Exam Questions CIPP-E

Certified Information Privacy Professional/Europe (CIPP/E)

NEW QUESTION 1

A German data subject was the victim of an embarrassing prank 20 years ago. A newspaper website published an article about the prank at the time, and the article is still available on the newspaper's website. Unfortunately, the prank is the top search result when a user searches on the victim's name. The data subject requests that SearchCo delist this result. SearchCo agrees, and instructs its technology team to avoid scanning or indexing the article. What else must SearchCo do?

- A. Notify the newspaper that its article it is delisting the article.
- B. Fully erase the URL to the content, as opposed to delist which is mainly based on data subject's name.
- C. Identify other controllers who are processing the same information and inform them of the delisting request.
- D. Prevent the article from being listed in search results no matter what search terms are entered into the search engine.

Answer: A

NEW QUESTION 2

SCENARIO

Please use the following to answer the next question:

Anna and Frank both work at Granchester University. Anna is a lawyer responsible for data protection, while Frank is a lecturer in the engineering department. The University maintains a number of types of records:

- Student records, including names, student numbers, home addresses, pre-university information, university attendance and performance records, details of special educational needs and financial information.
- Staff records, including autobiographical materials (such as curricula, professional contact files, student evaluations and other relevant teaching files).
- Alumni records, including birthplaces, years of birth, dates of matriculation and conferrals of degrees.

These records are available to former students after registering through Granchester's Alumni portal. Department for Education records, showing how certain demographic groups (such as first-generation students) could be expected, on average, to progress. These records do not contain names or identification numbers.

➤ Under their security policy, the University encrypts all of its personal data records in transit and at rest. In order to improve his teaching, Frank wants to investigate how his engineering students perform in relational to Department for Education expectations. He has attended one of Anna's data protection training courses and knows that he should use no more personal data than necessary to accomplish his goal. He creates a program that will only export some student data: previous schools attended, grades originally obtained, grades currently obtained and first time university attended. He wants to keep the records at the individual student level. Mindful of Anna's training, Frank runs the student numbers through an algorithm to transform them into different reference numbers. He uses the same algorithm on each occasion so that he can update each record over time.

One of Anna's tasks is to complete the record of processing activities, as required by the GDPR. After receiving her email reminder, as required by the GDPR. After receiving her email reminder, Frank informs Anna about his performance database.

Ann explains to Frank that, as well as minimizing personal data, the University has to check that this new use of existing data is permissible. She also suspects that, under the GDPR, a risk analysis may have to be carried out before the data processing can take place. Anna arranges to discuss this further with Frank after she has done some additional research.

Frank wants to be able to work on his analysis in his spare time, so he transfers it to his home laptop (which is not encrypted). Unfortunately, when Frank takes the laptop into the University he loses it on the train. Frank has to see Anna that day to discuss compatible processing. He knows that he needs to report security incidents, so he decides to tell Anna about his lost laptop at the same time.

Before Anna determines whether Frank's performance database is permissible, what additional information does she need?

- A. More information about Frank's data protection training.
- B. More information about the extent of the information loss.
- C. More information about the algorithm Frank used to mask student numbers.
- D. More information about what students have been told and how the research will be used.

Answer: D

NEW QUESTION 3

According to Article 84 of the GDPR, the rules on penalties applicable to infringements shall be laid down by?

- A. The local Data Protection Supervisory Authorities.
- B. The European Data Protection Board.
- C. The EU Commission.
- D. The Member States.

Answer: D

NEW QUESTION 4

SCENARIO

Please use the following to answer the next QUESTION NO:

Louis, a long-time customer of Bedrock Insurance, was involved in a minor car accident a few months ago. Although no one was hurt, Louis has been plagued by texts and calls from a company called Accidentable offering to help him recover compensation for personal injury. Louis has heard about insurance companies selling customers' data to third parties, and he's convinced that Accidentable must have gotten his information from Bedrock Insurance.

Louis has also been receiving an increased amount of marketing information from Bedrock, trying to sell him their full range of their insurance policies.

Perturbed by this, Louis has started looking at price comparison sites on the internet and has been shocked to find that other insurers offer much cheaper rates than Bedrock, even though he has been a loyal customer for many years. When his Bedrock policy comes up for renewal, he decides to switch to Zantrum Insurance.

In order to activate his new insurance policy, Louis needs to supply Zantrum with information about his No Claims bonus, his vehicle and his driving history. After researching his rights under the GDPR, he writes to ask Bedrock to transfer his information directly to Zantrum. He also takes this opportunity to ask Bedrock to stop using his personal data for marketing purposes.

Bedrock supplies Louis with a PDF and XML (Extensible Markup Language) versions of his No Claims Certificate, but tells Louis it cannot transfer his data directly to Zantrum as this is not technically feasible. Bedrock also explains that Louis's contract included a provision whereby Louis agreed that his data could be used for marketing purposes; according to Bedrock, it is too late for Louis to change his mind about this. It angers Louis when he recalls the wording of the contract, which was filled with legal jargon and very confusing.

In the meantime, Louis is still receiving unwanted calls from Accidentable Insurance. He writes to Accidentable to ask for the name of the organization that

supplied his details to them. He warns Accidentable that he plans to complain to the data protection authority, because he thinks their company has been using his data unlawfully. His letter states that he does not want his data being used by them in any way.

Accidentable's response letter confirms Louis's suspicions. Accidentable is Bedrock Insurance's wholly owned subsidiary, and they received information about Louis's accident from Bedrock shortly after Louis submitted his accident claim. Accidentable assures Louis that there has been no breach of the GDPR, as Louis's contract included, a provision in which he agreed to share his information with Bedrock's affiliates for business purposes.

Louis is disgusted by the way in which he has been treated by Bedrock, and writes to them insisting that all his information be erased from their computer system. Based on the GDPR's position on the use of personal data for direct marketing purposes, which of the following is true about Louis's rights as a data subject?

- A. Louis does not have the right to object to the use of his data because he previously consented to it.
- B. Louis has the right to object at any time to the use of his data and Bedrock must honor his request to cease use.
- C. Louis has the right to object to the use of his data, unless his data is required by Bedrock for the purpose of exercising a legal claim.
- D. Louis does not have the right to object to the use of his data if Bedrock can demonstrate compelling legitimate grounds for the processing.

Answer: B

NEW QUESTION 5

Please use the following to answer the next question:

WonderkKids provides an online booking service for childcare. Wonderkids is based in France, but hosts its website through a company in Switzerland. As part of their service, WonderKids will pass all personal data

provided to them to the childcare provider booked through their system. The type of personal data collected on the website includes the name of the person booking the childcare, address and contact details, as well as information about the children to be cared for including name, age, gender and health information.

The privacy statement on Wonderkids' website states the following:

"WonderkKids provides the information you disclose to us through this website to your childcare provider for scheduling and health and safety reasons. We may also use your and your child's personal information for our own legitimate business purposes and we employ a third-party website hosting company located in Switzerland to store the data. Any data stored on equipment located in Switzerland meets the European Commission provisions for guaranteeing adequate safeguards for you and your child's personal information. We will only share you and your child's personal information with businesses that we see as adding real value to you. By providing us with any personal data, you consent to its transfer to affiliated businesses and to send you promotional offers."

"We may retain you and your child's personal information for no more than 28 days, at which point the data will be depersonalized, unless your personal information is being used for a legitimate business purpose beyond 28 days where it may be retained for up to 2 years."

"We are processing you and your child's personal information with your consent. If you choose not to provide certain information to us, you may not be able to use our services. You have the right to: request access to you and your child's personal information; rectify or erase you or your child's personal information; the right to correction or erasure of you and/or your child's personal information; object to any processing of you and your child's personal information. You also have the right to complain to the supervisory authority about our data processing activities."

What direct marketing information can WonderKids send by email without prior consent of the person booking the childcare?

- A. No marketing information at all.
- B. Any marketing information at all.
- C. Marketing information related to other business operations of WonderKids.
- D. Marketing information for products or services similar to those purchased from WonderKids.

Answer: C

NEW QUESTION 6

Which area of privacy is a lead supervisory authority's (LSA) MAIN concern?

- A. Data subject rights
- B. Data access disputes
- C. Cross-border processing
- D. Special categories of data

Answer: C

NEW QUESTION 7

If a company chooses to ground an international data transfer on the contractual route, which of the following is NOT a valid set of standard contractual clauses?

- A. Decision 2001/497/EC (EU controller to non-EU or EEA controller).
- B. Decision 2004/915/EC (EU controller to non-EU or EEA controller).
- C. Decision 2007/72/EC (EU processor to non-EU or EEA controller).
- D. Decision 2010/87/EU (Non-EU or EEA processor from EU controller).

Answer: B

NEW QUESTION 8

Which type of personal data does the GDPR define as a "special category" of personal data?

- A. Educational history.
- B. Trade-union membership.
- C. Closed Circuit Television (CCTV) footage.
- D. Financial information.

Answer: B

NEW QUESTION 9

What is one major goal that the OECD Guidelines, Convention 108 and the Data Protection Directive (Directive 95/46/EC) all had in common but largely failed to achieve in Europe?

- A. The establishment of a list of legitimate data processing criteria
- B. The creation of legally binding data protection principles

- C. The synchronization of approaches to data protection
- D. The restriction of cross-border data flow

Answer: D

NEW QUESTION 10

SCENARIO

Please use the following to answer the next question:

Joe is the new privacy manager for Who-R-U, a Canadian business that provides DNA analysis. The company is headquartered in Montreal, and all of its employees are located there. The company offers its services to Canadians only: Its website is in English and French, it accepts only Canadian currency, and it blocks internet traffic from outside of Canada (although this solution doesn't prevent all non-Canadian traffic). It also declines to process orders that request the DNA report to be sent outside of Canada, and returns orders that show a non-Canadian return address.

Bob, the President of Who-R-U, thinks there is a lot of interest for the product in the EU, and the company is exploring a number of plans to expand its customer base.

The first plan, collegially called We-Track-U, will use an app to collect information about its current Canadian customer base. The expansion will allow its Canadian customers to use the app while traveling abroad. He suggests that the company use this app to gather location information. If the plan shows promise, Bob proposes to use push notifications and text messages to encourage existing customers to pre-register for an EU version of the service. Bob calls this work plan, We-Text-U. Once the company has gathered enough pre-registrations, it will develop EU-specific content and services.

Another plan is called Customer for Life. The idea is to offer additional services through the company's app, like storage and sharing of DNA information with other applications and medical providers. The company's contract says that it can keep customer DNA indefinitely, and use it to offer new services and market them to customers. It also says that customers agree not to withdraw direct marketing consent. Paul, the marketing director, suggests that the company should fully exploit these provisions, and that it can work around customers' attempts to withdraw consent because the contract invalidates them.

The final plan is to develop a brand presence in the EU. The company has already begun this process. It is in the process of purchasing the naming rights for a building in Germany, which would come with a few offices that Who-R-U executives can use while traveling internationally. The office doesn't include any technology or infrastructure; rather, it's simply a room with a desk and some chairs.

On a recent trip concerning the naming-rights deal, Bob's laptop is stolen. The laptop held unencrypted DNA reports on 5,000 Who-R-U customers, all of whom are residents of Canada. The reports include customer name, birthdate, ethnicity, racial background, names of relatives, gender, and occasionally health information.

If Who-R-U adopts the We-Track-U pilot plan, why is it likely to be subject to the territorial scope of the GDPR?

- A. Its plan would be in the context of the establishment of a controller in the Union.
- B. It would be offering goods or services to data subjects in the Union.
- C. It is engaging in commercial activities conducted in the Union.
- D. It is monitoring the behavior of data subjects in the Union.

Answer: D

NEW QUESTION 10

To receive a preliminary interpretation on provisions of the GDPR, a national court will refer its case to which of the following?

- A. The Court of Justice of the European Union.
- B. The European Data Protection Supervisor.
- C. The European Court of Human Rights.
- D. The European Data Protection Board.

Answer: A

NEW QUESTION 13

SCENARIO

Please use the following to answer the next question:

Building Block Inc. is a multinational company, headquartered in Chicago with offices throughout the United States, Asia, and Europe (including Germany, Italy, France and Portugal). Last year the company was the victim of a phishing attack that resulted in a significant data breach. The executive board, in coordination with the general manager, their Privacy Office and the Information Security team, resolved to adopt additional security measures. These included training awareness programs, a cybersecurity audit, and use of a new software tool called SecurityScan, which scans employees' computers to see if they have software that is no longer being supported by a vendor and therefore not getting security updates. However, this software also provides other features, including the monitoring of employees' computers.

Since these measures would potentially impact employees, Building Block's Privacy Office decided to issue a general notice to all employees indicating that the company will implement a series of initiatives to enhance information security and prevent future data breaches.

After the implementation of these measures, server performance decreased. The general manager instructed the Security team on how to use SecurityScan to monitor employees' computers activity and their location. During these activities, the Information Security team discovered that one employee from Italy was daily connecting to a video library of movies, and another one from Germany worked remotely without authorization. The Security team reported these incidents to the Privacy Office and the general manager. In their report, the team concluded that the employee from Italy was the reason why the server performance decreased. Due to the seriousness of these infringements, the company decided to apply disciplinary measures to both employees, since the security and privacy policy of the company prohibited employees from installing software on the company's computers, and from working remotely without authorization.

To comply with the GDPR, what should Building Block have done as a first step before implementing the SecurityScan measure?

- A. Assessed potential privacy risks by conducting a data protection impact assessment.
- B. Consulted with the relevant data protection authority about potential privacy violations.
- C. Distributed a more comprehensive notice to employees and received their express consent.
- D. Consulted with the Information Security team to weigh security measures against possible server impacts.

Answer: C

NEW QUESTION 17

What obligation does a data controller or processor have after appointing a data protection officer?

- A. To ensure that the data protection officer receives sufficient instructions regarding the exercise of his or her defined tasks.
- B. To provide resources necessary to carry out the defined tasks of the data protection officer and to maintain his or her expert knowledge.
- C. To ensure that the data protection officer acts as the sole point of contact for individuals' Questions: about their personal data.

D. To submit for approval to the data protection officer a code of conduct to govern organizational practices and demonstrate compliance with data protection principles.

Answer: D

NEW QUESTION 20

Article 58 of the GDPR describes the power of supervisory authorities. Which of the following is NOT among those granted?

- A. Legislative powers.
- B. Corrective powers.
- C. Investigatory powers.
- D. Authorization and advisory powers.

Answer: D

NEW QUESTION 23

According to Article 14 of the GDPR, how long does a controller have to provide a data subject with necessary privacy information, if that subject's personal data has been obtained from other sources?

- A. As soon as possible after obtaining the personal data.
- B. As soon as possible after the first communication with the data subject.
- C. Within a reasonable period after obtaining the personal data, but no later than one month.
- D. Within a reasonable period after obtaining the personal data, but no later than eight weeks.

Answer: A

NEW QUESTION 26

Read the following steps:

- Discover which employees are accessing cloud services and from which devices and apps Lock down the data in those apps and devices
- Monitor and analyze the apps and devices for compliance
- Manage application life cycles
- Monitor data sharing

An organization should perform these steps to do which of the following?

- A. Pursue a GDPR-compliant Privacy by Design process.
- B. Institute a GDPR-compliant employee monitoring process.
- C. Maintain a secure Bring Your Own Device (BYOD) program.
- D. Ensure cloud vendors are complying with internal data use policies.

Answer: C

NEW QUESTION 29

An employee of company ABCD has just noticed a memory stick containing records of client data, including their names, addresses and full contact details has disappeared. The data on the stick is unencrypted and in clear text. It is uncertain what has happened to the stick at this stage, but it likely was lost during the travel of an employee. What should the company do?

- A. Notify as soon as possible the data protection supervisory authority that a data breach may have taken place.
- B. Launch an investigation and if nothing is found within one month, notify the data protection supervisory authority.
- C. Invoke the "disproportionate effort" exception under Article 33 to postpone notifying data subjects until more information can be gathered.
- D. Immediately notify all the customers of the company that their information has been accessed by an unauthorized person.

Answer: A

NEW QUESTION 30

SCENARIO

Please use the following to answer the next question:

BHealthy, a company based in Italy, is ready to launch a new line of natural products, with a focus on sunscreen. The last step prior to product launch is for BHealthy to conduct research to decide how extensively to market its new line of sunscreens across Europe. To do so, BHealthy teamed up with Natural Insight, a company specializing in determining pricing for natural products. BHealthy decided to share its existing customer information – name, location, and prior purchase history – with Natural Insight. Natural Insight intends to use this information to train its algorithm to help determine the price point at which BHealthy can sell its new sunscreens.

Prior to sharing its customer list, BHealthy conducted a review of Natural Insight's security practices and concluded that the company has sufficient security measures to protect the contact information. Additionally, BHealthy's data processing contractual terms with Natural Insight require continued implementation of technical and organization measures. Also indicated in the contract are restrictions on use of the data provided by BHealthy for any purpose beyond provision of the services, which include use of the data for continued improvement of Natural Insight's machine learning algorithms.

What is the nature of BHealthy and Natural Insight's relationship?

- A. Natural Insight is BHealthy's processor because the companies entered into data processing terms.
- B. Natural Insight is BHealthy's processor because BHealthy is sharing its customer information with Natural Insight.
- C. Natural Insight is the controller because it determines the security measures to implement to protect data it processes; BHealthy is a co-controller because it engaged Natural Insight to determine pricing for the new sunscreens.
- D. Natural Insight is a controller because it is separately determine the purpose of processing when it uses BHealthy's customer information to improve its machine learning algorithms.

Answer: A

NEW QUESTION 33

In which scenario is a Controller most likely required to undertake a Data Protection Impact Assessment?

- A. When the controller is collecting email addresses from individuals via an online registration form for marketing purposes.
- B. When personal data is being collected and combined with other personal data to profile the creditworthiness of individuals.
- C. When the controller is required to have a Data Protection Officer.
- D. When personal data is being transferred outside of the EEA.

Answer: C

NEW QUESTION 36

As per the GDPR, which legal basis would be the most appropriate for an online shop that wishes to process personal data for the purpose of fraud prevention?

- A. Protection of the interests of the data subjects.
- B. Performance of a contract
- C. Legitimate interest
- D. Consent

Answer: D

NEW QUESTION 40

SCENARIO

Please use the following to answer the next question:

Joe is the new privacy manager for Who-R-U, a Canadian business that provides DNA analysis. The company is headquartered in Montreal, and all of its employees are located there. The company offers its services to Canadians only: Its website is in English and French, it accepts only Canadian currency, and it blocks internet traffic from outside of Canada (although this solution doesn't prevent all non-Canadian traffic). It also declines to process orders that request the DNA report to be sent outside of Canada, and returns orders that show a non-Canadian return address.

Bob, the President of Who-R-U, thinks there is a lot of interest for the product in the EU, and the company is exploring a number of plans to expand its customer base.

The first plan, collegially called We-Track-U, will use an app to collect information about its current Canadian customer base. The expansion will allow its Canadian customers to use the app while traveling abroad. He suggests that the company use this app to gather location information. If the plan shows promise, Bob proposes to use push notifications and text messages to encourage existing customers to pre-register for an EU version of the service. Bob calls this work plan, We-Text-U. Once the company has gathered enough pre-registrations, it will develop EU-specific content and services.

Another plan is called Customer for Life. The idea is to offer additional services through the company's app, like storage and sharing of DNA information with other applications and medical providers. The company's contract says that it can keep customer DNA indefinitely, and use it to offer new services and market them to customers. It also says that customers agree not to withdraw direct marketing consent. Paul, the marketing director, suggests that the company should fully exploit these provisions, and that it can work around customers' attempts to withdraw consent because the contract invalidates them.

The final plan is to develop a brand presence in the EU. The company has already begun this process. It is in the process of purchasing the naming rights for a building in Germany, which would come with a few offices that Who-R-U executives can use while traveling internationally. The office doesn't include any technology or infrastructure; rather, it's simply a room with a desk and some chairs.

On a recent trip concerning the naming-rights deal, Bob's laptop is stolen. The laptop held unencrypted DNA reports on 5,000 Who-R-U customers, all of whom are residents of Canada. The reports include customer name, birthdate, ethnicity, racial background, names of relatives, gender, and occasionally health information.

If Who-R-U decides to track locations using its app, what must it do to comply with the GDPR?

- A. Get consent from the app users.
- B. Provide a transparent notice to users.
- C. Anonymize the data and add latency so it avoids disclosing real time locations.
- D. Obtain a court order because location data is a special category of personal data.

Answer: A

NEW QUESTION 43

A multinational company is appointing a mandatory data protection officer. In addition to considering the rules set out in Article 37 (1) of the GDPR, which of the following actions must the company also undertake to ensure compliance in all EU jurisdictions in which it operates?

- A. Consult national derogations to evaluate if there are additional cases to be considered in relation to the matter.
- B. Conduct a Data Protection Privacy Assessment on the processing operations of the company in all the countries it operates.
- C. Assess whether the company has more than 250 employees in each of the EU member-states in which it is established.
- D. Revise the data processing activities of the company that affect more than one jurisdiction to evaluate whether they comply with the principles of privacy by design and by default.

Answer: B

NEW QUESTION 44

In which of the following cases would an organization MOST LIKELY be required to follow both ePrivacy and data protection rules?

- A. When creating an untargeted pop-up ad on a website.
- B. When calling a potential customer to notify her of an upcoming product sale.
- C. When emailing a customer to announce that his recent order should arrive earlier than expected.
- D. When paying a search engine company to give prominence to certain products and services within specific search results.

Answer: A

NEW QUESTION 48

In which of the following cases, cited as an example by a WP29 guidance, would conducting a single data protection impact assessment to address multiple processing operations be allowed?

- A. A medical organization that wants to begin genetic testing to support earlier research for which they have performed a DPIA.
- B. A data controller who plans to use a new technology product that has already undergone a DPIA by the product's provider.
- C. A marketing team that wants to collect mailing addresses of customers for whom they already have email addresses.
- D. A railway operator who plans to evaluate the same video surveillance in all the train stations of his company.

Answer: D

NEW QUESTION 52

SCENARIO

Please use the following to answer the next question:

Joe is the new privacy manager for Who-R-U, a Canadian business that provides DNA analysis. The company is headquartered in Montreal, and all of its employees are located there. The company offers its services to Canadians only: Its website is in English and French, it accepts only Canadian currency, and it blocks internet traffic from outside of Canada (although this solution doesn't prevent all non-Canadian traffic). It also declines to process orders that request the DNA report to be sent outside of Canada, and returns orders that show a non-Canadian return address.

The first plan, collegially called We-Track-U, will use an app to collect information about its current Canadian customer base. The expansion will allow its Canadian customers to use the app while traveling abroad. He suggests that the company use this app to gather location information. If the plan shows promise, Bob proposes to use push notifications and text messages to encourage existing customers to pre-register for an EU version of the service. Bob calls this work plan, We-Text-U. Once the company has gathered enough pre-registrations, it will develop EU-specific content and services.

Another plan is called Customer for Life. The idea is to offer additional services through the company's app, like storage and sharing of DNA information with other applications and medical providers. The company's contract says that it can keep customer DNA indefinitely, and use it to offer new services and market them to customers. It also says that customers agree not to withdraw direct marketing consent. Paul, the marketing director, suggests that the company should fully exploit these provisions, and that it can work around customers' attempts to withdraw consent because the contract invalidates them.

The final plan is to develop a brand presence in the EU. The company has already begun this process. It is in the process of purchasing the naming rights for a building in Germany, which would come with a few offices that Who-R-U executives can use while traveling internationally. The office doesn't include any technology or infrastructure; rather, it's simply a room with a desk and some chairs.

On a recent trip concerning the naming-rights deal, Bob's laptop is stolen. The laptop held unencrypted DNA reports on 5,000 Who-R-U customers, all of whom are residents of Canada. The reports include customer name, birthdate, ethnicity, racial background, names of relatives, gender, and occasionally health information.

Who-R-U is NOT required to notify the local German DPA about the laptop theft because?

- A. The company isn't a controller established in the Union.
- B. The laptop belonged to a company located in Canada.
- C. The data isn't considered personally identifiable financial information.
- D. There is no evidence that the thieves have accessed the data on the laptop.

Answer: A

NEW QUESTION 53

Under what circumstances might the "soft opt-in" rule apply in relation to direct marketing?

- A. When an individual has not consented to the marketing.
- B. When an individual's details are obtained from their inquiries about buying a product.
- C. Where an individual's details have been obtained from a bought-in marketing list.
- D. Where an individual is given the ability to unsubscribe from marketing emails sent to him.

Answer: B

NEW QUESTION 54

When collecting personal data in a European Union (EU) member state, what must a company do if it collects personal data from a source other than the data subjects themselves?

- A. Inform the subjects about the collection
- B. Provide a public notice regarding the data
- C. Upgrade security to match that of the source
- D. Update the data within a reasonable timeframe

Answer: A

NEW QUESTION 56

What should a controller do after a data subject opts out of a direct marketing activity?

- A. Without exception, securely delete all personal data relating to the data subject.
- B. Without undue delay, provide information to the data subject on the action that will be taken.
- C. Refrain from processing personal data relating to the data subject for the relevant type of communication.
- D. Take reasonable steps to inform third-party recipients that the data subject's personal data should be deleted and no longer processed.

Answer: C

NEW QUESTION 60

Under the GDPR, where personal data is not obtained directly from the data subject, a controller is exempt from directly providing information about processing to the data subject if?

- A. The data subject already has information regarding how his data will be used
- B. The provision of such information to the data subject would be too problematic
- C. Third-party data would be disclosed by providing such information to the data subject
- D. The processing of the data subject's data is protected by appropriate technical measures

Answer: A

NEW QUESTION 62

An organisation receives a request multiple times from a data subject seeking to exercise his rights with respect to his own personal data. Under what condition can the organisation charge the data subject for processing the request?

- A. Only where the organisation can show that it is reasonable to do so because more than one request was made.
- B. Only to the extent this is allowed under the restrictions on data subjects' rights introduced under Art 23 of GDPR.
- C. Only where the administrative costs of taking the action requested exceeds a certain threshold.
- D. Only if the organisation can demonstrate that the request is clearly excessive or misguided.

Answer: D

NEW QUESTION 65

Which GDPR principle would a Spanish employer most likely depend upon to annually send the personal data of its employees to the national tax authority?

- A. The consent of the employees.
- B. The legal obligation of the employer.
- C. The legitimate interest of the public administration.
- D. The protection of the vital interest of the employees.

Answer: B

NEW QUESTION 67

SCENARIO

Please use the following to answer the next question:

Due to rapidly expanding workforce, Company A has decided to outsource its payroll function to Company B. Company B is an established payroll service provider with a sizable client base and a solid reputation in the industry.

Company B's payroll solution for Company A relies on the collection of time and attendance data obtained via a biometric entry system installed in each of Company A's factories. Company B won't hold any biometric data itself, but the related data will be uploaded to Company B's UK servers and used to provide the payroll service. Company B's live systems will contain the following information for each of Company A's employees:

- > Name
- > Address
- > Date of Birth
- > Payroll number
- > National Insurance number
- > Sick pay entitlement
- > Maternity/paternity pay entitlement
- > Holiday entitlement
- > Pension and benefits contributions
- > Trade union contributions

Jenny is the compliance officer at Company A. She first considers whether Company A needs to carry out a data protection impact assessment in relation to the new time and attendance system, but isn't sure whether or not this is required.

Jenny does know, however, that under the GDPR there must be a formal written agreement requiring Company B to use the time and attendance data only for the purpose of providing the payroll service, and to apply appropriate technical and organizational security measures for safeguarding the data. Jenny suggests that Company B obtain advice from its data protection officer. The company doesn't have a DPO but agrees, in the interest of finalizing the contract, to sign up for the provisions in full. Company A enters into the contract.

Weeks later, while still under contract with Company A, Company B embarks upon a separate project meant to enhance the functionality of its payroll service, and engages Company C to help. Company C agrees to extract all personal data from Company B's live systems in order to create a new database for Company B. This database will be stored in a test environment hosted on Company C's U.S. server. The two companies agree not to include any data processing provisions in their services agreement, as data is only being used for IT testing purposes.

Unfortunately, Company C's U.S. server is only protected by an outdated IT security system, and suffers a cyber security incident soon after Company C begins work on the project. As a result, data relating to Company A's employees is visible to anyone visiting Company C's website. Company A is unaware of this until Jenny receives a letter from the supervisory authority in connection with the investigation that ensues. As soon as Jenny is made aware of the breach, she notifies all affected employees.

The GDPR requires sufficient guarantees of a company's ability to implement adequate technical and organizational measures. What would be the most realistic way that Company B could have fulfilled this requirement?

- A. Hiring companies whose measures are consistent with recommendations of accrediting bodies.
- B. Requesting advice and technical support from Company A's IT team.
- C. Avoiding the use of another company's data to improve their own services.
- D. Vetting companies' measures with the appropriate supervisory authority.

Answer: A

NEW QUESTION 72

SCENARIO

Please use the following to answer the next question:

T-Craze, a German-headquartered specialty t-shirt company, was successfully selling to large German metropolitan cities. However, after a recent merger with another German-based company that was selling to a broader European market, T-Craze revamped its marketing efforts to sell to a wider audience. These efforts included a complete redesign of its logo to reflect the recent merger, and improvements to its website meant to capture more information about visitors through the use of cookies.

T-Craze also opened various office locations throughout Europe to help expand its business. While Germany continued to host T-Craze's headquarters and main product-design office, its French affiliate became responsible for all marketing and sales activities. The French affiliate recently procured the services of Right Target, a renowned marketing firm based in the Philippines, to run its latest marketing campaign. After thorough research, Right Target determined that T-Craze is

most successful with customers between the ages of 18 and 22. Thus, its first campaign targeted university students in several European capitals, which yielded nearly 40% new customers for T-Craze in one quarter. Right Target also ran subsequent campaigns for T- Craze, though with much less success. The last two campaigns included a wider demographic group and resulted in countless unsubscribe requests, including a large number in Spain. In fact, the Spanish data protection authority received a complaint from Sofia, a mid-career investment banker. Sofia was upset after receiving a marketing communication even after unsubscribing from such communications from the Right Target on behalf of T-Craze. Why does the Spanish supervisory authority notify the French supervisory authority when it opens an investigation into T-Craze based on Sofia's complaint?

- A. T-Craze has a French affiliate.
- B. The French affiliate procured the services of Right Target.
- C. T-Craze conducts its marketing and sales activities in France.
- D. The Spanish supervisory authority is providing a courtesy notification not required under the GDPR.

Answer: C

NEW QUESTION 75

Which GDPR requirement will present the most significant challenges for organizations with Bring Your Own Device (BYOD) programs?

- A. Data subjects must be sufficiently informed of the purposes for which their personal data is processed.
- B. Processing of special categories of personal data on a large scale requires appointing a DPO.
- C. Personal data of data subjects must always be accurate and kept up to date.
- D. Data controllers must be in control of the data they hold at all times.

Answer: D

NEW QUESTION 78

The Planet 49 CJEU Judgement applies to?

- A. Cookies used only by third parties.
- B. Cookies that are deemed technically necessary.
- C. Cookies regardless of whether the data accessed is personal or not.
- D. Cookies where the data accessed is considered as personal data only.

Answer: C

NEW QUESTION 79

Under what circumstances would the GDPR apply to personal data that exists in physical form, such as information contained in notebooks or hard copy files?

- A. Only where the personal data is produced as a physical output of specific automated processing activities, such as printing, labelling, or stamping.
- B. Only where the personal data is to be subjected to specific computerized processing, such as image scanning or optical character recognition.
- C. Only where the personal data is treated by automated means in some way, such as computerized distribution or filing.
- D. Only where the personal data is handled in a sufficiently structured manner so as to form part of a filing system.

Answer: D

NEW QUESTION 82

A company plans to transfer employee health information between two of its entities in France. To maintain the security of the processing, what would be the most important security measure to apply to the health data transmission?

- A. Inform the data subject of the security measures in place.
- B. Ensure that the receiving entity has signed a data processing agreement.
- C. Encrypt the transferred data in transit and at rest.
- D. Conduct a data protection impact assessment.

Answer: A

NEW QUESTION 87

SCENARIO

Please use the following to answer the next question:

Sandy recently joined Market4U, an advertising technology company founded in 2016, as their VP of Privacy and Data Governance. Through her first initiative in conducting a data inventory, Sandy learned that Market4U maintains a list of 19 million global contacts that were collected throughout the course of Market4U's existence. Knowing the risk of having such a large amount of data, Sandy wanted to purge all contacts that were entered into Market4U's systems prior to May 2018, unless such contacts had a more recent interaction with Market4U content. However, Dan, the VP of Sales, informed Sandy that all of the contacts provide useful information regarding successful marketing campaigns and trends in industry verticals for Market4U's clients.

Dan also informed Sandy that he had wanted to focus on gaining more customers within the sports and entertainment industry. To assist with this behavior, Market4U's marketing team decided to add several new fields to Market4U's website forms, including forms for downloading white papers, creating accounts to participate in Market4U's forum, and attending events. Such fields include birth date and salary.

What should Sandy give as feedback to Dan and the marketing team regarding the new fields Dan wants to add to Market4U's forms?

- A. Make all the fields optional.
- B. Only request the information in brackets (i.e., age group and salary range).
- C. Eliminate the fields, as they are not proportional to the services being offered.
- D. Eliminate the fields as they are not necessary for the purposes of providing white papers or registration for events.

Answer: D

NEW QUESTION 89

An unforeseen power outage results in company Z's lack of access to customer data for six hours. According to article 32 of the GDPR, this is considered a

breach. Based on the WP 29's February, 2018 guidance, company Z should do which of the following?

- A. Notify affected individuals that their data was unavailable for a period of time.
- B. Document the loss of availability to demonstrate accountability
- C. Notify the supervisory authority about the loss of availability
- D. Conduct a thorough audit of all security systems

Answer: C

NEW QUESTION 94

Under Article 30 of the GDPR, controllers are required to keep records of all of the following EXCEPT?

- A. Incidents of personal data breaches, whether disclosed or not.
- B. Data inventory or data mapping exercises that have been conducted.
- C. Categories of recipients to whom the personal data have been disclosed.
- D. Retention periods for erasure and deletion of categories of personal data.

Answer: D

NEW QUESTION 98

Which sentence BEST summarizes the concepts of "fairness," "lawfulness" and "transparency", as expressly required by Article 5 of the GDPR?

- A. Fairness and transparency refer to the communication of key information before collecting data; lawfulness refers to compliance with government regulations.
- B. Fairness refers to limiting the amount of data collected from individuals; lawfulness refers to the approval of company guidelines by the state; transparency solely relates to communication of key information before collecting data.
- C. Fairness refers to the security of personal data; lawfulness and transparency refers to the analysis of ordinances to ensure they are uniformly enforced.
- D. Fairness refers to the collection of data from diverse subjects; lawfulness refers to the need for legal rules to be uniform; transparency refers to giving individuals access to their data.

Answer: A

NEW QUESTION 103

SCENARIO

Please use the following to answer the next question:

Liem, an online retailer known for its environmentally friendly shoes, has recently expanded its presence in Europe. Anxious to achieve market dominance, Liem teamed up with another eco friendly company, EcoMick, which sells accessories like belts and bags. Together the companies drew up a series of marketing campaigns designed to highlight the environmental and economic benefits of their products. After months of planning, Liem and EcoMick entered into a data sharing agreement to use the same marketing database, MarketIQ, to send the campaigns to their respective contacts.

Liem and EcoMick also entered into a data processing agreement with MarketIQ, the terms of which included processing personal data only upon Liem and EcoMick's instructions, and making available to them all information necessary to demonstrate compliance with GDPR obligations.

Liem and EcoMick then procured the services of a company called JaphSoft, a marketing optimization firm that uses machine learning to help companies run successful campaigns. Clients provide JaphSoft with the personal data of individuals they would like to be targeted in each campaign. To ensure protection of its clients' data, JaphSoft implements the technical and organizational measures it deems appropriate. JaphSoft works to continually improve its machine learning models by analyzing the data it receives from its clients to determine the most successful components of a successful campaign. JaphSoft then uses such models in providing services to its client-base. Since the models improve only over a period of time as more information is collected, JaphSoft does not have a deletion process for the data it receives from clients. However, to ensure compliance with data privacy rules, JaphSoft pseudonymizes the personal data by removing identifying information from the contact information. JaphSoft's engineers, however, maintain all contact information in the same database as the identifying information.

Under its agreement with Liem and EcoMick, JaphSoft received access to MarketIQ, which included contact information as well as prior purchase history for such contacts, to create campaigns that would result in the most views of the two companies' websites. A prior Liem customer, Ms. Iman, received a marketing campaign from JaphSoft regarding Liem's as well as EcoMick's latest products. While Ms. Iman recalls checking a box to receive information in the future regarding Liem's products, she has never shopped EcoMick, nor provided her personal data to that company.

Under the GDPR, Liem and EcoMick's contract with MarketIQ must include all of the following provisions EXCEPT?

- A. Processing the personal data upon documented instructions regarding data transfers outside of the EEA.
- B. Notification regarding third party requests for access to Liem and EcoMick's personal data.
- C. Assistance to Liem and EcoMick in their compliance with data protection impact assessments.
- D. Returning or deleting personal data after the end of the provision of the services.

Answer: C

NEW QUESTION 104

According to the GDPR, when should the processing of photographs be considered processing of special categories of personal data?

- A. When processed with the intent to publish information regarding a natural person on publicly accessible media.
- B. When processed with the intent to proceed to scientific or historical research projects.
- C. When processed with the intent to uniquely identify or authenticate a natural person.
- D. When processed with the intent to comply with a law.

Answer: C

NEW QUESTION 107

In addition to the European Commission, who can adopt standard contractual clauses, assuming that all required conditions are met?

- A. Approved data controllers.
- B. The Council of the European Union.
- C. National data protection authorities.
- D. The European Data Protection Supervisor.

Answer: A
