exchserver-2019#step-3-generate-the-csv-files> <https://docs.microsoft.com/en-us/Exchange/collaboration/public-folders/migrate-to-exchange-online?view=exchserver-2019#step-4-create-the-public-folder-mailboxes-in-exchange-online>

**NEW QUESTION 7**

- (Topic 5)

You have a Microsoft Exchange Online tenant.

You plan to implement an on-premises alarm system that will send email alerts by using SMTP. The alarm system will NOT support TLS.

You need to ensure that the alarm system can send the alerts to both internal and external recipients by using Exchange Online.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct answer is worth one point.

- A. Configure SMTP AUTH client submission.  
B. Configure the alarm system settings to use a TXT record of the tenant.  
C. Create a connector.  
D. Configure the alarm system settings to use an MX record of the tenant.  
E. Configure direct send.

**Answer:** CE

**Explanation:**

? C. Create a connector1. A connector is a configuration setting that controls how email messages are delivered to or received from your own email servers or a partner organization1. You need to create a connector to route mail between Exchange Online and your on-premises alarm system that uses SMTP1. You can specify the IP address of your alarm system as a trusted sender and configure the connector to use certificate-based authentication or IP address-based authentication1.

? E. Configure direct send2. Direct send is an option that allows you to send mail directly from your printer or application to Microsoft 365 or Office 365 without using a local email server2. You need to configure direct send on your alarm system settings to use an MX record of the tenant as the SMTP server address2. For example, contoso-com.mail.protection.outlook.com2. Direct send does not require TLS encryption or SMTP authentication2.

**NEW QUESTION 8**

- (Topic 5)

You deploy a Microsoft Exchange Server 2019 organization.

You need to ensure that users of all new mailboxes are prevented from editing their personal information.

What should you do?

- A. From the Exchange admin center, create a new role assignment policy.  
B. From PowerShell, run the New-Ro1eAssignmentPolicy cmdlet and specify the-isDefault parameter.  
C. From the Exchange admin center, create a new role group and assign the role group to Domain Users.  
D. From PowerShell, run the New-RoleGroup cmdlet and specify the-CustomRecipientWriteScope parameter.

**Answer:** B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/powershell/module/exchange/role-based-access-control/newroleassignmentpolicy?view=exchange-ps>

**NEW QUESTION 9**

- (Topic 5)

You use an IMAP-based email system. You purchase a Microsoft 365 subscription.

In Exchange Online, you create mailboxes for all users.

You need to migrate all the email accounts of all the users to Exchange Online.

Which three components should you create? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a migration batch
- B. a CSV migration file
- C. an inbound connector
- D. an accepted domain
- E. a remote domain
- F. a migration endpoint

**Answer:** BDF

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/exchange/mailbox-migration/migrating-imap-mailboxes/migrate-other-typesof-imap-mailboxes>

#### NEW QUESTION 10

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Server 2019 organization that uses an email domain named contoso.com.

You plan to move several mailboxes to Microsoft 365.

You need to configure hybrid mail flow to meet the following requirements:

? All email messages received from the internet must be filtered for spam by Microsoft 365.

? Your company's on-premises firewall must allow email messages between the on-premises Exchange servers and Microsoft 365.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Mail exchanger (MX) record to configure:

|   |   |
|---|---|
|   | ▼ |
| Mail.contoso.com                        |   |
| Contoso-com.mail.protection.outlook.com |   |
| Outlook.office365.com                   |   |

Firewall port to allow:

|          |   |
|----------|---|
|          | ▼ |
| TCP 25   |   |
| TCP 2525 |   |
| TCP 587  |   |
| TCP 993  |   |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Mail exchanger (MX) record to configure:

|   |   |
|---|---|
|   | ▼ |
| Mail.contoso.com                        |   |
| Contoso-com.mail.protection.outlook.com |   |
| Outlook.office365.com                   |   |

Firewall port to allow:

|          |   |
|----------|---|
|          | ▼ |
| TCP 25   |   |
| TCP 2525 |   |
| TCP 587  |   |
| TCP 993  |   |

#### NEW QUESTION 10

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant.

You need to configure Outlook on the web to meet the following requirements:

- Prevent users from requesting a remote wipe of their devices.
- Prevent users from accessing voice mails.

You create a new Outlook Web App mailbox policy named Policy1.

Policy1

Select the features that you want to enable for this Outlook Web App mailbox policy.

Communication management

|                                     |                   |
|-------------------------------------|-------------------|
| <input checked="" type="checkbox"/> | Instant messaging |
| <input checked="" type="checkbox"/> | Text messaging    |
| <input checked="" type="checkbox"/> | Unified Messaging |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**  
Unified Messaging

#### NEW QUESTION 14

- (Topic 5)

You have a Microsoft Exchange Online tenant that contains a user named User1. User1 has a mobile device.

You need to enable Exchange ActiveSync logging for User1 and retrieve the log files. Which two Exchange Online PowerShell cmdlets should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Get-ActiveSyncDevice
- B. Set-ActiveSyncMailboxPolicy
- C. Set-ClientAccessRule
- D. Get-MobileDeviceStatistics
- E. Set-CASMailbox

**Answer:** E

**Explanation:**  
Reference:  
<https://docs.microsoft.com/en-us/exchange/plan-and-deploy/post-installation-tasks/change-oab-generation-schedule?view=exchserver-2019>

#### NEW QUESTION 19

- (Topic 5)

You have a Microsoft Exchange Online subscription.

You need to generate a CSV file containing all the email messages that failed to send from the user1@contoso.com email address during the last 30 days.

What are two possible ways to achieve the goal? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From Exchange Online PowerShell, run the Get-MessageTrace cmdlet.
- B. From the Exchange admin center, run a message trace.
- C. From the Security & Compliance admin center, export the mailbox audit logs.
- D. From Exchange Online PowerShell, run the Get-MessagetraceDetail cmdlet.
- E. From the Security & Compliance admin center, run a message trace.

**Answer:** BD

**Explanation:**  
References:  
<https://docs.microsoft.com/en-us/exchange/monitoring/trace-an-email-message/run-a-message-trace-andview-results>  
<https://docs.microsoft.com/en-us/powershell/module/exchange/mail-flow/get-messagetracedetail?view=exchange-ps>

#### NEW QUESTION 22

HOTSPOT - (Topic 5)

Your company has a Microsoft Exchange Server 2019 hybrid deployment.

The company has four departments that have the mailboxes shown in the following table.

| Department    | Number of mailboxes | Location        |
|---------------|---------------------|-----------------|
| Finance       | 500                 | On-premises     |
| Manufacturing | 1,000               | Exchange Online |
| Sales         | 5,000               | On-premises     |
| Marketing     | 2,000               | Exchange Online |

The mailboxes are configured as shown in the following table.

| Department    | Archive  | Single item recovery |
|---------------|----------|----------------------|
| Finance       | Enabled  | Enabled              |
| Manufacturing | Disabled | Disabled             |
| Sales         | Disabled | Disabled             |
| Marketing     | Enabled  | Enabled              |

You have two administrators named Admin1 and Admin2 that are assigned the permissions shown in the following table.

| Administrator | Management role group                            | Organization                    | Management role       |
|---------------|--|---------------------------------|-----------------------|
| Admin1        | Organization Management,<br>Discovery Management | Exchange Online,<br>on-premises | None                  |
| Admin2        | Organization Management,<br>Discovery Management | Exchange Online,<br>on-premises | Mailbox Import Export |

For each of the following statement, select yes if the statement is true. otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statements   | Yes                   | No                    |
|--|-----------------------|-----------------------|
| Admin1 can search for email messages in every mailbox in the organization by running the <code>New-ComplianceSearch</code> cmdlet.                     | <input type="radio"/> | <input type="radio"/> |
| Admin2 can perform a search for a specific keyword in every mailbox of the manufacturing department by running the <code>Search-mailbox</code> cmdlet. | <input type="radio"/> | <input type="radio"/> |
| Admin1 can delete email message from every mailbox of the marketing department by running the <code>Search-Mailbox</code> cmdlet.                      | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/exchange/discovery-management-exchange-2013-help>

<https://docs.microsoft.com/en-us/powershell/module/exchange/mailboxes/search-mailbox?view=exchange-ps>

**NEW QUESTION 26**

- (Topic 5)

You have a Microsoft Exchange Online tenant.

Remote users report that they receive an error message when they attempt to add their email account to Microsoft Outlook.

You need to confirm that the DNS records resolve correctly for the users.

Which two DNS records should you test? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. autodiscover.outlook.com
- B. smtp.office365.com
- C. outlook.office365.com
- D. security.microsoft365.com
- E. portal.office.com

**Answer:** AC

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/exchange/troubleshoot/administration/incorrect-settings>

**NEW QUESTION 30**

HOTSPOT - (Topic 5)

You run the `Get-WebServicesVirtualDirectory` cmdlet as shown in the following exhibit.

```
PowerShell I-preview o(64)
PS C:\> Get-WebServicesVirtualDirectory | Format-Table

Identity MRSProxyEnabled InternalURL ExternalURL
-----
MBX1      False      https://mail.contoso.com/EWS/Exchange.asmx https://mail.contoso.com/EWS/Exchange.asmx
MBX2      True       https://mail.contoso.com/EWS/Exchange.asmx https://mail.contoso.com/EWS/Exchange.asmx
MBX3      False      https://mail.contoso.com/EWS/Exchange.asmx https://mail.contoso.com/EWS/Exchange.asmx

PS C:\> Get-ExchangeCertificate | Format-Table

Thumbprint RootCAType ISSelfSigned Services
-----
A80VESIE410PCANGPT014VPXYC51H9AGRN72KFZG6 None True SMTP
TTVQY2WYN851594C2062NWNF5JK98I6N667RF9XK4 ThirdParty False IIS, IMAP, POP

PS C:\>
```

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

What should you do to ensure that all mailboxes can be synced successfully?

▼

Enable the MRS proxy endpoint on all servers.

Disable the MRS proxy endpoint on all servers.

Update the external URL to outlook.office365.com.

What should you do to ensure that email can be delivered between on-premises users and Microsoft Exchange Online users?

▼

Configure IMAP to use a self-signed certificate.

Configure SMTP to use a third-party certificate.

Disable the MRS proxy endpoint on all servers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1:  
The MRS proxy endpoint needs to be enabled on all mailbox servers.  
Box 2:  
SMTP is used to deliver email between on-premise users and Exchange Online users. This requires a third-party (public CA) certificate.

NEW QUESTION 32

- (Topic 4)  
You need to ensure that Alex Wilber can recover deleted items when using Outlook on the web.  
Which two actions should you perform? Each correct answer presents a complete solution.  
NOTE: Each correct selection is worth one point.

- A. Assign Sales Policy to Alex Wilbur.
- B. Modify Marketing Policy.
- C. Remove Alex Wilbur from all groups.
- D. Assign Policy2 to Alex Wilbur.
- E. Modify Policy1

Answer: BD

NEW QUESTION 33

- (Topic 4)  
Which contacts can sign in to and access resources in the adatum.com tenant?

- A. Contact1 only
- B. Contact2 only
- C. Contact1 and Contact3 only
- D. Contact2 and Contact3 only
- E. Contact1, Contact2. and Contact3

Answer: D

NEW QUESTION 37

- (Topic 2)  
You need to configure the required objects for the branch office administrators. What should you create for each administrator?

- A. a management role assignment policy and a management role group
- B. a management role scope and a management role assignment
- C. a management role scope and a management role group
- D. a management role and a management role assignment policy

Answer: C

Explanation:

Reference:  
<https://practical365.com/exchange-server/exchange-server-role-based-access-control-in- action/>

NEW QUESTION 41

- (Topic 5)

You have hybrid deployment between a Microsoft Exchange Online tenant and an on- premises Exchange Server 2019 organization. The deployment uses Azure AD Connect. All incoming email is delivered to Exchange Online. You have 10 mail-enabled public folders hosted on an on-premises Mailbox server.

Customers receive an error when an email message is sent to a public folder.

You need to ensure that all the mail-enabled public folders can receive email messages from the internet. The solution must ensure that messages can be delivered only to valid recipients.

Solution: From Azure AD Connect, select Exchange Mail Public Folders. Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

From Azure AD Connect, selecting Exchange Mail Public Folders will ensure that all the mail-enabled public folders can receive email messages from the internet and that messages can be delivered only to valid recipients. This is according to the Microsoft 365 Messaging documentation (<https://docs.microsoft.com/en-us/exchange/hybrid- deployment/hybrid-mail-flow>).

**NEW QUESTION 42**

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant named adatum.com that contains a user named User1.

You plan to perform a new message trace for User1. The message trace must generate an Enhanced summary report.

Which three Delivery status options can be included in the report? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

## New message trace

**NEW QUESTION 47**  
HOTSPOT - (Topic 5)  
Your company named ADatum Corporation has a Microsoft Exchange Online subscription that contains the sharing policies shown in the following table.

| Name    | Domain   | Enabled | Default |
|---------|--|---------|---------|
| Policy1 | {Anonymous:CalendarSharingFreeBusySimple, fabrikam.com:CalendarSharingFreeBusyReviewer, ContactsSharing} | True    | True    |
| Policy2 | {contoso.com:CalendarSharingFreeBusyDetail}  | True    | False   |
| Policy3 | {litware.com:CalendarSharingFreeBusyReviewer}  | True    | False   |

The subscription contains the mailboxes shown in the following table.

| Name  | Sharing policy |
|-------|----------------|
| User1 | Policy1        |
| User2 | Policy2        |
| User3 | Policy3        |

ADatum does business with the partner companies shown in the following table.

| Name           | SMTP domain  | Email platform                   |
|----------------|--------------|----------------------------------|
| Fabrikam, Inc. | Fabrikam.com | On-premises Exchange Server 2019 |
| Contoso, Ltd.  | Contoso.com  | Third-party email server         |
| Litware, Inc.  | Litware.com  | Exchange Online                  |

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

| Statements  | Yes                   | No                    |
|---|-----------------------|-----------------------|
| For User1 to share contacts with the users at Fabrikam, a federation trust is required. | <input type="radio"/> | <input type="radio"/> |
| User2 can share free/busy hours, subject, and location with the users at Contoso.       | <input type="radio"/> | <input type="radio"/> |
| User3 can share calendars with the users at Litware.                                    | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

| Statements  | Yes                              | No                               |
|---|----------------------------------|----------------------------------|
| For User1 to share contacts with the users at Fabrikam, a federation trust is required. | <input type="radio"/>            | <input checked="" type="radio"/> |
| User2 can share free/busy hours, subject, and location with the users at Contoso.       | <input checked="" type="radio"/> | <input type="radio"/>            |
| User3 can share calendars with the users at Litware.                                    | <input checked="" type="radio"/> | <input type="radio"/>            |

NEW QUESTION 48

- (Topic 5)  
You have a Microsoft Exchange Server 2019 hybrid deployment. You plan to implement Hybrid Modern Authentication (HMA). You retrieve the Exchange virtual directory settings, and you discover the following output.

```
InternalUrl           : https://mail.contoso.com
ExternalUrl           : https://mail.contoso.com
IISAuthenticationMethods : {Ntlm, Negotiate}
InternalAuthenticationMethods : {Ntlm, Negotiate}
ExternalAuthenticationMethods : {Ntlm, Negotiate}
```

You need to prepare the virtual directories for the planned implementation of HMA. What should you do?

- A. Add OAuth as an authentication method.
- B. Remove NTLM as an authentication method.
- C. Delete https://mail.contoso.com from the ExternalUrl value.
- D. Modify the InternalUrl value to http://mail.contoso.com.

Answer: A

Explanation:

Reference:  
<https://docs.microsoft.com/en-us/microsoft-365/enterprise/configure-exchange-server-for-hybrid-modernauthentication?view=o365-worldwide>

NEW QUESTION 53

SIMULATION - (Topic 5)  
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.  
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.  
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.  
Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.  
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@abc.com

Microsoft 365 Password: xxxxxx

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only.

Lab Instance: XXXXXX

You need to ensure that all emails sent from the users in your company to recipients who use a suffix of @fabnkam.com are encrypted by using Microsoft Office 365 Message Encryption (OME).

To complete this task, sign in to the Exchange admin center.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

? In the Microsoft 365 admin center, choose Admin centers > Exchange.

? In the EAC, go to Mail flow > Rules and select New + > Create a new rule.

? In Name, type a name for the rule, such as Encrypt mail for DrToniRamos@hotmail.com.

? In Apply this rule if, select a condition, and enter a value if necessary. For example, to encrypt messages going to DrToniRamos@hotmail.com:

\_ In Apply this rule if, select the recipient is.

\_ Select an existing name from the contact list or type a new email address in the check names box.

- To select an existing name, select it from the list and then click OK.

- To enter a new name, type an email address in the check names box and then select check names >OK.

? To add more conditions, choose More options and then choose add condition and select from the list.

For example, to apply the rule only if the recipient is outside your organization, select add condition and then select the recipient is external/internal >Outside the organization >OK.

? To enable encryption using the new OME capabilities, from Do the following, select Modify the message security and then choose Apply Office 365 Message Encryption and rights protection. Select an RMS template from the list, choose Save, and then choose OK.

**NEW QUESTION 55**

- (Topic 5)

You have a Microsoft Exchange Online tenant that contains a user named User1 and a shared mailbox named Mailbox.

You plan to use PowerShell to grant User1 the Send As permission for Mailbox1. Which cmdlet should you run?

- A. Add-RecipientPermission
- B. Add-MailboxPermission
- C. Set-MailboxFolderPermission
- D. Add-MailboxFolderPermission
- E. Set-Mailbox

**Answer:** E

NEW QUESTION 56

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant that contains a user named User1. User1 has the Department attribute set to Procurement. You create the connector shown in the Connector exhibit. (Click the Connector tab.) You create the transport rule shown in the Transport rule exhibit (Click the Transport rule tab.) For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

| Statements  | Yes                   | No                    |
|---|-----------------------|-----------------------|
| Email messages from User1 to user2@contoso.com are sent to mail.contoso.com.  | <input type="radio"/> | <input type="radio"/> |
| Email messages from User1 to user2@contoso.com are delivered only if a TLS connection is established.                     | <input type="radio"/> | <input type="radio"/> |
| Email messages from User1 to user3@europe.contoso.com are delivered by using the Contoso Secured Outbound Mail connector. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Answer Area

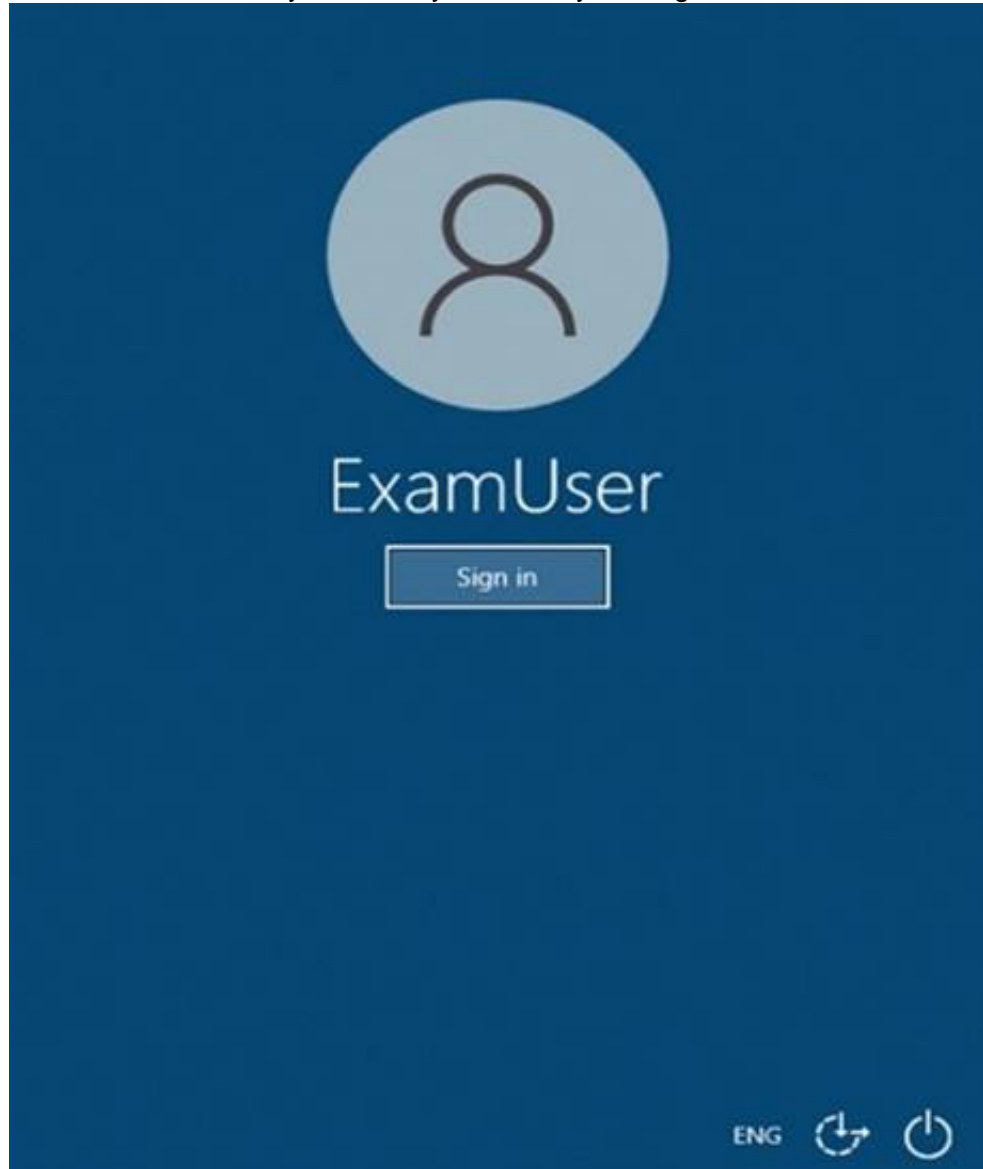

| Statements  | Yes                              | No                               |
|---|----------------------------------|----------------------------------|
| Email messages from User1 to user2@contoso.com are sent to mail.contoso.com.  | <input checked="" type="radio"/> | <input type="radio"/>            |
| Email messages from User1 to user2@contoso.com are delivered only if a TLS connection is established.                     | <input type="radio"/>            | <input checked="" type="radio"/> |
| Email messages from User1 to user3@europe.contoso.com are delivered by using the Contoso Secured Outbound Mail connector. | <input checked="" type="radio"/> | <input type="radio"/>            |

NEW QUESTION 59

SIMULATION - (Topic 5)

SIMULATION

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time. When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. The following information is for technical support purposes only.

Lab Instance: XXXXXX

You need to ensure that all email sent or received by a user named Diego Siciliani is preserved in Exchange Online. The solution must prevent Diego Siciliani from permanently deleting any email messages for 180 days.

To complete this task, sign in to the Microsoft 365 admin center.

A. Mastered

B. Not Mastered

**Answer: A**

**Explanation:**

You need configure a Retention Policy. You could also use a Litigation Hold but Retention Policies are replacing Litigation Holds in future, so a Retention Policy is the way to go.

? In the Microsoft 365 Compliance Center, go to the Policies section and click Retention.

? Click the New retention policy link.

? Enter a name for the policy (such as "Diego Siciliani Email Retention") and click Next.

? In the retention period, enter 180 days and click Next.

? Ensure that only Exchange email is selected. SharePoint sites, OneDrive accounts and Office 365 groups are also selected by default so you may need to deselect them.

? Click the Choose recipients link for Exchange email.

? Click the Choose recipients button to open a list of recipients.

? Select Admin1 and click the Choose button then click the Done button.

? Click Next.

? Click the Create this policy button.

**NEW QUESTION 64**

HOTSPOT - (Topic 5)

Your network contains an Active Directory Domain Services (AD DS) domain.

You have a Microsoft 365 subscription. All mailboxes are hosted in Microsoft Exchange Online.

You have the DNS domains shown in the following table.

| Name                    | Description                         |
|-------------------------|-------------------------------------|
| corp.contoso.com        | AD DS domain                        |
| contoso.com             | Verified custom domain for Azure AD |
| contoso.onmicrosoft.com | Default Azure AD tenant             |

You need to ensure that the Autodiscover service can be used to configure Microsoft Outlook settings for devices connecting from the internet. How should you configure the DNS record for Autodiscover? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Type of DNS record: CNAME

In DNS domains: contoso.com only

A. Mastered

B. Not Mastered

**Answer: A**

**Explanation:**

**Answer Area**

Type of DNS record: CNAME

In DNS domains: contoso.com only

**NEW QUESTION 65**

- (Topic 5)

You have a Microsoft Exchange Online tenant that uses a third-party email hygiene system named Service1. Service1 blocks all encrypted email.

All external email is routed through Service1 by using a connector.

Users classify email by using sensitivity labels. Emails classified as Secret are encrypted automatically.

You need to ensure that the users can send emails classified as Secret to external recipients.

Which two items should you create? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a remote domain
- B. a connector
- C. a data loss prevention (DLP) policy
- D. a mail flow rule
- E. a label policy

**Answer:** BD

**Explanation:**

Use an additional Connector and a Mail Flow Rule to bypass the third-party email hygiene system for emails that have the Secret sensitivity label.

Emails with the sensitivity label will use the new connector. All other emails will use the existing connector.

Reference:

<https://docs.microsoft.com/en-us/exchange/mail-flow-best-practices/use-connectors-to-configure-mail-flow/conditional-mail-routing>

**NEW QUESTION 68**

- (Topic 5)

You have a Microsoft Exchange Online tenant that contains a group named Group1.

The members of Group1 need to create user mailboxes. The solution must use the principle of least privilege.

To which role group should you add Group1?

- A. Recipient Management
- B. Security Operator
- C. Help Desk
- D. Organization Management

**Answer:** A

**NEW QUESTION 70**

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant that contains the users shown in the following table.

| Name  | Mobile device | Mail client                   |
|-------|---------------|-------------------------------|
| User1 | iOS           | Native mail client            |
| User2 | Android       | Microsoft Outlook for Android |

From the Exchange admin center, you issue a Wipe Data command for User1 and User2. What occurs on the device of each user? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

User1: 

|   |   |
|---|---|
|   | ▼ |
| All the data in the email client is wiped.        |   |
| Only email messages and calendar items are wiped. |   |
| The mobile device is wiped.                       |   |

User2: 

|   |   |
|---|---|
|   | ▼ |
| All the data in the email client is wiped.        |   |
| Only email messages and calendar items are wiped. |   |
| The mobile device is wiped.                       |   |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

User1: 

|   |   |
|---|---|
|   | ▼ |
| All the data in the email client is wiped.        |   |
| Only email messages and calendar items are wiped. |   |
| The mobile device is wiped.                       |   |

User2: 

|   |   |
|---|---|
|   | ▼ |
| All the data in the email client is wiped.        |   |
| Only email messages and calendar items are wiped. |   |
| The mobile device is wiped.                       |   |

#### NEW QUESTION 72

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant.

You need to create a report to display messages that have a delivery status of Quarantined.

From the modern Exchange admin center, you create a new message trace.

How should you configure the message trace? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Time range: 

|              |   |
|--------------|---|
|              | ▼ |
| Last 7 days  |   |
| Last 15 days |   |
| Last 30 days |   |
| Last 90 days |   |

Report type: 

|                         |   |
|-------------------------|---|
|                         | ▼ |
| Extended report         |   |
| Summary report          |   |
| Enhanced summary report |   |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Time range:

|              |   |

|              | ▼ |
| Last 7 days  |   |
| Last 15 days |   |
| Last 30 days |   |
| Last 90 days |   |

Report type:

|                         |   |
|-------------------------|---|
|                         | ▼ |
| Extended report         |   |
| Summary report          |   |
| Enhanced summary report |   |

#### NEW QUESTION 74

- (Topic 5)

You have a Microsoft 365 E5 subscription.

A user attempts to send an email message to an external recipient and receives the following error message: "Your message couldn't be delivered because you weren't recognized as a valid sender. The most common reason for this is that your email address is suspected of sending spam and it's no longer allowed to send messages outside of your organization. Contact your mail admin for assistance. Remote Server returned '550 5.1.8 Access denied, bad outbound sender'." You need to ensure that the user send email to external recipients. What should you do?

- A. compliance management in the Exchange admin center
- B. Data loss prevention in the Security & Compliance admin center
- C. Threat management in the Security & Compliance admin center
- D. action center in the Exchange admin center

**Answer: C**

**Explanation:**

<http://automatica.com.au/2020/01/office-365-single-users-unable-to-send-email-access-denied-bad-outbound-sender-error/>

#### NEW QUESTION 76

DRAG DROP - (Topic 5)

Your company named Contoso, Ltd. has a Microsoft Exchange Server 2019 hybrid deployment.

A partner company named Fabrikam, Inc. uses an Exchange Online subscription for email. You need to ensure that all the users at Fabrikam can view the free/busy information of the users at Contoso.

What should you configure? To answer, drag the appropriate components to the correct companies. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

#### Components

|                              |
|------------------------------|
| A connector                  |
| A sharing policy             |
| A remote domain              |
| A federation trust           |
| An organization relationship |

#### Answer Area

For Fabrikam:

Component

For Contoso:

Component

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

| Components                   | Answer Area |
|------------------------------|-------------|
| A connector                  |             |
| A sharing policy             |             |
| A remote domain              |             |
| A federation trust           |             |
| An organization relationship |             |

|               |                              |
|---------------|------------------------------|
| For Fabrikam: | An organization relationship |
| For Contoso:  | An organization relationship |

#### NEW QUESTION 81

- (Topic 5)

You have two servers named EXCH1 and EXCH2 that run Windows Server 2012 R2 and have Microsoft Exchange 2016 installed. You purchase a Microsoft 365 subscription. You plan to configure a hybrid deployment between an Exchange Online tenant and the on- premises Exchange Server Organization. You need to identify the prerequisites to installing the Microsoft Hybrid Agent on EXCH1 and EXCH2. Which two prerequisites should you identify? Each correct answer presents part of the solution.

- A. All outbound HTTPS connections to Microsoft Online Services
- B. Enable Hybrid Modern Authentication (HMA).
- C. Upgrade the operating system of EXCH1 and EXCH2 to Windows Server 2019.
- D. Enable TLS 1.2.

**Answer:** AD

#### Explanation:

To perform a hybrid deployment between an Exchange Online tenant and an on-premises Exchange Server organization, you must ensure that all outbound HTTPS connections to Microsoft Online Services are allowed. This is a prerequisite for installing the Microsoft Hybrid Agent.

\* D. Enable TLS 1.2. Reference: <https://docs.microsoft.com/en-us/exchange/hybrid-deployment/prepare-for-hybrid-deployment> explanation: To perform a hybrid deployment between an Exchange Online tenant and an on-premises Exchange Server organization, you must ensure that Transport Layer Security (TLS) 1.2 is enabled on your on-premises Exchange servers. This is a prerequisite for installing the Microsoft Hybrid Agent.

#### NEW QUESTION 85

- (Topic 5)

You have a Microsoft 365 subscription that contains a verified domain named contoso.com.

You have an app named App1 that sends meeting invitations on behalf of users. The invitations are sent from a Microsoft Exchange Online mailbox that has a sender address of app1 @contoso.com and a reply-to address of the user scheduling the meeting.

You create an anti-phishing policy named Policy1 that includes all the users in contoso.com. Policy1 is configured to protect the domain against impersonation.

You discover that email messages sent from App1 are quarantined.

You need to ensure that App1 can send messages that impersonate any contoso.com user How should you modify Policy1?

- A. Enable mailbox intelligence.
- B. Add app1@contoso.com as a trusted sender.
- C. Add app1@contoso.com as an excluded user.
- D. Enable spoof intelligence.

**Answer:** C

#### NEW QUESTION 88

HOTSPOT - (Topic 5)

Your company has an Exchange Online tenant.

A partner company named Fourth Coffee also uses Exchange Online.

You need to ensure that the users at your company share free busy information with the users at Fourth Coffee. The solution must ensure that the meeting details included in the calendars of your company users remain hidden from the Fourth Coffee users.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

```

New-SharingPolicy -Name "Fourth Coffee" -DomainNames "fourthcoffee.com"
New-AvailabilityConfig
New-OrganizationRelationship
-FreeBusyAccessEnabled $true -FreeBusyAccessLevel
-FreeBusyAccessScope "Executives"
  
```

New-SharingPolicy  
 New-AvailabilityConfig  
 New-OrganizationRelationship

-FreeBusyAccessEnabled \$true -FreeBusyAccessLevel

-FreeBusyAccessScope "Executives"

None  
 LimitedDetails  
 AvailabilityOnly

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**NEW QUESTION 90**

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant named contoso.com.

Email messages from a remote domain named fabrikam.com are received from a server that uses a wildcard certificate for fabrikam.com and are encrypted by using TLS.

Fabrikam.com is switching to a third-party cloud filtering service for inbound and outbound email. The IP address used by the third-party service is 131.107.200.10.

You need to reconfigure the connector to only accept messages from fabrikam.com that are encrypted and received from the third-party service.

Which two settings should you modify for the connector? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

**Edit Connector**

What security restrictions do you want to apply?

☒ Reject email messages if they aren't sent over TLS.

☒ And require that the subject name on the certificate that the partner uses to authenticate with Office 365 matches this domain name

\*.fabrikam.com

☒ Reject email messages if they aren't sent from within this IP address range

+ -

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

**Edit Connector**

What security restrictions do you want to apply?

☒ Reject email messages if they aren't sent over TLS.

☒ And require that the subject name on the certificate that the partner uses to authenticate with Office 365 matches this domain name

\*.fabrikam.com

☒ Reject email messages if they aren't sent from within this IP address range

**NEW QUESTION 93**

SIMULATION - (Topic 5)

SIMULATION

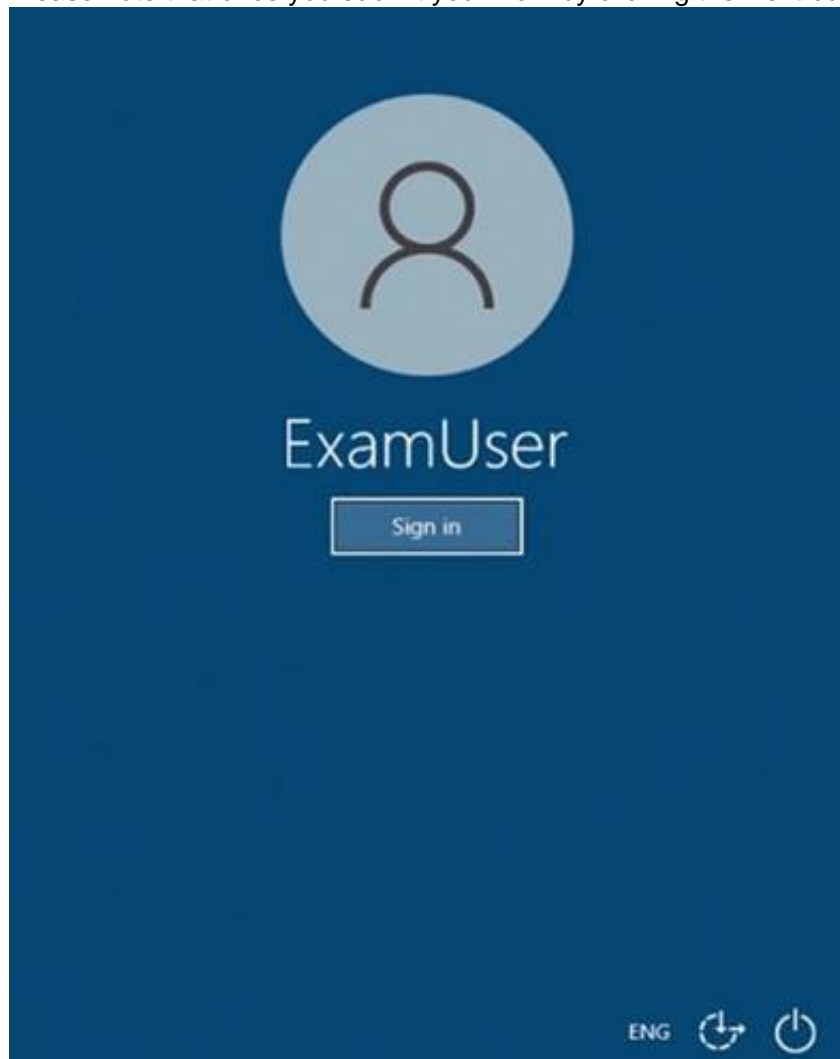

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@abc.com

Microsoft 365 Password: xxxxxx

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only.

Lab Instance: XXXXXX

You need to ensure that the users in your company can schedule a conference room named Room1 in the company's office by using Microsoft Outlook.

To complete this task, sign in to the Exchange admin center.

A. Mastered

B. Not Mastered

**Answer: A**

**Explanation:**

? In the Exchange admin center, navigate to Recipients > Resources.

? To create a room mailbox, click New + > Room mailbox.

? Use the options on the page to specify the settings for the new resource mailbox.

- Room name: Use this box to type a name for the room mailbox. This is the name that's listed in the resource mailbox list in the Exchange admin center and in your organization's address book. This name is required and it can't exceed 64 characters.

- Alias: A room mailbox has an email address so it can receive booking requests. The email address consists of an alias on the left side of the @ symbol, which must be unique in the forest, and your domain name on the right. The alias is required.

- Location, Phone, Capacity: You can use these fields to enter details about the room. However, as explained earlier, you can include some or all of this information in the room name so users can see it.

? When you're finished, click Save to create the room mailbox.

**NEW QUESTION 95**

- (Topic 5)

Your company has a Microsoft Exchange Server 2019 organization that contains two servers in a database availability group (DAG).

The customer service department at the company uses public folders to receive customer communications.

Only users in the customer service department can read items in the folders.

For a new customer, you create a mail-enabled public folder that has the default settings. The customer reports that when she sends an email message to the email address of the

public folder, she receives a non-delivery report (NDR). You need to ensure that the public folder can receive email.

Which public permissions should you configure in Microsoft Outlook?

- A. Grant the Author permission to the Default group
- B. Grant the Author permission to the Anonymous group
- C. Grant the Create items permission to the Anonymous group
- D. Grant the Create items permission to the Default group

**Answer: C**

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/exchange/collaboration/public-folders/mail-enable-or-disable?view=exchserver-2019>

**NEW QUESTION 100**

- (Topic 5)

You discover that Policy1 failed to apply to the Executives group.

You need to ensure that Policy1 is applied to all the members of the Executives group. What should you do?

- A. Increase the priority of Policy1.
- B. Decrease the priority of Strict Preset Security Policy.
- C. Remove the Executives group from the Strict protection preset security policy.
- D. Modify the Strict protection preset security policy to match Policy? and assign the Strict protection preset security policy to contoso.com.

**Answer: C**

**Explanation:**

Preset security policies are policies that provide a centralized location for applying all of the recommended spam, malware, and phishing policies to users at once1

. The policy settings are not configurable and are set by Microsoft based on best practice1s

. There are two types of preset security policies: Standard protection and Strict protection1

. Standard protection is a baseline protection profile that's suitable for most user1s. Strict protection is a more aggressive protection profile for selected users who are high value targets or priority users1.

If you want to apply Policy1 to the Executives group, you need to remove them from the Strict protection preset security policy first. Otherwise, the preset security policy will take precedence over Policy1 and prevent it from being applied2.

To remove the Executives group from the Strict protection preset security policy, you can follow these steps2:

? Login to the Microsoft Security portal at <https://security.microsoft.com>.

? On the left nav, under Email & collaboration, select Policies & rules.

? Select Threat policies.

? Select Preset Security Policies underneath the Templated policies heading

? Select Manage underneath the Strict protection preset.

? Select Specific recipients and remove the Executives group from the list of recipients.

? Select Save.

**NEW QUESTION 105**

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Server 2019 hybrid deployment named contoso.com. You are preparing to migrate several user mailboxes to Microsoft 365.

You have an on-premises Mailbox server named server1.contoso.com. You need to create a migration endpoint.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

New-MigrationEndpoint -Name MEP1

|                     |
|---------------------|
| -Autodiscover       |
| -ExchangeRemoteMove |
| -SkipVerification   |
| -TestMailbox        |

server1.contoso.com

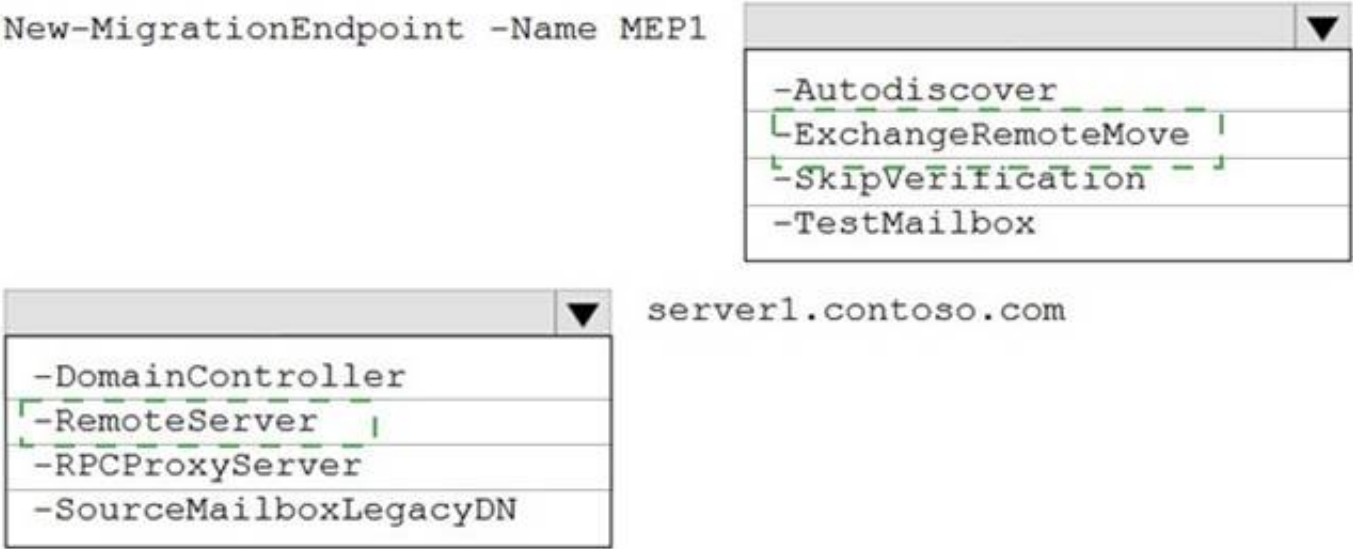

|                        |
|------------------------|
| -DomainController      |
| -RemoteServer          |
| -RPCProxyServer        |
| -SourceMailboxLegacyDN |

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

NEW QUESTION 107

- (Topic 5)

You have 1,000 user accounts that are each licensed for Microsoft 365. Each user account has a Microsoft Exchange Online mailbox. Ten of the user accounts are configured as service accounts for applications. The applications send event notifications to the mailboxes of the service accounts by using SMTP. The developers of each application have delegated access to the mailbox of their respective application. You need to ensure that all the event notifications sent by the applications are retained in the service account mailboxes so that new developers can review older notifications. The developers must be able to view only the notifications for their respective application. What should you do?

A. Replace the service account mailboxes with a single user mailbox that contains a folder for each application.  
 B. Replace the service account mailboxes with a single user mailbox that contains Power Automate rules.  
 C. Convert the service account mailboxes into shared mailboxes.  
 D. Convert the service account mailboxes into mail-enabled users.

Answer: C

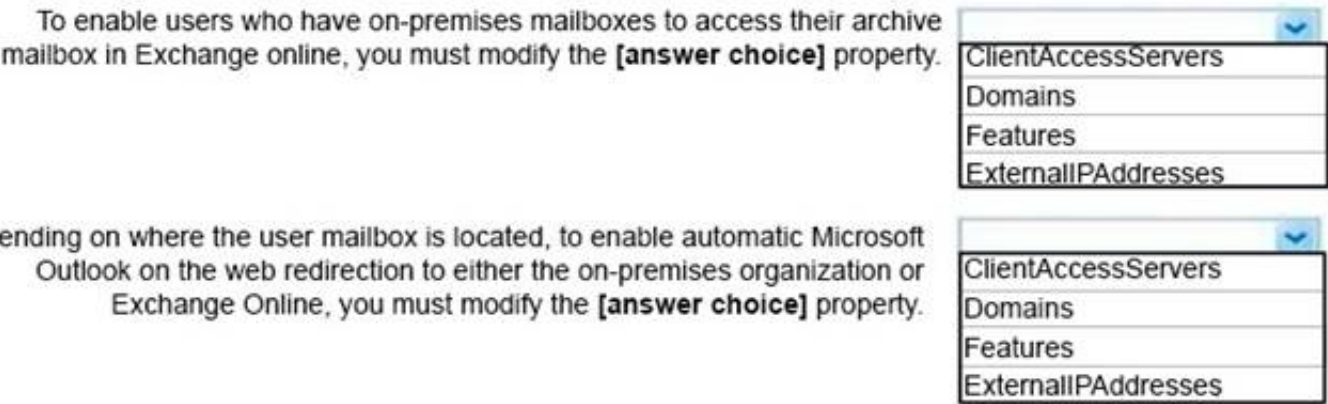

NEW QUESTION 111

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Server 2019 hybrid deployment. You run the Get-HybridConfiguration cmdlet and receive the output shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/powershell/module/exchange/federation-and-hybrid/set-hybridconfiguration?view=exchange-ps>

NEW QUESTION 112

DRAG DROP - (Topic 5)

Your network contains an Active Directory domain and an Azure Active Directory (Azure AD) tenant in a hybrid deployment.

You implement a Microsoft Exchange Online tenant.

You plan to deploy a new on-premises app named App1 to a Windows server. The solution must meet the following requirements:

? Use an Active Directory user account named App1service as a service account.

? Be able to receive email requests by using an email address of app1@contoso.com.

? Use App1service to sign in to the mailbox of App1 to view the requests.

In the domain, you create App1service.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

#### Actions

Create a shared mailbox for App1service

In Azure AD, register an enterprise application for App1

Sync the App1service account to Azure AD

Create a user mailbox for App1service

Assign a license to App1service

Assign app1@contoso.com as an email address to App1service

#### Answer Area

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

#### Actions

Create a shared mailbox for App1service

In Azure AD, register an enterprise application for App1

Sync the App1service account to Azure AD

Create a user mailbox for App1service

Assign a license to App1service

Assign app1@contoso.com as an email address to App1service

#### Answer Area

Sync the App1service account to Azure AD

Assign a license to App1service

Assign app1@contoso.com as an email address to App1service

#### NEW QUESTION 115

DRAG DROP - (Topic 5)

You have a Microsoft Exchange Online tenant that does NOT contain any public folders.

You need to create a new public folder. The solution must ensure that users can create a post by sending an email to the folder.

Which three actions should you perform in sequence? To answer, move the appropriate cmdlets from the list of cmdlets to the answer area and arrange them in the correct order.

#### Actions

Assign an Exchange Online license.

Create a public folder mailbox.

Create a public folder.

Create a Microsoft 365 group.

Create a shared mailbox.

Mail-enable the public folder.

Set an email address on a public folder.

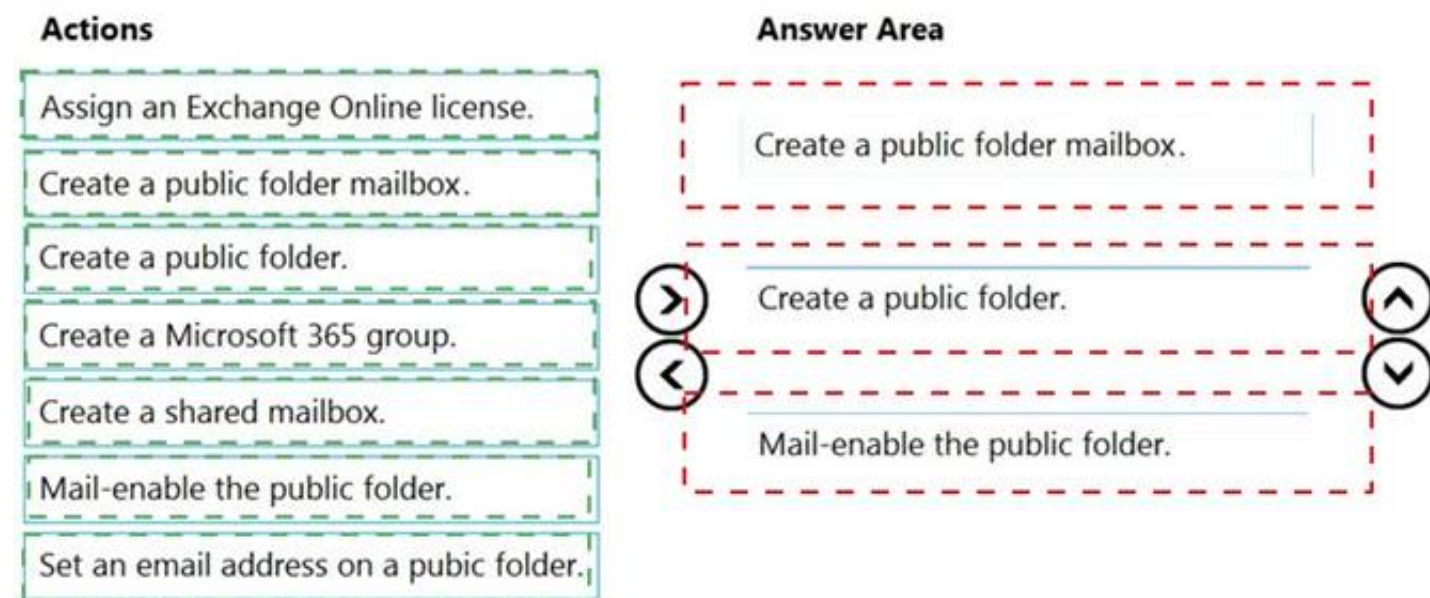

#### Answer Area

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

#### NEW QUESTION 116

- (Topic 5)

You have a Microsoft Exchange Online tenant that contains a user named User1. User1 reports that an email message marked as high priority was undelivered. You need to trace the email messages sent by User1 during the last 15 days. The solution must include the Delivery Priority property of the messages. Which report should you use?

- A. Enhanced summary
- B. Summary
- C. Extended
- D. Outbound messages

**Answer:** A

#### NEW QUESTION 121

- (Topic 5)

You have a Microsoft Exchange Online tenant that contains a mailbox named Mailbox1.

You need to ensure that Mailbox1 rejects all external email messages and responds with the following non-delivery report (NDR): "Mailbox1 is an automated system mailbox and does not accept incoming mail.

What should you do?

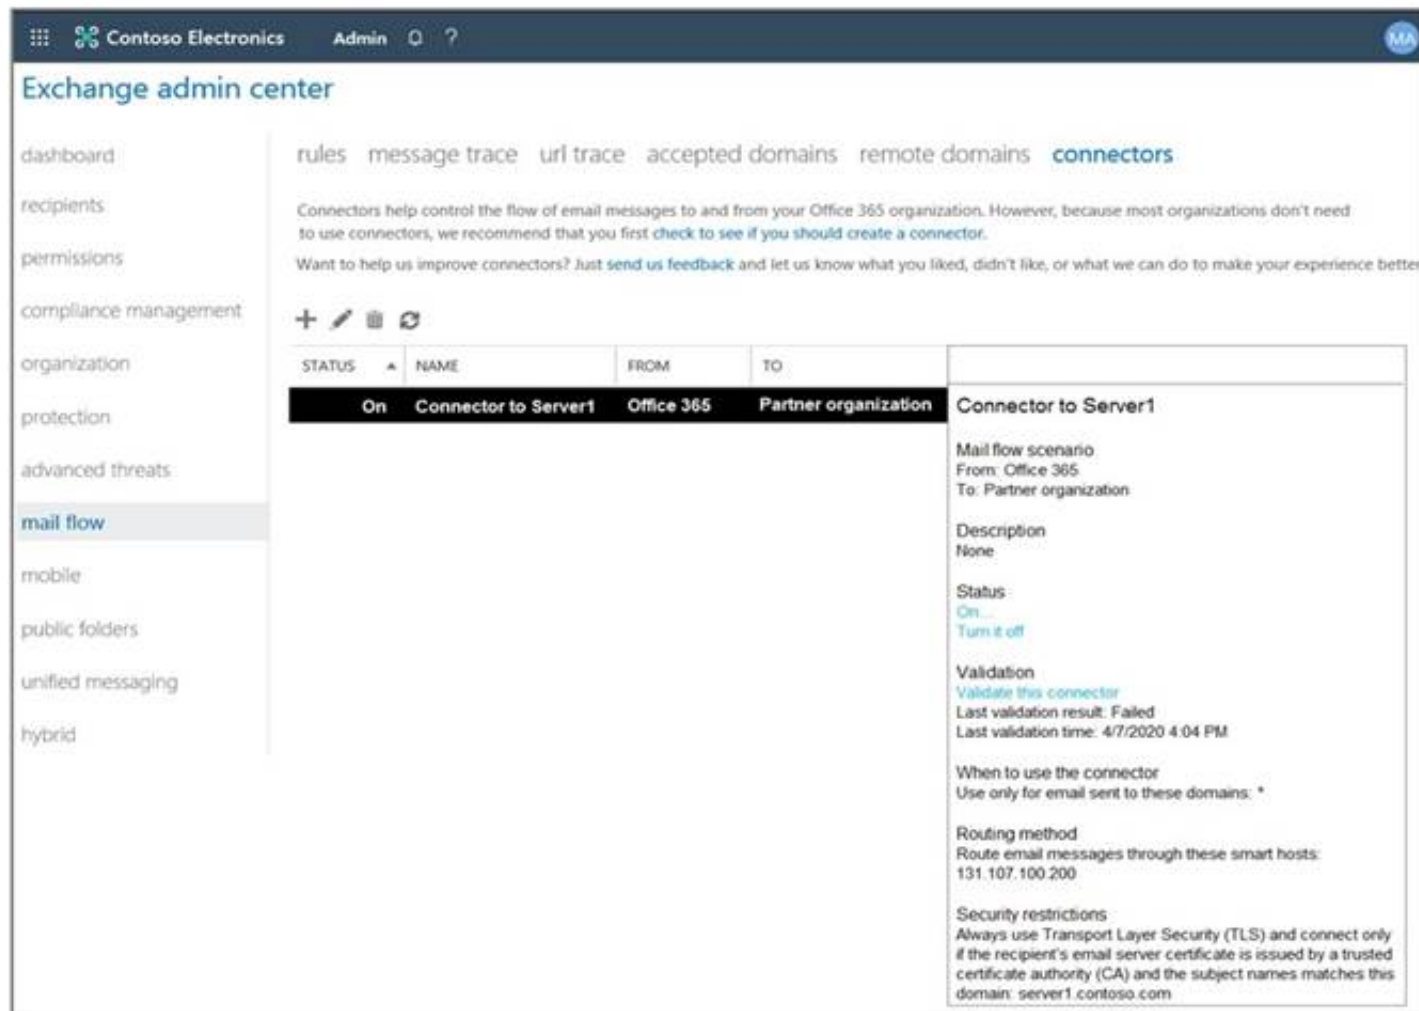

- A. Set a message delivery restriction for Mailbox1.
- B. From Mailbox1, create an inbox rule.
- C. Create a mail flow rule.
- D. Modify the permissions for Mailbox1.

**Answer:** C

#### NEW QUESTION 125

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant as shown in the following exhibit.

All email recipients have an email address that uses an SMTP suffix of @contoso.com.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

131.107.100.200 will route

- all email messages from Exchange Online to any contoso.com recipients.
- all email from Exchange Online to any external recipients
- all email messages from Exchange Online to recipients hosted on Server1 only

The Exchange Online tenant

- cannot receive email messages from the internet
- can receive email messages from server1.contoso.com only
- can receive email messages from any email host on the internet

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Box 1:

Under “When to use this connector”, it says “Use only for email sent to these domains: \*” The asterisk means all domains so any external email will use the connector.

Box 2:

With Exchange Online, you don’t need to configure a receive connector as you would with on-premises Exchange. Therefore, the server by default will be able to receive emails from any email host.

**NEW QUESTION 129**

- (Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Exchange Online tenant that contains 2,000 mailboxes.

A partner company named Fabrikam, Inc. uses a third-party messaging solution. The outbound SMTP server for Fabrikam uses an IP address of 131.107.2.22.

You discover that several email messages from the fabrikam.com domain are erroneously marked as spam.

You need to ensure that all the email messages sent from the fabrikam.com domain are delivered successfully to the user mailboxes of your company.

Solution: You create a spam filter policy. Does this meet the goal?

- A. Yes
- B. No

**Answer: A**

**Explanation:**

Add Fabrikam.com to the ‘Domain allow list’ in a spam filter policy.

**NEW QUESTION 134**

- (Topic 5)

You have a Microsoft Exchange Server 2019 organization.

A compliance manager plans to create retention policies for the mailboxes of executive users. The policies will move specific emails to an archive mailbox. You need to create an archive mailbox for each executive user. What should you do?

- A. Run the New-Mailbox cmdlet-
- B. Enable mailbox journaling.
- C. Enable In-Place Archiving for each mailbox.
- D. Run the set-Mailbox cmdlet.

**Answer: C**

**Explanation:**

<https://docs.microsoft.com/en-us/exchange/policy-and-compliance/in-place-archiving/in-place-archiving?view=exchserver-2019>

**NEW QUESTION 137**

- (Topic 5)

You have a Microsoft Exchange Online tenant that contains 1,000 users.

A user named User1 receives a non-delivery report (NDR) when attempting to send an email message to an internal group named sales@contoso.com. The NDR contains the following text: "5.7.1 Delivery not authorized."

You need to ensure that User1 can send email to sales@contoso.com successfully. Solution: You instruct User1 to reduce the size of the email message. Does this meet the goal?

- A. No
- B. Yes

**Answer: B**

**NEW QUESTION 141**

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant that uses Microsoft Defender for Office 365.

Users report that a domain named contoso.com sent them phishing email messages that contain URLs.

You need to ensure that the messages are identified as phishing. The solution must ensure that contoso.com and all its subdomains and paths are matched.

How should you complete the PowerShell command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Answer Area

**NEW QUESTION 144**

- (Topic 5)

You have a hybrid deployment between a Microsoft Exchange Online tenant and an on-premises Exchange Server 2019 organization.

The tenant uses an email domain named @contoso.com.

You recently purchased an email domain named fabrikam.com.

You need to ensure that all the users in the tenant can receive email messages by using the @fabrikam.com email domain. The solution must ensure that the users can continue to receive email by using the @contoso.com email domain.

Which three actions should you perform? Each correct answer presents part of the solution. NOTE; Each correct selection is worth one point.

- A. From Azure AD Connect add a domain for fabrikam.com.
- B. From the on-premises Exchange admin center, add an accepted domain for fabrikam.com.
- C. From the Exchange Management Shell, create a script that runs the
- D. From the Microsoft 365 admin center, verify the fabrikam.com email domain
- E. From the on-premises Exchange admin center, modify the email address policy
- F. From the Microsoft 365 admin center, add the fabrikam.com email domain.

**Answer: BDE**

**NEW QUESTION 147**

- (Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Online tenant that contains the following email domains:

- ? Adatum.com
- ? Contoso.com
- ? Fabrikam.com

When external recipients receive email messages from the users in the tenant, all the messages are delivered by using the @contoso.com email domain. You need to ensure that the users send email by using the @fabrikam.com email domain. Solution: From the Exchange Management Shell, you run Set-Mailbox cmdlet.

Does this meet the goal?

A. Yes

B. No

Answer: B

Explanation:

Set-Mailbox -PrimarySmtpAddress <SmtpAddress>

Reference:

<https://docs.microsoft.com/en-us/powershell/module/exchange/set-mailbox?view=exchange-ps>

NEW QUESTION 148

HOTSPOT - (Topic 5)

You have a Microsoft 365 ES subscription that contains a Microsoft Exchange Online tenant. You plan to use a mailbox named Mailbox1 to store user-reported malicious email messages. You need to configure Microsoft Defender for Office 365 to meet the following requirements:

- + Configure Mailbox1 as a SecOps mailbox.
- + Create a policy that has zero-hour auto purge (ZAP) for infected email disabled for Mailbox1.

Which two settings should you configure? To answer, select the appropriate settings in the answer area.

Policies

|   |                  |
|---|------------------|
|  | Anti-phishing    |
|  | Anti-spam        |
|  | Anti-malware     |
|  | Safe Attachments |
|  | Safe Links       |

Rules

|   |                          |
|---|--------------------------|
|  | Tenant Allow/Block Lists |
|  | DKIM                     |
|  | Advanced delivery        |
|  | Enhanced filtering       |
|  | Quarantine policies      |

Others

|   |                                |
|---|--------------------------------|
|  | User reported message settings |
|  | Evaluation mode                |

A. Mastered

B. Not Mastered

Answer: A

Explanation:

## Policies

## Rules

## Others

### NEW QUESTION 152

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant that contains three Azure Active Directory (Azure AD) security groups named Administrators, Managers, and Marketing. The tenant contains the users shown in the following table.

| Name  | Group membership |
|-------|------------------|
| User1 | Managers         |
| User2 | Marketing        |
| User3 | Administrators   |
| User4 | None             |

The tenant contains the resources shown in the following table.

| Name            | Type      |
|-----------------|-----------|
| ConferenceRoom1 | Room      |
| ConferenceRoom2 | Room      |
| Projector1      | Equipment |

ConferenceRoom1 has the following policy.

```
PS C:\> get-calendarprocessing "ConferenceRoom1"|fl Allb*,allr*,bookinp*,req*,res*
AllBookInPolicy      : False
AllRequestOutOfPolicy : False
AllRequestInPolicy   : False
BookInPolicy          : (/o=ExchangeLabs/ou=Exchange Administrative Group
                        (FYDIBOHF23SPDLT)/cn=Recipients/cn=7fddffd211974ea68d22dae2c891db02-Managers)
RequestOutOfPolicy    : {}
RequestInPolicy       : (/o=ExchangeLabs/ou=Exchange Administrative Group
                        (FYDIBOHF23SPDLT)/cn=Recipients/cn=03a5a93a90ad4296907830a3ec1a8f94-User2)
ResourceDelegates     : {User4}
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

| Statements  | Yes                   | No                    |
|---|-----------------------|-----------------------|
| User1 can book ConferenceRoom1 automatically without the approval of User4. | <input type="radio"/> | <input type="radio"/> |
| User2 can book ConferenceRoom1 automatically without the approval of User4. | <input type="radio"/> | <input type="radio"/> |
| User4 can book ConferenceRoom1 pending approval from User3.                 | <input type="radio"/> | <input type="radio"/> |

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Box 1: Yes  
The BookInPolicy allows the Managers group. User1 is in the Managers group so User 1 can book ConferenceRoom1 automatically without the approval of User4.  
Box 2: No  
The BookInPolicy allows the Managers group. User2 is not in the Managers group so User 2 cannot book ConferenceRoom1 automatically without the approval of User4.  
Box 3: No  
The RequestInPolicy does not include User4. Therefore, User3 is not allowed to request to book the meeting room either with or without approval.

NEW QUESTION 157

- (Topic 5)  
You have a Microsoft Exchange Server 2019 organization. You purchase a Microsoft Office 365 E5 subscription.  
You plan to implement Exchange Modern Hybrid and free/busy sharing.  
Which two components should you configure for the planned implementations? Each correct answer presents part of the solution.  
NOTE: Each correct selection is worth one point.

- A. a sharing policy  
B. a federation trust  
C. a relying party trust  
D. Active Directory Lightweight Directory Services (AD LDS)  
E. an organization relationship

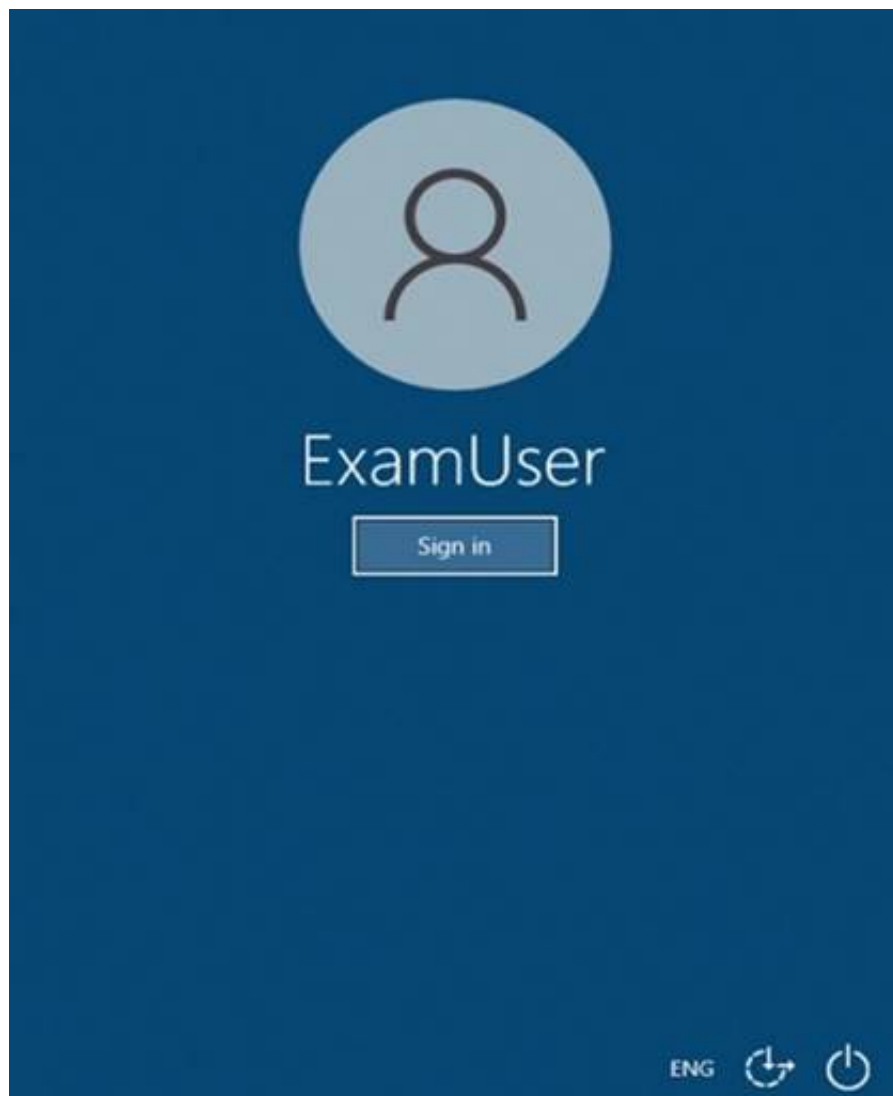

Answer: BE

Explanation:

References:  
<https://docs.microsoft.com/en-us/exchange/shared-free-busy>

NEW QUESTION 160

SIMULATION - (Topic 5)  
SIMULATION  
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.  
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.  
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.  
Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.  
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@abc.com

Microsoft 365 Password: xxxxxx

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only.

Lab Instance: XXXXXX

You need to create a public folder named Finance. The solution must ensure that only the members of a group named Finance Team can send email messages to the Finance folder.

To complete this task, sign in to the Microsoft 365 admin center.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

? In the EAC, go to Public folders > Public folder mailboxes, and then click Add +.

? In the New public folder mailbox page that opens, enter the following information:

- Name: Enter the name for the public folder mailbox.
- Organizational unit: Click Browse to select the location in Active Directory where the mailbox object is created.
- Mailbox database: Click Browse to select the mailbox database where the mailbox is created.

When you're finished, click Save.

Use the EAC to create a public folder

When using the EAC to create a public folder, you'll only be able to set the name and the path of the public folder. To configure additional settings, you'll need to edit the public folder after it's created.

? Navigate to Public folders > Public folders.

? If you want to create this public folder as a child of an existing public folder, click the existing public folder in the list view. If you want to create a top-level public folder, skip this step.

? Click Add +.

? In Public Folder, type the name of the public folder.

? In the Path box, verify the path to the public folder. If this isn't the desired path, click Cancel and follow Step 2 of this procedure.

? Click Save.

? Navigate back to Public folders > Public folders.

? In the list view, select the public folder that you want to mail-enable or mail-disable.

? In the details pane, under Mail settings, click Enable or Disable.

? A warning box displays asking if you're sure you want to enable or disable email for the public folder. Click Yes to continue.

You can then run the Set-MailPublicFolder PowerShell cmdlet, and include the AcceptMessagesOnlyFromDLMembers parameter to specify who is allowed to send messages to this recipient.

**NEW QUESTION 164**

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant named contoso.com that contains a resource mailbox named Room1. You need to configure Room1 to send the following automatic response message: "Thanks for the meeting invite." How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

**NEW QUESTION 165**

- (Topic 5)

You have a Microsoft Exchange Online subscription for an email domain named contoso.com.

A partner company has an Exchange Online subscription for an email domain named fabrikam.com.

You need to prevent out-of-office messages sent by users in contoso.com from being sent to users in fabrikam.com.

What is the best way to achieve the goal from the Exchange admin center? More than one answer choice may achieve the goal. (Choose the best answer.)

- A. Create a connector
- B. Create a mail flow rule
- C. Create a remote domain
- D. Create an accepted domain

**Answer:** C

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/exchange/mail-flow-best-practices/remote-domains/remote-domains>

**NEW QUESTION 166**

- (Topic 5)

Your company has a Microsoft Exchange Server 2019 organization.

You are auditing the Litigation Hold on the mailboxes of the company's research and development department.

You discover that the mailbox of a user named User1 has a Litigation Hold enabled.

You need to discover who placed the Litigation Hold on the mailbox of User1, and when the Litigation Hold was enabled.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From the Exchange admin center, run an In-place eDiscovery and Hold report.
- B. From PowerShell, run the Get-Mailbox cmdlet.
- C. From the Exchange admin center, run a per-mailbox Litigation Hold report.
- D. run a per-mailbox Litigation Hold report.
- E. From PowerShell, run the Get-MailboxStatistics cmdlet.

**Answer:** BC

**Explanation:**

<https://docs.microsoft.com/en-us/powershell/module/exchange/get-mailboxstatistics?view=exchange-ps>

**NEW QUESTION 171**

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Server 2019 organization that contains the Mailbox servers shown in the following table.

| Name | Member of | Database |
|------|-----------|----------|
| EX1  | Site1     | Mail1    |
| EX2  | Site2     | Mail2    |
| EX3  | Site3     | Mail3    |

The organization contains the mailboxes shown in the following table.

| Name  | Database |
|-------|----------|
| User1 | Mail1    |
| User2 | Mail2    |
| User3 | Mail3    |

You create the public folder mailboxes shown in the following table.

| Mailbox | Database | Hierarchy |
|---------|----------|-----------|
| PF1     | Mail1    | Primary   |
| PF2     | Mail2    | Secondary |
| PF3     | Mail3    | Secondary |

You set the DefaultPublicFolderMailbox property of each user mailbox to the public folder mailbox closest to the user. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statements  | Yes                   | No                    |
|---|-----------------------|-----------------------|
| If User3 creates a public folder, the folder hierarchy will be updated first on EX3.  | <input type="radio"/> | <input type="radio"/> |
| When User2 views the folder hierarchy, the user will use EX2.   | <input type="radio"/> | <input type="radio"/> |
| If User3 accesses a public folder from PF1, and then EX1 goes offline, User3 can still access the content in the public folder. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

| Statements  | Yes                              | No                               |
|---|----------------------------------|----------------------------------|
| If User3 creates a public folder, the folder hierarchy will be updated first on EX3.  | <input type="radio"/>            | <input checked="" type="radio"/> |
| When User2 views the folder hierarchy, the user will use EX2.   | <input checked="" type="radio"/> | <input type="radio"/>            |
| If User3 accesses a public folder from PF1, and then EX1 goes offline, User3 can still access the content in the public folder. | <input checked="" type="radio"/> | <input type="radio"/>            |

#### NEW QUESTION 172

HOTSPOT - (Topic 5)

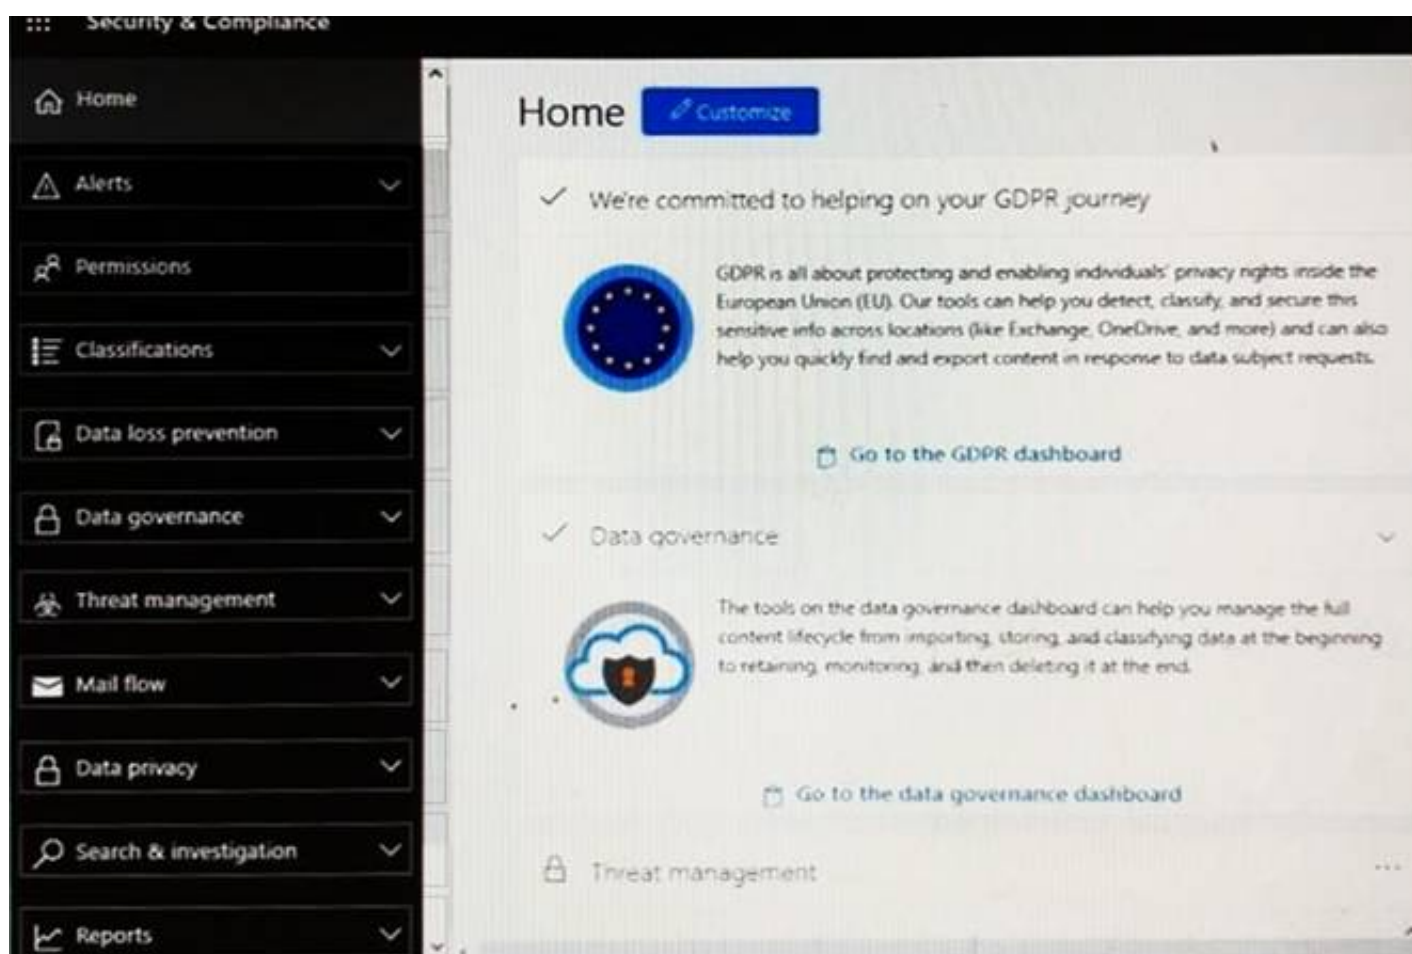

You manage a Microsoft Exchange Online subscription. You use Advanced Threat Protection (ATP).

A partner company sends daily invoices to your company. The invoices are always named AdatumInvoice.xlsx.

Some users report that sometimes they cannot find the invoices in their Inbox folder. You need to identify whether the invoices are identified as malicious by Microsoft 365.

Which two blades should you use? To answer, select the appropriate blades in the answer area.

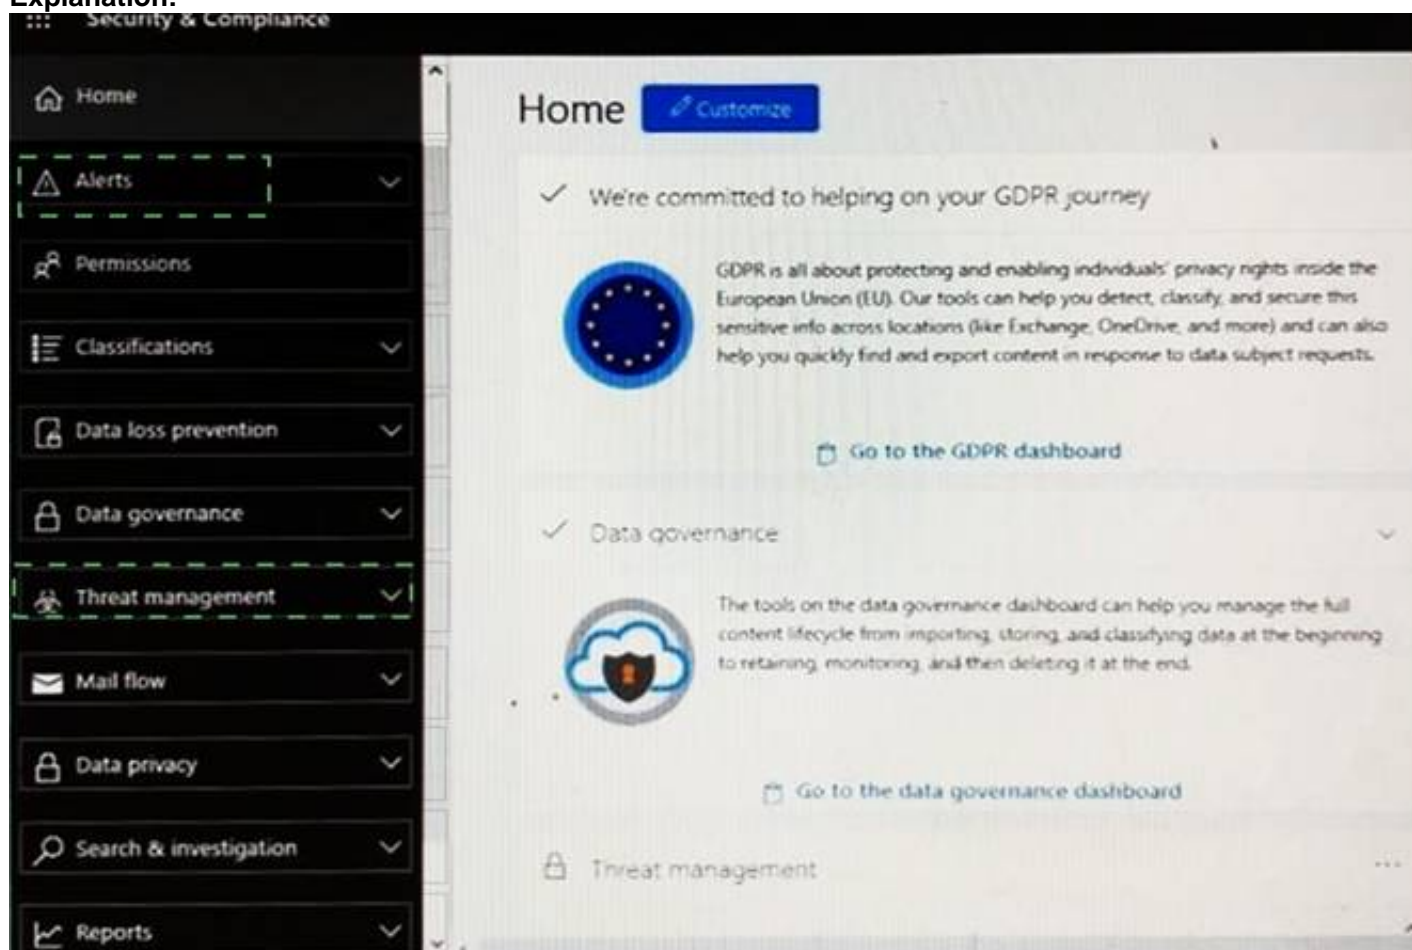

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

#### NEW QUESTION 176

- (Topic 5)

Note: This question is part of a series of questions that present the same scenario.

Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Server 2019 organization that contains 200 mailboxes. You need to add a second email address to each mailbox. The address must have a

syntax that uses the first letter of each user's last name, followed by the user's first name, and then @fabrikam.com.

Solution: You convert all the mailboxes to shared mailboxes, and then you run the Set-Mailbox cmdlet and specify the -EmailAddressPolicyEnabled \$true parameter.

Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/exchange/email-addresses-and-address-books/email-address-policies/email-address-policies?view=exchserver-2019>**NEW QUESTION 181**

- (Topic 5)

You have a Microsoft Exchange Server 2019 hybrid deployment that contains the public folders shown in the following table.

| Name | Structure    | Mail-enabled |
|------|--------------|--------------|
| PF1  | Hierarchical | Yes          |
| PF2  | Flat         | No           |
| PF3  | Flat         | Yes          |

You plan to migrate the public folders to Exchange Online to improve the collaboration options available to users. Which public folders can be migrated to Office 365 groups without losing the folders' existing functionality?

- A. PF2 and PF3 only
- B. PF2 only
- C. PF1 and PF2 only
- D. PF1 only
- E. PF3 only

**Answer:** A**Explanation:**

Not PF1. Office 365 groups are 'flat' so you would lose the folder hierarchy. Reference:

<https://docs.microsoft.com/en-us/exchange/collaboration/public-folders/migrate-to-microsoft-365-groups?view=exchserver-2019>**NEW QUESTION 184**

- (Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Online tenant that uses an email domain named contoso.com.

You need to prevent all users from performing the following tasks:

? Sending out-of-office replies to an email domain named fabrikam.com.

? Sending automatic replies to an email domain named adatum.com.

The solution must ensure that all the users can send out-of-office replies and automatic replies to other email domains on the internet.

Solution: You modify the default remote domain.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/exchange/mail-flow-best-practices/remote-domains/remote-domains>**NEW QUESTION 186**

- (Topic 5)

You have a Microsoft Exchange Online tenant that contains a retention policy named Policy1 and a user named User1.

Policy1 is assigned to all users and contains the retention tags shown in the following table.

| Name | Type            | Retention period | Retention action   |
|------|-----------------|------------------|--------------------|
| Tag1 | Default mailbox | 1826 days        | Permanently Delete |
| Tag2 | Default folder  | 365 days         | Move to Archive    |
| Tag3 | Personal        | 730 days         | Move to Archive    |

Tag3 is applied to an email message in the inbox of User1. You remove Tag3 from Policy1. What will occur to the message?

- A. The existing retention tag will be retained.
- B. The existing retention tag will be removed.
- C. The default mailbox retention tag will apply.
- D. The default folder retention tag will apply.

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/exchange/security-and-compliance/messaging-records-management/retention-tags-and-policies>

**NEW QUESTION 190**

HOTSPOT - (Topic 5)

You are migrating mailboxes from a Microsoft Exchange Server 2016 organization to Exchange Online. The mailbox migrations are configured to suspend, and you plan to perform a coordinated cutover.

Which PowerShell command should you run to complete all the suspended mailbox migrations? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

|   |                       |   |
|---|-----------------------|---|
| <div>▼</div> <div>Get-ADUser</div> <div>Get-Mailbox</div> <div>Get-MigrationUser</div> <div>Get-MoveRequest</div> | -MoveStatus Suspended | <div>▼</div> <div>New-MoveRequest</div> <div>Resume-MoveRequest</div> <div>Set-MoveRequest</div> <div>Start-MigrationUser</div> |
|---|-----------------------|---|

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Box 1: Get-MoveRequest

The Get-MoveRequest cmdlet gets the status of an ongoing asynchronous mailbox move that was initiated by using the New-MoveRequest cmdlet.

Box 2: Resume-MoveRequest

The Resume-MoveRequest cmdlet is used to resume a move request that has been suspended or has failed.

**NEW QUESTION 195**

- (Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Online tenant that uses an email domain named contoso.com.

You need to prevent all users from performing the following tasks:

? Sending out-of-office replies to an email domain named fabrikam.com.

? Sending automatic replies to an email domain named adatum.com.

The solution must ensure that all the users can send out-of-office replies and automatic replies to other email domains on the internet.

Solution: You create two new remote domains. Does this meet the goal?

- A. Yes
- B. No

**Answer: A**

**Explanation:**

Reference:

**NEW QUESTION 204**

- (Topic 5)

You have a Microsoft Exchange Online subscription.

You need to prevent all Android devices from using Exchange ActiveSync to sync email.

Other devices must

be allowed to sync email by using Exchange ActiveSync. What should you use?

- A. data loss prevention (DLP) policies
- B. Exchange ActiveSync access settings
- C. device access rules
- D. mobile device mailbox policies

**Answer:** C

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/powershell/module/exchange/new-activesyncdeviceaccessrule?view=exchange-ps>

**NEW QUESTION 207**

- (Topic 5)

You have a Microsoft Exchange Server 2019 organization.

You need to ensure that a user named User1 can prevent mailbox content from being deleted if the content contains the words Fabrikam and Confidential.

What should you do?

- A. Add User1 to the Discovery Management management role group.
- B. Assign the Legal Hold and Mailbox Import Export management roles to User1.
- C. Add User1 to the Records Management management role group.
- D. Add User1 to the Compliance Management management role group.

**Answer:** A

**Explanation:**

Alternatively, assign the Mailbox Search and Legal Hold management roles to User1 Reference:

<https://docs.microsoft.com/en-us/exchange/policy-and-compliance/holds/holds?view=exchserver-2019>

**NEW QUESTION 212**

- (Topic 5)

You have a Microsoft Exchange Online tenant that contains a user named User1.

You need to ensure that User1 can perform the following tasks from the Microsoft Purview compliance portal:

- Create, edit, delete, and control access to Core eDiscovery cases.
- Use Content search to bulk delete email messages.

The solution must follow the principle of least privilege. To which role group should you add User1?

- A. Compliance Administrator
- B. Compliance Data Administrator
- C. Organization Management
- D. eDiscovery Manager

**Answer:** D

**NEW QUESTION 214**

HOTSPOT - (Topic 5)

Your company purchases new mobile devices for each user in its sales department and marketing department. The new devices only support Exchange ActiveSync.

You need to configure mobile device access to meet the following requirements: Apply a specific password policy to all the sales department users.

Prevent all the marketing department users from using an Exchange ActiveSync-based client to access their mailbox.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

For the sales department users:

Create a mobile device access rule

Create and assign a mobile device policy

Create a client access rule scoped to the users

For the marketing department users:

Run the Set-Mailbox cmdlet

Run the Set-CasMailbox cmdlet

Run the Set-ActiveSyncDeviceAccessRule cmdlet

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

For the sales department users:

Create a mobile device access rule

Create and assign a mobile device policy

Create a client access rule scoped to the users

For the marketing department users:

Run the Set-Mailbox cmdlet

Run the Set-CasMailbox cmdlet

Run the Set-ActiveSyncDeviceAccessRule cmdlet

NEW QUESTION 217

DRAG DROP - (Topic 5)

You have a Microsoft Exchange Online tenant that contains two groups named Group1 and Group2. You need to ensure that the members of Group1 can perform In-Place eDiscovery searches only for the members of Group2. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Create an administrative unit that contains Group1.

Configure the write scope and assign Group2 to the new role group.

Copy the Discovery Management role group.

Create a custom management scope that contains the membership of Group2.

Copy the Recipient Management role group.

Configure the write scope and assign Group1 to the new role group.

Answer Area

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Actions

Create an administrative unit that contains Group1.

Configure the write scope and assign Group2 to the new role group.

Copy the Discovery Management role group.

Create a custom management scope that contains the membership of Group2.

Copy the Recipient Management role group.

Configure the write scope and assign Group1 to the new role group.

Answer Area

Create a custom management scope that contains the membership of Group2.

Copy the Recipient Management role group.

Configure the write scope and assign Group1 to the new role group.

NEW QUESTION 221

- (Topic 5)

You have a Microsoft Exchange Online tenant that contains a resource mailbox named ConferenceRoom1. ConferenceRoom1 is configured as shown in the following exhibit.

ConferenceRoom1

general  
▶ **booking delegates**  
booking options  
contact information  
email address  
MailTip  
mailbox delegation

Booking requests:  
☒ Use customized setting to accept or decline booking requests  
☐ Accept or decline booking requests automatically  
☐ Select delegates who can accept or decline booking requests

Delegates:  
+ -

|       |
|-------|
| User4 |
|       |

Save Cancel

You need to review the customized setting for booking requests. Which cmdlet should you run?

- A. Get-ResourceConfig
- B. Get-Mailbox
- C. Get-MailboxCalendarFolder
- D. Get-CalendarProcessing

**Answer:** D

**Explanation:**

Reference:

<https://itpro.outsidesys.com/2017/11/06/exchange-configuring-the-resource-booking-attendant-with-powershell/>

<https://docs.microsoft.com/en-us/powershell/module/exchange/get-calendarprocessing?view=exchange-ps>

**NEW QUESTION 222**

- (Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Online tenant that contains 1,000 users.

A user named User1 receives a non-delivery report (NDR) when attempting to send an email message to an internal group named sales@contoso.com. The NDR contains the following text: "5.7.1 Delivery not authorized."

You need to ensure that User1 can send email to sales@contoso.com successfully. Solution: You modify the properties of User1.

- A. Yes
- B. No

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/exchange/mail-flow-best-practices/non-delivery-reports-in-exchange-online/fix-error-code-550-5-7-1-in-exchange-online>

**NEW QUESTION 224**

- (Topic 5)

You have a Microsoft Exchange Online tenant that has Office 365 Advanced Threat Protection (ATP) enabled.

The tenant contains a user named Ben Smith who has a UPN of ben.smith@fabrikam.com. Ben Smith is protected by using an ATP anti-phishing policy.

Ben Smith reports that emails sent from his personal account of ben.smith@relecloud.com are not delivered to his work email account.

You need to ensure that personal emails are delivered to the ben.smith@fabrikam.com What should you do?

- A. Create a transport rule to assign the MS-Exchange-Organization-PhishThresholdLevel header a value of 2 for the message received from ben.smith@relecloud.com
- B. Add ben.smith@fabrikam.com as a trusted sender to the ATP anti-phishing policy.
- C. Add ben.smith@relecloud.com as a trusted sender to the ATP anti phishing.
- D. Add relecloud.com to the ATP anti-phishing list of misted domains.

**Answer:** C

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/configure-atp-anti-phishing-policies?view=o365-worldwide>

**NEW QUESTION 228**

- (Topic 5)

You have a Microsoft Exchange Server 2019 organization that contains 5,000 mailboxes.

You need to migrate 1,000 users to Exchange Online. The migrated users must support Hybrid Modern Authentication (HMA).

Which migration method should you use?

- A. cutover migration

- B. full hybrid migration
- C. minimal hybrid migration
- D. express hybrid migration

Answer: B

NEW QUESTION 229

- (Topic 5)

You have a Microsoft Exchange Server 2019 organization.

You plan to implement a hybrid deployment between Exchange Online and Exchange Server. The deployment must meet the following requirements:

- ? Support Outlook for iOS and Android.
- ? Support 500 on-premises mailboxes.
- ? Support Modern Authentication.

Which hybrid configuration topology should you recommend?

- A. Classic Full
- B. Modern Minimal
- C. Modern Full
- D. Classic Minimal

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/hybrid-configuration-wizard-options> <https://docs.microsoft.com/en-us/exchange/hybrid-deployment/hybrid-agent>

NEW QUESTION 233

DRAG DROP - (Topic 5)

You have a Microsoft Exchange Online tenant that contains a group named Marketing. You need to ensure that the Marketing group meets the following requirements:

- Members of the Marketing group must be prevented from creating their own distribution groups.
- Members of the Marketing group must be prevented from modifying their contact information.

The solution must NOT affect any other users in the tenant.

Actions

From the Exchange admin center, create a new role assignment policy.

Assign the policy to the Marketing group members.

Assign the policy directly to the Marketing group.

Disable features for the policy.

From the Exchange admin center, create a new Outlook Web App policy.

Remove permissions from the policy.

Edit the Default Role Assignment Policy.

#### NEW QUESTION 238

- (Topic 5)

Your company has a Microsoft Exchange Server 2019 organization.

The company has 10,000 mailboxes. Each department at the company has 1,000 mailboxes.

You need to ensure that when users query the global address list (GAL), they can view only the list of the users in their department.

What should you create?

- A. One GAL, 10 offline address books (OABs), 10 address lists, 10 address policies (ABPs), and one email address policy  
B. 10 GALs, 10 offline address books (OABs), 10 address lists, 10 room lists, and 10 address book policies (ABPs)  
C. One GAL, 10 offline address books (OABs), 10 address lists, 10 room lists, and one address book policy (ABP)  
D. 10 GALs, 10 offline address books (OABs), 10 address lists, and 10 email address policies

**Answer:** B

**Explanation:**

References:

<https://docs.microsoft.com/en-us/exchange/address-books/address-lists/create-global-address-list>

#### NEW QUESTION 242

- (Topic 5)

Your company has a Microsoft Exchange Online tenant named contoso.com.

The company acquires a company named ADatum Corporation that uses a third-party IMAP email service named adatum.com.

You plan to migrate the mailbox content of adatum.com to contoso.com. You need to connect Microsoft 365 to the IMAP email service.

What should you create first?

- A. a new organization relationship  
B. a new migration endpoint  
C. a new remote domain  
D. a new staged migration batch

**Answer:** B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/exchange/mailbox-migration/migrating-imap-mailboxes/migrating-imap-mailboxes>

#### NEW QUESTION 245

HOTSPOT - (Topic 5)

have a Microsoft Exchange Online tenant. All mailboxes use a suffix of

All email is routed to and from the tenant through a third-party email filtering service. You have the following network-connected

? Public IP are used via NAT when connecting to the internet.

? SMTP disabled

You to ensure that the scanners can send email to external recipients via Exchange. solution must NOT require that credentials be from the scanners

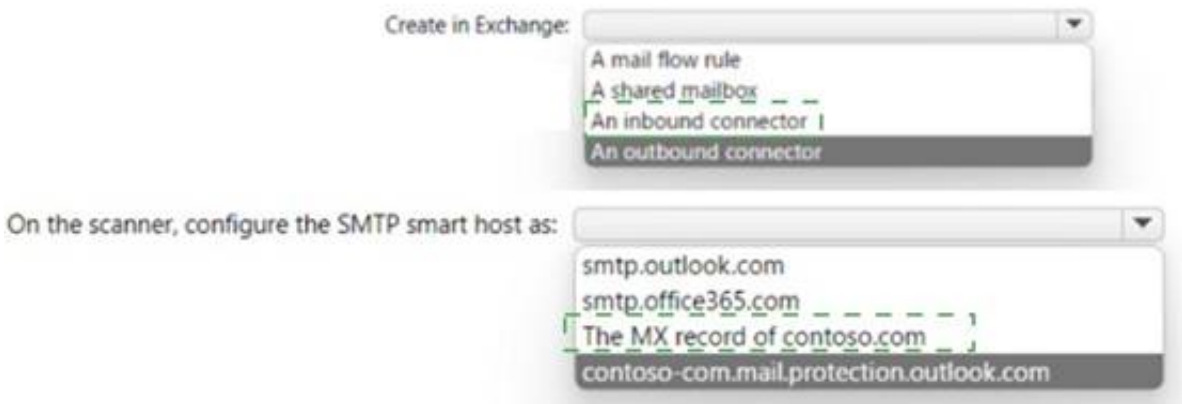

A. Mastered

B. Not Mastered

**Answer:** A

**Explanation:**

**NEW QUESTION 250**

- (Topic 5)

Your network contains an Active Directory domain named corp.contoso.com. The domain contains client computers that have Microsoft Office 36S Apps installed. You have a hybrid deployment that contains a Microsoft Exchange Online tenant and an on-premises Exchange Server 2019 server named Server1. All recipients use an email address suffix of Contoso.com. You migrate all the Exchange Server recipients to Exchange Online, and then decommission Server1. Users connected to the internal network report that they receive an Autodiscover error when they open Microsoft Outlook. You need to ensure that all users can connect successfully to their mailbox by using Outlook. Which two actions should you perform? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. From the corp.contoso.com DNS zone, modify the Autodiscover host (A) record.
- B. Add an accepted domain.
- C. From the contoso.com DNS zone, modify the Autodiscover alias (CNAME) record
- D. Modify the name of the TLS certificate.
- E. From the domain, modify the Autodiscover service connection point (SCP).

**Answer:** CE

**NEW QUESTION 251**

- (Topic 5)

You have a hybrid deployment that contains a Microsoft exchange Online tenant and anon premises Exchange Server 2019 server named Server1. Alt users use an email address suffix of @contoso.com. On Server1, you create a new mailbox that uses an email address of user1@contoso.com Users hosted in Exchange Online report that they receive a non-delivery report (NDR) When they attempt to send email messages to user1@contoso.com. The NDR contains the following text: "User1 wasn't found at contoso.com." You verify that the Exchange Online users can send email successfully to the other mailboxes hosted on Server1. Users hosted on Server1 can send email to user1@contoso.com successfully. You need to identify what causes the email delivery to fail. What should you use?

- A. the Azure Active Directory admin center
- B. the Exchange admin center
- C. Azure AD Connect Health
- D. the on-premises Exchange admin center

**Answer:** C

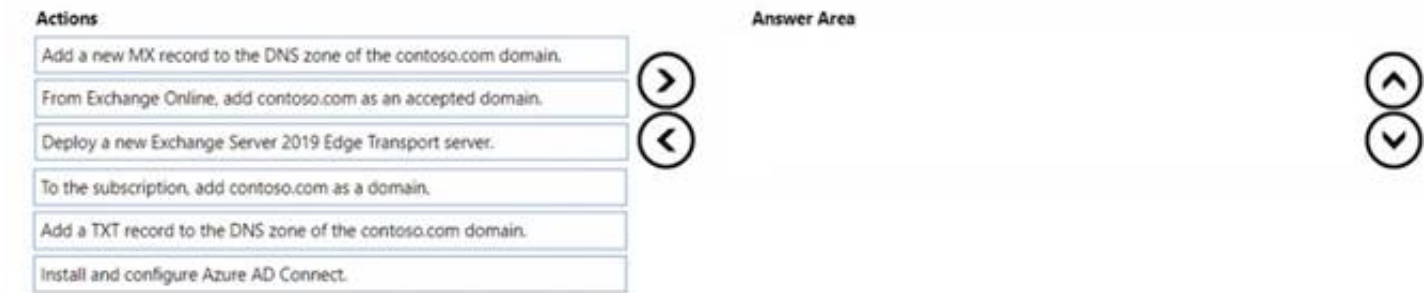

**Explanation:**

It's likely that the new user account hasn't replicated to Azure Active Directory. Azure AD Connect is responsible for account replication between on-prem AD and Azure AD.

**NEW QUESTION 256**

DRAG DROP - (Topic 5)

Your network contains an Active Directory domain named contoso.com. The domain contains a Microsoft Exchange Server 2016 server named Server1. All users have an email address with a suffix of @contoso.com. You have a new Microsoft 365 subscription. You plan to configure an Exchange hybrid deployment. You need to complete the prerequisites to run the Hybrid Configuration wizard.

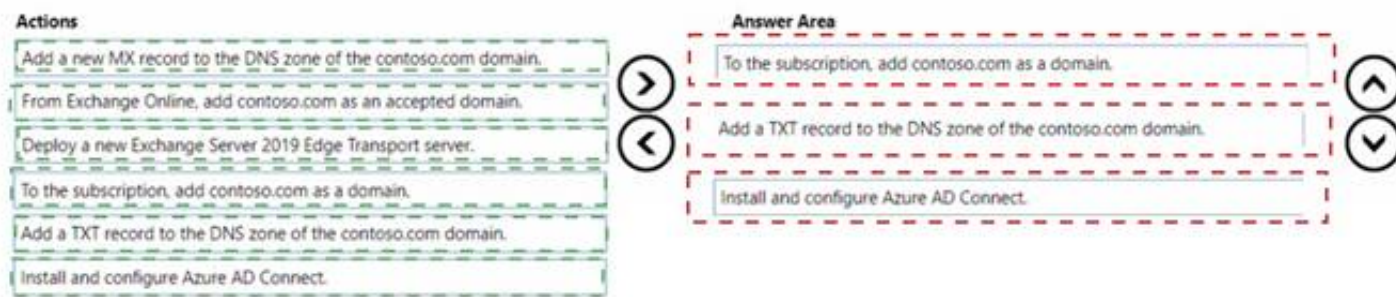

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

#### NEW QUESTION 258

- (Topic 5)

You have a Microsoft Exchange Online tenant that uses an email domain named contoso.com.

An incoming email messages route through an third-party filtering service named Filter1 to connector named Connector1.

You discover that incoming messages contain headers that specify the source IP address as Filter1.

You to ensure that incoming email messages contain headers that specify source IP address of the original sender. The solution must prevent any charges to the service.

What should you do?

- A. From Microsoft 365 Defender portal configure enhanced filtering for Connector1.
- B. Configure Connector1 to authenticate messages by using the IP address of Filter1 service.
- C. Configure the MX Of contoso.com to point to contoso-can.mailgotection.outbok.com.
- D. From the Exchange admin centre
- E. create a transport rule to rewrite header for incoming messages.

**Answer:** C

#### NEW QUESTION 259

- (Topic 5)

Your network contains an on-premises Active Directory Forest. The forest contains the domains shown in the following table.

| Name         | Verified in Azure AD | Synced by using Azure AD Connect | On-premises Microsoft Exchange Server 2019 server |
|--------------|----------------------|----------------------------------|---|
| contoso.com  | Yes                  | Yes                              | server1.contoso.com                               |
| fabrikam.com | Yes                  | No                               | server2.fabrikam.com                              |

You have a Microsoft 365 subscription.

You plan to migrate only the mailboxes of contoso.com to Exchange Online. You deploy an Exchange Online tenant that supports the contoso.com domain.

All incoming internet email and all email between Exchange Online and the Exchange Server are routed through server1.contoso.com.

After you migrate the first test mailboxes, you discover that the users in contoso.com that have mailboxes in Exchange Online cannot see any fabrikam.com recipients in the global address list (GAL).

You need to ensure that the contoso.com users can see the fabrikam.com recipients in the GAL

What should you do?

- A. From Exchange Online, create an outbound connector for the (abrikam.com domain.
- B. Add a TXT record to the DNS zone of the fabrikam.com domain.
- C. Rerun the Hybrid Configuration wizard and add fabrikam.com as a domain in the hybrid configuration.
- D. Configure Azure AD Connect to sync the fabrikam.com domain.

**Answer:** D

#### NEW QUESTION 263

SIMULATION - (Topic 5)

SIMULATION

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

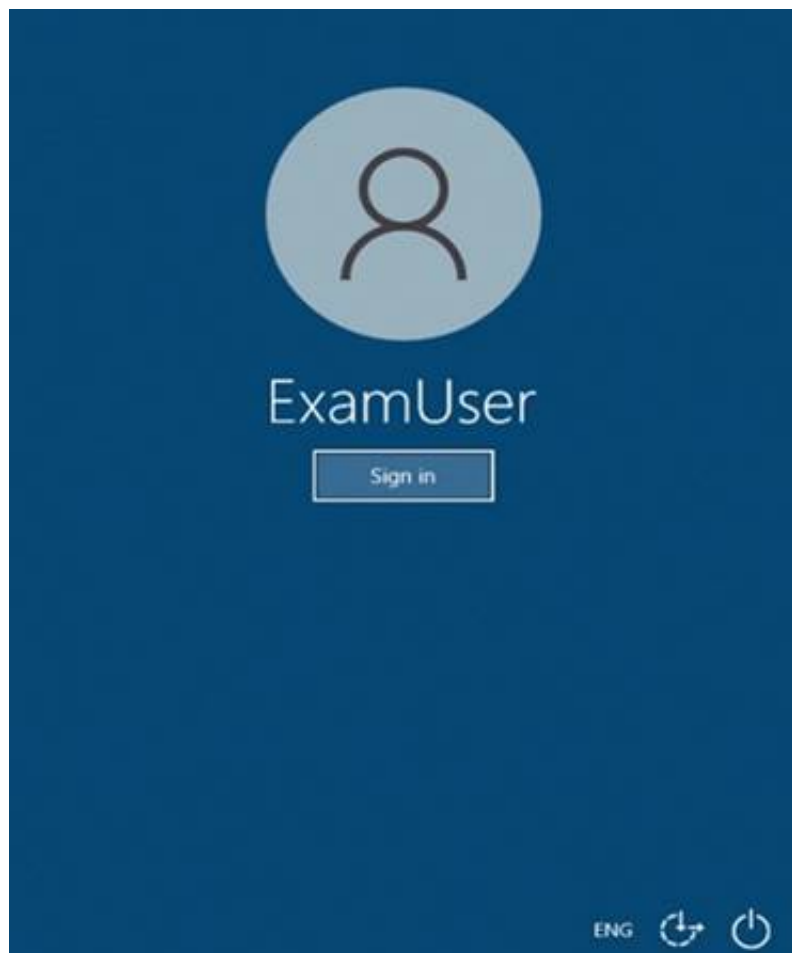

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@abc.com

Microsoft 365 Password: xxxxxx

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only.

Lab Instance: XXXXXX

You need to create a public folder named Finance in your Microsoft 365 tenant. Users must be able to send emails to Finance by using an email address of finance@lab.CloudCredential(1).TenantName.

To complete this task, sign in to the Exchange admin center.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Use the EAC to create a public folder mailbox

? In the EAC, go to Public folders > Public folder mailboxes, and then click Add +.

? In the New public folder mailbox page that opens, enter the following information:

- Name: Enter the name for the public folder mailbox.
- Organizational unit: Click Browse to select the location in Active Directory where the mailbox object is created.
- Mailbox database: Click Browse to select the mailbox database where the mailbox is created.

When you're finished, click Save.

Use the EAC to create a public folder

When using the EAC to create a public folder, you'll only be able to set the name and the path of the public folder. To configure additional settings, you'll need to edit the public folder after it's created.

? Navigate to Public folders > Public folders.

? If you want to create this public folder as a child of an existing public folder, click the existing public folder in the list view. If you want to create a top-level public folder, skip this step.

? Click Add +.

? In Public Folder, type the name of the public folder.

? In the Path box, verify the path to the public folder. If this isn't the desired path, click Cancel and follow Step 2 of this procedure.

? Click Save.

? Navigate back to Public folders > Public folders.

? In the list view, select the public folder that you want to mail-enable or mail-disable.

? In the details pane, under Mail settings, click Enable or Disable.

? A warning box displays asking if you're sure you want to enable or disable email for the public folder. Click Yes to continue.

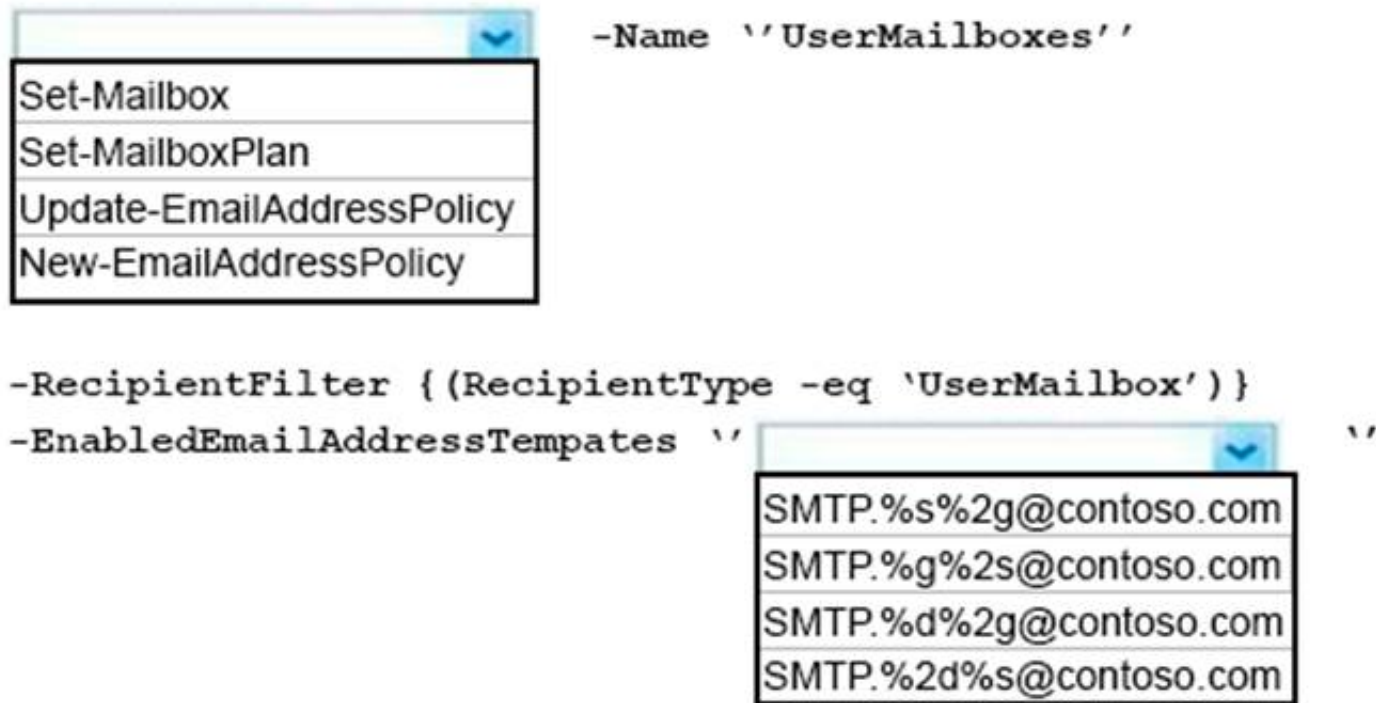

**NEW QUESTION 267**

HOTSPOT - (Topic 1)

You need to configure the environment to support the planned changes for email addresses.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A
